PICKFORD & BLACK,
HALIFAX

Mercantile Summary

WORD has come from Paris that Hippolyte Marinoni, the constructor of rotary presses, is dead. He was born in 1825, and had received a number of decorations for his work.

As a result of a lock-out at the Eddy Company's works at Hull, Que., the pulp and paper mills, employing over 350 hands, are closed. The trouble arose out of a question of hours of labor.

THE Londonderry Iron and Mining Company's blast furnaces at Londonderry, N.S., were successfully blown in on Friday last. The company expects to turn out from a hundred to a hundred and fifty tons of pig iron per day.

THE Consumers' Gas Company, Toronto, is asking for authority to increase its capital stock from $2,000,000 to $5,000,000. The money is needed to increase the company's plant, owing to the rapid growth of the demand for gas.

THE exports to the United States declared at Sherbrooke for the quarter ended December 31st amounted to $257,736, as compared with $239,698 for the same period last year, an increase of $18,037. On the other hand, the exports declared at Cookshire showed a decrease of about $55,000.

THE twenty-mile extension of the Gatineau branch of the Canadian Pacific Railway is now ready for operation. The present terminus is about fifty miles from the proposed route of the Grand Trunk Pacific, and it is expected that the former line will be further extended so as to make connections.

THE Canadian Elevator Company, of Winnipeg, is to build at Port Arthur one of the largest grain elevators in the world in time to receive this year's crop. The work-house, which will be the first to be erected, will have a capacity of 1,750,000 bushels, and this will be supplemented by immense storage warehouses of tile or concrete.

THE Canadian Pacific Railway Company is inaugurating a service of four steamers between St John, N.B., and Cuban and Mexican Gulf ports, including New Orleans, Galveston, Pensacola and Mobile. It is said, too, that it will place several light draft steamers under the Cuban flag on the direct route between Havana and St. Louis during Exposition time this year.

IT is stated that the Canadian Pacific Railway Company has under consideration a plan for erecting large sawmills in southern British Columbia, for which they have good facilities. Their intention is to put a stop to the alleged exorbitant prices for lumber charged by dealers in Manitoba and the North-West, which has retarded the settlement of the country. On the other hand, the lumbermen claim that this has been effected by the high freight rates on lumber charged by the railroad, and they question whether the company has power under its charter to go into the manufacture of lumber.

Mercantile Summary.

CONSIDERABLE interest is being taken in the arrival at Glasgow, Scotland, of a cargo of Canadian pig iron from Cape Breton. This is the first shipment for about two years, as better prices have been obtainable in Canada and the United States.

THE number of vessels launched during the past year on the Clyde was 200, with an aggregate tonnage of 455,739, as compared with 312 vessels of 518,270 tons during the previous year. One feature was the increasing number turned out of turbine boats.

THE Shawinigan Water and Power Company has completed the installation of a transmission line for the delivery of power at Sorel. A transformer station has been built at Joliette, where the 50,000 volt current from the main line is reduced to one of 12,500. Across the St. Lawrence, near Lanoraie, the current is carried by a heavily insulated submarine copper cable. It is interesting to note that the cable, which is of aluminum throughout, was made by the Northern Aluminum Company at Shawinigan Falls. The line at present referred to is only one of several which are to be put up for the purpose of conveying power to points between Shawinigan Falls and Montreal.

FURTHER contracts have been let for construction material for the Canadian Northern Railway. About 25,000 tons of standard rails, we understand, are to be made by an American concern at $26 per ton, delivered at Port Arthur.

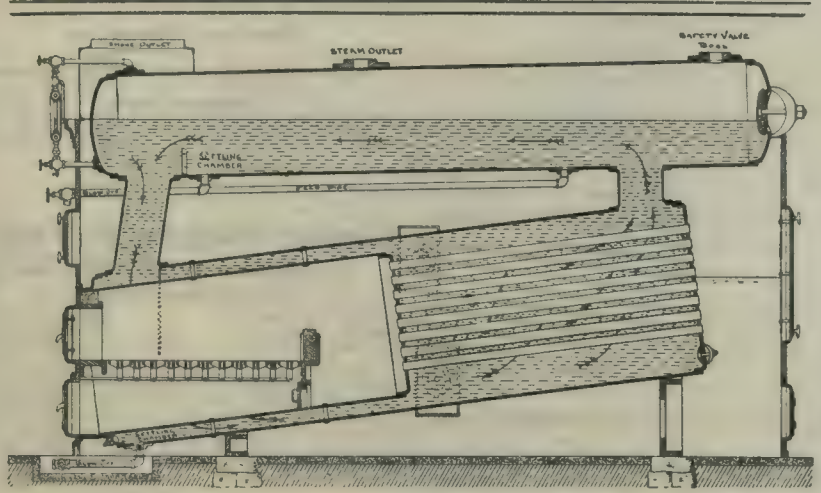
THE Schierholtz Zinkan Company, Limited, Waterloo, has received an Ontario charter authorizing it to manufacture and deal in furniture and mattresses and do a business in upholstering. The capital authorized is $50,000, and among the provisional directors are E. Schierholtz and E. Zinkan, of Waterloo, and H. S. Zinkan, of Berlin, Ont.

A DEMAND of assignment has been made upon E. Berzansky, clothier in Montreal, whose liabilities are stated at about $4,000.——N. Sloves, jeweller, of the same city, has arranged a compromise at 33 1-3 per cent., on liabilities of $2,500. He has had a previously favorable record extending back some twelve years.

NEGOTIATIONS are going on for the sale of the Dominion Iron & Steel Company's valuable iron pyrites areas near Cape Chidley, in Labrador, to a large United States concern engaged in manufacturing sulphuric acid. The Steel Company has already spent considerable money in prospecting and development work.

ACCORDING to figures compiled by the Iron Age, furnace stocks of pig iron on November 1, 1902, were 71,858 tons, the weekly capacity of active blast furnaces being 343,581 tons. The output continued to expand, with occasional slight reactions, until the maximum point was attained on June 1, 1903, when 398,130 tons weekly were being produced. The highest monthly production was in May, when the total reached the remarkable sum of 1,755,966 tons, or at the rate of twenty-one million tons annually. From this point, however, the output fell off, until on December 1st last the weekly active capacity was only 251,181 tons, and meanwhile furnace stocks had risen to the enormous sum of 658,107 tons.

PAYS FOR ITSELF.



A MUMFORD Standard Internally Fired Boiler requires from 10 to 25 per cent. less fuel than a return tubular boiler.

A saving of only 10 per cent. will cover the cost of the boiler in five or six years.

A MUMFORD BOILER will therefore PAY for itself several times during its lifetime.

Mercantile Summary.

The old-established and well-known millinery firm of Thomas May & Co., Montreal, with a branch office at Toronto, has suspended, the liabilities being stated at $225,000.

In February last the Stouffville (Ont.) Brass and Steel Works gave a chattel mortgage of $6,000 to J. H. Ratcliffe and others. This mortgage has been foreclosed and assets sold to one J. A. Todd, who will continue the business.

The large new mill of the Canada Corundum Company at Craigmont, Ont., which is said to be larger than any ore-concentrating mill in the Dominion, its capacity being to produce over $2,000 of grain corundum per day, is now about completed.

A fire in Montreal on the 7th inst., damaged the stock of M. Beullac, decorator, to the extent of $14,000, fully insured, and the stationery stock of Fabre & Gravel, to the amount of $9,000, not insured. Loss on building is $7,000, fully insured. On the 4th the Roman Catholic Indian Industrial School near Fort Qu Appelle, Assa., was totally consumed by fire, at a loss of nearly $40,000. On the 9th, a serious fire took place at Campbellford, N.B., by which the stores of Thomas Bros., grocers, Geo. Mills, boots and shoes, and R. N. Simpson, butcher, were destroyed, at a loss of something like $10,000, partially insured.

The weekly list of country failures in the Province of Quebec is made up as follows: Robinovitch Bros., general store, St. Guillaume d'Upton, have assigned on demand. The firm exists only since the spring of 1903. One brother formerly ran a small business in Montreal, called the Main Dry Goods House, and the other brother peddled in the district about their present location. They are said to owe about $14,000, and as they claimed a joint capital of $5,000 to $6,000 it is hard to understand so speedy a failure.—Joseph Roy, in the tinsmithing line in the same village for the past dozen years, has also assigned, owing about $1,300.—The Misses E. V. & L. Bourque, who started in the millinery line in 1901, buying out a bankrupt stock, have now themselves failed. The hotel firm of Maranda & Leboeuf, Sorel, have become insolvent. Maranda was previously a storekeeper in the neighboring parish of St. Ours, where he failed in 1897, and again in 1898. He probably thought hotelkeeping an easier job, but likely now thinks that "it takes a smart man to run a hotel." -A demand of assignment has been made upon H. Noel, hay dealer at St. Marc. His liabilities are mainly to local farmers.—The failure is noted of Dr. A. N. Sabourin, engaged in the drug trade at St. Johns. He was also interested with A. Longtin in the Imperial Chemical Co., of the same town, which concern recently came to grief through the failure and absconding of Longtin, who was quite an extensive liquor and grocery jobber. The doctor's liabilities are placed in the neighborhood of $20,000.

Gentleman's
Dressing Bag

This one is of the Deep Club Style made of finest quality of natural grain leather, in dark brown, black and russet, best English sewed frame, with gold plated mountings, leather lined.

43 to 49 Bay Street, Toronto.

THE Nepigon Railway Company proposes to operate a ferry across Lake Nepigon and to build a railroad from the northern end of the lake so as to intersect the projected Grand Trunk Pacific.

A NEW steamer of 7,000 tons will shortly be launched on the Clyde for the Elder-Dempster line, to be called the "Canada Cape." After next month there will be four steamers in the South African service, leaving St. John in winter and Montreal in summer.

MRS. REID is the sole owner of J. Reid & Co.'s business at Thornton, she having purchased the stock of Henry Hall in October, 1902. The price paid was $2,500, and it was a cash transaction. The last report to hand is that they have assigned to G. T. Summers, a banker of Peeton.

W. DESBIENS and E. A. Cabana, doing a small manufacturing business in Montreal under the style of the Humanic Shoe Co., have been obliged to assign. They started in the summer of 1902, and last July obtained an extension, the terms of which they have been unable to complete. They show liabilities of $7,431.

THE Windsor, Essex and Lake Shore Rapid Railway Company wants to increase its capital stock from $500,000 to $1,000,000; also power to extend its line from its present terminus at Wheatley to Chatham, passing through the Townships of Romney, Tilbury East, Raleigh and Harwich, or the alternative route to Chatham via Mersea, Raleigh, etc., to Tilbury Village.

THE Province states that the Vancouver branch of the British Columbia Mining Association is now practically dead, President Rand and others of the executive having resigned, and no other members having presented themselves for election. The trouble seems to have been caused by a feeling that the branch had not been treated fairly by the parent association, and that there was in Vancouver a lack of interest in its objects.

L. H. BETTE & Co., engaged in business at Wallace, N.S., as general dealers and lobster packers, are seeking a settlement at 50 cents, on liabilities of $10,500, showing nominal assets of $10,500, but largely depreciable. Mr. Lames H. Bette, the only partner began the business in 1888, but sold out in 1900, with the idea of starting business at Sydney. He, however, abandoned that idea and resumed at his old location in 1900.

A BRIEF record has been that of the Regal Packing Co., Limited, of Montreal, whose factory is situated at Port Perry, Ont. The company was only chartered last spring with an authorized capital of $20,000, some $6,000 or $7,000 being paid up. They acquired the old show grounds and building at the town above named, and proposed making a specialty of canning and evaporating apples. The nature of the management lacked much that was to be desired, and the paid-up capital is said to have been practically sunk.

THE WINNIPEG EXHIBITION.

The plans for holding a Dominion Exhibition in Winnipeg this year are being developed more fully. The Dominion Government, we are pleased to see, has granted the sum of $50,000 to be used for advertising purposes, for adding to the prize list, and for transporting exhibits from other parts of the Dominion to Winnipeg. The exhibition board, aided it is expected by the city, will make extensive alterations and improvements to the old buildings, so as to make use of the former site. And judging from what the wonders which the management of the Winnipeg Fair have already accomplished, the exhibition of 1904 at that city will be the growing West and its energetic people.

This fair, always important, is more than ever important now that an inflow of new people has increased the value and intensified the activity of Manitoba and the Territories. The matter was well put by William Whyte of the C.P.R. when interviewed the other day on the subject. He reminded us that the western farmer has all along preferred to buy American machinery, as he believed it to be better adapted to the conditions he has to meet than that made in Eastern Canada. This has been the case until the Canadian manufacturers have set themselves to study the needs of the West and show to their western customers that they can produce an article as good as that made in the United States. "It should be our aim," urged Mr. Whyte, "to confine all this trade to Canada, and an exhibition of this kind which will bring the two sections of the country into closer touch cannot but have the most beneficial results." Voicing, as we have no doubt he did, the views and feelings of prominent men in Winnipeg and elsewhere, he concluded: "We want to get the people of the East to meet the people of the West so that the East may see the products and possibilities of the West, as well as place their manufactures on exhibition before the people who must be their largest customers."

ONTARIO ASSOCIATION OF ARCHITECTS.

At the annual convention of the Ontario Association of Architects, held this week in Toronto, several matters of general interest to the public were brought up for discussion. One of these was the alleged Americanization of Canadian structural art, which Mr. W. L. Lymons deplored. This, he said, was not due to lack of ability on the part of Canadian architects; more probably it was a result of indifference or of having too much to do; but certainly, the bulk of our architectural work bordered on plagiarism. Prof. R. C. Carpenter, of Cornell University, read a very interesting paper on the heating of buildings. He described various systems of heating, and stated that a somewhat lower temperature of houses, with more moisture and with plenty of ventilation, would mean a reduced doctor's bill. Probably the healthiest means of heating, he said, was by hot water, though hot-water radiators are usually open to the objection of taking a great deal of space; after which he placed steam-heating, in which recent improvements would probably place it on an equality with the former.

FOR GROCERS AND PROVISION DEALERS.

London advices speak of the demand for Canadian cheese continuing about as before reported. Choicest goods at last reports made 52 to 53s. per cwt. Stocks of qualities below 50s. in quality were rapidly lessening.

Owing to the war scare in the East the prices of rice in Japan have been advancing for some time past. The total increase amounts to something like $7 per ton.

A dispatch from Liverpool says that at the exhibition of colonial products, which has just opened in that city, the Canadian section is the largest, and is said to be quite imposing.

The working of the German surtax seems to be making considerable difference to the glass bottle trade, and British firms are congratulating themselves upon the particularly good field which seems to be opening before them.

The A. B. Taylor Canning Company, of Bloomfield, Ont., has received an Ontario charter giving it power to make and sell canned fruits, vegetables and meats, and to take over A. B. Taylor's canning factory, situate at the village of Bloomfield, Ont. The share capital is placed at $40,000.

400 Shares Cement Stock for Sale

This Stock Pays Large Dividends. – For particulars address, "A B C.," care of Monetary Times, Toronto.

Sale of Stock of Hardware & Shop Supplies by Tender.

The extensive and old-established business of J. Henderson, in Town of Collingwood, owner retiring.

Collingwood is one of the most flourishing and progressive towns in Canada, and has brightest outlook for the future. It has largest and most up-to-date dry-dock and ship-building plant on upper lakes, where largest vessels are built and repaired. It has also large saw mills, export meat packing plant, flour mills, grain elevator, planing mills, tannery, foundry, etc., which give employment to a large number of hands. It has also near completion large steel plant and rolling mills, wire mills, nail factory, and furniture factory. It is headquarters of large line of steamboats, which give it connection with all points on lakes. Harbor is now crowded with steamboats, which will fit out there in spring.

It is a terminal of Grand Trunk Railway, and also an objective point of railways now building and protected.

Written tenders for above stock will be received by the undersigned up to the 15th day of January, 1904, from whom conditions and terms of tender and other information can be obtained on application. Building for sale or rent.

J. HENDERSON,
Hardware Merchant,
Collingwood.

Position Wanted.

By a young man of good character with some years' experience in Bookkeeping, Banking and General Office Work. First class references as to ability, &c Apply, "S M," Monetary Times, Toronto.

opened in St. Thomas on Tuesday last. Western Ontario, as is generally known, is a very important dairying centre, as it has 246 cheese factories, which last year handled 52,000,000 gallons of milk, from which was made 24,000 tons of cheese, the price realized being about $5,000,000. Besides this, the butter made in creameries and in private dairies realized probably another $5,000,000.

Canadian tobacco users last year contributed to the revenue in excise duties $3,904,617, which represented a consumption of 24,653,214 pounds. The manufactured product was equal to a consumption of 2.58 pounds per head of the entire population. This fact ought to make some of our non-smokers stare.

NEW MUNICIPAL IMPROVEMENTS.

At the elections on Monday last several by-laws for municipal improvements in Ontario were voted on at the same time with the choosing of mayors and councillors. At Lindsay, for example, a by-law to grant $10,000 on waterworks extension was carried; at Harriston, aid for rebuilding the high school was granted; at Stayner, it was decided to borrow $10,000 for new cement sidewalks; at Collingwood, the good roads and elevator by-laws carried by large majorities; at Brockville, the ratepayers were in favor of raising $25,000 for improved electric lighting facilities; at Woodstock, a by-law was passed in favor of establishing a free public library; Dundas citizens decided in favor of issuing debentures for $14,000 for sidewalks; at Waterloo, $10,000 will be given to increase the town's present waterworks, and the ratepayers at this place also placed themselves on record as being in favor of the town's purchasing the electric light and gas plants. At Belleville, too, the council was authorized to borrow $50,000 in order to purchase, repair and operate the gas works as a municipal concern. At St. Thomas a bonus of $20,000 to the Pere Marquette railway car shops was carried.

EMPLOYERS COMBINING AGAINST UNIONS.

If the figures collected by Mr. F. W. Job, of Chicago, be correct, the various employers' associations which have been formed or have become conspicuous during the past year or so are making their influence very distinctly felt by the labor unions. He says that the books of the Chicago unions have lost at least 30 per cent. of their names during the year, besides which seven various unions have given up their charters altogether, while several others are preparing to follow their example. The secretary of one of the unions writes a circular letter as follows: "We have seen union after union destroyed after reaching the zenith of power. All the struggles made to gain that point have been lost through lack of self-restraint. It is idle to pooh-pooh the organized opposition to the labor movement. It is growing with startling rapidity all over the country. It indicates a revulsion of sentiment. Until recently the predominating public desire was to strengthen the working classes. Now a dread has arisen that the unions cannot be trusted with power, and that, if given it, they will exercise it to the injury of themselves and society."

UNITED STATES FINANCIAL CONDITIONS.

war crisis between Russia and Japan. Coming together, and affecting other financial centres than New York, they induced a general selling movement on both long and short accounts. Passing of the dividend on Steel common was a foregone conclusion. It was the fall in earnings from 13 millions in June to something over 3 millions in December that caused fresh selling in the stock market. This was less than half the earnings in the same month last year. It was argued that if the iron trade suffered to that extent in December, how about other lines of industry? This, however, is fallacious reasoning. It must be remembered that an immense amount of business was held up towards the close of the year by uncertainty as to prices. Buyers would not pay old figures and wages had to be reduced. These difficulties have since been partially adjusted. Pig-iron production fell from the rate of 20 million tons annually to 12 millions in a few short months. Such arrested development cannot last, and as soon as price and wage adjustments are complete we will see better times again in the steel trade, possibly not later than next spring. A normal rate of production should be about sixteen or seventeen million tons, which is considerably above the present; and this rate ought to be regained when constructive activities are renewed. Cotton speculation continued upon a feverish scale, the staple showing sharp declines owing to the war rumors and distrust of the speculative movement.

—A New York press despatch of 11th January contained the following statement: Deaths from pneumonia in this city last week, numbering 364, are causing the Department of Health to adopt energetic means to check the disease. "In my opinion," said Commissioner Darlington of that department, "the habit of expectoration in public places has much to do with bringing on the disease. Last week's increase of deaths from that cause, nearly 100 more than for the corresponding week last year, is positively alarming." Being asked to say if this statement of the nature of pneumonia was correct, we referred to a well-known physician who thus replies: "Yes, the commissioner is, I believe, quite right. The spittle of many persons who are apparently in good health contains the pneumococcus, or 'bug' which causes pneumonia. If they expectorate in public places, these germs are lying round ready to pounce upon the man, woman, or child, who is a fit host for them. To answer your other question: The pneumococcus is a microbe. It is also a coccus, not a bacillus. The coccus in bacteriology is a microbic organism of rounded form. The bacillus is a microbic organism of rod-like form." Restraint upon public spitting is therefore no "fad" but a necessity for public health.—Ed. M. T.

MR. WALKER'S ADDRESS.

It is not easy, when dealing with an address such as that of the general manager at the annual meeting of the Canadian Bank of Commerce, to do it justice in any attempt at condensation. The view this careful observer takes of the financial and commercial situation is at once wide and minute. He deals with various countries and many branches of business because of the extensive interests of the bank in them. By referring to the comparatively small as well as to the great items of commerce or finance he is able to throw side lights upon the picture he draws of the condition and prospects of Canada. In painting this picture for us he shows in detail what a princely heritage we have, how we are using it, where we are improving it, and where, by impatience or by other follies, we mar our present earnings and our future prospects.

Business conditions in Eastern Canada, Manitoba and the Territories, British Columbia, the Yukon, the United States, are reviewed, and the difficulties or advantages of traders and producers shown with great clearness. And he finds so much to encourage that his conclusion is that as individuals we are quite as wealthy as, if not wealthier than, the citizens of the United States, in which opinion so eminent an authority as Sir Robert Giffen agrees with him.

Obviously one must select for comment only parts of this voluminous address, since it is not feasible to deal with the whole. The speech is most informing upon many points, and well repays perusal in full. First, the speaker referred to the sharp warning given us during the year as to our capacity for hindering rather than aiding industrial development. The spirit of speculation receives a rebuke; and referring to the stock and other gambling on the exchanges he says gamblers have had a lesson last year in "a decline in stock exchange quotations so severe as to sweep away many hastily acquired fortunes, and, what is much worse in the case of very many of our people who were not rich, the savings acquired in their ordinary labors."

Further, unless we propose to accept the lessons which flow from exploded speculations, excessive promotions of new or re-organized industrial ventures, and excessive demands on the part of labor, we have no good reason to suppose that we are to be spared the natural consequences." And Mr. Walker insists that it should be borne steadily in mind that whether we contribute much or little to such an end, forces at work in the United States may bring about a general decline in prices which cannot fail to hurt Canada severely.

In the course of his analysis of business in various parts of Eastern Canada, the growth of Montreal as a port, the increase in our transportation business and facilities, the speaker pressed upon the Government the duty of spending effort and money on enhancing the safety of the St. Lawrence route, and further declared strongly that the Canadian people should "determine to do at least what is necessary to success in carrying all Canadian grain by Canadian railways and lake routes to a Canadian port, and thence to Europe in Canadian vessels." While recounting with pride the growth of our foreign trade to $460,000,000, he alludes to this ominous fact for a borrowing people, that Canada has dropped from the position of an excess in exports, held for so many years, to one of excessive imports. And he expresses the hope that the check administered to speculation and extravagance may soon correct this feature.

The shadow of United States competition, such as possibly to make Canada a slaughter market in certain conditions, is present to the mind of the speaker. He reminds us that we have to hold our own against a nation fifteen times as large in people and in industries. "We cannot stand again, as we have been forced to in the past, the process of absorbing a large part of the surplus product of the United States. It is not a question of which fiscal policy we like; it is a question of holding our own in a time of industrial war. . . . Deeply interested as we are in Mr. Chamberlain's proposals, the vital question in tariffs for us at the moment is in connection with our nearest neighbors. After we have protected ourselves against the use of this country as a slaughter market for the United States, we must in some measure try to meet Mr. Chamberlain's proposals."

The remarks of the general manager upon British Columbia commend themselves especially to us. After

describing progress in copper-gold mining in that province, and some signs and prospects of betterment in silver-lead mining, he urges with warmth more broad and sensible treatment of Fraser River salmon fishery and greater attention to other fishing industries in which there are great possibilities. "It is a pity that public interest in our fisheries cannot be aroused and some national sense created of our great wealth in this respect." In some remarks to his hearers, supplementary to his address as reported, Mr. Walker paid a glowing compliment to the wonderful work being done in the development of British Columbia: "A band of workers so few as to be, if you deduct Indians and foreigners, only half the population of Toronto, are there dealing with the resources and affairs of an Empire—for in extent that is virtually what British Columbia is."

THE BANK OF TORONTO.

The resources of the bank have been very fully employed in 1903, the report assures us, in keeping with the expansion of the country's trade. As a considerable sum has been added to the resources of the bank during the twelve months by increased deposits and by payments for new stock subscribed to the amount of half a million, the profits of the year show a very marked increase over those of 1902. They suffice, together with the $93,000 brought forward, to pay 10 per cent. dividend, to make an addition to Officers' Pension Fund, to write $36,900 off bank premises, and to carry forward a larger sum than at the last meeting. The premium thus far paid on new stock, issued at a premium of 100 per cent., enables the addition of $454,430 to rest account, which has at its credit $3,154,430, while the paid capital of the bank is $2,954,430. Since the previous meeting three new agencies of the bank have been opened in Montreal and five in the Province of Ontario. The vice-president, Mr. W. H. Beatty, who was in the chair, made some brief remarks upon the conditions generally existing throughout the country, indicating his belief that while the activity which now prevails is gratifying, there are some features which justify and even demand caution. The lumber trade, on which this bank is usually well informed, is in a very fairly satisfactory shape. Export lumber trade to Europe has turned out well, and salutary counsels, as well as the high price of labor and materials, appear to have averted over-production, in the Georgian Bay district at any rate.

THE AMES & CO. PROPOSALS.

Six months ago or thereabout, it may be remembered, the Toronto stock broking firm of A. E. Ames & Co., which had suspended payment on 2nd June, 1903, offered its creditors payment in full with interest if given time. One-fourth was to be paid on 15th July, the remainder at periods respectively six, twelve and eighteen months thereafter. The July payment was promptly made; but now the firm issues a notice that "We have been unable to provide for the payment coming due on the 15th instant, or any substantial part of it." The amount due on this payment is $769,298, the total liabilities being $2,307,895, of which $522,991 is unsecured. What Messrs. Ames & Co. now propose is that their creditors shall take stock in a joint stock company to be formed, with a capital of $645,000, namely, $600,000 preference and $45,000 common stock. And it is stated, "with great regret, but very deliberately, that in the absence of the adoption of this plan it will be impossible for us to continue the conduct of the business with any hope of working out the problem successfully."

The whole tone of the circular letter indicates that the firm has not yet realized just what its position is in the estimation of the community. Mr. Ames deemed himself or his firm worth seven months ago a surplus of $1,090,000, owing at that time something over seven millions of dollars. But mark how his house of cards has quickly fallen about his ears! So speculative was the character of the business and so ephemeral the values placed upon the assets that the calculated surplus is to-day only $59,780, and he confesses himself at a stand. Of the liabilities, $240,000 was in the shape of deposits, induced by offers of interest at a rate higher than safer concerns were paying, but which extra half per cent. or one per cent. was grasped at by greedy ones or green ones, who did not discern the risk they ran. A downward turn in the stock market has sufficed to cause this confident speculator to become a suitor to his creditors for their acquiescence in an elaborate scheme, failing which, as his letter states, there is no hope of their being paid.

Mr. Ames is not an ordinary man; he is uncommon in possessing much irregular ability; uncommon also in the degree of his self-esteem. His present scheme is one which no one but a clever and bold person would be likely to think of or to offer. But he presumes too much, surely, if he expects depositors to take shares in a complicated joint stock concern in order to enable him to pay his debts in some such period as five years.

DRY GOODS STAPLES.

The withdrawal of price lists a short time ago by some of the leading domestic cotton mills was followed, towards the end of last week, by the announcement of further advances. These include a 10 per cent. rise in grey cottons, and one of 5 per cent. in bleached cottons and sheetings, cambrics, interlinings, cotton bags, drills and pillow cottons. The advance in union durban drills is 5 per cent., as also is that in heavy drills. Wrapperettes go up about 12½ per cent., and some kinds of sateens 5 per cent. Linings also go up, this being the third advance since the season began. We understand that the advances announced in several lines of Magog prints do not come into force until February 1st. Speculative orders are still banned by the manufacturers, and some of them reserve the right only to quote prices on receipt of orders, and to accept such as they please. This is evidence that declining or even stationary prices are by no means looked for. In the meanwhile the raw cotton market is fluctuating like a vertical weathercock, though the net result, so far as value is concerned, remains very much as before. This practically precludes any likelihood of a drop in the value of finished goods for months to come, because present prices of such are even now considered as being much below a parity with raw cotton. Not only in

cotton, but in flax has the upward movement been strongly manifested of late. Since October the advance in Scotch and Belfast linens has gone up at least 12½ to 15 per cent., and now the manufacturers there have withdrawn prices. Orders sent now to them are only booked subject to quotations at time of receipt.

It is not too early now to form a judgment on last year's general dry goods trading taken as a whole. The wholesalers' opinion varies between "as good a season as ever experienced" and "the best year on record." The steady advances of price in so many staple lines did not, as was at first feared, curtail the demand, but has actually stimulated it, this being due, no doubt, to the very justifiable fear of a continuance of the same conditions. The almost total absence of job lots or bankrupt stocks was a feature which helped to keep trade on a firm and stable basis.

Travellers out on the road are now in the full swing of business again after the holidays, and they report a very encouraging state of things for the spring trade. Dress goods for that season are already in rapidly improving demand. Lustres and tweeds are especially called for, and so are most plain goods, but very fanciful designs seem out of favor. Foulards retain their popularity, the chief colors asked for being navy blue and browns, with several different shades which harmonize with the latter.

THE FIRE WASTE OF 1903.

The early promise of the year just past to be a good one from a fire insurance standpoint was not fulfilled, the aggregate fire loss in Canada and the United States having amounted to $156,195,700, as compared with $149,260,850 for the previous year. The month of December was particularly wasteful, as may be seen from a comparison of the following figures, tabulated by the "Journal of Commerce and Commercial Bulletin:

	1901.	1902.	1903.
January	$16,574,950	$15,032,000	$13,166,350
February	13,992,000	21,010,500	16,090,800
March	15,036,250	12,056,600	9,907,650
April	11,352,800	13,894,600	13,549,000
May	22,380,150	14,866,000	16,366,800
June	9,590,000	10,245,350	14,684,350
July	15,740,000	10,028,000	12,838,600
August	8,334,000	7,425,550	8,428,350
September	7,645,200	9,945,000	9,939,450
October	14,749,900	9,593,300	10,409,800
November	15,469,800	10,546,650	13,589,550
December	13,473,400	14,616,500	17,224,700
Totals	$164,347,450	$149,260,850	$156,195,700

However, higher rates of premium made it possible, notwithstanding the heavy losses, for the insurance companies on the whole to make a fair percentage of profit on their outstanding operations, though they were adversely affected by the fall in the values of securities during the year.

The increase of seven millions in the burnings of 1903 as compared with 1902 emphasizes the need of greater carefulness in matters concerning fire; and the fearful loss of life in the Chicago theatre should drive municipal authorities everywhere to see that their orders for the public safety are obeyed. It turns out now that the building by-laws of Chicago and the specific regulations laid down to save life in case of a theatre fire were flagrantly disobeyed. Iron exit gates that should have been open were locked, and panic-stricken people, hemmed in, dashed against them in vain, and sank down inside them to smother. The admissions made by building com'r of the city, showing laxity in examining the building, are most damaging. How much better off are we in Canada than Chicago in respect of our theatres, churches and public buildings? Do we remember the astounding spread of the Toronto University burning, where masses of dry and varnished wooden wainscotting took fire like tinder. Have we not many buildings just as likely, nay, far more likely, to burn than that? They are inflammable in both construction, fitting, and decoration. And their means of exit are insufficient.

Much is being said and written about the need of investigation into the condition of buildings of public resort in Toronto in case of fire. And it is to be expected that a public-spirited mayor will use his influence and his common sense to have flagrantly dangerous premises put into better shape. But the need is general throughout Canada. It seems unhappily to be nobody's business to enforce regulations made to lessen risk of life and limb in case of fire in public buildings.

JAPAN AND RUSSIA.

Just how far France will be obliged by her alliance with Russia to go in the event of a war in which a combination of powers should attack the latter does not seem to be definitely known. But Great Britain is clearly bound by her recent treaty to come to the help of Japan should that country be engaged with a combination of hostile powers under circumstances which, in the opinion of Great Britain, justified Japan. Whether the Czar of Russia realizes the sort of silently aggressive game which his ministers are playing in the far East, and which is so exasperating to Japan, or whether, knowing it, and even disapproving of aggression, he is still unable to prevent it, can at this distance only be guessed at.

That Russia was helped by Germany and France some years ago to great advantages in Manchuria and parts of the Yellow Sea is well known. That she has helped herself to further advantages is not so generally known. And now she is going so far in advances in Korea, which are considered a menace by Japan, that the latter power is righteously indignant. We find in the latest London Economist a statement which covers the ground very fairly, thus:

"In 1895, when Japan had forever broken the claim of Chinese suzerainty over Korea, and had secured a territorial foothold on the mainland by exacting the cession of the Liao-Tung peninsula, it was in the ostensible interest of the world's peace as affected by international rivalries in the Far East that Russia organized the overwhelming combination of herself, France, and Germany for the object of coercing the victorious young island-power into a surrender of the most conspicuous fruits of its triumph. Within a few months of the successful engineering of this achievement of Western diplomacy it was rumored that Russia had sought to obtain, as a reward from China for her benevolence, a secret treaty giving her exclusive naval access to Port Arthur in the Liao-Tung peninsula, as

well as the privilege of extending the Siberian railway southwards to some warm-water port in Chinese territory. The rumor was denied by the Russian Government, and the denial was accepted and repeated by Lord Salisbury. Yet in 1898, in compensation for the German acquisition of Kiao-chau, to which there was some plausible reason to think that Russia was a previously consenting party, and for the acceptance of an Anglo-German loan by China, the Czar's Government obtained a twenty-five years' lease of Port Arthur, with the right (granted or taken) both to extend the Siberian, now the Manchurian, railway to it as terminus, and to turn the port into a naval station. Since then Manchuria has been rapidly Russianized, the railway has been completed to Port Arthur, and the tongue of land which Germany and France were hypnotized into helping to force Japan to give up has been made to all intents and purposes a Russian stronghold resting upon Russian land communications."

TOTAL ABSTINENCE AND LIFE ASSURANCE.

It was more than sixty years ago, namely in 1840, that the United Kingdom Temperance and General Provident Institution was founded. We have frequently quoted from its experience. It was the first company to make a distinction on its books between policy-holders who drink intoxicants and those who do not; and it instituted a Temperance Section as distinct from a General Section in which to classify insurants. The story goes that its founder, who held its first policy, started this company in indignant protest against the attempt of some other company, in the then prevalent state of opinion on the subject, not only to refuse him any preference as a teetotaler, but to impose on him, as such, an extra premium, "Be that as it may, this company is the one associated in the public mind with the 'temperance section,' and the one that has actively catered for teetotalers as a class. In its periodic bonus distributions it has announced an experience favorable to abstainers, and acted accordingly."

At a recent meeting of the Institute of Actuaries a paper upon Total Abstinence from the life insurance point of view was read by the actuary of the company named, Mr. R. M. Moore. He submitted a study of the company's experience, comparing abstainer and non-abstainer, showing greater longevity on the part of the former. Of whole-life assurers there are on the books of the company about 32,000 who drink strong liquors and 29,000 who do not. A *resume* of the paper is given by the London Economist. While careful to remark that this is a scientific statistical study upon a limited scale, and one must take care not to read into it more than it contains, that journal yet considers it a most suggestive contribution to sociology, deserving of careful consideration. The average sum assured under the company's policies is small, being in the first half of the company's history about £200 sterling, and being now about £300, or say $1,500. The net conclusions of Mr. Moore's analysis, says the Economist, will be most readily appreciated when exhibited in terms of the actuarial function which is best popularly understood—what is known as the future "expectation of life." This, for the non-abstainers, is found to be practically identical with that, at corresponding ages, shown by the new mortality tables recently published, embodying the general experience of assured lives throughout the United Kingdom, and based on the combined experience of the British life offices. The abstainers' experience, however, shows a result substantially better. Thus at age 30 the non-abstainer's expectation is 35 years, and the abstainer's 38.8; at age 40 these figures become 27 and 30; at age 50 they are 20 and 22 respectively. We may say roughly, with the author of the paper, that the advantage is one of 10 per cent. throughout the working years of life. Put financially, it is computed that a teetotal life of 30 or 40 could be insured, for equal benefits, at a premium about 11s. cheaper per cent. than that of a moderate drinker —on the results, that is to say, shown by this experience.

TORONTO SUBURBAN TROLLEY SERVICE.

It is to be hoped that the application of the Toronto and Suburban Railway Company to the Ontario Legislature for an extension of time in which to build its proposed trolley line to Hamilton and for power to construct a line to Woodbridge and Brampton will not be allowed to pass unchallenged. Presumably the real object of the desired legislation is to hold the fort on behalf of parties whose names are not openly stated; but, laying that consideration aside, it may be well to glance at the present company's record. For some years past it has been running cars between Toronto Junction and Weston, Lambton and Davenport, and it is only necessary to ask a plain question of any person living in either of those districts to learn that the service rendered is almost inconceivably bad. A few years ago a coroner's jury after considerable enquiry pronounced that the cars were not safe; since that period they have certainly not improved. Only last Saturday a car containing several passengers suddenly broke an axle while descending a steep hill, swerved around at right angles to the badly graded track, and was only saved from doing serious damage by the fortunate proximity of two posts, one of which was snapped off. Less than a month ago a somewhat similar accident occurred; indeed, hardly a week passes but some mishap of a minor character takes place. Only a lucky chance has prevented serious loss of life owing to the company's equipment, which is positively rotten.

Not only this, but the company's time schedule is absolutely undependable, even in good weather. Either through a break in the power-house machinery, or a burnt motor, or a general want of power, there is always something to prevent the cars running on anything like their scheduled time. Quite frequently a car is left off altogether, so that the only course for an impatient would-be passenger is to walk towards his destination on the off-chance of being picked up by a passing car within five or fifty minutes.

Time and again the management has been remonstrated with, but all to no avail. Promises of improvement are made only to be broken. More than this, it is supremely indifferent as to whether its patrons have a grievance or not. Yet this is the company which wants power to build additional lines! Instead of the petition being granted, what the company deserves is the withdrawal of the charter it already holds, for under

the present grossly incapable management it is simply spoiling a franchise which in other hands might prove a boon to the people of the localities interested.

TRADE WITH THE BAHAMAS.

The question has more than once been asked, Cannot more trade be done between Canada and the Bahama Islands, that charming winter resort in the Gulf Stream? And the answer given is that direct steamers are needed to make this possible. True, there is more business now than there was a few years ago; the two peoples are getting acquainted, and down in Nassau one may even hear conversations upon and hopes about being "united commercially and nationally as well." Making some enquiry about possible trade with the Bahamas, we have a reply from a merchant in Nassau, who says: "Already we are placing on this market goods 'Made in Canada,' and intend using every effort to this end. The one great need now is to have a direct line between your Maritime Provinces and this port. The charges on goods, shipping via the United States, are too great to warrant trade, in many important lines. With a direct service this could be remedied, as goods could be delivered on board at Montreal or Halifax as easily as they are at New York, and landed right at our docks, without any extra freight or charges."

Being asked as to the kinds of products that might be exchanged between us, Mr. Roberts instances sisal fibre as an important article of export needed by Canadian manufacturers. Further articles are tortoise shells, sponges, and tropical fruits. The only article of import that he specifically mentions is Canadian flour. But we know that Hamilton hams and bacon, Tilsonburg meal and Halifax lumber have been going there —likewise ice—grown in Canada. Canadian flour gives satisfaction, and the writer is hopeful that a great portion of the trade in this line may be secured for the benefit of Canadian millers. He adds: "I trust that Canadians will use every effort to aid us in establishing a line of vessels between Canada and the Bahamas. Already some efforts are being used in this direction, and it seems reasonable to say that this can be accomplished." The difficulty that we perceive in the premises is the limited extent of the business possible to be done. In textiles we cannot compete with England, and there are but few manufactures we can sell the Bahamians. The most reasonable thing seems to be the regular calls at New Providence by steamers from St. John and Halifax to the West Indian archipelago.

BANKS AND BANKING IN ENGLAND AND WALES.

The last yearly reports of the joint stock banks in England and Wales have been made public. They show an increase of £9,265,000 in the amount held by these banks on deposit, which now totals £593,248,000, an enormous sum. The cash in hand, at call and short notice (fully secured) is £152,621,000; investments in Government securities and other first class stocks, bonds, etc., amount to £131,638,000; discounts, loans, etc., to £392,483,000; and an item of sundry assets stands at £29,244,000.

During the past year the number of banks has decreased by five through amalgamation, and is now 66, while the branches number 4,219, an increase of 190 in the year. The deposits have increased over two hundred millions of pounds sterling in ten years.

The original purpose of the writer of these papers was to show the amount of cash in hand held by these banks, and of such assets as can be easily converted into cash if wanted to meet their customers' demands; and, taking that point first, it is seen that the banks hold, immediately available, nearly 48 per cent. of the amount of their deposits.

In addition to the joint stock banks, under which heading is included the many incorporated companies representing old private banking firms, there are now sixteen private firms in England and Wales who publish statements showing deposits of £31,162,000, inclusive of notes issued by seven, with cash in hand and at short notice £7,940,000 and investments £10,700,000, making together a large proportion of their deposits; and there are still some of the old private English banking firms who do not publish their accounts. The Post Office Savings Bank also holds large deposits, and some of the old local savings banks are still in business. There are also nearly sixty colonial and foreign joint stock banks having London offices, and holding large amounts, of which a not inconsiderable part doubtless is due to their English customers.

The following table has been prepared, showing the amounts due to customers, the cash in hand and at call and short notice, with the investments in Government and other first class securities, which are held by four of the principal private banks, by five of the incorporated companies representing many old private banks, and by six of the joint stock banks, all of which have been chosen by the writer only because of old acquaintance.

	Branches.	Deposits.	Cash in hand at call and short notice.	Consols and other securities.	Total assets immediately available.
		£	£	£	£
Four private banks		26,751,930	9,103,321	7,538,135	16,641,456
Five companies ..	940	136,611,545	37,812,154	26,169,423	63,981,577
Six joint stock banks	1,089	211,562,606	64,415,815	46,221,281	110,637,096
	2,029	374,926,081	111,331,290	79,928,839	191,260,129

The banks and bankers in the above summary have cash and assets immediately available to the amount of more than half of their deposits—nearly four millions more than half. One of the companies holds £9,623,000 in cash, one joint stock bank has £8,068,000, one has £7,548,000, and one £7,476,000; these sums being supplemented by money at call, etc., and by investments in consols and other Government securities by, in the case of one bank, £8,296,000, by another £7,186,000, and a third £6,158,000. The amounts held by the Bank of England are not included in any of the above figures.

The well-known firm of Messrs. Smith, Payne & Smiths—established 1758—appeared in this summary for the last time in 1902, as they with their associated country banks have been incorporated with the Union Bank of London, until then a metropolitan bank only.

Messrs. Samuel Smith & Co. began business in Nottingham, Mansfield and Newark in 1688, and at other places in 1775 and 1784. It is now announced that Prescott's Bank, including Messrs. Dimsdale's, established in 1762, and Messrs. Prescott & Co., established in 1766, has also joined "The Union of London and Smith's Bank, Limited," under which style the united banks continue business.

HALIFAX LETTER.

Business people in Halifax were shocked on New Year's Day to learn that Kenny & Co., the oldest wholesale dry goods firm in Canada, having a history extending back for three-quarters of a century, had found it necessary to go into liquidation, as you announced last week. The news came as a surprise, for the firm was doing a large business, and its credit was by most people regarded as more than ordinarily high. During the year the firm met with a number of losses and other disappointments that could not be foreseen nor guarded against. It is well understood by everyone who knows anything of the case, that the failure was not due to lack of knowledge of the dry goods business nor to neglect, for the partners who are held in high esteem knew the dry goods trade thoroughly, and worked hard, and were conscientiously aided by a capable staff. The city cannot afford to lose the business connection that such a firm as Kenny & Co. has, and the hope is general that they will be able to make such arrangement with their creditors as will permit of a reorganization.

But in any case, the past history and present status of the trade show that Halifax is well situated for the carrying on of the wholesale dry goods business. A large proportion of the goods of this character consumed in the Maritime Provinces comes from Great Britain and other European countries, and because of its Maritime situation, Halifax is able to receive such goods at just as small cost as that at which they can be imported into any Canadian or United States city. Goods of United States manufacture can also be delivered in Halifax by water from Boston and New York, both promptly and cheaply. Once in stock here, they can be distributed very economically by water and by rail, also to retailing points in the Maritime Provinces. In the case of imported goods, Halifax should have the advantage over houses situated at a distance, and in the case of domestic productions, our houses have the advantage in distribution, also if retailers follow the modern custom of buying in small quantities at short intervals, as required.

With the beginning of the year, Sydney assumed the dignity and responsibility of a city. The growth of Sydney is illustrated by the following facts: In 1898, the number of teachers employed in the Sydney schools was fourteen, while the number is now thirty-four. In 1898, Sydney had twenty-two miles of streets, it now has forty-six miles, being in this particular almost abreast of Halifax. In 1898, the assessment valuation was $870,560, which has now increased to $6,563,766. Though somewhat under a cloud at present, Sydney citizens have not lost faith in the future of their city possessing, as it does, such manifest natural advantages.

Another Cape Breton town, which has come rapidly to the front, is Glace Bay. Two years ago its population was 6,945. To-day, within the same limits, the population is 13,900. Some time last month the town limits were extended to include Bridgeport, with a population of 2,500, so that Glace Bay at the present time has a population of over 16,000. The town owns and operates its own electric light and water systems, and its principal streets to-day are said to be the finest in the province. During the year the electric tramway has been completed giving a complete circuit of Sydney, Glace Bay and all the various mining towns of Cape Breton County.

Commencing on January 26th, a short course in animal husbandry will be given at the Government Farm, at Truro. It will be conducted by Prof. Cumming, Prof. Day and Dr. Reid, of Guelph, Ont., and will be an exact duplicate of the short course in animal husbandry given with much success at the Guelph Agricultural College. Instruction is free, and it is hoped a large number of farmers will avail themselves of this opportunity to keep abreast of the best ideas pertaining to their calling.

Halifax, N.S., 11th January, 1904.

DEATH OF MR. E. E. WEBB.

The news of the unexpected and comparatively early death of Mr. E. E. Webb, general manager of the Union Bank of Canada, has been learned with regret by many. He had been ill for some weeks and died in Quebec on the evening of January 7th, aged only 51. Ephraim Elliott Webb was born in the township of Hull, Que., in 1853, and educated at the Ottawa Collegiate Institute. He entered the service of the Union Bank at Ottawa in the early seventies and was accountant there for some years. Subsequently he was transferred to Quebec, and eventually appointed general manager.

Mr Webb was largely instrumental in extending the field of the Union Bank's operations to its present wide extent, for when he assumed the management, the bank had but few branches, and now has eighty-two. He has long had faith in the development of Western Canada, and about the year 1888 opened the first branch there; the bank has now fifty-six branches west of Winnipeg. The deceased gentleman was a man of sterling qualities, honorable, truthful, kind of disposition, but also reserved, determined, and full of quiet energy. He had been half of his life in the bank; and one who knew him well expresses the opinion that it was excessive devotion to work which caused his too-early death.

THE LIFE COMPANIES' YEAR IN CANADA.

A number of life companies have sent us the principal figures illustrating the results of their business in Canada during 1903. It is, as a rule, the case that they show gains in amounts written and betterments in important items.

The Sun Life Company of Canada tells us that its business for the year just closed is one of the best ever experienced by that company. The total new applications were $19,672,773, an increase of nearly four millions over 1902. The new applications, Canadian, were $7,079,358, an increase over 1902 of two millions. The company's surplus is now over $900,000.

In the case of the National Life, the year's premiums amount to $150,644, which is $24,000 more than last year, while death claims were $2,500 less. The progress of the company since its foundation in 1899 is shown by the following figures: The assurance in force at close of 1900 was $1,792,500; at close of 1901 it was $2,554,900; of 1902, $3,425,800; and last year, $4,806,112.

The result of the year to the North American Life shows the new business issued in the general branch was the largest in the history of the company. Handsome increases are shown in the premium and interest income, as also in assets. It is somewhat of a novelty, but a pleasing novelty, to have this company say, as it does in print: "The North American Life extends its hearty congratulations to its Canadian competitors who have announced that they have had a prosperous year's business, and sincerely trusts that they all will share with it in the general prosperity of the country."

It is stated that on behalf of the Confederation Life, that the business it has written during 1903 is the largest in the history of the company, which is now, if we remember rightly, over thirty years old.

The Crown Life, one of our newest and livest companies, reports a satisfactory year's business. It discovers in various parts of Canada a decided response to the appeals of its agents to consider "Canada First," in insurance as in everything else.

We have not yet received the figures for 1903 of the Canada Life, but understand in a general way that the year has been a markedly prosperous one for that company.

METROPOLITAN LIFE INSURANCE COMPANY.

It has been announced by this strong company that a cash dividend amounting to ten weeks' premiums (about 20 per cent. of the premiums for the year), has been declared on all Industrial policies issued by the Metropolitan during the years 1879, 1884, 1889, 1894, 1899, which shall be in force on their anniversaries in 1904, when the dividend will be payable, except policies issued during 1899 on the Increasing Life and Endowment plan. It is estimated that the total amount of dividends hereby declared will be nearly six hundred and fifty thousand dollars, which with the sums paid during the preceding seven years, makes a total of $4,500,000 distributed, without any obligation, expressed or implied in the policies, to pay any dividend whatsoever.

This we pronounce to be a handsome action. The beauty of it is that it is purely voluntary; and is an excellent indication of the liberality, added to the sense of moral responsibility, entertained by the management. As we understand the matter, all the industrial policy-holders, which it has taken over from the companies the Metropolitan has reinsured, will share in the distribution. All are treated alike. No amount of success, as measured by volume of business secured or profits earned, will go so far to attract business to the company as such an open-handed procedure as is above described.

CENTRAL CANADA LOAN & SAVINGS COMPANY.

This company has last year, for a second time, paid a bonus to shareholders over and above the customary six per cent. dividend. Considering the state of the stock market during most of the year, and knowing how large a part of this company's business consists of dealing in stocks, one would hardly expect to see dividends increased. Let us see whence the net revenue of $166,000 has come from. The president's address says that the company's business has developed along three lines:—(1) loans on real estate, chiefly in the province of Ontario; (2) time and call loans on stocks, bonds and other approved collateral. Leaving the third item for a moment, and looking back to the business of 1902 it is clear that the development along the time and call loan line was not great, seeing that such loans stand this year at $1,785,000, an increase of only $59,901 over the $1,725,099 of 1902; while the company's mortgage loans are this year actually less than last, in the proportion of $1,056,771 as compared with $1,062,655. And we know that the state of the mortgage lending market has not been favorable to large earnings. Therefore, the third section of the company's business has been, as indeed the president says, the important one, namely, the purchase and sale of government, municipal and high-grade bonds of steam and electric railway, electric light, power and other similar companies. It is in the clever handling of these securities that the profits last year and this year must have been made.

Not having a list of the $3,650,000 of bonds and stocks owned by the company, we cannot compare it with those of a previous year, and therefore only notice that this amount is $373,000 greater than a year ago. But the shareholders have the assurance of the president that these assets are "estimated at prices well within their present market value." From the interesting statistics which the report gives us we learn that there are now 105 shareholders; 2,357 depositors for an average of $482 each; 427 holders of the company's currency debentures, an average of $3,680 each; 921 holders of sterling debentures, representing $2,290 each. And we note that while the amount of deposits has not changed, the currency debentures are less, while sterling debentures have increased by $200,000.

EMBEZZLEMENTS.

Eight millions a year embezzled in the United States, that is to say, known to be embezzled, for there may be much more lost in this way, is a considerable drain. And the amount lost in the eighth month of last year does not look as if it were lessening. We have a statement of embezzlements in the United States for last October, together with the record for the past four years, which statement we have taken from the monthly bulletin of the United States Fidelity & Guaranty Company. It is as follows:

From Firms and corporations	$1,173,417
" Banks.	387,000
" Transportation and insurance companies.	137,741
" Building associations and benevolent societies	114,668
" Court trusts	100,350
" Federal, state and municipal bodies.	35,254
" Miscellaneous	35,002
Total for month	$1,983,432

The United States record for the past four years in this direction will be found below:

Year 1900	$8,090,878 00
" 1901	7,734,250 00
" 1902.	6,933,516 00
" 1903 (Ten months).	7,790,351 74
Total	$30,548,995 74

NEW YORK LIFE INSURANCE COMPANY.

The figures presented in the report of this company for the year 1903 are of great, almost startling, magnitude. The claim is made that it has the largest income, the largest amount of insurance in force, and the largest new business of any life company in the world. Not having yet received the reports of the Mutual Life, of New York, nor the Equitable Life, which we suppose are its chief competitors in the extent of business done, we cannot verify this statement, but are content to let it stand as the official statement of a conspicuous boast. One thing the friends and well-wishers of the great company may take comfort from, namely, the conservative one that no stocks of any kind are invested in or even loaned upon under the company's by-laws. And in fact it sold several years ago what it then held while a boom was on. According to a condensed summary of the report officially issued, its holdings of bonds show less depreciation than United States bonds or British Consols, and its unassigned surplus shows so small a shrinkage that it does not include therein some two million dollars of excess of market values over book values.

Let us notice a few of the totals given in the report of 1903. The assets are $352,652,000, and the surplus $47,000,000. Of the total income for that year, $88,269,000, no less a sum than $14,887,000 was derived from interest and rents, the remainder consisting of premiums on insurances and annuities. And the total payments to policyholders were $34,670,000; namely $16,860,000 in death claims, $5,992,000 in endowments and annuities, $11,817,000 in dividends, purchased insurances, etc. The number of paid-for insurances is 812,711 and their aggregate, 1,745,212,00; which represents an average policy of $21,300. New insurances of the year were 171,118 for $326,658,000, which shows the average policy written in 1903 to have been $1,908. The progress of the company during the last twelve months is illustrated by an increase in assets of $29,811,000; an increase in paid-for insurance in force of $191,584,000; an increased income of $9,161,000 and an increase in dividends to policyholders of $1,198,000. Among the limitations to which the company is subjected is one to limit its expenses to the amount received for that purpose, and another that it is pledged by by-laws and by various government agreements not to invest its funds in, or lend them on the security of, stocks of private corporations, second mortgages, unimproved or unproductive real estate, hotels, theatres, churches, breweries, factories, mining or industrial enterprises. With such great resources, with nearly sixty years experience of life underwriting, and with such safeguards as those indicated, the New York Life can offer to insurants such advantages as few life companies in the world are entitled to display.

A NEW YEAR PRESENT.

On New Year's Eve, the men employed at the Hall Mines smelter at Nelson, B.C., gathered to the number of eighty on the feed floor under the guidance of their foreman, and rather puzzled the superintendent, Mr. R. R. Hedley, by sending him a message that his presence was immediately requested. That gentleman presently appeared, when foreman Scoley read an address to Mr. Hedley from the smelter employees, of which the following is an extract:—

> "We desire, at this New Year, to express to you our sincere appreciation of your open and fair dealings with us, as such employees. In the discharge of all duties, under your superintendence, we have continuously felt supported and encouraged by your kind and courteous treatment, and by the knowledge that you, as our superintendent, possessed, in a high degree, a thorough knowledge of the capabilities and rights of your employees, and a strong sympathy for them in their work, and that you would do justice under all circumstances to all."

The spokesman further handed Mr. Hedley a handsome ebony cane, with gold top, and then the men gave him three cheers. Happily, it is usually easy for Mr. Hedley to wear a smile; it is even not difficult to make him blush; he did both on this occasion. And then he made a little warm-hearted speech of a sort that pleased the men, saying in part:—

> "Well, boys, you certainly have kept this affair dark and have taken me completely by surprise. When John Scoley told me at noon that I would be wanted down here at this hour he had such a long face on him that I thought there was trouble in store for me, and at once asked if it was serious. John replied that he thought it could be arranged if I would come on time and so I came. (Laughter and applause). I want to thank you very much for your kindly expressed opinion of me. For seven years now we have worked together on a sound and friendly basis, and I have always believed that I had the good will of the men. You have worked well for me and I want you to work well for the company. We have been 'up against it' for the past two years one way and another. I think this last year has been about the hardest of them all, but things are looking a little better now, and if we all work and pull together this coming year we may be able to make some kind of a showing by next New Year's Eve. * * * I wish you all a very happy New Year, and that it will prove a prosperous one for us all."

FOREIGN MONEY.

Editor, Monetary Times,—

Sir,—The circulation of foreign money in Canada, the loss thereby entailed, and the best way to overcome the evil, are frequently spoken of in commercial bodies and written about in the press in such a manner as to show that clear and accurate ideas are not generally held on the subject. As to the intrinsic values of gold coins, little need be said, as they do not enter to any appreciable extent into general circulation, being held by the banks as part of their security against the issue of notes. The British mint makes a charge of 1½d. for coining an ounce of fine gold value $20.67, equal to .07 of a cent on a sovereign valued at $4.86 2-3. The United States mint charges half of one per cent. on gold coinage, the charge on a $10 gold piece being thus 5 cents.

The weight of fine gold in a United States $10 gold piece is 232.2 grains, which is one-sixteenth of the weight of fine silver in 160 standard silver dollar pieces. The weight of the silver dollar was fixed by an Act of Congress, passed in 1837, at 412½ grains of silver, containing 90 per cent. pure silver, and 10 per cent. copper, the weight of pure silver in a dollar being thus 371¼ grains. The fact that these silver dollars have been coined so far in excess of the requirements of trade, that, not car loads, but train loads of them, are lying unused in the vaults of the mint at Philadelphia, and the sub-treasuries, all coined at 16 to 1, should be sufficient to cover Wm. J. Bryan and his followers with ridicule.

When we come to the value of the subsidiary silver coins, 50 cents, 25 cents, 10 cents, and 5 cents, by the Act of 1853, there is 28½ grains less standard silver per dollar used in coining them, and they are proportionally less valuable than one dollar pieces.

There was a time when silver was even more valuable than 16 to 1 in comparison with gold, but about 1870 the price began to decline from $1.25 per ounce, till in 1885 95 cents was reached. Then under the operation of the Bland bill in the United States, in 1890, the price jumped to $1.20, and the enormous surplus of silver dollars was coined which still fill the mint and treasury vaults. But an Act of Congress proved unable to control the world's exchanges, and silver bullion fell till in the early part of 1903 it was down in the forties, the immediate cause of decline being the disbursement of the Chinese War indemnity in silver. Subsequently it recovered, and about 60 cents per troy ounce of 480 grains of fine silver may be considered as the average of the year 1903. This is convenient, as it makes a grain of silver equal to ⅛ of a cent.

Taken on this basis, United States silver coins are of the intrinsic value shown below, remembering they are 90 per cent. fine.

Actual Value of United States Silver Coins.

Fine Silver at 60c. Troy Ounce.	Grains of Standard Silver.	Grains of Pure Silver.	Value of Pure Silver.
Standard dollar	412½	371¼	46.4 cents
Half dollar	192	172.8	21.6 "
Twenty-five cents	96	86.4	10.8 "
Ten cents	38 1-3	34.5	4.3 "
Five cents	19 1-6	17.25	2.15 "

Sterling silver, of which British and Canadian coins are made, is finer than the American standard, as it contains 92½ per cent. of pure silver, and thus the British shilling weighing 80.24 grains is worth 10.03 cents. Canadian coins are overvalued in like manner, but they are instantly redeemable at their face value, and the profit the Government makes on their issue lessens the taxation of the Canadian people.

On the other hand, in accepting an American "cart-wheel" dollar, worth 46 4-10 cents, for $1 worth of Canadian goods, there is a loss for the time being of 53 6-10 cents, and while it remains in circulation it is a loan wthout interest to the people of the United States, as is all American paper money circulating in Canada.

Between silver coins and paper it is estimated that from four to five millions of dollars of United States money is in circulation in the Dominion. This should be replaced by Canadian money which would, at 5 per cent. on the sums stated, be earning $200,000 to $250,000 for the people of this country.

There is no kind of reciprocal action in this matter, as Canadian money, except in small amounts at frontier places, is either refused or subjected to a discount when tendered in the United States.

Take a look at the "Silver" item in the financial news, and you will find "Mexican dollars" quoted from 42½ to 44 cents in New York, that being what a Mexican buyer is allowed for a payment in that form. Yet the Mexican dollar, containing 420 grains, 90 per cent. fine, or 378 grains of pure silver, is worth more as bullion, than the standard United States dollar, which contains only 371¼ grains.

In attempting to secure to the people of this country a saving of $200,000 to $250,00 per annum by driving out United States money, it is suggested that their

> Silver dollar be taken for 85 cents.
> Half dollar at 40 cents.
> Quarter at 20 cents.
> Dime at 6 cents.
> Half-dime at 3 cents.
> Cent piece at nothing.
> All bills at 5 per cent. discount.

The way this matter is managed on the southern frontier of the United States is illustrated by the tale of a New York drummer on the way to San Francisco by the Rio Grande route. Stopping off at El Paso, early one morning, he "did" the town, and thought he would step over the bridge into Mexico. To fortify himself for the walk, he took a glass of "Bourbon," tendering a United States dollar; the barkeeper handed him a Mexican dollar, answering his look of enquiry by explaining that there was a discount of 15 per cent. on Mexican money, so that the difference paid for the drink. After walking round the Mexican town, he stepped into a restaurant and got a glass of "Rhum;" on tendering the Mexican dollar he was handed a United States dollar for change. Going back to Texas, he got another glass of Bourbon, and again went to Mexico, repeating his journeys forth and back until evening. When returning to El Paso, he found he had acquired a heavy jag which had not cost a cent, as his original United States dollar piece was in his pocket.

This tale shows that our Mexican friends have applied a means to keep United States money out of their country, and if Canadian boards of trade, banks, brokers, merchants, and hotel keepers would adopt the measure suggested, Americans would soon provide themselves with gold or exchange to pay for purchases in Canada, and we would profit to the extent of $200,000 to $250,000 per annum by the change from the present system, in which there is no reciprocity whatever.

Yours respectfully,

R. W. Elliot.

Toronto, 6th January, 1904.

INSURANCE MATTERS.

We beg to thank the North British and Mercantile Insurance Co., and the Royal Victoria Life Co., for copies of their respective very tasteful calendars.

The presidency of the Insurance Institute of Montreal has been resigned by Mr. E. P. Heaton, general manager of the Guardian Fire and Life Insurance Company, owing to lack of time to devote to the position. Mr. T. L. Morrissey, one of the vice-presidents, has been appointed his successor, and Mr. C. R. G. Johnson, a member of the council, succeeds Mr. Morrissey in the vice-presidency.

Detroit has begun the year badly in the matter of fires. The Evening News of that city gives cuts and descriptions of four fires there since January 5th, the aggregate loss by which is stated at $223,000. On Saturday the Sievers & Erdman carriage factory was gutted, with a loss of $60,000; on Sunday the Business University burned, loss, $45,000; the Bailey Art Company lost $38,000 by their burning, and the Berry Bros. fire costs $70,000.

It is announced that Mr. J. W. Marling, manager of the province of Quebec branch of the Canada Life, will at his own request retire on the 1st of August next, after about 40 years' active service with the company. Mr. E. A. Schmidt, late of the Equitable Life, will be associated with Mr. Marling as assistant manager during the intervening period. Mr. Marling will still retain a certain connection with the company, and it may be added that a generous provision was made several years since for the change now announced.

We learn that Mr. J. S. H. Matson, of Victoria, is visiting his father, Mr. R. H. Matson, in Toronto, previous to a visit to England. Mr. Matson, jr., is manager for British Columbia of the National Life Assurance Company of Canada, and one of Canada's most successful personal writers of life underwriters in Canada. He is, we are told, on his way to England on important business, where he will remain for several months. Mr. Matson intends visiting Paris, Berlin, Amsterdam, Rome, St. Petersburg, and other large business centres.

The deterioration of vitality in men, after the age of forty, is declared by the "Medical Examiner" to be mainly due to what it calls the uric acid change of life. The presence of albumen in the urine is a further indication, and its early detection is a boon if it causes a change of habits and diet that prevent the change of constitution from thoroughly establishing itself. Uric acid means lime deposits, and that is old age in its final reduction. The following regimen is suggested by the "Medical Examiner:" Less hours of work at the desk, more hours of sleep; simple and nutritious food at regular times; abundance of good water for drink, little or no alcohol; avoidance of late suppers and midnight debates at his club; last, but not the least, regular systematic physical exercise in any form which he finds most agreeable.

The report of the Toronto Fire Department for the past year was on the whole gratifying. The total fire loss was kept considerably below the average, and in every case of fire the flames were confined to the building in which they had originated, a striking tribute to the efficiency of the brigade. During the year 867 alarms were responded to, the largest in Toronto's history; false alarms, however, were not so numerous. The total loss and insurance were: Losses on buildings, $86,904.86; loss on contents, $187,791.84; amount of insurance paid, $219,058.70. Accidents to members of the department were frequent, but none of them resulted fatally, and very few were serious. Considerable new apparatus has been added to the city's fire-fighting equipment recently, but the Chief still recommends some further improvement to fire-houses, and more especially in the water supply, which at times proved unsatisfactory. He again alluded also to the danger arising from overhead wires.

FINANCIAL ITEMS.

The Bank of British North America advises us that a branch of that bank has been opened at Calgary, N.W.T., under the temporary management of Mr. A. D. Severs.

A branch of the Traders Bank of Canada has been opened in Clifford, Ont., since the turn of the year. It is said that a lease of a building has been taken which will be fitted up to suit. The same bank has opened an office at Ayton, Ont.

The suspension is announced in France of the Parisian bank, the Credit Internationale, the losses of depositors being by some placed as high as $1,400,000. The director of the institution has disappeared, leaving behind him a letter explaining that he had recently suffered heavy losses on the Bourse, and another peculiar feature was that the same man had twice before been found guilty of swindling.

A very convenient and neat memorandum book is issued by the Trust and Loan Company of Canada. It is something more than a calendar or a note book; it contains many convenient and unusual facts and particulars about this and other countries. A picture is given of its Montreal offices, but we do not find any of its Toronto and Winnipeg offices.

The staff of the Merchants Bank of Canada, at Oakville, will please accept the thanks of this journal for a neat New Year card.

Mr. James Brydon, the manager of the Canadian Bank of Commerce, at Collingwood, was the recipient on Wednesday last of a beautiful Dutch solid silver tea set, from the Bank of Montreal, in consideration of his active and zealous assistance to them during a fire in their premises on January 2nd. The presentation was made by Mr. Cortlandt Freer, local manager of the Bank of Montreal. The nature of the circumstances, which resulted in this unusual gift, are matter of much interest to all bankers.

From the University of Chicago Press have been received some specimen translations from the Code of Hammurabi, King of Babylonia about 2250 B.C. Here are two regulations showing that deposit banking is far from being a modern invention: "If a man gives to another silver, gold or anything else in deposit, whatever he gives he shall show to witnesses and he shall arrange the contracts and then he shall make the deposit.", "If a man gives on deposit without witnesses or contracts, and at the place of deposit they dispute with him, that case has no penalty." The Bankers' Magazine adds: Here is another, which has no application to banking, but illustrates the ancient origin of the desire of a man

to get his money's worth: "If a wine seller does not receive grain as the price of drink, but receives money by the great stone, or if she makes the measure for drink smaller than the measure for corn, they shall call that wineseller to account, and they shall throw her into the water."

During the year just ended, our Halifax correspondent tells us, the Bank of Nova Scotia opened seven new branches, the Royal Bank, five; Peoples Bank of Halifax, two, and the Union Bank of Halifax, three.

The Peoples Bank of Halifax found its plan of issuing nothing but new notes during the holidays very popular. For a few days before Christmas the tellers in the Halifax offices were kept very busy attending to people who had been attracted specially by this feature. The Halifax Board of Health has ordered its secretary to forward a letter to all banks in that city, requesting them hereafter to issue only new notes retaining the old ones so as to avoid the spread of disease by this agency.

In his letter, enclosing the communication which appears in to-day's paper, Mr. Elliot comments on the irritation often felt by Canadians travelling in the United States when our money is refused in even border cities, while we take their bills and silver at their face value. He adds: "As well as the very considerable loss to Canadians, sustained by lending them money for nothing, or on inadequate security, there is the sting of over-lordship involved in the idea of Yankee money having free circulation in Canada, while Canadian money is refused in the United States."

Boys or youths of the present day, many of whom dislike to enter the service of banks, because they think apprenticeship long and promotion slow, may find encouragement in the present position of a Texas boy, Ernest R. McDuffie, who has been made, at fifteen years of age, assistant cashier of the Bank of Lawton, Oklahoma Territory. We are not joking—this is a fact, on the testimony of the Bankers' Magazine, which prints on page 19 of its January issue a portrait of the lad. He even attended the Oklahoma Bankers' Convention, where, it is stated, "much attention was bestowed on him owing to his youth and position." It is natural for a Canadian to ask what sort of a bank it is that can get along with a fifteen-year-old lad as assistant manager? We do not find its name in the special list of the Magazine. Perhaps, however, bank clerks are scarce in Oklahoma, and promotion comes speedily. Ernest was previously, we are told, a clerk in a real estate office.

A delightful little story was told by Dr. Hoskin at the meeting of the Bank of Commerce to illustrate the strong esprit de corps which animates the 814 employees of that extensive concern, and how personal an interest even the youngsters seem to acquire in its work. He had a messenger in his office, aged about fourteen, who left him, by consent, to go into the employ of the Commerce. Occasionally he would call at Dr. Hoskin's office. One day the Doctor said to him: "Well, George, how are you getting on over at the bank?" "Pretty fairly, sir, thank you." was the reply. "We are very busy just now." "Oh, indeed," said the Doctor, "how is that?" "Well, you see, we are taking over another bank away down about Halifax." The boy deemed himself just as much a part of the machine as the general manager or the directors. And after all, this is the sense of responsibility, of proprietorship, if you will, that makes clerks valuable and gets them on.

There are more than a thousand bank establishments in Canada to-day. The president of the Bank of Commerce, in his address to shareholders on Tuesday last, stated that more than 150 branches of chartered banks had been opened in Canada during last year. "This brings the total of bank establishments up to about 1,020, as compared with about 700 in the year 1900.'" As to the prudence of opening so many, especially of placing two, three, or four in one small town, he considered it often very foolish competition. It should be remembered by citizens of those places which are clamoring for bank agencies, said Mr. Cox, that, "First, we cannot carry on a bank successfully without a well-trained staff, and we cannot provide bank-managers to order, if the requirements are too numerous at any one time. Secondly, we cannot afford to carry more than a certain number of new, and therefore probably for the time being, unprofitable branches, at any one time. . . . I hope it will be understood that we are not attempting to criticize other banks. We are all guilty and will probably continue so until competition enforces a more sensible policy."

DRY GOODS NOTES.

The International Flax Fibre Company has moved into head offices at St. Joseph, Ont., and is establishing there a factory for the treatment of flax and linen.

It is stated that a firm of carpet manufacturers in one of the English Midland counties intends to invest £10,000 in the establishment of a carpet factory in Canada, to employ a hundred hands.

At the convention in Belleville this week of the Eastern Dairymen's Association, the suggestion in favor of a system of provincial licenses and sanitary inspection in cheese factories was greeted with loud applause.

The German Government is believed to be making overtures looking to the abolition or modification of the Canadian surtax on goods coming from Germany, which has already made its influence felt in no unmarked manner.

The London Times says that two and a quarter tons of whalebone were sold at Dundee for £3,000 a ton. The previous record was £2,800. There is said to be only four tons in stock in the world, all supplies, American and British, having been cleared up.

TORONTO STOCK TRANSACTIONS.

Apart from the strong feeling in Commercial Cable, there has been no particularly striking feature on the local exchange this week. Prices may be said to have been steady, with an apparently improved undertone to the market. Transactions were as follows: Bank of Monrteal, 22 at 249⅜-249½; Ontario, 21 at 125; Toronto, 15 at 225; Merchants, 14 at 150; Commerce, 42 at 151½-153; Dominion, 130 at 225½-225¾; Standard, 10 at 225; Hamilton, 17 at 207; Ottawa, 20 at 208-209; British Am. Assurance, 96 at 97; West. Assurance, 531 at 97-97½; Consumers' Gas, 4 at 209; C.P.R., 2,810 at 46½-47⅜; Toronto Electric Light, 28 at 132-133½; (new) 9 at 130; Can. Gen. Electric 86 at 130-139¾; preferred, 20 at 106; Commercial Cable.: 1,821 at 164-180¾; Rich. & Ont. Nav., 189 at 79-80¾; Toronto Railway, 47 at 98½-99¼; Twin City, 840 at 88½-89¼; Can. Perm. Loan, 512 at 120-121; Sao Paulo, 426 at 87-89¼; Soo (com.), 50 at 58; pref., 350 at 117-119; Dominion Coal, 606 at 67½-70; Nova Scotia Steel, 600 at 79-80⅝; bonds, $3,000 at 104¾; and North. Nav., 59 at 70-73.

—Owing to the severe epidemic of typhoid fever in municipalities surrounding Montreal, the quality of the water used is being severely criticized, for which there appears to be excellent ground. All sorts of suggestions are being made, including the installation of a thorough filtration system capable of purifying the whole supply.

—The bankers of Nelson speak well of the business results of 1903 in that part of the Kootenay District, as compared with several previous years. Mr. Buchanan, of the Bank of Montreal, declares that the hopes of improvement he had formed a year ago have been more than realized, every line of business showing development, which has come about quickly and steadily. With the distribution of the lead bounty, and the reopening of several mining properties, the outlook is very promising. Mr. Heathcote, of the Bank of Commerce, had noted a great improvement in the last six months, and increase in deposits and a prompt payment of trade paper by merchants were especially noticeable. The testimony of customers of the Royal Bank, as given to Mr. Banfield, was that their business was better. The first half of 1904, in the opinion of that gentleman, should show a

gain over the good results of latter half of 1903. The business outlook, in the view of the Imperial Bank authorities, is satisfactory. No lengthy opinion was obtainable by the News from Mr. Lay, who was temporarily out of town.

—If a good beginning counts for anything, the Nova Scotia fisheries should be prosperous during the present year. On New Year's Day, R. and T. Hendober, of Half Island Cove, Guysboro County, took from the boats 158,000 pounds of haddock, making the record for one day for a single firm. They also bought of fishermen at other places, paying out for the day's receipts $2,370.

—Black Bros. & Co., Limited, of Halifax, are much encouraged at the reception their new package codfish is receiving in Quebec and Ontario. The first full carload for Montreal was shipped to-day, and was all sold to arrive. This codfish makes a neat and attractive article, and is meeting with much favor at the hands of the grocery trade. There is a small molasses war on between a St. John firm and a Halifax importing company. The former is offering new crop.

Meetings.

THE CANADIAN BANK OF COMMERCE.

The thirty-seventh annual meeting of the shareholders of The Canadian Bank of Commerce was held in the banking house on Tuesday, 12th January, 1904, at 12 o'clock.

Among those present were:

Wm. Cook, Carrville; Rev. Wesley Casson, J. W. Flavelle, Henry Beatty, Wm. Ross. Hon. George A. Cox, Col. Mason, C. M. Gripton, St. Catharines; John Hoskin, K.C., LL.D.; F. J. D. Smith, Newtonbrook; Mrs. F. J. D. Smith, Newtonbrook; C. S. Gzowski, Robert Kilgour, Rev. Dr. Warden, James Hedley, Frederick Wyld, James Crathern, Montreal; Robert Thompson, A. V. Delaporte, A. Kingman, Montreal; Rev. Dr. Armstrong Black, Ed. Cronyn, Melfort Boulton, W. B. Hamilton, G. W. Yarker, John Massey, Thomas Walmsley, Wm. Garside, Chas. Bonnick, E. R. Wood, H. H. Fudger, F. C. Bruce, Hamilton; J. A. Bruce, Hamilton; J. J. Kenny, W. Prendergast, W. T. Boyd, E. Saunders, David Smith, W. A. Murray, Montreal; A. W. Anglin, E. H. Bickford, Walter Cassels, K.C.; Samuel Nordheimer, C. D. Warren, Col. Pellatt, Robert Cassels, Rev. Dr. Briggs, J. S. McMaster, David Kemp, J. W. Langmuir.

The president, Hon. George A. Cox, having taken the chair, Mr. F. G. Jemmett was apointed to act as secretary, and Messrs. Melfort Boulton and E. Cronyn were appointed scrutineers.

The president called upon the secretary to read the annual report of the directors, as follows:

REPORT.

The directors beg to present to the shareholders the thirty-seventh annual report covering the year ending 30th November, 1903, together with the usual statement of assets and liabilities:

The balance at credit of profit and loss account, brought forward from last year was		$ 152,821 07
Surplus derived from purchase of assets of the Halifax Banking Company, as per statement at foot is		293,028 38
Net profits for the year ending 30th November, after providing for all bad and doubtful debts amounted to		1,004,217 31
		$1,450,066 76

Which has been appropriated as follows:

Dividends Nos. 72 and 73, at 7 per cent. per annum:		
For the year on $8,000,000	$560,000	
For six months on $700,000, new stock	24,500	
		$ 584,500 00
Transferred to Rest account, after the amalgamation with the Halifax Banking Company		500,000 00
Written off bank premises		185,007 62
Transferred to pension fund (annual contribution)		15,000 00
Balance carried forward		165,559 14
		$1,450,066 76

THE RESULT OF THE PURCHASE OF THE ASSETS OF THE HALIFAX BANKING COMPANY IS AS FOLLOWS:

Surplus of assets over liabilities, at our re-valuation		$1,039,028 38
Paid to shareholders in cash	$ 6,000 00	
Transferred to pension fund to provide for claims of the staff of the Halifax Banking Company	40,000 00	
Credited to capital account for 14,000 shares new stock issued to the shareholders of the Halifax Banking Company	700,000 00	
		$ 746,000 00
Balance transferred to profit and loss account		$293,028 38

The entire assets of the bank have been, as usual, carefully re-valued, and all bad and doubtful debts amply provided for.

The directors have to report another satisfactory year in the matter of profits, and after adding to the ordinary earnings of the bank the premium arising from the new stock issued to the shareholders of the Halifax Banking Company, namely, $293,028.38, we have been able to add $500,000 to the Rest, and to write off bank premises the sum of $185,007.62.

During the year the bank has opened new branches as follows: In Ontario at Rainy River; in Manitoba, at Elkhorn, North Winnipeg, and Portage la Prairie; in the Northwest Territories, at Innisfail, Ponoka, Prince Albert, Red Deer and Regina; in British Columbia at East Vancouver; and in Nova Scotia, at Sydney. It has also assumed the offices of the Halifax Banking Company at the following places: Sackville, and St. John, in New Brunswick; and Amherst, Antigonish, Barrington, Bridgewater, Canning, Halifax, Lockeport, Lunenburg, Middleton, New Glasgow, Parrsboro', Shelburne, Springhill, Truro and Windsor, all in Nova Scotia. The branch at Lockeport, N.S., taken over from the Halifax Banking Co., and that at Sandon, B.C., have been closed.

The various branches, agencies, and departments of the bank have been inspected during the year.

The directors have again pleasure in recording their appreciation of the efficiency and zeal with which the officers of the bank have performed their respective duties.

GEO. A. COX, President.

Toronto, 12th January, 1904.

GENERAL STATEMENT, 30th NOVEMBER, 1903.

LIABILITIES.

Notes of the bank in circulation		$ 7,880,547 68
Deposits not bearing interest	$17,323,760 67	
Deposits bearing interest, including interest accrued to date	45,459,894 80	
		$62,783,655 47
Balances due to other banks in Canada		138,820 91
Balances due to other banks in foreign countries		367,407 45
Dividends unpaid		1,398 67
Dividend No. 73, payable 1st December		304,500 00
Capital paid-up	$8,700,000 00	
Rest	3,000,000 00	
Balance of profit and loss account carried forward	165,559 14	
		$11,865,559 14
		$83,341,889 32

ASSETS.

Coin and bullion	$2,564,064 39	
Dominion notes	3,367,241 75	
		$ 5,931,306 14
Deposit with Dominion Government for security of note circulation		391,400 00
Notes of and cheques on other banks		3,464,629 89
Balances due by other banks in Canada		18,905 19
Balances due by agents in Great Britain		3,409,164 94
Balances due by agents of the bank and other banks in foreign countries		913,772 21
Government bonds, municipal and other securities		6,958,076 23
Call and short loans		9,908,590 61
		30,005,845 21
Other current loans and discounts		50,584,275 94
Overdue debts (loss fully provided for)		353,474 02
Real estate (other than bank premises)		167,307 99
Mortgages		166,056 93
Bank premises		1,000,000 00
Other assets		74,929 23
		$83,341,889 32

B. E. WALKER,
General Manager.

In moving the adoption of the report, the president said:

PRESIDENT'S ADDRESS.

It gives your directors great pleasure to lay again before the shareholders a report showing handsome profits and most substantial growth. The profits again exceed one million dollars, and while in view of the increase in capital for a part of the period the percentage is less than last year, still it exceeds 12 per cent. on the average capital of the year. In addition to these ordinary profits, we have to deal with the sum of $293,028.88, being the profit derived from the purchase of the assets of the Halifax Banking Company. Out of this total we have transferred to the Rest Account $500,000, and we have expended on bank premises, out of the year's profits, the large sum of $185,007.62. After making our usual annual contribution to the Pension Fund, the balance of the Profit and Loss account carried forward amounts to $165,559.14. It will be observed that out of the surplus in the assets of the Halifax Banking Company we have provided $40,000 in order to place the officers of that bank, who have been fully admitted to our staff, on an equality with their fellows in our Pension Fund. But for this the profit on the purchase would have been $333,028.38. The expenditure on bank premises, which will probably be considerable for each year during the present period of rapid growth, has been unusually large this year on account of the addition and the improvements made in our Head Office building.

The increase in the total of our assets is about $10,500,000. Towards this the Halifax Banking Company contributed $5,870,000, and the balance represents the growth of our ordinary business. Our bank note circulation shows an increase of $512,505, but this is more than balanced by the circulation of the Halifax Banking Company, now either assumed in our account or replaced by our notes. In past years many banks, whose capital did not afford circulation sufficient for their actual business, borrowed or hoarded our notes in times when circulation was urgently needed. This year, owing to the large increase in the capital of many banks, most of them have been able to supply their own wants, and thus the maintenance of our circulation at last year's level indicates sufficient growth in our own business to overcome this use of our notes by other banks.

This has been another year of rapid expansion in banking in Canada, especially if we judge by the number of new branches opened. Over 150 new offices of Canadian banks have been created during the year. This brings the total of bank establishments up to about 1,020, as compared with about 700 in 1900. No new banks, however, commenced business during the year and by absorption the total number of banks is even slightly reduced. To what extent the opening of new branches is being carried beyond prudence it is not easy to say. That the country still desires the opening of branches in very many places where there is satisfactory promise for the future but inadequate banking facilities, is certainly true, but the problem which we have to consider is at least two-fold. First, we cannot carry on a bank successfully without a well-trained staff, and we cannot provide bank-managers to order, if the requirements are too numerous at any one time. Secondly, we cannot afford to carry more than a certain number of new, and therefore probably for the time being, unprofitable branches, at any one time. The chief fault on the part of the banks seems to be in the distribution of the facilities they have to offer to the public. People are well pleased when first one and then two, three and four banks open branches in their particular town, but unfortunately this often very foolish competition has not only the effect of making profit impossible for the banks in the particular place, but of making it impossible for some of these banks to put the wasted facilities in this town at the disposal of some other place where there is no bank at all. I hope it will be understood that we are not attempting to criticize other banks. We are all guilty and will probably continue so until competition enforces a more sensible policy.

While our statement shows that we have been prosperous, and our general manager, in the summary of business conditions, about which he will speak to you in a few minutes, sees no reason to doubt the continuance of at least reasonable prosperity, still the year has been one of unusual anxieties, requiring on the part of your directors and the general management the exercise of great prudence. Not to aid in a too rapid expansion, and yet not to check a legitimate expansion, is clearly our duty, but it is one requiring the exercise of constant study and anxiety. We have had a year unusually free from the losses attending the business of lending money, but we have come to the end of a year almost unparalleled in shrinkage in the quotation value of almost all securities, and in this shrinkage the most important relatively has been that of British Consols, of which we hold a considerable amount. In view of our very large holding of various classes of securities, we are glad to be able to state that we have provided whatever was necessary to write every security to the quoted value at the date of our statement. Were it not for the necessity of making this provision, we would have been able to show profits considerably larger than last year.

Apart from the decline in the prices of securities our greatest anxiety during the year has been in connection with the money markets of the world. There seemed to be a conviction that in view of the discrediting of so many United States stock-exchange securities and of the quantity of undigested securities carried by the banks in eastern reserve cities, these banks would be unequal to the demand made in the autumn for carrying the western and southern crops to market. This conviction was noticeably strong in London and seemed to materially influence opinion there. We, however, have steadily hoped that the warning of the spring would cause that adjustment of affairs all over the country which would avoid in the autumn what everybody dreaded and what everybody had in mind, and this is what did take place. When we compare the condition of the banks in the reserve cities with that of a year ago, we find that while the resources of New York, Boston, and four middle and western cities declined, Chicago, just about held its position, and nine other reserve cities, mostly western, increased their resources.

In London many influences besides the condition in New York have been apparent. The sudden rise in the bank rate following a period when the money market seemed to be righting itself, and the great fall in the price of Consols and Transvaal war loan issues, accompanied naturally by the sale of large blocks for foreign account, all seemed to show that Great Britain had perhaps not felt the full cost in money of the war until now. With the stoppage of new flotations, at least of the speculative kind, and the gathering of the results of the year's industry unaccompanied by violent expenditures on capital account, we must hope that the London money market will gradually improve. Although the drought is over and the business outlook in Australia is now much better, the new Government and the various States are making demands on the London money market which are seriously large, while in South Africa there has been a collapse of the inflated trade which followed the establishment of peace, and it is thought that business will be very dull for some time to come. Whether our credit will be aided by the contrast we present both in prosperity and in the extent of our demands on the London money market, or not, this much is clear, that it should be, and that we should do as little as possible to impair the high standing to which we are justly entitled at the present time.

The general manager then spoke as follows:

GENERAL MANAGER'S REMARKS.

In coming to the end of the year we must all be conscious that while in most respects it has not been different from other recent years of prosperity, in certain phases it has been sufficiently different to constitute a check upon the rather violent pace of our industrial movement. Whether it is the banker's natural function or not, it is his habit to obtrude his warning in the face of the business world, and if we review what was said in this room a year ago we have little cause to change the opinions then expressed. We have had a year in which the general results of agriculture, pasturage, dairying, mining, lumbering, trading and manufacturing have been excellent, and unmistakably in the matter of national prosperity we are well forward in the race as compared with any previous time. Nor is it easy to imagine conditions in the near future which will prevent this country from making steady progress in a large way relatively to our past.

But just because our future over a series of years seems reasonably certain, it behooves us from time to time to consider in close detail the causes of our general prosperity and of our occasional reverses. It is well to remember that whether we make or mar the future of this great country we did not create its boundless stores of raw material, and we have only occasion for self congratulation in proportion to the good use we make of our opportunities. During the past year it is clear that we have been sharply warned as to our capacity for hindering rather than aiding the industrial development of Canada. The spirit of speculation, especially of ordinary stock and other forms of gambling on the exchanges, had received a severe check in the autumn of 1902, and during the year following we have witnessed a decline in stock exchange quotations so severe as to sweep away many hastily acquired fortunes, and, what is much worse in the case of very many people who were not rich, the savings acquired in their ordinary labors. That the importance of these losses in relation to the prosperity of the country as a whole is quite small there is little doubt, but this fact does not ease the smart to the individuals who have to bear it. We can only hope that the lesson will last for a few years at least, and that we may rest satisfied with a prosperity more humdrum perhaps, but more conducive to real happiness and national well-being. The causes of this check to speculation are of course, not entirely local, and it is not a mere coincidence that we suffer at the same time as our neighbors. It is not even due in as large a measure as some people suppose, to the connection of our stock and produce exchanges with the exchanges of the United States, and to the international aspect of some of our industrial movements. As in the case of any other violent and long

continued movement, nature demands a change toward the equilibrium sooner or later, and the main causes of this change in the United States and Canada are two, viz,—the gradual disappearance of money available for being fixed in capital expenditures, and the forcing of the cost of production of almost all articles to too high a point, the disturbance in the value of money being the sign of the one and the strikes and general labor troubles of the other. If in addition to these two causes of liquidation we were required to bear that of bad crops, a period of depression—of bad times, in fact—would be almost inevitable in parts of North America. But although the returns from all kinds of agriculture and from pastures are not quite as good as usual, we have results sufficiently good to warrant the belief that bad times are not as yet upon us.

However, unless we propose to accept the lessons which flow from exploded speculations, excessive promotions of new or re-organized industrial ventures, and excessive demands on the part of labor, we have no good reason to suppose that we are to be spared the natural consequences. And it should be borne steadily in mind that whether we contribute much or little to such an end, forces at work in the United States may bring about a general decline in prices which cannot fail to hurt us severely.

EASTERN CANADA.

In speaking a year ago on the subject of our manufacturing industries, we dealt with the matter so fully as to make it impossible without wearisome repetition to do so again this year. There has been again a quite extraordinary increase in the quantity of goods manufactured, a greater difficulty than ever, during a portion of the year, in securing sufficient labor, and no apparent diminution in the buying power of our people. The feature referred to last year of United States manufacturers establishing additional plants in Canada, or establishing manufacturing plants here in preference entirely to their own country, has been going on with scarcely lessened pace. The export trade of our manufacturers has continued to increase. Only in iron and steel and in cotton and woolen manufacturing are we facing unusually difficult problems, and but for the fall in prices we would doubtless have mastered the making of steel at a profit.

But if, as it seems probable, we are to witness a general decline in prices, we must not be slow to recognize what this may mean. As we said a year ago, we must hold our own against a nation fifteen times as large in people and in industries. We cannot stand again, as we have been forced to in the past, the process of absorbing a large part of the surplus product of the United States. It is not a question of which fiscal policy we like, it is a question of holding our own in a time of war. It will only be industrial war, it is true, but it may be as fierce and unrelenting as ordinary war, although the results cannot be so terrible.

Deeply interested as we are in Mr. Chamberlain's proposals, the vital question in tariffs for us at the moment is in connection with our nearest neighbor. After we have protected ourselves against the use of this country as a slaughter market for the United States, we must in some measure try to meet Mr. Chamberlain's proposals. In what particular manner we can best show our sense of the value of the integrity of the British Empire, and what we should be prepared to do to sustain that integrity, are subjects which we cannot attempt to deal with in a mere review of business conditions.

The output of our coal mines is steadily increasing, and the prices continue to keep high enough to produce very handsome profits. This industry is now on such a large scale that we must not expect to get through a year without some local check on the volume of production as against the increase elsewhere. The fire in the mine at Glace Bay was doubtless of unusual importance in this respect, but its effect in the stock market, where the daily features of the fire were used with shameless disregard of truth, was out of all proportion to its actual significance.

The conditions of the lumber trade are not very different from last year. Prices remain high, the cost of production quite keeping pace therewith. Strikes in the building trade undoubtedly affected the demand somewhat, but on the other hand the scarcity of money may lessen the quantity cut in the woods this winter. On the whole, the conditions as to supply and demand seem sound, but the prices at which everything connected with the trade is held, are so high as to be somewhat disturbing. At the recent sale by the Ontario Government, however, experienced lumbermen paid such sums per mile for limits as would hardly seem warranted unless we are to face, permanently, new conditions as to the value of all lumber products. We are glad to see that the Government of Ontario, which has just had such ample evidence of the value of our remaining timber, is about to aid in forestry research in our Provincial University. We can but hope that the work of the Canadian Forestry Association, of the Provincial Directors of Forestry, where such an office has been established, and of forestry departments in our universities, may some day bring large practical results in the way of further segregation of the country as to timber preserves and in replanting on an extensive scale. The large revenue derived from annual cutting on quite small timber reserves by European governments, should tempt our politicians if they have any concern for their successors in office, or for the people.

In the Maritime Provinces the forest fires during the past summer will doubtless cause an increase in the cut this winter because of the necessity for prompt work in burnt areas, and this, in view of a probably restricted demand at home and abroad, seems unfortunate. The cut of New Brunswick for the past year was about 130,000,000 feet, and the business has been as a rule quite profitable.

Apart from manufacturing, which in the important centres in the Maritime Provinces, where it is carried on largely, has been as profitable as in Ontario and Quebec, the other results of industry have been varied. Fishing, even more important here than in British Columbia, has been unsuccessful, the catch being very small, and, notwithstanding an increased price, the result to each individual quite inadequate. On the other hand, the fruit crop is unusually large and the results most satisfactory. The area devoted to agriculture and pasture is unfortunately small. The returns have, however, been good, and we can but hope that, year by year, the Maritime Provinces will become less dependent on the other parts of Canada in this respect. The mining of gold, although not very large, is now a settled industry, increasing in volume, and a source of considerable profit. On the whole, this part of Canada shares satisfactorily in the present prosperity, and the fact is reflected in the steady growth of its bank deposits. If the credit system, which has decreased so much in Ontario, could be gradually curtailed in the Maritime Provinces, it would doubtless conduce greatly to soundness in trade, and it would make the disappointments arising from failure in any branch of industry, such as fishing or agriculture, much easier to bear. It is to be hoped that the active railway building being done and about to be done, and the improvements to ocean ports, will not only increase the prosperity of these provinces, but bring them for all purposes of communication nearer to their Western brothers.

In Ontario the farmers have had another year of pronounced good fortune. In detail the circumstances were somewhat different from last year, but the results were similar. The crops of cereals, fruit, etc., were generally abundant and prices satisfactory. The result in cattle was marred by a sharp drop in the price, but in the condition of the pastures, in quantity, and especially in the steady improvement in some parts in the breeding of both cattle and horses, the year was one of advancement. In hogs the farmers have made money, as in most recent years. The season has been even unusually good for the dairymen. In cheese the quantity and quality have been all that we could wish. The price has, however, fluctuated uncomfortably, owing to the varying conditions of stocks on hand in Great Britain and Canada for the particular month by which the cheese is known, and, in view of the apparently larger stocks on hand and present low prices, the result to the dealer for the year is not yet quite clear. The cultivation of beets for sugar making at a price and in quantities satisfactory to both the farmer and the sugar maker is yet in an experimental stage in those districts in Ontario where an effort in this direction is being made. Labor of all kinds, in the country, as well as in the towns, has been unusually hard to obtain, even at the prevailing high wages.

As an example of how farmers are paying their debts, one of our Ontario managers reports that out of 757 notes for agricultural implements held at this branch for collection in October and November, only 49 remained unpaid at the close of November. The payments on mortgages continue to an extent not entirely pleasing to the lender. Perhaps nothing shows the improvement in the conditions surrounding country life in Ontario more than the paving and general public and private improvements in many towns which depend almost entirely on the trade of the farming community.

If we judge our Eastern trade by Montreal, our largest city and chief point of distribution and as yet our most important port, we find that the business of the city and adjoining country shows sales the largest on record, with few losses from bad debts. In manufactures the increase has been quite as marked a feature as in Toronto. The customs dues largely exceed the previous year, while the export trade is the largest yet recorded. Montreal, in exports, imports, and in the payment of customs dues, is the port at which about 30 per cent. of the entire foreign trade of Canada is done. The railway and water communication of Montreal with the interior is so much shorter than that of other North American cities that we are apparently getting at last a fair share of the grain carrying trade, although it is to be hoped that we have not more than entered upon the race as yet. The Lachine Canal returns show that 6,155 vessels passed up and down during the past season, as compared with 5,276 the previous year. The increase in the freight carried was still better, being over 50 per cent. We are now carrying nearly all our own grain and a fair quantity of grain grown in the

United States. The quantity of our own grain which reached the seaboard via the United States, from the head of our lake system, was the smallest on record. The abolishing of the canal tolls, the enlargement of all port facilities at Montreal and what is now being done to further increase them, the steady improvement in our railway tracks and equipment, and the increase in our steel tonnage, all help to make this possible, but we must hope that the Dominion Government will continue to provide whatever money is necessary for expenditure on the St. Lawrence route until all objections, whether well founded or the result of prejudice, have been removed.' Whatever we may hope to do in moving grain grown in the United States, we should, with the knowledge that the crops in our Northwest will increase enormously in the immediate future, determine to do at least what is necessary to success in carrying all Canadian grain by Canadian railways and lake routes to a Canadian port, and thence to Europe in Canadian vessels. We were very proud a few years ago to be able to state that the foreign trade of Canada had reached a million dollars a day. For 1902 the imports were 203 millions and the exports 212 millions. For 1903 the imports were 234 millions and the exports 226 millions. This brings our foreign trade up to 460 millions, a handsome total for five and one-half millions of people. There is, however, the ominous fact for a borrowing people, that we have dropped from the position of an excess in exports, held for so many years, to one o excessive imports. It is to be hoped that the check administered to speculation and extravagance may soon correct this feature. If, however, we indulge in railroad building to a very great extent and do not make our rails and other supplies at home, we cannot expect to keep down our imports.

MANITOBA AND NORTHWEST TERRITORIES.

Turning now to our great grain and cattle areas, while the year has been very complicated and not easy to sum up accurately, and clearly less satisfactory than the unbounded prosperity of 1902, we have still only progress to report.

In 1902 the average in Manitoba per acre of all grains was 26 bushels, a most generous outcome for that country. This year, the average is only 16.42 bushels per acre, and the grain, owing to the great storm and other climatic features, less good in quality in many parts. Many localities, however produced quite as much per acre as last year. When the production of the Territories is added and the additional acreage and the better price taken into the account, the total money result is not very different from last year, although divided among a larger number of people.

Our comparison of the two years, combining the figures for Manitoba and the Territories, is as follows:

	1902.	1903.
Wheat, bus.	64,000,000	50,000,000
Oats, bus.	50,000,000	40,000,000
Barley, bus.	13,000,000	11,000,000
Flax, bus.	618,000	580,000

and we estimate that after allowance is made for the country mills and for seed wheat, there is about 36,000,000 bushels of wheat for marketing. Our estimates of last year were exceeded by about 10,000,000 bushels. This year they have been made as usual, independent of Government reports. Our figures for Manitoba, when compared with the since published estimate of the Department of Agriculture, are practically the same.

Notwithstanding this large falling off and what we shall have to say of the cattle trade, the whole country from Winnipeg to the foothills has prospered in almost every species of trade and industry. Our Winnipeg manager, in considering the present position of the Western farmer, says:

"He has within the past two or three years improved his position by going into mixed farming. The cattle, horses, hogs, sheep and all classes of animals so necessary to the Eastern farmer have increased very rapidly in numbers on Western farms, and as regards grade and breeding compare equally with any part of Canada, so that the Western farmer is not now so dependent upon a big grain crop as formerly, or as the majority of Eastern Canadian people suppose. He has also been somewhat cured of the craze for more land, and is directing his attention more to improving what he already holds, in the way of better buildings for his live stock and more home comforts for himself and family."

Nothing, perhaps, shows more significantly the growth of this part of Canada than the land sales, and the development of the chief city, Winnipeg. The actual number of acres sold is less than last year, but whereas last year large blocks changed hands with little relative settlement thereon, this year the sales are mainly for actual settlement, while the prices obtained are 15 to 20 per cent. higher. Of course what we want is settlement, not speculation in wild land. The new settlers who came into the Northwest in 1902 numbered 72,800. This year, estimating December, the total reaches 118,000. Winnipeg as a distributing centre grows rapidly, building exceeds even what seems prudent. electric power, an inestimable boon to a prairie city has been secured, and while signs of manufacturing are not large still effort in this direction is being made.

In Calgary, Edmonton, Medicine Hat, and in the many smaller towns of Alberta, there is a great deal of activity in building, and indeed steady improvement in this respect is the rule throughout all of Manitoba and the Territories. The cattle trade, however, on which in the ranching districts so much depends, has been affected by the sharp fall in prices and by other factors which had not to be considered a year ago. A very severe storm caused a considerable loss in young animals and a greater rainfall than usual prevented the grass from becoming properly ripened, resulting in the cattle being less firm and less fat than they should be. Freight facilities have been insufficient and freight charges too high under the circumstances. In consequence many ranchers have not sold freely and there may be an oversupply later which may affect profits unfavorably for a year or so. The year has also been a bad one for the shippers who have lost heavily. Some idea of the growing importance of our cattle trade will be gathered from the fact that in 1877 our shipments from Montreal were 6,940 head, while in 1903 there were shipped 147,216 head. In some of the dry districts ambitious efforts at irrigation are being put forth and having regard to what has been accomplished in the United States, we shall look with keen interest for the outcome of these ventures.

BRITISH COLUMBIA.

In British Columbia the most noticeable feature has been the rapid development of the lumber industry. The demand from the Territories, as well as elsewhere, has been unprecedented, and a trade, which a few years ago was small in proportions and most unsatisfactory as to profits, has now reached figures which almost create the feeling that there may be an over-production. The mills, except on the Coast, are as a rule small, and to some extent the geographical conditions may not enable this condition to be changed readily, and yet a period of depression with a narrower profit would surely threaten the existence of many of the present ventures. Licenses to limit holders are being secured for large areas, and at a considerably increased fee per square mile, and there promises to be great activity and consequently great competition in this class of business.

In coal mining there has been great prosperity, despite the curtailing of the possible output by strikes in some of the collieries. In the Crow's Nest collieries the output has nearly doubled during the past year. On Vancouver Island there would have been a handsome increase but for the labor troubles, which practically lost to the mines some foreign trade which for the time being had to go elsewhere.

In copper-gold mining there is a quiet but steady progress, the actual mining and smelting on a paying basis in the Boundary district being larger than at any previous time. Although not yet free from contingencies, such as the failure of coke supply, this kind of mining seems to be established as one of our manufacturing industries in which a handsome return on large investments of capital is assured, provided the skill in management is adequate.

In silver-lead mining, notwithstanding the richness of our mines and some increase in the price of silver and lead, there has not as yet been a substantial recovery from the depression caused by the attitude in 1901 of the smelter trust in the United States, and the tariff of that country, regarding lead, and by the low prices in the markets of the world then ruling for both silver and lead. However, better results are expected next year.

The past year has been one of the most unsatisfactory on record in salmon canning. The quantity packed in British Columbia was only 473,547 cases, against 625,982 for the lean year of 1902, and 1,236,156 for the bumper year of 1901. In the regular course of things it would have been a lean year, but this has been aggravated by the numerous fish traps on Puget Sound and by the Quesnelle River dam, which some think cuts off one-quarter of the best spawning grounds of British Columbia. We have before urged the importance of having expert knowledge in these matters. If the salmon fishing on the Fraser River can be removed from politics and treated fairly as a national industry, it should be for all time to come a great source of wealth. The pack being also small in the United States, prices have risen and old stocks will thus be cleaned out, leaving an excellent trade position for the next catch. There are great possibilities in other kinds of fishing on the Pacific coast, and it is a pity that public interest in our fisheries cannot be aroused and some national sense created of our great wealth in this respect.

Agriculture and fruit growing in British Columbia are increasing, but not as rapidly as should be the case in this wonderfully productive soil. In the city of Vancouver the increase in population and in building is as pronounced as in other large Canadian cities. As a port of entry its growth may be illustrated by a few figures. In 1888 the revenue collected was $63,016; in 1898, $667,842; and in 1903, $1,388,595.

Now that the finances of the province have been put upon a sound basis, and the speculative features of mining have passed away, we can but hope for a cessation of labor troubles, and we may see a growing desire on the part of

the politicians to work together for the province, in order that this great section of Canada may have its fair chance. In any event it would be well for the rest of Canada to realize what an undertaking it is for such a small body of people as British Columbia at present contains to carry on the affairs and build the improvements for such an enormous area of country, the major part of which is practically not even sparsely settled.

YUKON TERRITORY.

In the Yukon Territory we have only to record another year of prosperity. Lack of water during a month or so caused the quantity of gold mined to be a little less than the estimate made in mid-summer, but the total reached in value between 12 and 12½ million dollars. Such additions to our wealth are very gratifying, and the arrival of this gold is still important enough to attract the attention of Wall Street in times of activity in the money market. Canada now provides the bulk of the supplies for the Yukon Territory, and had we been so fortunate in the decision on the Alaska boundary as to secure a port on the Lynn inlet, this route would doubtless have been an important permanent avenue for this large trade. We will now have to consider other quite feasible but very different routes, involving, however, the expenditure of a large amount of money which we might have saved without any loss whatever to the United States.

UNITED STATES.

In the three Pacific Coast States in which we are interested, there has been another year of prosperity, but we think we are not wrong in saying that there is somewhat less confidence as to the immediate future than existed a year ago. There have been large failures in the grain trade although doubtless not caused by natural contingencies in the trade itself, and in salmon canning, some over-building in the cities, a decline in the profits and values in shipping, and some check to production from increased cost of labor. In the lumber business there has been great expansion for a few years and there is now a slight check and a distinct sense of over-production. The wheat crop is less in quantity than last year, and although the salmon catch south of Puget Sound was excellent, in the northern State the results were as bad as with us. On the other hand, these less satisfactory conditions do not exist throughout the whole of the three States, and in some localities the feeling of prosperity rightly or wrongly, is not at all abated. The northern shipping trade done at Seattle is still very large, and in many parts of Alaska there are most important interests being developed. The gold received at that port from the Yukon and Alaska combined was not far short of $15,000,000, and both directly and indirectly this is a great source of prosperity to Seattle. On the whole, while entirely satisfactory conditions have not been quite so universal as in the previous year, the people of these States have added another year of good results to a long period of prosperity.

GENERAL REMARKS.

Looking ahead, while we see no reason to apprehend serious trouble, it is clear that we must await the recovery of the money market, the absorption of the mass of recently created securities and the return of stability in the labor market, before enterprises of the more ambitious character should be encouraged. In the United States there is also the doubt attending the next Presidential election, which always acts as a drag on enterprise, and we regret that once more we have to record a year in which no practical steps have been taken towards the reform of the currency and banking systems.

In Canada most of these deterrent causes are also present. We have, it is true, the advantage of a small population with a great area of new land and of raw material for enterprise to work upon, as opposed to a vast population and little land or raw material not now so owned as to be past the possibilities of the man without much capital. We have in our great problem of transportation a steadily widening horizon in which, as the people understand the wants of our country more, the prospects of the end approaching grow less. To whatever extent the plans at present before the country may in the near future be accomplished, this much is clear: we cannot halt: and we need not expect that any of us will live to see the end of railroad building on a large scale in Canada, as one by one the great districts in which settlement is possible, come into nearer view. During the year one of the most pleasant elements in transportation namely, the reduction of rates, has been a prominent business feature throughout the Northwest.

In conclusion let me say, that I have often contended that, whatever the aggregate wealth of the Canadian people might be, I was sure that as individuals we were quite as wealthy as, if not wealthier than, the citizens of the United States. The Western United States farmer begins to realize something akin to this, and it is also pleasant to notice that so eminent an authority as Sir Robert Giffen confirms this view.

The motion for the adoption of the report was then put and carried.

It was then moved by Mr. John A. Bruce, seconded by Mr. Frederick Wyld:

That the thanks of the meeting are due, and are hereby tendered to the president, vice-president, and other directors, for their careful attention to the interests of the bank.

In moving the resolution, Mr. Bruce said: I need not add anything to this; I think the reports you have heard will convince you that the directors have given the very best attention to the interests of the bank, and that our interests are perfectly safe in their hands.

Mr. Wyld: It is a very high compliment to any gentleman to occupy the position of president of such a bank as this, or to be the vice-president of it, or a director of this institution. At the same time, I think we cannot consider it altogether a bed of roses for these gentlemen after you have heard the statement that Mr. Walker has been able to give us to-day, and when you consider the fact of their having to advise in all these important and large transactions that continue to take place. That they have given it their close and best attention I think is beyond question. I have very great pleasure, indeed, in seconding the resolution.

Mr. Hy. Beatty: I would beg to move, and have very great pleasure in doing so: That the thanks of the meeting be tendered to the general manager, assistant general manager and other officers of the bank for the satisfactory dismonths.

charge of their respective duties during the past tweve

Mr. F. J. D. Smith: It gives me much pleasure, Mr. president, to second that resolution. The very satisfactory report that has been presented is, I think, largely due to the executive of the bank. The directors may plan, but they stand almost in the position of the general and staff of an army. If the army does not carry out the plan skilfully and successfully all the good plans are wasted. We really owe them to the general manager, the assistant general manager, and all the officers of the bank the success of this past year. I can only say that we all have to judge by what we know, and I fancy that it has been the experience of others, I know it has been mine, that in all the intercourse I have had with the officers, from the general manager downwards, it has been a pleasure to me to meet them. I have much pleasure in seconding the resolution.

Mr. Cox: It always gives me very great pleasure to submit this resolution to the shareholders, because no person knows better than myself how well it is deserved.

Mr. Walker: Gentlemen, I think this is the seventeenth time that I have risen to respond to this resolution. I have often remarked regarding a certain perfunctoriness connected with it, but I have always tried to insist—not for myself, or for the leading officers of the staff, but the younger members—that it is a very suitable expression on the part of the shareholders of their satisfaction, if they feel that satisfaction. Mr. Laird will, I hope, have something to say on this resolution; therefore, I shall not say many words. We had a year ago, what we thought was a large staff, 657 men. We have added to it by taking over the Halifax Banking Company, 70 men, and have otherwise increased the staff during the year by 87, thus bringing us now to a staff of 814. I am sure that I can say of this army that, in readiness to face new conditions, to give up comfort in order to assume new responsibilities, in fertility of resource and cheerfulness of purpose, no better staff could exist.

Mr. Laird: In responding to the flattering remarks occasioned by your resolution, I might be permitted to say that the past year has given me the opportunity to make the acquaintance of many of the officers and clerks in the service, and it affords me pleasure to testify to the zeal and intelligence characterizing their labors in the service of the bank. With the acquisition of the Bank of British Columbia and the Halifax Banking Company, our difficulties in considering the rights of such a large force have been increased, but our aim has been to create an impression of our earnest desire to deal justly and generously with the members of our extensive household. We should like to assure the humblest clerk, and every officer in our bank, that there is no likelihood of any claim to promotion being overlooked. There may be delay in promptly recognizing merit, but only on account of the difficulty of adjusting salaries and positions when it becomes necessary to carry out some well-considered plan for the benefit of the whole service. We are thoroughly convinced that we have exceptionally loyal assistants, faithful in the discharge of peculiarly responsible duties, and the resolution now submitted will be regarded as a generous acknowledgment of their worth. I thank you sincerely for the kind manner in which you have received this resolution, and the remarks that have been made by my associate, Mr. Walker. It has been an inspiration to me, as I am sure it has been to all in the Executive, the kindly manner in which he has received our suggestions made from time to time, and the benefit that we have derived from his wider experience in the management of great affairs.

Moved by Dr. Hoskin,

Seconded by A. Kingman, Esq.:

That the meeting do now proceed to elect directors for the coming year, and that for this purpose the ballot box be opened, and remain open until three o'clock this day, the

poll to be closed, however, whenever five minutes shall have elapsed without a vote being tendered, the result of the election to be reported by the scrutineers to the general manager.

The meeting then adjourned.

The scrutineers subsequently reported the following gentlemen to be elected as directors for the ensuing year:

Hon. George A. Cox, Robert Kilgour, W. B. Hamilton, M. Leggatt, James Crathern, John Hoskin, K.C., LL.D.; J. W. Flavelle, A. Kingman, Hon. L. Melvin Jones, Frederic Nicolls.

At a meeting of the newly-elected board of directors, held subsequently, Hon. Geo. A. Cox was re-elected president, and Robert Kilgour, vice-president.

THE BANK OF TORONTO.

The forty-eighth annual meeting of the stockholders of the Bank of Toronto was held on 13th inst.

In the absence of the president, George Gooderham, Esq., the vice-president, William H. Beatty, Esq., was called to the chair.

Messrs. Charles H. Gooderham and Edward M. Chadwick were appointed scrutineers.

At the request of the chairman, the secretary read the following:

REPORT.

PROFIT AND LOSS ACCOUNT.

The balance at credit of Profit and Loss, on 29th November, 1902, was		$ 93,128 07
The net profits for the year, after making full provision for all bad and doubtful debts, and deducting expenses, interest accrued on deposits and rebate on current discounts, amounted to the sum of	$424,200 36	
Premium received on new stock	454,430 00	
		$878,630 36
		$971,758 43

This sum has been appropriated as follows:

Dividend No. 94, five per cent.	$125,000 00	
Dividend No. 95, five per cent.	142,809 39	
		$267,809 39
Taxes paid to Provincial Governments		4,425 00
Transferred to Officers' Pension Fund		5,000 00
Written off bank premises		36,900 40
Transferred to Rest Account from Net Profits	$100,000 00	
Transferred to Rest Account, premium on new stock	454,430 00	
		$554,430 00
Carried forward to next year		103,193 64
		$971,758 43

REST ACCOUNT.

Balance as on 29th November, 1902	$2,600,000 00
Transferred from Net Profits	100,000 00
Premium on new stock	454,430 00
Amount at credit on 30th November, 1903	$3,154,430 00

The past year has been one of increased activity, the trade of the country has continued to expand, and the resources of the bank have been very fully employed.

Of the new stock heretofore authorized, your directors allotted amongst the stockholders of the bank 5,000 shares, representing $500,000 capital at a premium of 100 per cent., in the proportion of one share of new stock to every five shares of old stock as of record on 30th April last, and 4,780 shares thereof have been subscribed on which the payments of capital have aggregated $454,430.

The average amount of paid-up capital throughout the year has been $2,678,090.

Since the last annual meeting branches of the bank have been opened at Board of Trade Building, Montreal; Guy street, Montreal, and Maisonneuve, in the province of Quebec; Cardinal, Coldwater, Dorchester, Omemee, and corner Queen street and Spadina avenue, Toronto, in the province of Ontario.

GEO. GOODERHAM,
President.

D. COULSON,
General Manager.

The report was adopted, and the thanks of the stockholders were tendered to the president, vice-president, and directors for their attention to the affairs of the bank.

The following named gentlemen were elected directors: George Gooderham, William H. Beatty, Henry Cawthra, William G. Gooderham, Robert Reford, Charles Stuart, John Waldie, John J. Long, Charles S. Hyman, M.P.

At a meeting of the new board, George Gooderham, Esq., was unanimously re-elected president, and William H. Beatty, Esq., vice-president.

THE CENTRAL CANADA LOAN AND SAVINGS COMPANY.

The Twentieth Annual General Meeting of the Shareholders of the Central Canada Loan and Savings Company was held at the Company's offices, in the City of Toronto, on Thursday, the 7th day of January, 1904, at two p.m.

The President, Hon. Geo. A. Cox, having taken the chair, Mr E. R. Wood, Managing Director, was requested to act as Secretary to the meeting.

After reading the notice convening the meeting, the Secretary read the Twentieth Annual Report and the accompanying Financial Statement, as follows:—

The Directors beg to submit to the Shareholders their Twentieth Annual Report for the year ending 31st December, 1903.

The net earnings amount to $166,670.01, equal to 13.33 per cent. on the paid-up capital of $1,250,000.

They were disposed of in the following manner:

(a)	By the payment of four quarterly dividends of 1½ per cent. each being 6 per cent. for the year on the Paid-up Capital	$75,000 00
(b)	By bonus of 1 per cent. for year	12,500 00
(c)	By addition to Reserve Fund	75,000 00
(d)	By balance left in Profit and Loss Account	4,170 01
		$166.670 01

The above addition to Reserve Fund increases same to $700,000, equal to 56 per cent. of the Paid-up Capital.

The balance in the Profit and Loss Account carried forward is $25,694.58.

The Assets have been increased by $247,981.60, and now amount to $6,827,305.99.

The securities, held by the Real Estate Mortgages and for the Loans on Collaterals have been carefully scrutinized and are ample for the advances made against them. The Bonds and Stocks owned by the Company are entered in the accounts at prices well within their market value.

A running monthly Audit of the Company's Books has been made during the year, and the Certificate of the Auditors is attached to the Balance Sheet.

The Inspection Committee have made their regular investigation of all securities held against loans as well as

securities owned by the Company and their report is also appended.

GEO. A. COX,
President.

GENERAL STATEMENT FOR THE YEAR ENDING 31st DECEMBER, 1903.

Balance at Credit, 31st December, 1902	$625,000 00
Transferred from Profit and Loss	75,000 00
Balance Carried Forward	$700,000 00

E. R. WOOD,
Managing Director.

The President, Senator Cox, in moving the adoption of the report, said:

It is gratifying to the Directors to be able to announce in our 20th Annual Report to the shareholders, the results of a successful and profitable year's business. The conditions of the past year are worthy of special mention, for the financial world experienced the reaction that seems to inevitably follow an era of expansion. The shrinkage in the value of all classes of securities has been almost unprecedented, and it is therefore with much satisfaction that we are able to announce, notwithstanding these adverse circumstances, one of the most successful years in the Company's career.

At the close of 1902 we paid our shareholders, for the first time, a bonus of one per cent. in addition to the usual dividend of six per cent. For the year just closed we are able to pay the same dividend and bonus. We are also able, from the net earnings, to add $75,000 to the Reserve Fund. This, with the single exception of 1902, is the largest addition ever made to that fund in a single year. Our net earnings, after providing for interest on borrowed capital and expenses of management, have been $166,670.01, which is 13.33 per cent. on our paid-up capital. The addition made to the Reserve Fund brings it up to $700,000, or 56 per cent. of paid-up capital. The assets have been increased by $247,981.60 and now amount to $6,827,305.99.

In view of the special conditions prevailing during the past year, I feel justified in emphasizing the fact that all the bonds and other securities held by the Company are estimated, in the statement presented, at prices well within their present market value.

In concluding the twentieth year of our existence, it may be well to briefly glance over what has been accomplished. Our paid-up capital has been increased from $250,000 to $1,250,000, and we have accumulated a Reserve of $700,000. Of this Reserve $160,000 has been derived from premiums on new stock issues and $540,000 from actual net earnings in excess of cash dividends and bonuses. The average paid-up capital for the twenty years has been $963,500, and the bonuses of the past two years have brought our average yearly cash dividends up to 6.10 per cent. The average yearly transfers to Reserve Fund have been 3.63 per cent., thus showing an average net earning of 9.73 per cent. on the Company's paid-up capital during its entire existence.

Our business has been developed along three lines: (1) Loans on Real Estate, chiefly in the Province of Ontario, (2) Time and Call Loans on Stocks, Bonds and other approved Collateral, (3) the purchase and sale of Government, Municipal and high-grade Bonds of Steam and Electric Railway, Electric Light, Power and other similar Companies. The latter is an important branch of our business, and has contributed materially to the earnings of the Company.

There are now no less than 3,810 clients directly interested in our success. We have 2,357 depositors, representing an aggregate of $1,137,000, an average of $482 each. 427 holders of Currency Debentures amounting to $1,574,582, an average of $3,680, and 921 holders of Sterling Debentures, aggregating $2,108,498, an average holding of $2,290. Our $1,250,000 of paid-up capital is in the hands of 105 shareholders.

The officers and staff have discharged the duties devolving upon them during the year in a most satisfactory manner.

It is with pleasure and satisfaction I move, seconded by Mr. E. R. Wood, Vice-President, that the 20th Annual Report be adopted, and that it be distributed amongst the shareholders, debenture holders and depositors."

The resolutions appointing the Auditors and Inspection Committee were passed, after which the following gentlemen were elected Directors for the ensuing year:

President, Hon. Geo. A. Cox; Vice-Presidents, E. R. Wood, F. G. Cox; C. D. Massey, E. W. Cox, J. J. Kenny, Rev. John Potts, D.D.; F. C. Taylor, Wm. Mackenzie, A. A. Cox, Robert Jaffray, Sir Thomas W. Taylor, J. H. Housser, Richard Hall.

The following figures, illustrating the progress of the Company since its inception, were submitted:

Year.	Paid-up Capital.	Reserve Fund.	Total Assets.	Dividend Paid.
1884	$ 250,101.96	.....	$ 526,080 38	6
1885	420,000	$38,000	826,101 23	6
1886	500,000	60,000	1,395,345 58	6
1887	500,000	70,000	1,310,223 69	6
1888	500,000	80,000	1,232,428 50	6
1889	800,000	180,000	2,641,810 80	6
1890	800,000	192,000	3,003,696 14	6
1891	800,000	200,000	3,163,873 37	6
1892	1,000,000	250,000	4,186,673 66	6
1893	1,200,000	300,000	5,035,688 09	6
1894	1,200,000	315,000	5,200,830 09	6
1895	1,250,000	325,000	5,454,720 34	6

Certificate of Superintendent of State of New York Insurance Department.

ALBANY, January 2, 1904.

I, FRANCIS HENDRICKS, Superintendent of Insurance of the State of New York, do hereby certify that the **New York Life Insurance Company**, of the City of New York, in the State of New York, **A Mutual Life Insurance Company** having no Capital Stock, is duly authorized to transact the business of Life Insurance in this State.

I FURTHER CERTIFY that, in accordance with the provisions of Section Eighty-four of the Insurance Law of the State of New York, I have caused the policy obligations of the said Company, outstanding and paid for on the 31st day of December, 1903, to be valued on the following basis: Policies known as the Company's three per cent Policies, and all Policies issued since December 31, 1900, being valued as per the American Experience Table of Mortality with three per cent. interest, and all other Policies being valued as per the Combined Experience Table of Mortality with four per cent. interest; and I hereby certify the result to be as follows:

Net Reserve Value of Policies $281,227,489; Net Reserve Value of Additions, $3,374,092; Net Reserve Values of Annuities, $15,760,186. Total, $300,361,767. Less Net Reserve Value of Policies reinsured, $271,420. Total Net Reserve Values, $300,090,347.

I FURTHER CERTIFY, from the sworn report of the Company on file in this Department, that the Admitted Assets are $352,652,047.57.

Reserve Values of Policies as calculated by this Department, $300,090 347; General Liabilities, $5,456,653.95; Additional Reserve, which the Company voluntarily sets aside in excess of the State's requirements, $6,859,193 00; Reserve to provide dividends payable to policy-holders in 1904 and in subsequent years, $32,214,730.84; Reserve to provide for all other contingencies, $8,031,122,78; Total Additional Reserves, $47,105,046.62. Total, $352,652,047.57.

IN WITNESS WHEREOF, I have hereunto subscribed my name and caused my official seal to be affixed at the City of Albany, the day and year first above written.

FRANCIS HENDRICKS, Superintendent of Insurance.

The Detailed Annual Statement of the Company, giving list of securities held, etc., will be supplied on application. Address: NEW-YORK LIFE INSURANCE COMPANY, 346 and 348 Broadway, New York.

OLD CHUM
Cut Plug
Smoking Tobacco
Proves its
Superior Quality.

Sold by all Leading Wholesale Houses.

BUDDHA'S DECALOGUE.

Buddha, the great religious teacher of India, has at the present time about 300,000,000 followers. Condensed into ten short precepts, his doctrines may be given as follows:

1. From the meanest insect up to man thou shalt kill no animal whatever.
2. Thou shalt not steal.
3. Thou shalt not commit adultery.
4. Thou shalt speak no word that is false.
5. Thou shalt drink no wine or anything to intoxicate.
7. Thou shalt avoid all anger, hatred and bitter language.
7. Thou shalt not indulge in idle or vain talk.
8. Thou shalt not covet thy neighbor's goods.
9. Thou shalt not harbor pride, envy, revenge, or malice, nor desire the death or misfortune of thy neighbor.
10. Thou shalt not follow the doctrines of strange gods.—New York American.

—"Say, pa, it says here in 'Lady Clare,' I trow they did not part in scorn.' What does 'I trow' mean?" "That's the poetic way of saying 'you bet.'"

—"And when you have got the number of hours in a working day down to the minimum, what then," asked the manufacturer. "Oh, then we'll go in for a thirty-minute hour," remarked the walking delegate.—Yonkers Statesman.

—The Lancashire cotton trade appears to have come to the conclusion that something will have to be done to put a stop to the injuries caused to their interests by the huge systems of international cotton gambling which have been so conspicuously carried on during the past year or two. We do not know how they propose to work, except by encouraging the cultivation of cotton in parts of the British Empire, but one of their plans is said to be to "reduce consumption." The following report from New York is hard to believe, but such as it is, it says that Daniel J. Sully, the cotton king, who has made $10,000,000 in the great campaign in cotton futures, which recently put the price of this commodity up to 14 cents, the highest in twenty-five years, and which has closed cotton mills all over the country and Europe, and thrown many thousands of men and women out of employment, is raising a fund of $250,000 among the cotton spinners of the United States "to influence" the American press and the American people to accept the high prices of one of their greatest commodities as the inevitable result of conditions created by physical necessities rather than by speculative manipulation, says a morning paper. Mr. Sully is said to have subscribed $10,000 to the pool.

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY
Full Government Deposit Paid.
President:
ALEXANDER SUTHERLAND, D.D., Toronto.
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.

MONTREAL MARKETS.

Montreal, January 13th, 1904.

Ashes.—Actual transactions are very few at the moment. The stock in store is a mere bagatelle, and nothing is coming of any consequence, though buyers quote $6.05 to $6.10 for first pots, and $5.50 to $5.55 for seconds. A proportional quotation for pearls would be about $7, but there has been no business reported for some time.

Cements and Firebricks.—Business in cements is extremely dull; in firebricks some few fair sales are reported. We quote Belgian cement, $1.80 to $2.05; English, $2.15 to $2.25; German, $2.15 to $2.35; Firebricks, $18 to $24 per M.

Dairy Products.—The butter market is rather a quiet one, with just a moderate local demand, and no export enquiry. Winter creameries are quoted at from 19 to 20½c., as to quality; good roll butter brings from 16½ to 17½c., and ordinary dairy 15 to 17c. Cheese rules quiet, but British advices are encouraging to holders, who quote 10⅞ to 11c. for finest fall makes. Shipments for last week, via St. John and Portland, were 18,568 boxes of cheese, and 1,905 packages of butter. Total shipments since close of navigation are 131,302 boxes of cheese, and 9,128 packages of butter.

Dry Goods.—What retail paper came due on the 4th appears to have been very fairly met, one leading house reporting 78 per cent. of its customers' paper as provided for. Travellers are doing well in the way of orders, and spring goods are now moving out quite briskly. The week has developed nothing specially new with regard to values, which all hold steady. Several agents for French dress goods manufacturers are due here next week, and it is expected they will quote higher prices.

Furs.—No very large lots are coming to hand, and until results of the London sales are known there is a disposition to trade carefully. These sales began this year on the 25th inst. We quote prices here for prime skins as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No. 1 choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—Matters have not livened up very much yet since the holidays. Travellers are all pretty much out again and there is a little more doing, but not sufficient to create any change in values. Sugars are steady at late quotations, namely $4 for standard granulated at the factory, with yellows ranging from $3.35 up. The St. Lawrence refinery, which was shut down about ten days, has started up again. Advices from Barbadoes would indicate that the molasses crop will be rather later than usual, and the market will hardly open till toward the end of February. Local quotations are still very firm at 40 to 42c. The tea market is still a quiet one, but no weakening is shown.

Hides.—Beef hides are now beginning to show some little depreciation in quality, though the grub is not very much in evidence as yet. Receipts are not so large as before Christmas, but are still fairly liberal. Prices are un-

altered, dealers buying on the basis of 8c. for No. 1. It is not expected that lambskins will go beyond 75c. this season. Calfskins are quoted at 10c. and 8c. for Nos. 1 and 2 respectively.

Metals and Hardware.—The new furnace of the Londonderry Iron & Mining Co., was blown in last week. The product will be mostly sold in the Maritime Provinces, and comparatively little is expected to come as far west as Montreal. The quotation is made of $19 at the furnace. The quality is said to be quite equal to the old Londonderry brand, which was quite favorably known. Some of the local foundries have started up this week, but are doing little in the way of buying. Holders of the moderate stocks of Summerlee iron in store here quote $22 for No. 1, and $21 for No. 2. Glasgow warrants are cabled at 49s. 10d. This is the figure at which the year closed, as against 53s. 9d., at the end of 1902. The output of Scotch iron for 1903 is figured at 60,000 tons larger than 1902. Domestic bars continue easy at $1.85. Sheets, plates, etc., are without noteworthy change. Ingot tin keeps stiffening and is quoted locally at 32¼c. for Straits. Copper, lead, spelter, etc., are unaltered.

Oils, Paints and Glass.—Travellers are beginning to send in some fair orders, and a good spring trade is looked for. The only change in prices is an advance in turpentine, for which 85¾c. is now quoted, with expectations of a further advance of a cent. We quote: Single barrels, raw linseed oil, 47 to 48c.; boiled. 50 to 51c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 85¾c., single barrels, Olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gal.; steam refined seal, 50 to 55c. per gal.; tinged and brown ditto, down to 35c.; castor oil, 8 cents, for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.50; No. 1, $4.25; No. 2, $4; No. 3, $3.80 to $3.90; No. 4, $3.60; dry white lead, 4¼ to 4½c. for pure; No. 1 do, 4 to 4½c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in barrels, $1.90; do., in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75c.; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

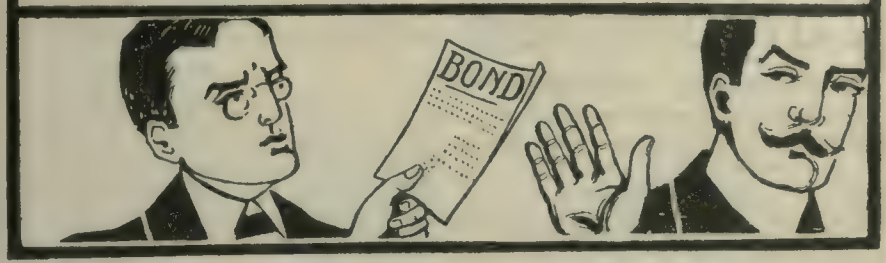
TORONTO MARKETS.

Toronto, January 14th, 1904

Chemicals, Drugs, etc.—A somewhat quiet trade is the order of the day. Some dealers are wondering if the reports of conflict in the Far East will affect the prices of certain drugs. Cod-liver oil is strongly held, but there is not much demand. The trade in quinine is better, as usual at this time of the year. Opium continues dull. In New York the price of refined camphor went up sharply a day or two by 2c. Cocaine has dropped a little.

Flour and Grain.—No net change whatever has taken place in our quotations for grain since last week, but the feeling is strong owing to the disturbed conditions in the East. Some are of the opinion that the prices of wheat are bound to go to considerably higher level in any case owing to the increas-

An Unreasonable Request



Excuse me! I don't go on bonds any more. If you have to furnish a bond write to THE UNITED STATES FIDELITY AND GUARANTY COMPANY. They issue all kinds of Surety Bonds and Draft-Checks for Travellers.

JAMES H. MILNES & COMPANY,

Head Office, 86 King St. E. | TORONTO. | Docks, Foot of Yonge St.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

Managers and Underwriters.

ing world's consumption. The price of flour has also been put up about 25c. all round, though some divergence of views exists as between buyers and holders. For Manitoba flours, Hungarian patents, the regular range of quotations just now is between $4.50 and $4.90, while for extra choice brands slightly more is realized. Millfeed keeps very steady. The millers have raised the price of oatmeal to $4.10 per sack, or a little more in barrels, owing to their scarcity. They claim to have been selling it for some time past at less than a proper value.

Fruits.—A fairly good trade in fruits is being carried on. Oranges are coming in in large quantities, and prices are a little easier, but the demand continues good. Apples are selling well and are also reaping better profits abroad. Prices may be quoted as follows:—Apples, $1 to $2.50 per barrel; cocoanuts, $4 per sack; oranges, Florida, $3 to $3.50 per case; Jamaica, $2.75 per box, $4 per barrel; California navels, $3 to $3.50; Mexican, $2.25 to $2.50; Valencias, ordinary, $4.50; large, 420's, $5; and large, $5.50; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; celery, 20c. to 40c. per dozen; cranberries, $9.50 to $10 per barrel, $1.25 per basket; Spanish onions, $2.75 to $3 per large case, and $1 for small; Malaga grapes, $5 to $6 per barrel.

Groceries.—Sugar quotations remain as before, under an average market. Canned fruits and vegetables are held firmly and some have been advanced in prices, such as peaches, which are now $2.50 to $2.75, blue berries, $1.10; peas, from 87½ as high as $1.40. Canned chicken has made a big upward movement, boneless Aylmer being held at $3.25, at which value duck and turkey also sell. Dried fruits are in fair demand, but there is as yet no striking feature.

Hardware.—For small shelf goods of a seasonable nature, the demand continues almost exceptionally good. A feature of the pig-tin market was a considerable advance. In England it amounted last week to 25s., the rise being attributed to the statistical position

It Leads Them All.

As applied to the gain in net amount of life insurance in force in Canada for the FIVE YEARS ending December 31st, 1902.

Head Office - WATERLOO, ONT.

The Mutual Life OF CANADA

has once more established its right to the above claim. It stands to-day

At the Head Of All

life companies doing business in Canada in the NET AMOUNT IN FORCE GAINED OVER all its competitors during the past five years, as shown by the Government Reports.

The Manufacturers' Life

The Manufacturers' Life Insurance Company has during 1903 once more proved to its many policyholders and friends that it is one of the most progressive and successful life insurance companies doing business in Canada. It has, during the year just passed, surpassed all its previous records by large amounts. The policies applied for reached the grand total of $7,764,542. This is an increase of $1,221,973 over the amount applied for in 1902. The premiums received on this new business amounted to $368,833, or an increase of $62,983 over the previous year. The total premium income showed an increase of over $174,000, reaching altogether the magnificent sum of $1,240,000.

Certainly the policyholders of the Manufacturers' Life have reason to congratulate themselves on the excellent showing made by the company in the year just closed. It is evident, moreover, that there is no better company in which those desiring insurance could place a policy.

and small stocks. A firmer market prevails for copper. Lead is very quiet, some fair-sized orders have been received from Canadian plates and for galvanized iron for spring delivery. Heavy iron material is a little weak, but not much actual change has occurred. Barbed and twist wire have declined a few cents in price.

Hides, Skins and Leather.—There is a certain amount of scarcity in some kinds of hides, and they will probably prevent any particular decline, though trade is not active. Sheepskins are in steady demand, and are quoted a little higher, at 90c. Calfskins are steady. In Chicago, packer hides continue in good demand, the large buyers being in the market for supplies and sales are reported of 35,000 native steers at 11c. Prices quoted at the close, Wednesday, were 11 to 11¼c. for native steers, 11½c. for heavy Texas, 10c. for butt brands, 9¾c. for Colorados, 10c. for heavy native cows and 8½ to 8¾c. for branded cows. Country hides were firm at 8¼c. for No. 1 buffs. The leather trade has been on the quiet side for some time past, though prices remain as before. Improvement is now looked for.

Paints and Oils.—A feature of the trade is the renewed advance in turpentine which is now quoted at 86c. in Toronto. For linseed oil, the demand has improved since the reduction in price, and as a consequence it again went up about a cent. In other articles under this heading, the feeling may be described as fairly good.

Provisions.—Large quantities of butter continue to pour into this market and in a large number of cases, the quality is poor. Creamery is a cent lower for any but the very best grades. Cheese is firmer, and is quoted about ¼c. higher. Eggs continue very high, with great depletion in stocks. For fresh-killed chickens, the demand is good at 10 to 11c. per pound, other poultry is easy. In hog products at the present time not a very active business is going on. Dressed hogs are quoted at $6.30 per cwt. on board cars.

Live Stock.—For both butchers' and export cattle at the market this week, the demand was good. Qualities reigned somewhat better than average and both classes were bought up very readily. For average-sized feeders and stockers there was a rather brisk enquiry. Milch cows of good quality continue to be wanted. Calves sold well, and so did sheep and lambs, notwithstanding the heavy offerings.

Seeds.—Trade is only quiet and prices remain as before, with $5 to $6.25 quoted for red clover, alsike at $4 to $5.25, and timothy at $2 to $2.75.

Wool.—No new feature has developed, there being practically no export demand for Canadian fleece. Pulled wools are in normal demand from the demestic mill-men.

NOTICE

Is hereby given that the Annual General Meeting of the Policy-holders and Guarantors of the

North American Life Assurance Co.

will be held at the Head Office of the Company, North American Life Building, 112-118 King St. West, Toronto, Ont., on

Thursday, 28th January, 1904,

at 11 o'clock in the forenoon,

for the reception of the Annual Report, a Statement of the Affairs of the Company, the Election of Directors, and the transaction of all such business as may be done at a General Meeting of the Company.

Participating Policy-holders have one vote for each $1,000 of insurance held by them.

L. GOLDMAN,
January 13th, 1894. Managing-Director.

Agency Organizers Wanted.

The Royal Victoria Life Insurance Company wants January 1st, 1904, Two Agency Organizers, one for their Maritime Province Division and the other for their Northwest Division. Must have a good knowledge of the territory, with successful experience in canvassing and in selecting and developing agents. A good opportunity for energetic young men.

DAVID BURKE,
General Manager, - Montreal.

Sometimes a revision of policy forms means little. It stands for

THOROUGHNESS

in every detail in the changes that have been made by the Union Mutual—re-arrangement of features, reduction of rates, liberalizing of rights, a contract modern to the highest notch. A policy that looks well, sells easily and pleases long.

UNION MUTUAL LIFE INSURANCE Co.

Mercantile Summary

MR. T. LUDGATE has completed the erection of a large sawmill near Chemainus, on Vancouver Island. This is one of several mills recently put up in different parts of the Province in spite of the talk of depression in the logging business.

A CABLE of Monday last from London states that the Grand Trunk Railway have ordered 15,000 tons of the best English rails at $23.50 per ton as against 25,000 tons bought in the United States by the Canadian Northern Railway at $26, and adds: English makers are still open to fill orders.

J. W. WOODWORTH, of late doing quite a considerable business at Sydney, N.S., in a fruit commission way, is reported insolvent. He is said to have been previously unsuccessful in business at Centreville, N.B.—A small Halifax grocer, S. D. Suggatt by name, has made an assignment of his estate. He owes only $800 to $1,000.

THE Kootenay Valley Company has sold the timber on a 10,000 acre block of land situated between the junction of the Kootenay and Elk rivers in British Columbia to V. Hyde Baker and Messrs. Ryan and McNab, of Cranbrook. The price paid was $50,000. The same parties have purchased 800 acres of land for a mill site located on the banks of the Kootenay river.

THE illuminated heading of the Intercolonial Railway charter, a moose head relieved against birch bark and blue sky, makes an always striking picture. It is well done, too, and is pretty enough to hang in any man's office or dwelling with pleasure to the eye. The calendar reminds us that the route of the Maritime Express on "The People's Railway" is: Leave Montreal at noon daily except Saturday for Quebec, Saint John, Halifax and the Sydneys.

LETTERS patent are issued incorporating Jonathan Hodgson, George Sumner, Thomas E. Hodgson, James Gardner, William Cassils Hodgson and Frank Sumner, merchants, of Montreal, to purchase the general dry goods, small wares, fancy goods and manufacturing business now carried on by the firm of Hodgson, Sumner & Co. in that city under the name of Hodgson, Sumner & Co., Limited; capital stock, $1,000,000, in shares of $100 each. This is an old and successful concern of high repute.

Two small retail dry goods failures are reported from Montreal this week, and in both cases the insolvents had been dry goods clerks, and had not completed a year's business on their own accounts. R. Nadon had for twenty years been employed with the Carsley Co., and started last spring in the east end suburbs with some little savings, but has already had to succumb. W. Hebert is a young man with some clerking experience, who borrowed $1,500 from an aunt, with which he started last August. He, too, has had to place his affairs in the hands of an assignee.

Mercantile Summary.

THE Telford Lumber Company, Ltd., Prince Albert, Assa., capital $380,000, has received a Dominion charter to acquire and operate sawmills and deal in timber.

THE Trinidad Electric Company, which is formed of Nova Scotian capitalists, and which during the past two years bought out several tramway and electric lighting companies in Port of Spain, earned net profits last year of $103,194, or nearly 10 per cent. of the total purchase price. The stock is now on a 5 per cent. dividend basis.

THE White Horse and Alsek Railway Company is applying to the Dominion Government for power to construct and operate a railroad from a point near White Horse, Y.T., westwardly to the international boundary line, thence northerly to Dawson City; also to equip and operate other transportation facilities in connection with the above.

THE tea jobbing firm of S. C. Durand & Co., in existence at Montreal since January, 1900, have been obliged to assign. The liabilities are not heavy, and it is reported the larger half is due to the estate of the late Miss Duncan, with whose brother, the late John Duncan, in his lifetime a large tea importer, Mr. Durand was previously employed.

CALL OPTIONS

Advantages Explained

Options offer considerable advantages to those wishing to operate prudently and successfully in Stock and Mining Shares. They avoid the payment of Fortnightly Differences, and also Contangoes.

GEO. A. STIMSON & CO.,

24-26 King Street West TORONTO, Ont.

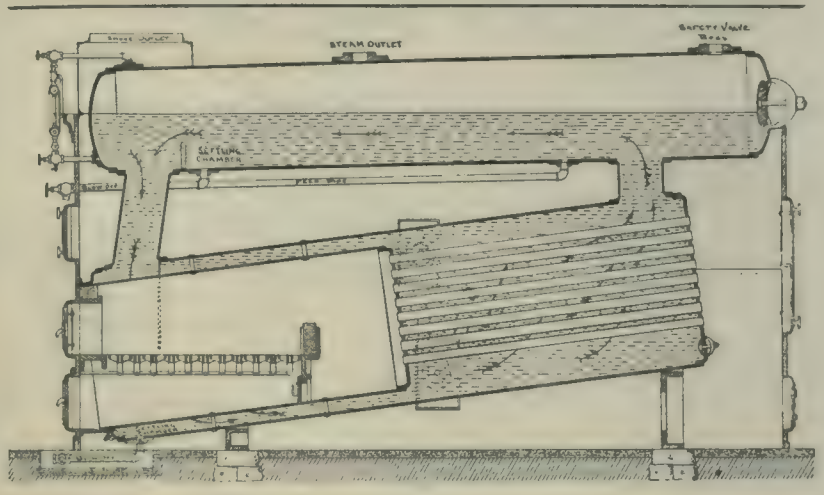
J. L. HORNBROOK, a St. John, N.B., grocer, has suspended, and is said to show assets of only $1,060 to pay liabilities of about $3,000.

A GENERAL dealer at Rexton, N.B., S. Aizanman, has assigned to the sheriff for the general benefit. In November last he was unfortunate in being burned out without insurance, and subsequently tried to arrange a compromise at 40 cents. Liabilities are given as $2,050.—F. R. Jaillet, a barber of the same place, also keeping a small stock of groceries and confectionery, has also made an assignment.

THE Canadian Coal Mining Company, which includes Mr. J. P. Geddes, of New York, and several other United States capitalists, is seeking a charter from the New Brunswick Legislature in order to build a railroad from Coal Branch, Kent County, to the company's mines, eight miles distant, with power to extend to Richibucto Harbor, sixteen miles, and to build westerly to connect with the New Brunswick Coal and Railway Company's line at Chipman. The company has acquired eighty miles of land, in which it is estimated that there are sixty million tons of bituminous coal of excellent quality. The company proposes to ship five hundred tons daily when the road is built, and spend $140,000 in prospecting and developing.

THE following patents were granted last week: H. P. Hilcoat, combination ball and roller bearings; A. J. Burton, band saw clapboard machines; C. H. Hutchings, machines for moulding concrete building blocks; C. H. Hutchings, moulds for the manufacture of artificial stone, and the process of making the same; E. Montreuil, oar locks; J. Montpetit, forming rolls for cans; F. W. Dunn, apparatus for the manufacture of artificial stone; A. G. Ronan, gas engines; W. I. Clark, J. E. Magee, A. G. Baker and A. Ludlam, moulds for making cement posts; E. G. Acheson, art or process of manufacturing earthenware; L. and A. Trottier, method of manufacturing imitation marble; and J. F. X. Trottier, telegraph transmitters.

PAYS FOR ITSELF.



A MUMFORD Standard Internally Fired Boiler requires from 10 to 25 per cent. less fuel than a return tubular boiler.

A saving of only 10 per cent. will cover the cost of the boiler in five or six years.

A MUMFORD BOILER will therefore PAY for itself several times during its lifetime.

N. BENETEAU'S waggon and carriage factory at Windsor, Ont. was damaged by fire last Sunday to the extent of $3,000.

LEVIS, Que. council has signed a contract with Dussault & Power for the construction of a waterworks system within three years. The price is $287,000.

THE returns for customs receipts at Vancouver during the past year amounted to $110,136 as compared with $100,094 for the previous year. The exports amounted to $409,297 as against $376,223 in 1902.

A LETTER from Niagara Falls, Ont., states that Mr. A. J. Wright, representing a Buffalo Syndicate, has purchased some 2,000 acres of land near the Canadian Power Works, which will be laid out in factory sites and suburban residences. The price, it is understood, was something under $500,000.

IT is stated that Canadian and American capitalists have received a contract from the Government of Guatemala to complete the Northern Railway by extending it some sixty miles to Guatemala City, thus bringing the interior of this rich country within four days' journey of New Orleans. It will also transfer practically the whole of Guatemala's commerce from the Pacific to the Atlantic side, which is expected to be of great and lasting benefit.

FROM an annual circular issued by the Allen Steamship Line, we gather that during the year 1903, their vessels carried from Liverpool, Moville and Glasgow to Canada and the United States no fewer than 54,502 passengers. One interesting feature of the report for past years is the fact that in each recent decade, the first three or four years have been prosperous and have been distinguished for their heavy passenger business, while following years have shown marked declines. The company has recently issued a booklet for the use of second and third-class passengers, which is full of information for introducing settlers in Canada.

AN improvement in the mail service between Canada and Great Britain is to be inaugurated in August next. The Allen line is having built two 17-knot steamers and these, together with the Tunisian and the Bavarian will be the regular mail steamers. Quebec is to be the terminal port in summer, but the vessels may continue to Montreal. St. John is to be the regular winter terminal port, but Halifax will be called at both ways. The 17-knot boats are to make the distance between Moville and Rimouski in six days and between Moville and Halifax in six and a half days, while the Tunisian and Bavarian are given seven days for the summer service and seven and a half for the winter. The subsidy to be paid is £2,000 for each round trip of the new steamers, £1,000 for the Tunisian and Bavarian, and £500 for the other vessels in summer and £750 in winter.

Gentlemen's
Fitted Suit Cases.

Mercantile Summary.

It is announced in Montreal that a new asbestos manufacturing company has been formed, with Mr. Wm. Sclater as manager, he having resigned the presidency and managership of the Canadian Asbestos Company.

At the annual meeting of the Rubber Boot and Shoe Jobbers' Association of Canada, held in Toronto, the following officers were elected: President, William Garside, Toronto; secretary, Osler Wade, Toronto; treasurer, Charles Bournick, Toronto. Mr. D. D. Hawthorn is chairman of the Ontario Executive; Mr. Pride, of Amherst, of the Maritime; Mr. Erskine, of the British Columbia Executive; Mr. Autlike, of the North-West. The next annual meeting will be held in Montreal on the third Tuesday of January, 1905.

The announcement of the failure of the old-established grocery and liquor firm of G. M. Wilkinson & Son, of Kingston, Ont., came as a surprise to many. The business was founded something like a half century ago by the late G. M. Wilkinson, who left quite a substantial estate, and his son, H. J. Wilkinson has been the sole proprietor of late years. He is reported to have sunk considererable money recently in running the British American Hotel, as well as in some other speculative ventures. His merchandise liabilities are said to be only about $5,000, but the Ontario bank is a creditor for some $22,000.

On demand, an assignment is made by M. Desilets, of Grande Mere. He is a young man, who began in the grocery line several years ago with the assistance of his father. Latterly he has been attempting something of a jobbing business, with apparently poor results. As he claimed a surplus of $12,000 last August, explanations of how this margin had disappeared might prove interesting to creditors.—J. O. Giroux, of Nicolet, was formerly a bank clerk. Having longings towards trade, with the help of his father, he established himself in the boot and shoe line in 1900, but he has failed to command success, and has placed his affairs in the hands of the assignee.

On the 15th inst., there was a very disastrous fire in Calgary. It started in the furnace room of the Norman Buildings which comprises the new Norman Theatre, and completely gutted that block. The loss is divided as follows: Senator Lougheed, owner of the property, $50,000; J. A. Glanville's dry goods store, $30,000; Wm. Robertson's clothing store, $25,000; Sale's clothing store, $12,000; Kerr and Terrell's grocery store, $8,000; D. J. Young, books and music, $15,000. On the same day a fire took place in the building used as a storehouse of the Brussels wool mills, and an implement warehouse occupied by Frost & Wood, at Brussels, Ont. Loss on building and contents, though the implements were partially saved, about $5.000, insured.

ARE YOU LOOKING FOR

A young man with some years of practical experience in Book-keeping, Banking and General Office Work behind him. Back of this experience is good character and exceptional references.—If you want such a man it may be to our mutual interests to get together. A line to "H. W.," this office, will bring you particulars.

CANADIANS IN THE UNITED STATES.

A book, bearing the curious title "Who's who in the United States," is published by a Chicago firm. Its latest edition contains short biographies of 14,443 people who have distinguished themselves in one way or another in that country. The Montreal Gazette devotes four of its columns to a list of names and descriptions of Canadians who appear in this volume. Many of them have found their way to the top in Uncle Sam's country, but nowhere have they been as prominent as in the academic life of the Unite States. We quote from the article:

Of the 254 names of Canadians in the list no less than sixty are connected with colleges, ten of them as presidents. Heading this list will be found one of the most prominent of the educationists of the continent, President Schurman, of Cornell University. In the teaching division are included such well known men as Dr. Osler, professor of medicine in Johns Hopkins University, of Baltimore; Dr. Barker, professor of anatomy in the University of Chicago; Dr. McMurrich, professor of anatomy in the University of Michigan; Dr. MacVane, McLean professor of ancient and modern history at Harvard, and Prof. Smyth, professor of mining and metallurgy at Harvard. There are no less than 35 who have attained more or less fame as authors, including Bliss Carman and C. G. D. Roberts, the poets; while eighteen others have become editors, among the number being men in charge of influential publications in nearly every section of the country. There are only five railway men on the list, but two of the five are at the very top, James J. Hill, the Great Northern magnate, and S. R. Callaway, at present president of the Locomotive Trust, and formerly president of the New York Central.

Twenty-three have attained success in business life, perhaps the most prominent being Hugh J. Chisholm, president of the International Paper Company. Canada has contributed many notable leaders to the religious life of the United States. Five bishops of the Protestant Episcopal Church were born in Canada. Two Roman Catholic Archbishops, Quigley, of Chicago, and Riordan, of San Francisco, are Canadian born. The Methodist Episcopal Church and the American M.E. Church each obtained a bishop from Canada. In addition the Rev. F. E. Clark, the president and founder of the mighty Epworth League movement, is Canadian born, and so is the Rev. Dr. R. F. Coyle, who presided over the last Presbyterian General Assembly, held at Los Angeles, Cal., last year. Ten other Canadians hold leading pastorates in the principal cities. Canada is represented in the legislative halls of the United States by three Senators, Gallinger, of New Hampshire; Kearns, of Utah, and Millard, of Nebraska, while in the Lower House there are four Congressmen, Canadian born. There are also included in the list five ex-Congressmen and one ex-Governor. In diplomacy the most important Canadian born representative is

THE DOMINION OF CANADA GUARANTEE & ACCIDENT INSURANCE CO.,
TORONTO.
J. E. ROBERTS, - - GEN.-MGR.

R. W. WILCOX & CO.,
Real Estate, Insurance and Commission Agents.
HERALD BLOCK, CALGARY, N. W. T. | CORRESPONDENCE SOLICITED.

Mr. H. G. Squilers, the present United States representative in Cuba, while in the Government service the leading Canadian born representative is Mr. E. C. Madden, the third assistant Postmaster-General, who first saw the light of day in Montreal. There are three retired brigadier-generals of the United States army who are Canadian born, and five judges came from Canada, and an equal number of prominent lawyers. Nor is the stage unrepresented. Clara Morris, Julia Arthur, May Irwin and May Robson were all born in Canada, while there are four male actors on the list."

One of the paragraphs taken from the book we find to be in error. It describes Rev. Charles W. Gordon ("Ralph Connor") as being born in Glengarry County, Ont., but now residing in the United States. The home of Mr. Gordon is in Winnipeg; but we presume the Chicago editor of the volume could not resist placing this distinguished Canadian writer in the list of "American" authors.

THE MANUFACTURERS' LIST.

There has just come to this office a copy of the Manufacturers' List: Buyers' Guide of Canada. The book is the greatest effort yet made to gather and classify the names and addresses of Canadian manufacturers, as well as the character of goods made.

A word must be said regarding the unusually complete manner in which the book is indexed; the index is thorough, and enables one to find the desired article in the least time. This is a very desirable thing in a work of this kind, and the system of cross indexing here employed is most complete. The book contains 570 pages of 7½ by 9½ inches and eleven thousand addresses of Canadian manufacturers, and it should prove of very great value in any office. The price of the book is $5 to the merchant trade only—$10 to manufacturers and others. Any of our readers who may desire a copy may send the subscription to the office of this publication.

FOR GROCERS AND PROVISION DEALERS.

The wholesale grocers' section of the Toronto Board of Trade has elected officers as follows: Chairman, Col. John I. Davidson; deputy chairman, Hugh Blain; secretary-treasurer, Agnes C. Gray; executive committee, John Sloan, W. Ince, Jr., F. W. Humphrey and Thos. Kinnear.

It is stated, though we do not know with how much truth, that the National Society of Millers in England has, after repeated experiments, succeeded in producing a hard milling wheat. Tests on a small scale are said to show it to be possessed of sufficient strength for all practical purposes.

The total pack of salmon on the Pacific coast in 1903 is estimated at 3,814,106 cases, the largest output for any year in the history of the business except 1901 and 1902. In 1901 the total pack was 5,040,961, and in 1902 was 4,259,186 cases. The British Columbia output for last year, however, showed a very considerable decrease, being only 473,547 cases, against 625,902 in 1902.

The pack of canned tomatoes in the United States and Canada now appears to have been larger during the year just past than ever before, as a result of the shortage and consequent high prices of the two previous years. The aggregate is estimated at 10,555,115 cases, of which 397,500 cases were supplied by Canada.

The Eastern Ontario Dairymen's Association re-elected their old officers as follows: President, D. Derbyshire, Brockville; first vice-president, J. R. Dargavel; second vice-president, J. McTavish; third vice-president, L. L. Gallagher; directors, E. Kidd, W. Eager, L. Patten, James Whitton, T. B. Carlaw, and H. Glendenning.

The Imperial Admiralty is expected shortly to call for tenders for a five years' supply of preserved meats and canned goods. Canadian firms desiring to tender are advised to have their names enrolled and to submit samples of their stock.

Reduced Cost of Production

is the goal all are striving for.

One of our Band Mill customers in comparing the **Band** with the **Gang** said:

"It's quality, not quantity, I'm after. I have stood over my men this year and insisted on quality. In selling my cut I arranged for an advance of 25c. per M for every 1% advance in quantity of the cutup and better grades By the use of the Band I have secured 8% advance, which means $15,000 extra profit this season."

Several gangs have been discarded for the Pony Band double cutting, adding much to quality while only slightly reducing quantity. Many hundred single and double cutting bands running in Canada. Simple—easily managed—it's worthy of investigation.

THE GRAIN TRADE.

The market for all kinds of grain is very strong just now, prices having made no appreciable upward movement during the last few days. Winter wheat is quoted at 78 to 80c. per bushel, spring at 74 to 76c., hard, No. 1, at 93c. to 1; Northern, No. 1, at 91 to 96c., No. 2, 88 to 92c., and No. 3, 85 to 90c.—all these quotations being dealers' prices at Toronto. No doubt, much of the strength thus shown is due to the war scare in the East, and to that extent is fictitious. For, unless other powers become involved besides Japan and Russia, which, while it is quite possible, is hardly probable in the near future, there is little intrinsic reason why values should go up at all, at any rate yet awhile. It is true that the Russian supplies to Britain may eventually be stopped, or fall away considerably, but so far this has not been the case. Exports of wheat from Russia, which, according to some authorities two months ago were to have dropped by this time almost to zero, are still going on at the normal rate of about 2,000,000 bushels per week. At the same time it cannot be denied that the present statistical position of wheat in the world's markets warrants firmness of price. A week ago the total supply in sight, including not only the actually visible, but the quantity on passage to Europe from all sources, was a fraction under 62,000,000 bushels, or more than 10,000,000 bushels less than the quantity in sight a year ago. Against this, the Argentine crop promises to be extra heavy. The estimate of the United States Department of Agriculture makes out a deficiency for that country of 13,713,000 bushels of winter wheat and 18,528,000 of spring wheat, compared with the year 1902. But the reports of that body are so often too low that no great amount of confidence is now-a-days placed in them. An actual crop of 5 per cent. higher than the estimates would make it fully as high as that of last year.

Some authorities believe they are warranted in prophesying a general increase all along the line of wheat prices for years to come. The Statist, a London authority, claims, for example, that though the world's production has increased more than 50 per cent. in the last 25 years, the consumption is growing even more rapidly, owing in part to the entry into the field of wheat eaters of the Japanese and other Eastern nations. That paper, apparently, forgets, however, that Canada's resources as a wheat producer are only just beginning to be tapped, to say nothing of Siberia and other countries. It should be remembered, too, that a crop of wheat is not like some articles, requiring many years of preparation and development, but a thing which from beginning to end takes but a bare nine months. Any real shortage and material enhancement of values would be followed by such an extension of planting as might be expected to increase the world's supply by leaps and bounds within a year or two. Not that we do not think fairly high prices are likely to prevail for some time to come, but that the talk of dollar wheat is, to say the least, improbable.

RAILROAD SERVICE IN ONTARIO.

An application of the remarks elsewhere, under the heading of transportation, may be made in the recent partial collapse of the Grand Trunk Railway service, more especially on the branch lines in Ontario. That an era of prosperity and extraordinary activity was rapidly approaching has been patent for years, and indeed has now been actually upon us for a long time. It finds the Grand Trunk trains utterly unable to cope with the traffic offering, its rolling stock insufficient, some of its locomotives leaky and powerless, its freight often weeks upon the road, and passengers hours late in making connections. Surely it would not have been deemed a token of any great rashness on the management's part to have taken time a little more by the forelock; and surely such "daring" would have been rewarded in the shape of hundreds of thousands of dollars of larger earnings.

We observe that Mr. Hays, the general manager of the road, has written to the press giving an account of the great improvements which have been made in the trackage and equipment of the Grand

Trunk Railway. On new steel bridges, suitable for carrying the largest locomotives, no less than $4,000,000 has been spent during the last six years. A hundred and thirty-two miles of additional second track have also been laid in Canada, so that now the Grand Trunk has five times as much double track as all the other Canadian roads together. They have also built 335 miles of additional sidings, 11,723 new freight cars, 127 passenger cars, and 208 engines, at a cost of $10,399,565, besides which a liberal expenditure has been made in station buildings, etc. Mr. Hays cites the above construction works as an explanation for the faulty service which, he admits, has been to some extent given to the road's patrons of late, and goes on to say that, if the Grand Trunk has been worse in this respect than the other lines during the present winter, it has been due to the fact that the tonnage handled is so much greater, and that the number of trains run by it in Ontario is so much larger than upon any other system. Mr. Hays concludes his letter by expressing the hope that with the near conclusion of the vast work of improvement, the public will enjoy a greater measure of satisfaction with the service given than ever before.

A TRANSPORTATION PROBLEM.

Sir Thomas Shaughnessy, in his interesting address to the Canadian Club in Toronto, on Monday, made some remarks on one aspect of the transportation question which, it seems to us, require a little modification. Speaking of the frequent complaints made by the public as to poor railroad service, insufficiency of rolling stock, and so forth, he stated what of course no one will dispute, that in order to make due preparation for a time of great prosperity and growth of traffic, immense sums of money have to be provided, and that if in the meantime the expected development of trade does not take place, a setback is delivered to the finances of the company and incidentally to the credit of the country. This of course is true, and points out the natural disinclination of a transportation company to go too far ahead of actual necessities. Conservatism is well, and optimism which is afterwards proved to have been ill placed is a danger.

But this point is precisely where the call for managerial judgment comes into play. When a railroad or any other company believes that all the signs are in favor of a coming era of great activity, when it prepares for this beforehand, even at an immense outlay, and when in the course of time its belief proves to have been warranted by actual circumstances, the public willingly gives the management credit for great astuteness. Surely, then, the converse applies also. When the era of great prosperity has arrived, and we find that a railway has made insufficient arrangements to take advantage thereof, it is hardly convincing to be told that supposing trade had not developed to such an extent, the company's credit would have suffered. The country at large has only to judge of results in each case. If, on the other hand, the well-formed judgment be deemed worthy of praise, then equally so is the judgment which proves ill-founded deserving of blame.

PROS AND CONS OF MUNICIPAL OWNERSHIP.

In May, 1903, it was resolved by the Ontario Legislature that a committee should be appointed for the purpose of selecting reports on the subject of municipal trading or operation of public utilities, obtaining expressions both in favor or in opposition, and in a general way, collecting information useful towards the formation of an opinion on either side of the controversy. The result of this committee's labors was published a short time ago, and is a voluminous affair as is natural from the wide scope of the subject. No attempt has been made to determine whether the mass of material studied and presented preponderates either in one direction or the other; but, as is mentioned in the preface to a Government report of 240 pages, it is quite likely that advocates of each side will be surprised to learn the strength of the arguments, the weight of the statistics, and the depth of the feeling on the other side.

The arguments are much too lengthy and numerous on both sides to admit of any but the most cursory reference at this time. There can be little doubt that the spirit of municipalizing the public franchises is in the air in spite of the tremendous efforts which have been made to counteract the movement. On the latter side have been arrayed all sorts of people, including not only those whose interests are naturally bound up in those of individual enterprise through hope of personal interest, but those who are opposed to collectionist opinions and aims of all types, ratepayers, who believe that municipalization of industries means higher rates, and all those who have an instinctive distrust of elected representatives in all shapes. Perhaps the taking up of the idea by out and out socialists and ultra radicals of all hues has injured the cause in at least as great a measure as helped it.

Certainly, the experience so far gathered of actual municipal operations, hardly seems to warrant the direful prophecies made by some. For instance, many illustrations are given to show that men elected to positions of municipal responsibility, where ownership was in force, have shown themselves, as a general rule, to be honest public servants and to have worked as hard for the general interests as they would have done for their own businesses. It should be mentioned, parenthetically, however, that most of the evidence presented on this score is from British sources. Much of the reasoning against municipal ownership is based upon its failure in many instances in the past, but even here evidence is presented to show that the admitted failure only applied partially. For example, the city of Bristol (England), loses something like £25,000 per year in the operation of its docks, but this is a loss its citizens would not like to forego, as it is over-weighed by benefits of an indirect nature.

Glasgow is usually taken as the standing example of the working of the municipal ownership. Without making any pretence to exhaust the catalogue, it may be mentioned that:

The corporation supply Glasgow with water, gas, electric light, tramways and telephones; they control eleven public parks and galleries, thirteen baths and wash-houses, a fruit and vegetable market, a dead meat market, a home cattle market, two foreign cattle markets, a cheese market, a bird and dog market, and an old clothes market, four slaughter-houses and offices, four hospitals and one burying ground; they are the owners of 2,488 municipal houses, 78 lodging houses, a family house, 372 shops, 49 stores, 43 warehouses, 43 workshops, 12 halls, two churches, two hotels, one theatre, one studio, one pawn shop, one nursing home, one powder mill, one panorama (site), one laundry, one bakehouse, one golf course, and one Gospel tent; they farm over 1,000 acres of land, where large crops are grown, including all the hay used in the stables of the cleansing department, as well as large crops of oats, wheat, turnips, etc.; they convert the city sewage into solid matter, which they sell to the farmers for manure; they carry on business as market gardeners; they possess stone quarries, and have 900 railway wagons; they build tramcars, reclaim bogs, conduct a civic granary, raise £1,000 a year on the clinker from the refuse cremating furnaces, collect and sell waste paper, and are not above melting and disposing of the solder from the old tin can they find in the dust heaps.

It serves to show, however, the complexity of the principles involved in municipal trading; for even in Glasgow, with so many working examples existing in plain view of all the world, there are those who point that city's experiences out as the acme of successful accomplishment, and there are others who use it but as a moral to adorn a tale of municipal failure. The book referred to above will prove of value both to those who want to have their minds made up for them on either one side or the other, and want neatly put-up arguments accordingly, and to those who seriously wish to thresh out the subject for themselves.

THE BANK STATEMENT.

We present below a condensation of the monthly statement of Canadian banks for December, 1903. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities; average holdings of specie, and Dominion notes, etc.:

Canadian Bank Statement.

	Dec. 1903	Nov. 1903.
LIABILITIES.		
Capital authorized	$97,046,666	$97,046,666
Capital paid up	78,563,236	78,398,733
Reserve Funds	50,598,511	50,374,087
Notes in circulation	$62,539,407	$67,425,586
Dominion and Provincial Government deposits	7,836,641	4,984,636
Public deposits on demand in Canada	120,529,032	120,098,903
Public deposits at notice	279,327,788	278,530,529
Deposits outside of Canada	34,479,937	32,040,968
Bank loans or deposits from other banks secured	863,949	765,878
Due to other banks in Canada	4,155,565	4,559,940
Due to other banks in Great Britain	2,884,279	2,644,917
Due to other banks in foreign countries	1,830,528	1,816,455
Other liabilities	11,475,029	10,147,883
Total liabilities	$525,924,229	$523,015,760
ASSETS.		
Specie	$16,101,019	$15,447,095
Dominion notes	30,941,367	30,464,185
Deposits to secure note circulation	3,130,844	3,130,844
Notes and cheques on other banks	21,686,472	21,675,636
Loans to other banks, secured	886,531	765,877
Deposits with other banks in Canada	6,392 486	6,064,417
Due from banks in Great Britain	9,258,198	14,017,106
Due from other banks in foreign countries	12,703,927	11,225,292
Dominion or provincial Govt. debentures or stock	10,722,900	10,660,750
Other securities	52,868,771	53,267,854
Call loans on bonds and stocks in Canada	39,029,667	39,109,610
Call loans elsewhere	34,991,423	33,221,069
	$238,713,605	$239,049,735
Current Loans in Canada	384,419,677	380,688,705
Current Loans elsewhere	18,616 518	21,208,961
Loans to Dominion and Provincial Governments	2,708,299	2,144,135
Overdue debts	2,229,568	1,983,619
Real estate	779,993	747,402
Mortgages on real estate sold	724,446	724,143
Bank premises	8,969,272	8,895,399
Other assets	5,983,964	6,834,900
Total assets	$663,145,534	$662,277,180
Average amount of specie held during the month	15,140,495	14,497,995
Average Dominion notes held during the month	29,647,360	29,242,649
Greatest amount notes in circulation during month	67,827,377	71,250,776
Loans to directors or their firms	10,878,573	11,316,467

BANK OF NOVA SCOTIA.

A noticeable feature in this bank's statement is the large proportion borne to its total assets by readily available resources. Besides cash in hand or in transit, it has $3,603,000 of bonds held as investments, call loans of nearly $3,000,000 secured by bonds, debentures and stocks, and $1,102,000 secured by grain and other staple commodities—the whole amounting to $15,264,000, or say 52½ per cent. of the total assets. Notes and bills discounted current are about the same as in last statement, while there is $3,000,000 in current loans secured in part by bonds and debentures, in part by grain and other staple commodities. The aggregate of liabilities reaches $29,072,125; of which over twenty millions is for deposits by the public; the circulation is $1,828,885; capital paid up remains at $2,000,000, while the reserve fund is $3,100,000.

The profit and loss account shows the net earnings of the Bank of Nova Scotia in the last twelve months to have been at the very satisfactory rate of 20.58 per cent. on capital. The amount to be dealt with, including $12,025 brought forward, was $423,638; of this sum dividend at ten per cent. absorbed $200,000; the sum of $12,000 was added to officers' pension fund; $70,000 was written off bank premises, and $100,000 added to reserve, making it relatively the largest fund of the kind carried by any Canadian bank. If the Toronto staff of the Bank of British North America, anxious to get out of cramped quarters and into their refitted premises, have during the whole of last year endured the pangs of hope deferred, the like may be said of the Toronto staff of the Bank of Nova Scotia, whose new building has been still longer under way. But happily strikes in the building trades do not last forever, and there is some reason to believe that the handsome white stone structure, 39 and 41 King street West will be ready for occupancy during 1904.

ROYAL BANK OF CANADA.

Another year of good earnings is to the credit of this bank, which has increased its paid capital during the twelve months to three millions. The new stock was issued at $200, instead of the higher figure of the previous year, and 5,000 shares of it at that rate added $500,000 to reserve, making that account

equal in volume to the capital. Net profits were $373,252. The regular dividend is now raised to eight per cent.; after paying which, adding $10,000 to Officers' Pension Fund, and writing $50,000 off bank premises, there were net earnings enough to carry the comfortable sum of $192,705 forward.

Comparing the balance sheet of last year with its immediate predecessor, we find the total liabilities now $25,106,736, as against $21,869,968 then. Deposits are $15,946,000, as against $13,800,000. Circulation has gone up from $1,920,713 to $2,303,518, indicating an active business. Turning to the assets, there is seen to be a very good ratio of those readily available, the amount being $10,922,751. Current loans and discounts are in larger proportion than in the previous statement. The items of overdue debts, real estate, and mortgages are very small, and the amount put down to represent the fittings of forty bank offices, namely $10,000, certainly shows no disposition to over-value assets. The bank premises account shows an increase, as to be expected from extensions of premises. The statement is one of a sound and prosperous bank.

A MODERN BRITISH FETICH.

We suppose it would be almost as much as one's life is worth to question in Britain the all-importance to the country of the manufacturing interests, even though all others should suffer decline and death. In the Eastern States, as well, there has been growing up a sentiment distinctly contemptuous of the value of pursuits other than those carried on in the mill and factory; and, even in Canada, we have a shrewd idea, though we hardly dare express it, that were it not for the huge body of proof to the contrary, expressed by dollars and cents' tables of the enormous value of agricultural exports, there would be some amongst us to express a not altogether dissimilar opinion. In England, however, the idea has become as firmly established in the minds of the people as the National Anthem. Cheap food, the blessing of the manufacturer, the bane of the farmer, has become part of the national tissue, the rock around which all controversies may rage, but against which nobody—not even those who may be ground to pieces under the juggernaut itself—dares to direct any argument. Protectionist, free-trader, reciprocitarian, fair-trader, all alike respect the slogan of cheap food, as they would a clause in the Apostles' Creed itself. It is the sine quâ non which all political parties hold in unquestioned respect. That the agricultural industries of Great Britain have been practically ruined by a blind adherence to the opinion that the manufacturers' path must be rendered easy at all hazards is recognized; but this does not interfere whatsoever; ruin or no ruin to the farmers, cheap food must not be called into question for a moment.

Without wishing to cast doubting eyes on the wisdom of a whole nation, and merely with the idea of discussing the matter in what may be called an academic manner, we would ask, is not this carrying a fetich too far? Is not this boosting of the manufacturing interests, at the expense of the agricultural, likely to work havoc with the whole fabric of the nation in the end? What of the future? Perhaps more actual cash may be made by the larger number of people by a vast increase of mills and factories, and perhaps for the present nothing else matters much; but the mills of the gods grind surely as well as slowly, and generally Nature has her way in the end. What does the depopulation of the rural districts portend for the future? The old solid race of yeomanry, which did so much for the well being of England in the past has largely disappeared; and already the national physique has degenerated to such an extent that the army standard has had to be lowered more than once. Long continued city life from generation to generation, unrelieved by frequent holidays abroad or in the country, which are possible only to the fairly prosperous classes, means, there can be little doubt, a gradual weakening of the powers; even now the big English cities swarm with men, women and children who would, even by a less severe critic than Lombroso, be called degenerates. How, in the present increasing depopulation of the country, can these cities be infused with the fresh, rich blood which alone prevents them from becoming actually worse?

Manufacturing and commercial supremacy in a nation is important, and is one of the marks of its progressiveness. Surely, however, too much may be paid for progress if conditions such as we have described are to be its concomitants. But the query recurs: is it a proven fact that the decay of the land interests is a necessary adjunct to manufacturing prosperity? It seems to be looked upon as such without question in Britain, but it may be remarked that other ideas have been sacrosancted in the same manner, and yet have afterwards fallen from their high estate. For purposes of contrast, take the case of France. Now, France is not a great manufacturing country like England; nevertheless, she manages to supply a large portion of her people's wants and has a surplus for export in some lines of goods which have not their peer for quality in the whole world. Mainly, however, France is a country of small farms beautifully cultivated by their owners; and what is the result? Probably the most thoroughly contented common people in Europe; no misery and poverty for which emigration is the only cure; occasionally the united desire and power to do something for their beloved country in a manner which has surprised the world, ever alert to the value of accumulated dollars and cents, if to little else. Compared with such a harvest of widespread happiness among the people, due to this close connection with the soil of their own little home-spots, surely the great manufacturing ideal, as it works out, looks a little cheap.

THE PRICES OF COMMODITIES.

A year which, even if there be no actual depression, shows signs of slackening activity is usually one which shows a relapse in the price of the ordinary commodities of life. The year just closed, however, was an exception to the rule, for there was a considerable rise in values, though these fluctuated during its course much more markedly than was the case in 1902. The London Economist's Index Num-

ber on December 31st, 1903, stood at 2,197, while at the end of the year 1902 it was 2,003, and in December, 1901, it was 1,948. Thus it stood higher two weeks ago than has been the case for many years, with the exception of a short period in the middle of 1900, when a somewhat inflated level was reached, owing to the boom of the two previous years. It is true that during the year 1903 several commodities declined in price, but there were so many that showed perceptible advances that the net rise of the whole was very large. Among the commodities which showed the most noteworthy decline, it is almost unnecessary to say, was pig iron, which dropped during the year 4s. 8d., though it is still 5½d. higher than at the end of 1901. Steel rails and coal also declined. Among the metals which made heavy advances were tin and copper, the rises being £12⅜ and £5⅛, respectively. Among grains, barley and oats went down a little, as also did rice. Beef, too, which was exorbitant during a portion of the years 1902 and 1903, dropped 1s. 2d. for prime qualities and 6d. for inferior. Wheat went up 1s. 5d., and sugar 1s. 7½d. Among the largest of the advances in price made during the year, however, was the extraordinary one in cotton which, from 4.66d. per pound, in January, went up to 7.50d. per pound on December 29th. This, together with the falling off of wool supplies, consequent upon drouth in Australia, caused the price of practically all textile materials to go much higher.

Dun's Index Number, a United States compilation, on a like basis to that of the London Economist, shows somewhat similar conditions, so far as net results are concerned, the quotations of per capita consumption on January 1st, 1904, being $100.142, compared with $98.223 a month ago, and compared with $100.356 on January 1st, 1903. Since the latter date, there have been some striking alterations, metals and meats having declined sharply, but clothing, dairy and garden products, and breadstuffs, having risen, particularly during the last month. Some of these advances, however, were probably more or less artificial, being due to the war rumors in the East. The per capita cost of a year's supply of provisions at wholesale prices reached its highest during the last decade on this continent, according to Dun's on May 1st, 1902, when it was $102.289, but this record, though the present quotations are also quite high, is hardly likely to be reached again in the near future.

THE BRITISH COLUMBIA MINING INDUSTRY.

We take the opportunity of presenting for the benefit of our readers a summary of the interesting review of the mining conditions prevailing in southern British Columbia during the past year, compiled by the Daily News, of Nelson. It appears to be of a conservative character.

The aggregate value of the mineral production of the Southern Kootenay and Boundary districts was sufficient to establish the claim often made that this is the mining region par excellence of the Dominion. An approximately accurate estimate for the year 1903 places the value at $11,932,639, of which gold was responsible for $4,219,718; silver, $1,839,953; copper, $3,3332,174; lead, $487,792; coal, $1,304,000, and coke, $747,000. This, without dispute, is a pretty good record for such a young country as Kootenay.

Before passing on to the more important mining sections, some general information is given as to the state of things in other parts of the Province. In Vancouver Island, and other coast districts, for example, we find that a considerable amount of development has taken place during the year, particularly at Mount Sicker, the Tyee and at the Lenora mine. Coal mining on the Island was seriously interfered with by labor troubles; since these were settled, however, the output at the various collieries has been large. The Wellington Colliery Company turned out over 581,000 tons, shipments going forward during eight months. There is not much to chronicle, we are told, about placer mining, either in the Atlin District or in the interior, operations having been restricted by a shortage of water. In the Cariboo country late rains have provided an ample supply of water for next season's operations by the large hydraulic companies, which last year retired early from the field.

The output of ore from the Boundary was far ahead of that of any other district, and one feature which makes its production peculiarly interesting from an economic point of view is the successful treatment of its low-grade ores. Low-grade ore such as predominates in this section requires to be worked on an extensive scale in order to return profits; and this is what has been accomplished: the cost of production has been considerably reduced without a lowering of wages. This means that in a region of low-grade ores which shows up well in the item of value produced, the circulation of money within its own borders must be comparatively very large. A noteworthy increase in ore production and smelter tonnage is the record for the Boundary last year. For instance, the Granby mines, which came first, turned out 393,860 tons of ore, an increase of 84,000 over 1902. All told, the value of metals extracted from ores of this district amounted to something over $3,000,000, while the outlook for the present year is described as highly favorable. Its smelters now have a combined capacity of between 3,000 and 3,500 tons of ore per day.

The very large Lardeau district showed in several sections during the year a marked improvement. At Fish River the erection of stamp mills gave an impetus to mining; while at Ferguson, especially on the Silver Cap group of claims, a good deal of development work was done. It was to Poplar Creek, however, that most attention was attracted owing to reports of wonderful mineraliferous strikes. A renewal of interest took place in the various camps around Kamloops, and the indications point to a bright future. The work already accomplished on several of the Coal Hill properties is said to be very encouraging.

Prospects in Rossland district are described as being brighter than for some time past. The approximate output of ore for 1903 was 349,897 tons, of which 162,333 are to be accredited to Le Roi, 82,770 to Centre Star and 62,130 to War Eagle. The success of the Elmore concentrating process, which has attracted so much attention, seems now to be assured. The ore receipts at the Canadian Smelting Works at Trail for the first eleven months of 1903 were 157,736 tons. The depression noted in the Slocan district owing to the continued low price of lead was offset last year in some measure by the Dominion Government's bounty. The finding of a good market, moreover, for zinc ores, the production of which has been persevered in, has made things look a deal brighter for this part of the Province. A very fair degree of progress was made in both the Nelson and the Ymir sections, but detailed information about these two important producers was crowded out of the review.

OUR AUSTRALIAN LETTER.

Injustice has been done to Mr. Reynolds of the Pacific cable. He has had a very difficult work. Circumstances have been against him, and it is not at all certain that he is backed up by all the members of the board, as he should be. The cable is a publicly owned work, and Australia is one of the partners, and yet instead of pushing for business as it was expected to do the Australian Government stands neutral, and the head of the Telegraph Department is actually instructed to do nothing to influence business for the Pacific cable. The cause of this extraordinary conduct is that Western Australia and South Australia are interested in sending the

trade to the Eastern Extension Cable Company. The latter State constructed a land line, over which originally all cable messages for Australia passed. Its Government was long ago urged to join the partnership for constructing the Pacific cable and make good terms for its land line. It refused. The Pacific cable cut off some business, and the State then entered into an agreement with the Eastern Extension which destroyed the rest. It gets, however, under some arrangement a toll of fourpence per word for each word carried by the Eastern Extension without the messages going over its line. The three eastern States are compensated, too. The Australian terminal charges for messages coming over the Pacific are fivepence per word, even when the messages are sent but a few miles, and this sum is divided amongst the States even where the messages have never gone over their wires. This is no better than robbery at the expense of Canada and the other partners.

Then, as to news. It turns out that there is a combination amongst the newspapers for handling cable news. One condition is that any newspaper publishing messages from any other source is compelled to forfeit $4,000, so that if the Pacific cable did originate a news system there is no press here to publish it. Nevertheless, I still think that the Cable Board is altogether too much controlled by precedent, red tape and agreements, and that a good business man would devise means for breaking through the hedge that prevents it from being commercially successful.

No doubt the Canadian press has published cables respecting the alleged attempt of Dr. Montague to bribe a member of the Victorian State Legislature. The facts are that a Mr. Mitchell arose in the Legislative Assembly and stated that during his election he was asked by Dr. Montague, then in Australia as the agent of the Independent Order of Foresters, to meet him. Not knowing the purpose, he did so, and the doctor offered to contribute fifty pounds towards his election expenses if he would befriend the Foresters in Parliament. He refused. After the election he was again tendered the fifty pounds by the then Premier, Sir Alex. Peacock, on behalf of Dr. Montague, and he again refused the money. Sir Alexander said that Dr. Montague had asked him to hand the money to Mr. Mitchell. He did so, not knowing that Mr. Mitchell had been previously approached. Upon Mr. Mitchell refusing to take it he returned the money to Dr. Montague. Sir Alexander made a statement to the newspapers respecting his own relations with Dr. Montague and the I.O.F., which necessitated a second explanation in the Legislature. Mr. Bromley, the leader of the Labor party, stated that he had documents incriminating other public men and Dr. Montague. The newspapers took the matter up and asserted that the public believed there was much more to explain, and the Premier announced that a Royal Commission should enquire into the matter. He appointed a Supreme Court judge as the Commissioner, and Dr. Montague was cabled to know what action he intended to take for his defence. Rumor is, of course, busy with transactions in other States by the doctor. Indeed, if he did half laid to his charge it is not a Royal Commission, but a Commission in Lunacy that should enquire into his actions. There does not appear to be a disposition to push the enquiry too deeply; in fact, there are some signs of regret that it was entered upon. It was easy to "go for" the doctor ten thousand miles away, but it may hurt some local men, for if the doctor used mercenary methods it is difficult to see how prominent Australians can be much better. Dr. Montague's defence is meanwhile awaited.

The second Commonwealth election was held last Wednesday. The full returns are not yet in, but in the House of Representatives the Government counts 28, Opposition 23 and the Labor Party 24. As the majority of the Labor Party is Protectionist it means no change in the tariff this Parliament. In the Senate the standing is: Government, 10, Opposition 11, and Labor 15. Only nineteen Senators were elected, and the Labor Party secured eleven of them. The Labor Party is really in the saddle. It would be better if it formed the Government.

The statistician of the New South Wales Government promises a harvest for the State of 28,570,000 bushels of wheat, an average of 19.2 bushels per acre. The largest yield previously was 16,000,000. If his estimate should be correct, which I doubt, New South Wales will get two ordinary harvests in one. The other States have been blessed with almost corresponding bounty.

Business is consequently improving, but is held back by some failures, which have shaken confidence a little. Canada is interested in none of them. One which recently surprised the city was that of a large contracting firm, composed of a father and two sons. The senior was highly respected, a bank director and alderman of the city. The firm was credited by the knowing ones with being worth a quarter of a million of dollars, but it is doubtful if the creditors will get anything. The examination of the firm's affairs showed a system of book-keeping that must be unprecedented as a bit of comedy. It had an account for each contract; and when the work was done and the account closed, if a loss was shown, as for a few years often was the case, the loss was carried on in its books as an asset. The assets proved to be largely made up of such losses. No one was more surprised at the showing than the head of the firm. He had neglected the supervision of his affairs for some years, which was the secret of the failure. F. W.

Sydney, New South Wales, 19th Dec., 1903.

[We have told Hon. Dr. Montague about the statements in this letter referring to him. His reply is that the matter is one which has arisen owing to the dismissal of a number of parties who had been working for the Independent Order of Foresters in Australia, and who had been dismissed because their dismissal was in the interests of the Order. He had received threatening letters and had paid no attention to them. The charge made against him, the Doctor considers, was an absurd one, as the evidence will show when it comes out. Sir Alex. Peacock, Prime Minister at the time he was in Australia, had been very kind personally to him and had facilitated his business. Some by-elections were going on and he, the Doctor, contributed £50 toward the election campaign. The suggestion that he had bribed Sir Alex. Peacock, or anyone else, he declares to be simply a base falsehood. He possesses the letter of the chief party who is making the charge, saying that he was making the attack to reap vengeance. Dr. Montague declared that when the whole facts come out, it would be seen that in ridding the Order of the people who were now attacking him, he was doing his duty, which he would do over again, if necessary. And he insists that in his negotiations with the Government, upon behalf of the I.O.F., he had done nothing that any gentleman might not have done.—Editor, Monetary Times.]

WEST INDIA TRADE.

Editor Monetary Times:

Sir,—Referring to your article of 15th January on "Trade with the Bahamas," I may tell you of some odds and ends which came before me during my visit in Nassau, and which, perhaps, will have some bearing on the matter in question.

I found that the entire trade of the Bahamas—I think there are ten islands, with 53,000 of a population—as shown in the aggregate of their export and import figures, amounted to less than £400,000 sterling per year. This amount was divided in about equal proportions between imports and exports. I suppose the total of these figures is about one-fourth of the annual turnover of the Eaton Company, of Toronto.

I presume the major portion of the goods represented by the above figures is carried by the regular vessels of the Ward line, which make Nassau a point of call between New York and Cuban points, and by the SS. "Antilles," a steam vessel, which sails from New York for Nassau once a month the year round. I think that the latter carries the major portion of the freight, both to and from Nassau, which is the port at which steamers call for the Bahama trade.

The stock of the steamship company owning the "Antilles" is controlled by the firm of brokers in New York through whom are purchased most of the provisions, flour, etc., that are handled through the Nassau merchants. The remaining portion of the stock not held in New York is owned in vagrant lots by sundry residents of Nassau.

If I am correctly informed, some of the trade represented by shipments carried on the "Antilles" and in merchandise purchased through this firm of New York brokers takes somewhat the character of a supply account between the New York firm and the merchants in Nassau. That is to say, a good many of the merchants in Nassau are more or less in debt to the New York house, and will not easily be persuaded to buy supplies outside of them. It is stated that the New York firm has grown wealthy out of this Bahama trade, and it is to be supposed they would make a sturdy fight to retain it, not only because of their brokerage, but because of the necessity of their business to supply freight for their steamer, the "Antilles."

The bulk of the requirements of the Bahamas in food products could be excellently well supplied from Canada, and practically their exports in fruit and sisal could find a market here. I fear, however, that as the total business is so small, and as the probabilities of any important increase in volume is somewhat remote, it might be difficult to put a steamer running once a month between Halifax and Nassau on a paying basis. Would it, however, be possible to establish such a line to call not only at Nassau, but at some of the other West Indies points, and thus establish a useful trade? This much is clear to me. Trade between the West Indies and Canada is essentially a natural trade. We need the products of those islands, and they need our northern products, and if the trade is of sufficient volume, and can be attracted to our maritime ports, it certainly ought to be cultivated.

Yours very truly, J. W. FLAVELLE.

Toronto, 16th January, 1904.

OUR ST. JOHN LETTER.

Since my last letter, St. John, St. Andrew's and St. Stephen have been visited by the Dominion Government Transportation Commission, and the members of that body have learned all there is to know about the possibilities of these three ports. At St. John, the commissioners went very fully into matters. They personally inspected the harbor, saw all the wharves built by the city for the development of western export trade, and learned where future wharves can be built. Mr. Bertram and his associates in their public utterances at the meetings of the Commission, were very specific in stating that it is the desire of the Government to learn what is necessary to be done to enable Canada to handle, through Canadian ports, all the business now developing or that will in future develop in Canada. They were particularly interested in Maritime Province ports, because through these must come in winter all the trade of Canada, and so they desired to know the nature and extent of accommodation that can be given to not one more only, but perhaps two or three more transcontinental lines of railway, and they also wanted to know where wharves for these can be built. All spoke most hopefully of the future; and predicted that with the development now taking place in the West the time will soon come when the exports of through Canadian ports will be ten, perhaps twenty, times greater than they are to-day. To some who expressed doubt about the Grand Trunk Pacific carrying on a winter business through Canadian ports, Mr. Bertram replied that it was part of the duty of the Commission to find means to compel them to do so. Facts, figures, plans and details of all kinds, relative to the port of St. John, the Bay of Fundy, and the growth and development of the export trade, were given the commissioners. Members of the City Council and Board of Trade laid stress on the necessity of the Government assisting St. John to build more wharves immediately, so that by next winter accommodation can be furnished lines of steamers that now seek to do business, but cannot be given wharf room. Considerable stress was laid on the advantages that would result from the establishment of a line of steamers between St. John and Jamaica, and it was contended that if good boats were put on Canadian merchants and manufacturers would find a market for many products now secured from New York and Boston, and that the banana trade of the Dominion, a trade worth $800,000 annually, could be captured. Now bananas are imported through the two ports named, but with a line from St. John the bananas could be shipped to Montreal and Toronto, which would thus become the great distributing points for this trade. The people of St. John look for good results to follow the visit of the Commission.

The Canadian Bank of Commerce intends to erect in St. John a modern bank building. It has just purchased from the estate of T. H. Hall the large building at the corner of King and Germain streets, and in the very centre of the retail section of the city. The Hall building is to be torn down and an entirely new bank building erected in its stead. This move of the Bank of Commerce is an important one as indicating not only the growth of the city, but also the development of business in the up-town section. At present all the banks are on or near Prince William St., and close to the wholesale centre. The Bank of Commerce is going several blocks further up-town than any of its competitors. It is a rare thing in St. John to see a fine building torn down to give place to something better, but last year Messrs. Manchester, Robertson & Allison, Limited, did this with a big building on King street, and now the Bank of Commerce is to follow suit. King street and the city profit by these improvements.

The McLaughlin Carriage Company, of Oshawa, Ont., has just completed the purchase of the brick stables of Ald. J. B. Hamm, on Union street, St. John, and will instal therein their Maritime Province branch, which has outgrown the quarters on Dock street, in which the business has been located for several years. Very extensive improvements are to be made in these premises, which are well adapted for the business of the McLaughlin Company.

St. John creditors of Messrs. A. W. Atkinson & Co., of Advocate Harbor, N.S., refused to accept the compromise offer of 25 cents, made a few weeks ago. Many meetings have since been held, but on Friday last the matter was settled by the firm agreeing to raise its compromise to 60 cents, of which 25 cents is to be in cash and the balance in six months.

The C.P.R. steamer, "Lake Erie," which arrived here on Monday, brought forty-five expert miners to work in the coal fields of New Brunswick. Some went to Queen's County, and some to Kent County. These completed a list of 100 miners imported by the local Government. Nearly all are men with families, so that the province receives quite an increase in population.

The Canadian Pacific Railway a few days ago gave out a statement of the winter port business up to the 5th of January, and the figures showed that the exports were over $900,000 in excess of those of last winter up to the same period.

St. John, 20th Jan., 1904. * * *

PELICAN AND BRITISH EMPIRE LIFE OFFICE.

A dainty brochure in black ink, with colored initials and finials, comes to us from London, Eng. It is entitled "At the Sign of the Pelican," and gives a history of the rise and progress of the Pelican Life Office, which was founded in 1797, and has been very successful. It is quite interesting to glance through the little history and to see in how quaint terms this novelty of life assurance was a century ago commended to the minds and hearts of the British public at a critical era in the history of the country. The company was born in the stirring times of the French Revolution and the wars of Napoleon; it made subscriptions to the seamen's wives and children after the battle of the Nile, and later to "relieve the sufferers by the victory of Waterloo"; it had among its policyholders men so eminent as Peel, Pitt and Disraeli in politics, as Lamb, Byron, Shelley and Scott in literature. Sir Walter Scott had a policy for £5,000 in it.

But while long foundation, solidity and historic interest are excellent things in their way, the people of to-day want, as a rule, the latest of everything as well as the best. It is satisfactory, therefore, to know that the constitution of the office has been thoroughly modernized, and its policy-holders

now enjoy all the real improvements introduced from time to time into the practice of life assurance. While this is, we believe, the oldest company in Canada, it values its policies by the latest and most extensive mortality tables invented, and at 3 per cent. Indeed, we are told it has funds in hand sufficient to stand a 2½ per cent. interest valuation. The last bonus was higher, it is claimed, than any similar bonus allotment in Canada, and it issues forms of policy which are new here.

Within the past few months, as our readers know, the Pelican effected a junction with the British Empire Life but has not pushed for new policy-holders in Canada pending arrangements which should place the business here on a wider footing. But we are authorized to say that the Pelican and British Empire Life Office is now doing business in Canada, and is open for risks on a great variety of policies. The strength of the company is great. It has resources of $6,000,000 in excess of its liabilities. It commenced business with assets of over $25,000,000, of which 10 per cent. are in Canada.

Some particulars respecting the amalgamated company were given by the London Statist, which it may be interesting to append: "The combined company, under the somewhat cumbrous and incongruous, but apparently necessary, name of the Pelican and British Empire Life Office, is to be administered by a board consisting of the boards of two companies, while the staffs will be amalgamated. The general manager of the Pelican Company is to retire and join the board of the combined company, and the general manager of the British Empire Company becomes general manager of the combined office. The existing business of the latter company is to be managed at a fixed cost of 10 per cent. on the premium income, and the present funds of that company and their accumulations are to form a specific trust for the benefit of members of that particular company. The mutual system is to be continued as regards the existing members of the British Empire office, as the whole of the divisible profits in their section will belong to and be apportioned among the members solely."

The boards of the two companies include many distinguished names. They consisted, as at 15th November last, of the following: Pelican—Right Hon. Viscount Hampden (chairman), Right Hon. Lord Avebury, Seymour P. Bouverie, Right Hon. Sir M. E. Grant-Duff, George Alfred Gadsden, Charles Emanuel Goodhart, Right Hon. Lord George Hamilton, Alexander Travers Hawes, Robert Kirkham Hodgson, Hon. Edwin Ponsonby. British Empire—Right Hon. Sir John Gorst, M.P., Right Hon. Sir Francis Jeune, His Honor Judge Bompas, Hugh Campbell, M.D., Right Hon. Viscount Dillon, George Phillips, John Tryon, Sir Wm. Henry Wills, Bart., Sidney Young.

In the opinion of the British journal quoted, the scheme seems a fair one all round. "The British Empire policyholders will benefit by the reduction of expenditure on their business from 16 to 10 per cent.; while their security is increased, as they will enjoy, in addition to the protection of their own funds, that afforded by a large capital and reserves amounting, including uncalled capital, to over £1,100,000. The Pelican policyholders and shareholders should, on their side, reap decided advantages. Under good management the old British Empire business should be administered at a less cost than 10 per cent. As far as new business is concerned, the combined company is in a favorable position, having the advantage of the agency and business connections of both offices."

The agency organization of the Pelican and British Empire is being extended in Canada, where it expects to do a select class of business of such volume as will conduce to the payment of first-class bonuses.

GUARDIAN ASSURANCE COMPANY, LIMITED.

We are informed that Mr. E. P. Heaton has retired from the management of the branch office in Canada of this company, and that a new manager for Canada is shortly to be appointed by Mr. Relton, the general manager, who is now in Canada. The staff will also be strengthened by the appointment of an assistant manager, from the head office in London. The active policy pursued by the late management, is intended to be continued. In this connection we note that Mr. Mark H. Irish has been appointed branch manager of the Guardian Assurance Company, Limited, for the province of Ontario, office 13 Wellington East. This is a new appointment, for the company has not before had a branch here. Mr. Irish has a considerable acquaintance with the business of the company, for he has been for something more than five years inspector for Ontario.

A WELL KNOWN INSURANCE MAN.

There are few manufacturers, probably, who have not heard of the Hartford Steam Boiler Inspection and Insurance Company. And many in Canada have known its president, Mr. Allen, either personally or by repute. That respected gentleman died just before the opening of the present year, at the age of seventy years. Jeremiah Mervin Allen was born in Connecticut of stock descended from the Pilgrims. He was elected president of the Hartford Steam Boiler Inspection and Insurance Company in 1867. The fortunes of the company were at that time low, but under Mr. Allen's management it increased its capital to over two and a half million dollars, and its reputation and business have gone on increasing. Mr. Allen, who founded and published a magazine called The Locomotive, which was devoted to the subject of steam engines, was widely known in insurance circles, and was a member of various scientific and historical societies. For a number of years he lectured on insurance topics at Cornell University, and at the Worcester Polytechnic Institute. He had also been announced as a lecturer in the Yale Insurance Course. He leaves behind him the reputation of a good and kindly man who has been of great use in his day and generation.

QUEBEC COUNTRY ENGLISH.

The efforts of a French-Canadian to express himself in English are sometimes amusing. A man from Montreal hands us an illustration of this which is good enough to print. It is a letter received the other day by a Montreal firm of bicycle manufacturers from one of their customers, a French-Canadian doing business in a little village, where evidently English is not the language of every day. The names only have been changed. The persistency with which, having found the article, the supposed absence of which occasioned his letter, yet he encloses his laborious production and apologizes for it, is not the least amusing part of the episode. Here is the letter:

Dear Sir,

i recuv de bicykel witch i by from you alrite but for why you dont send me no saddel wat is de use of de bicykel when she dont hav no saddel i am loose to me a customer shure ting by no having de saddel and dats not very pleasure for me. wat is de matter wit you mister Jones an companee is not my moneys so good like anoder mans you loose to my trade an i am very anger for dat an now i am tells you dat you are dam fools and no good mister F J Jones and companee i send you back at waunce your bicykel to morrow bekause you are such dam foolishness peoples.

Yours Respekfullee
J. B. St. Denis

P S—Since i rite dis letter i find de saddel in de box; excuse me.

IMPROVEMENTS IN THE BANK OF B.N.A. BUILDING.

The alterations and improvements in the Toronto building of the Bank of British North America have now been brought to completion. The whole interior has been practically remodelled, little but the old vaults remaining. Not much change has been made to the exterior, other than the removal of the entrance to the bank from Wellington street to Yonge street.

It will be remembered that the old entrance cut off the manager's room from direct contact with the other offices of the bank, making it necessary to cross the space for the

public in order to communicate. By the change in the entrance, this drawback is obviated, and the manager, while occupying his former room, is enabled to come into direct contact with his men. The ceiling of the present banking room is arched and groined and supported on four massive pillars richly finished in scagliola. By this procedure what was a large but bare room has been made handsome. The space for public has a mosaic tile floor, and the walls of the entire banking room are wainscotted to the height of eight feet with Italian marble. The counters are of Escallette and Lunel marble with railings of polished antique brass. The desks are mahogany finish.

The manager's room is decorated in a rich, but chaste manner, having what is termed a barrel vault ceiling. The finish is in quarter cut oak with mahogany doors. There is a commodious retiring room adjoining. A locker room and lavatory for the officers is placed at the north-east corner. The Bank Chambers or office entrance is at the south-east corner of the building on Wellington street, opening into a spacious marble-wainscotted, mosaic-floored hallway, containing an up-to-date electric elevator, serving the various floors of offices.

On the second floor are situated two suites of offices and the premises of the Toronto Clearing House Association. The floor area of the latter is 41½ ft. by 48 ft., equal to that of the banking room on the ground floor. It is finished in quarter cut oak, with wainscot enriched with burlap panels. The ceiling is heavily panelled and supported on massive columns. The fittings for the Bank Clearing arrangements are of quarter cut oak of somewhat quaint design and of substantial construction.

The third floor is fitted up with five suites of offices, and the fourth with four suites and commodious tiled floored lavatories. The Mezzanine of the fourth floor is devoted to caretaker's apartments. The exterior, plain and substantial as it is, has been cleaned and modernized, and the whole building has been refitted, heated and plumbed in an up-to-date manner. Messrs. Burke & Horwood, who are the architects, must be credited with having produced an appropriate and attractive banking room; the whole building indeed appears to have been brought up to a modern standard. It took a long time, what with strikes in the building trades and other delays. But now that it is practically completed, much comfort to its occupants must result.

FINANCIAL MATTERS.

"Puck" represents one man saying to another: "Our new company is capitalized at $40,000,000." The man addressed answers: "That's great! Let me see your prospectus." "Oh, we haven't got out a prospectus yet. The—er—the confounded printer wants his pay in advance."

The Sovereign Bank of Canada has taken over the business of Messrs. A. W. Carscallen & Co., private bankers, at Marmora. Mr. A. P. Smith, who has managed the Marmora branch of the bank during the past few months, has been promoted to another branch of the service. He will been succeeded at Marmora by Mr. James Parker, formerly with A. W. Carscallen & Co., who now retire voluntarily from the banking business.

The Bank of Hamilton has issued an instructive little map of that part of Ontario between Hamilton and Port Rowan and Dunnville, showing by means of circles the "sphere of influence" of its six branches from Brantford to Lake Erie. The seven places besides Hamilton which bear the bank's emblem [a beehive] are Brantford, Dunnville, Hagersville, Jarvis, Simcoe, Delhi and Port Rowan. The bank issues also a folder calendar for 1904 bearing the arms of the bank, the red and blue ensigns, and the appropriate motto, "A penny saved is a penny gained."

We observe that offices have been opened in the Bank of Commerce building to complete the organization of the Crown Bank of Canada. The following named persons have agreed to act as directors if the shareholders of the bank should elect them, viz.: Edward Gurney, R. Y. Ellis, John L. Coffee, Chas. Adams, John C. Copp, of Toronto; Charles Magee, of Ottawa; Jeffrey H. Burland, of Montreal; John White, of Woodstock; John M. Gill, of Brockville. Of the authorized capital of two millions, only one million is being offered, and that is issued by the provisional directors at a premium of 10 per cent. Tihs fact of itself shows a marked confidence in the progress of the institution.

INSURANCE MATTERS.

The Canadian business of the Employers' Liability Assurance Corporation, Limited, of London, England, shows a marked increase over that of the preceding year, according to approximate figures received this week. The business for twelve months, ending 31st December, 1903, shows a net premium income in Canada of about $289,000; the net amount of losses in Canada, $129,000; and total expenses in Canada, including commissions, $82,000. This is a very encouraging result.

We have pleasure in noticing a presentation made the other day to Mr. J. Edward Roberts, general manager of the Dominion of Canada Guarantee and Accident Insurance Company. The representatives of the office staff and general agencies of that company presented Mr. Roberts with a cabinet of silverware and cutlery as a token of their appreciation of the many kindnesses and of the good-will and bonhomie existing between the general manager and his staff.

The oldest insurance company in Hartford, namely, the Hartford Fire, is the first to make public its statement of the year's business. The ninety-fourth annual exhibit shows a gain in assets of more than a million dollars, the total assets, January 1st of present year, being $14,542,951. The reinsurance reserve has increased by $240,701, and is now $8,053,542. The gain in surplus during 1903 has been $756,642, a handsome result, which makes the present surplus to policy-holders $5,187,796. George L. Chase is president, and P. C. Royce, secretary of this old and strong fire underwriting company.

TRADE OPENINGS.

We have received the following list of enquiries from the office of Mr. P. B. Ball, Canadian trade agent in Birmingham, September 9th to December 16th, 1903:

(A) British buyers, who wish to communicate with manufacturers or dealers in the following: Baths and lavatory appliances, dairy produce and tinned fruits; wool; apples and canned goods; cider apples; handles, particularly for chisels; apples; oats and beans; shovel handles; yellow pine doors; all kinds of Canadian produce.

(B) Canadian buyers, who wish to communicate with British (or other) firms who make the following: Brass art goods; rattan and reed dealers; gloves and mittens; ducks and drills for carriage tops and buggy trimmings; plush for carriage seats, etc.; brass tubing for carriage top work; fire bricks; tinned plates and Canada plates.

(C) Canadian sellers, who wish to place the following articles on the British market: Wringing machines; chisel handles; cornmeal; butter, cheese, eggs, etc.; honey; mica; evaporated apples in rings; chrome ore; baled hay; mica, graphite, corundum, asbestos, and barite; roofing materials.

(D) British sellers, who wish to find a market in Canada for the following articles: Novelties, calendars, etc.; silver plating blanks; air guns and walking stick guns; essences for cake makers and colorings for sweets; superfine plate powder for nickel purposes; brattice cloths for use in mines; art metal manufactures; glue; cycle dress guards; enamel advertisement signs; brass tubes; copper tubes; gongs; jewellery; fire bricks; potash; leather for coaches, saddlery, cycles, etc.; wood pulping stones; fire bricks: rein rails; art metal goods.

—A new branch of the Canadian Bank of Commerce has been opened at Moose Jaw, Assa. Mr. R. A. Rumsey has been moved from Innisfail, Alta., to take charge of it, and Mr. H. M. Stewart has been appointed manager of the branch at Innisfail in place of Mr. Rumsey. This new branch of the bank increases the number of its branches in Canada to 101, and in Canada and United States to 106.

A LAKE TRANSPORTATION PROJECT.

We have received a prospectus, dated London, Eng., 3rd December, of a project which concerns lake and river navigation in Canada. It is proposed to float the Canadian Transit Company, Limited, capital $1,000,000, or £200,000, of which it is intended to issue 135,000 shares of one pound each; but there is also £135,000 of first mortgage debenture gold bonds secured upon the company's fleet of vessels.

It is not the Canadian Transit Company, however, which offers this capital and these bonds. It is "The New Canadian Company, Limited" (incorporated, we are told, under English and Canadian Acts), who offer the above mentioned 165,000 shares and £135,000 bonds at par. There is thus a company within a company, as it were. A contract has been made, it seems, between the companies named whereby the New Canadian Company agrees to supply to the Transit Company a fleet of twelve vessels at the price of £275,000 (say $1,375,000) and working capital of £25,000, taking the above described bonds and ordinary shares as their consideration. The steam vessels are to be 250 feet long and 41 feet beam, with a carrying capacity of 60,000 to 70,000 bushels of grain on a draft of 13 feet 6 inches, and are to have power enough to tow certain other vessels.

The most interesting page of the literature issued by this company is that containing the estimated earnings. A rate of 3½ cents per bushel from Buffalo to Montreal is supposed; and if all these boats make two trips per month, and carry thereby 1,620,000 bushels; and if they can get a steady freight of 3½ cents; and if they can earn $13,875 per month on westbound traffic, and if they can buy coal at $3.25 per ton, and can provision and pay their crews for $8,772 per month, they will be able, so a Montreal firm of agents and managers say, to pay insurance and to earn, net, £40,132 during each season of navigation.

The last sentence of this page states, in large type, that on this basis "a dividend of 10 per cent. on £165,000 of ordinary shares would absorb £16,500, and after providing £13,500 for sinking fund and depreciation there would remain a surplus of £10,132 7s. 6d.—pretty handsome results, no doubt.

Perhaps it is quite natural and right, after all the expenditure made in enlarging our canals, and after all the talk we have heard of the thereby increased advantages of St. Lawrence navigation, and the small use made of it by Canadians in carrying their own flour by water to the seaboard, that an effort should be made to divert from American railways at Buffalo a part of the many millions of bushels handled at that Lake Erie port. But have the projectors of this line of steamers made themselves fully acquainted with the conditions of the route? We are doubtful on this point. To be sure there are three respectable Montreal men on the directorate. There has also been secured a sort of certificate of likelihood from Mr. Raymond Prefontaine, who speaks largely of "the grand opportunities of carrying on an inland transportation business," besides a cautious opinion from Mr. Hugh A. Allan, that looking to the future it is "altogether probable that a considerable quantity of western business can be secured." Nevertheless, when one comes to consider the possibilities of capturing this grain trade from the American railways at Buffalo, and the rates at which Canadian tonnage can freight it to Montreal, the future of such a line of steamers is so largely experimental as to suggest the utmost care and economy in launching it. It is stated that "five per cent. yearly interest will be paid by the contractors on the issued shares of the company during the construction of the fleet." At whose expense will this be paid? Then there is a ten years' contract proposed with the managers. Is this necessary? Again, in discussing westbound freight, steel rails are mentioned as an item. Seeing that steel rails for use in Canada nowadays are mostly needed west of Winnipeg, it is a novel proposal to carry them from Montreal to Buffalo by boat and then tranship them.

Since the above was written—it was intended for last week's issue, but was crowded out—we have been informed that the Canadian Transit Company project met with a poor reception, and has been withdrawn. We shall let the article stand, however; and would suggest when next influential Montreal gentlemen recommend any scheme of lake and river navigation as a likely one, they should take counsel with people who are familiar with the marine traffic of the Great Lakes.

—Since the publication of the report for last year of the National Bank of Scotland, Limited, in the Monetary Times of 1st instant, we are advised from London that Mr. James Robertson, so long manager of the London branch of that bank, has retired; that his successor is Mr. J. S. Cockburn, and that Messrs. Thomas Ness and John Ferguson are assistant managers in that city.

—The following officers have received the marked honor of being elected, by acclamation, for the Montreal Board of Trade for the ensuing year: President, Mr. George E. Drummond; first vice-president, Mr. W. I. Gear; second vice-president, Mr. Robert Munro; treasurer, Mr. James Thom; board of arbitration, Messrs. E. B. Greenshields, Arthur J. Hodgson, James Crathern, A. McFee, James Davidson, Henry Miles, Robert Reford, C. F. Smith, Robert Bickerdike, R. W. MacDougall, Robert Archer, and John McKergow. The only elections necessary will be for members of the council, there being seventeen nominees for twelve seats.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, January 21st, 1904, compared with those of the previous week:

Cities	Jan. 21st, 1904.	Jan. 14th, 1903.
Montreal	18,264,510	19,806,607
Toronto	15,729,805	16,093,248
Winnipeg	4,907,065	5,219,196
Halifax	1,507,300	1,815 127
Hamilton	1,058,273	1,175,301
St. John	824.215	877,351
Vancouver	1,080,624	1 202 892
Victoria	486 443	710,390
Quebec	1,338,338	1,378,596
Ottawa	2,5 9,941	2,414,164
London	795.266	791,008
	$48.499,780	$51.483,880

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly circular under date of January 16th, say:

A better undertone exists in the stock market, and prices would have unquestionably displayed more strength had it not been for the fear of war between Russia and Japan. The most satisfactory element of strength was the increasing ease of money and the consequent better feeling in banking circles. In 1903 the depression in Wall Street was largely intensified by the forced contraction in credit. Purse strings were tightly held; and it follows that any relaxation in this respect will stimulate recovery. On the other hand, considerable demands are likely to be made upon the money market by the turning of temporary loans, made in 1903 by railroad corporations into fixed obligations. New issues of securities in considerable amounts are, therefore, inevitable; but it is to be remembered that these will be of the better grade, representing actual outlays and not the water so freely poured into the "Street" during the trust mania. Very likely, also, the conservative spirit now prevalent in business circles will induce corporation managers to be cautious in new departures and new outlays; thus tending to avert renewed congestion of the security markets. All things considered, however, there are abundant evidences that last year's lessons have been well learned; and that our financial and business leaders are readjusting themselves to a forward movement having a more substantial basis than heretofore. Two important uncertainties hang over the stock market, the Northern Securities case, now before the Supreme Court, and the crisis between Russia and Japan. As to the latter predictions are useless. Just now the outlook is more peaceful. And yet careful consideration leads to the opinion that war will be difficult, if not impossible, to avert unless Russia backs down, which seems unlikely. As for the sinew of war, money, it is difficult to say where it will be provided. France, Russia's strongest friend, already holds about $1,500,000,000 of Russian bonds, and is not likely to be hungry for more; especially as such aid would offend England, who is a much better customer for French products than Russia. There is no other country that would be anxious to lend Russia, except upon exorbitant rates; and it must not be overlooked that Russia's cruel treatment of the Jews has brought her the dislike of powerful bankers of that race who could easily put obstacles in the way of Russian borrowings. On the other hand, Japan could undoubtedly place large amounts of bonds in London, where both sympathy and self-interest are on her side. Discretion would no doubt lead Russia to moderate her aggressions; the question is, can she? Eventually her Governmental industrial schemes must break and produce serious internal dissensions.

THIRTY-THIRD ANNUAL STATEMENT OF THE
ROYAL BANK OF CANADA

31st DECEMBER, 1903

LIABILITIES.

	31st December, 1902.		31st December, 1903.	
To the Public—				
Notes of the Bank in circulation		$1,920,713 15		$2,303,518 05

J. M. COURTNEY,
Deputy Minister of Finance

THE New York Life INSURANCE COMPANY.

During the year just closed, the New York Life Insurance Company wrote new business amounting to $326,000,000, an increase of more than $23,000,000 over that of 1902. The total paid-for insurance in force exceeds $1,745,000,000, a gain of $191,000,000 over the previous year.

A feature in connection with the company worthy of mention is that about four years and a half ago the New York Life Insurance Company announced that, under its by-laws and its agreements with several Governmental Insurance Bureaus in Europe it would henceforth limit its investments to the most conservative class of securities, and would limit its expenses of management to the amounts included in premiums received for expenses and contingencies. Some companies spend more than this, and justify themselves on the ground of the large initial cost of new business, which more than pays for itself in later years. The New York Life, however, does the largest new business of any company, and it was a problem how its supremacy in this respect would be affected by the expense limit which it had voluntarily imposed on itself. Its annual report for 1903, published in our last issue, shows that it goes right on increasing its new business, which was larger in 1903 than ever before, and larger than that ever reported by any company. Evidently a limited expense rate is not incompatible with the largest growth which able management has yet been able to secure. The conservative methods of the New York Life have become powerful factors in the progress of the Company.

Mr. Richard J. Kearns, director of the Toronto agency, with offices in the Lawlor Building, reports a most gratifying increase in business handled by that office, and the prospects for even better results this year are, indeed, bright.

The Crown Bank of Canada

Provisional Offices: 23 King Street West, Toronto, Ont.

Now opened to complete organization.

The following have consented to act as Directors upon election:

PRESIDENT:

EDWARD GURNEY, President of the Gurney Foundry Co., Limited, Toronto.

VICE-PRESIDENT:

CHARLES MAGEE, President Ottawa Fire Insurance Co.; President C. Ross Co., Limited, Ottawa; late President of the Bank of Ottawa, Ottawa.

DIRECTORS:

R. Y. ELLIS, Director of the P. W. Ellis Co., Limited, Toronto.

CHARLES ADAMS, of Messrs. Adams Brothers, Wholesale Saddlery, Toronto.

JOHN L. COFFEE, of Messrs L. Coffee & Company, Grain Exporters, Toronto.

JOHN C. COPP, Manager Toronto Land and Investment Corporation, Toronto.

JOHN M. GILL, President of the James Smart Manufacturing Company, Limited, Brockville.

JOHN WHITE, Merchant, Mayor of the City of Woodstock.

LIEUT.-COL. JEFFREY H. BURLAND, President of the Canada Engraving & Lithographing Co., Limited, Montreal

GENERAL MANAGER:

GERALD de COURCY O'GRADY, Late Manager at London, Ont., of The Canadian Bank of Commerce.

SOLICITOR:

FRANK ARNOLDI, K.C., of Messrs. Arnoldi & Nisbet, Toronto, Ont.

Authorized Capital, $2,000,000 in 20,000 shares of $100 each, issued at $110 per Share.

It has been decided for the present to confine the issue of stock to ONE MILLION DOLLARS, being one-half of the authorized Capital.

TERMS:—$5.00 per share of the par value on application, $25.00 per Share of the par value on allotment, and the balance in eight successive monthly instalments of $10.00 per share, commencing on the first day of each of the eight months immediately succeeding the date of such allotment.

Application for stock or for further information including prospectus, forms of application, etc., may be made to

G. de C. O'GRADY, General Manager,
The Crown Bank of Canada,
Provisional Office, 23 King St. W.,
Bank of Commerce Building, Toronto.

A COMPANY is being formed in British Columbia under the name of the A. J. Burton Saw Company, Limited, of Vancouver, for the purpose of manufacturing band, gang and circular saws, thus diverting the manufacture of these and such articles required by the big lumbering interests of the Province from the United States.

THE residents of Ladner, a town on the south bank of the Fraser river, in British Columbia, are petitioning the British Columbia Electric Railway to extend their line to the delta. As, however, this, in a short while, would make the third means of transportation to that district, it is not altogether probable that the extension will be made, at any rate for a year or two.

IN a fire on the 18th inst., which broke out in a cellar occupied by McLeod, Hawthorne & Co., dealers in trunks and leather goods, Montreal, the whole building was badly damaged. It was occupied by Swift, Copeland & Co., hats and furs, loss nearly $50,000, insured, Woodhouse, Rozand & Co., milliners, the King Clothing Company, and Findlay, Smith & Co., woolens. On the same day Pruneau & Kirouac, dealers in books and fancy goods. Quebec, had their stock badly damaged by fire, which started in the furnace room. Loss on stock, nearly $20,000, besides $2,000 on the building; both insured.

The
Enormous sale of
OLD CHUM
Cut Plug
Smoking Tobacco
Proves its
Superior Quality.
Sold by all Leading Wholesale Houses.

THE weekly failure list among country traders in the Province of Quebec includes the following: S. Sauve, who began as a small storekeeper at St. Stanislas de Kotska last July, has assigned already. Liabilities are said to be under $1,000. C. Descoteaux, who has done a small tailoring business, mostly custom, at St. Leonard d'Aston for some years, has also assigned.—In 1896 B. Beaulieu started a small general business at St. Helene de Kamouraska. He was never thought to have much ability, has been found all along slow in settlements, so that his assignment now creates little surprise. F. X. Juneau, a joiner by trade at St. Felicien, away back of St. John, has been handling furniture and implements in a small way for several years, but has become involved, and now makes a proposition to pay 50 cents on liabilities of $2,440. In the year 1901 J. D. Hamel started as a grocer at Three Rivers. He borrowed $1,500 from his mother-in-law as business capital, but has now had to assign. J. N. J. Bisson, grocer and baker at Brought n Station, has assigned, and at a meeting of creditors held in Quebec business liabilities were shown of about $3,100 and business assets of $1,415. Mortgages of $2,000 pretty well covered the real estate.

—Attention is called to the change in the law made at the last session of the Legislature of Nova Scotia, which requires that all companies incorporated under Provincial or Federal Statutes shall during the month of January forward to the Provincial Secretary's office a list of shareholders, etc., and also pay an annual registration fee. Companies whose capital does not exceed $10,000 are required to pay five dollars as such fee, not exceeding $100,000, ten dollars; not exceeding $500,000, twenty dollars; and if exceeding $500,000, twenty-five dollars. Foreign companies must pay double these fees, and mutual insurance companies without capital, fifty dollars. Companies not complying with this regulation are liable to a penalty of one hundred dollars.

MONTREAL MARKETS.

Montreal, 20th Jan.

Ashes.—Business continues of a very limited character, and the high prices quoted by dealers are bringing out few offerings. Good tares of No. 1 pots would bring $6.05 to $6.10; seconds, $5.50 to $5.60 per cental.

Cements and Firebricks.—There is little doing in these lines. Cements are practically dead, and in firebricks only an occasional moderate sale is reported. We quote: Belgian cement, $1.80 to $2.05; English, $2.15 to $2.25; German, $2.15 to $2.35; firebricks, $18 to $24 per M.

Dairy Products.—Receipts of butter have been light of late, and the market shows, if anything, a rather firmer tendency. Winter creamery butter is quoted at from 19 to 21½c., but owing to light stocks some attention has been directed to stocks of full grass fall creamery, held in cold storage, with some business reported at 21½c. Dairy makes range about 16 to 17c. There has been a fair degree of English enquiry for cheese since last writing, and it is claimed that business has developed at 10⅞ to 11c. for finest fall goods, with holders firm in their ideas. Cheese shipments from St. John and Portland last week were reported at 13,727.

Dry Goods.—The rush of spring shipments is now on, and the wholesale warehouses all show much activity in this respect. Money keeps coming in well. Yesterday the Canadian Colored Cotton Co. issued another new price list, establishing a further advance of from 7½ to 10 per cent. on all their makes of awnings, cottonades, denims, tickings, shakers, shirtings, ginghams, saxonies, cotton blankets, etc. The Montmorenci Cotton Co. also supplemented their circular of December, a few days ago with a further advance of 5 to 7½ per cent. on their makes of grey cotton and cotton blankets.

Furs.—At the moment there is not a great deal doing, both collectors and city buyers apparently waiting to hear results of the London sales, which begin next Tuesday. We quote prices here for prime skins as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No. 1 choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

TO GET SATISFACTION
From your steam plant is the crucial basis of economy to all manufacturers. A satisfactory steam plant is one that produces the greatest needed power at the lowest cost.

Groceries.—Business has not acquired any great amount of briskness since the holidays, though there is rather more doing than ten days ago. Collections are very fair, and January has been remarkably free from failures among retailers. Little change is reported in values. A cable was received from Barbadoes today, announcing the opening of the molasses market at 17c., f.o.b., just about the opening quotation of a year ago, but there will be no stock available till next month. Local quotations for old goods remain very firm. In sugars there has been no change, the factory price for standard granulated remaining at $4, with yellows ranging from $3.35 to $3.75. Stocks of dried fruits are quite moderate after the holiday trade, and prices have undergone no material shrinkage. Canned corn is very firm at $1 to $1.05, and tomatoes at $1.05 for standard brands.

Hides.—The only notable change in this line of business is an advance in calfskins, which are now quoted at 11c. per lb. for No. 1, and 9c. for No. 2. Beef hides are now beginning to show the grub more generally, but dealers continue to pay 8c. per lb. for No. 1. Lambskins are quoted at 75c. each.

Leather.—The boot and shoe factories are all again in full blast, and, as a rule, have good orders in hand, but as yet they have not started in to do any heavy buying, though a fair volume of moderate orders is noted. Little recent change has been reported in prices, values being pretty strongly held. The markets in the United States are said to be looking up, and some dealers profess to be looking for firmer quotations.

Metals and Hardware.—Business is beginning to be more active again in general hardware, but in heavy metals there seems to be some hanging back on the part of buyers, in the anticipation of easier values, and local agents for large British manufacturing concerns report that they are not booking import orders so freely as usual at this time of the year. It is reported that No. 2 Summerlee iron has been offered at $20, as against $21, quoted a few weeks ago. Bars seem to hold pretty steady at $1.85, but cut nails have been reduced to $2.30 or $2.25 in car lots. Canada plates are easier at $2.35; tinplates steady owing to high price of ingot tin; galvanized sheets, $4.25; block sheets, $2.35; boiler plate is unchanged at $2.10. Iron pipe shows further decline, being now quoted at $4.35 for inch. Ingot tin keeps firming up, 33c. being now asked for Straits in an ordinary way.

Oils, Paints and Glass.—The feature in these lines is the rapid continued advance in turpentine, which is now quoted at 94¼c., and is expected to go higher. Linseed and other oils are unchanged, and leads are still being sold at easy prices. We quote: Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 terms. Turpentine, 94¼c., single barrels, days or 3 per cent. for four months' Olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gal; steam refined seal, 50 to 55c. per gal; tinged and brown

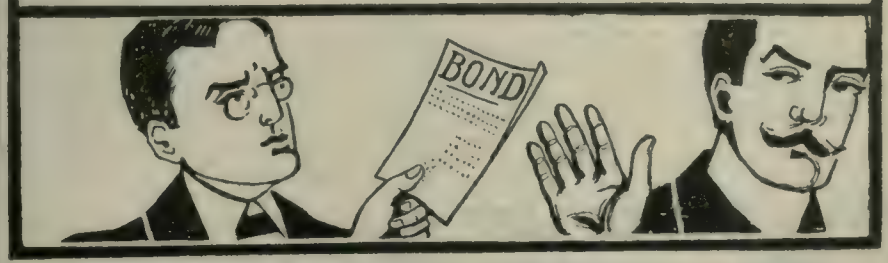
Canadian Industrial Blue Book

THE MANUFACTURERS' LIST BUYERS' GUIDE OF CANADA, 1904.

This publication is not on the "fake" or "graft" order. It is not under the auspicious prestige or patronage of any association, corporation or individual influence to support it, but stands upon its own merits as a book of information for the enquirer about Canada, its manufacturers and their products.

MANUFACTURERS' LIST CO., Publishers,
128 St. Peter Street, MONTREAL.

An Unreasonable Request



SMITH—You will oblige me if you will go on my bond, merely a matter of form you know.
JONES—Oh no thanks! cost me three hundred last time.
SMITH—Well, what will I do?
JONES—Write to THE UNITED STATES FIDELITY & GUARANTY COMPANY,

Kirkpatrick & Kennard, Managers for Canada, 6 Colborne St., Toronto.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name **THE GREAT-WEST LIFE**; but the above statement exactly describes the happy position of its policy-holders.

TORONTO MARKETS.

Toronto, Jan. 21, 1904.

Chemicals, Drugs, etc.—Business is a little quiet locally in the drug trade, but prices remain very much as before. In New York the feature of the week has been a decline in the manufacturers' prices of quinine. Opium is attracting more attention owing to its gain of somewhat marked strength. Menthol has an upward tendency, and so has camphor.

Dry Goods.—As mentioned in another place in this issue, the Canadian Colored Cotton Company on the 15th inst. came out with its revised price circular for many lines of cotton goods. It shows prices ranging from 5 to 12½ per cent. higher, and all orders are subject to mills' acceptance. The chief lines affected are awnings, cottonades, denims, tickings, sheetings, flannelettes, etc. The demand for these and other staple goods

Forging Ahead . . .

In Tendering to its Policyholders and Well Wishers

THE SEASON'S HEARTY GREETINGS

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

is pleased to announce that it has written during the past year

Over Five Millions

of good Canadian Business; and that in all other respects the Company has had a most successful year.

The Manufacturers' Life

The Manufacturers' Life Insurance Company has during 1903 once more proved to its many policyholders and friends that it is one of the most progressive and successful life insurance companies doing business in Canada. It has, during the year just passed, surpassed all its previous records by large amounts. The policies applied for reached the grand total of $7,754,542. This is an increase of $1,221,973 over the amount applied for in 1902. The premiums received on this new business amounted to $368,833, or an increase of $62,983 over the previous year. The total premium income showed an increase of over $174,000, reaching altogether the magnificent sum of $1,240,000.

Certainly the policyholders of the Manufacturers' Life have reason to congratulate themselves on the excellent showing made by the company in the year just closed. It is evident, moreover, that there is no better company in which those desiring insurance could place a policy.

continues very active. Travellers now out on the road with spring samples report keen interest in all that is going on in the trade, and have evidently come to the conclusion that the high prices are here to stay. July raw cotton made a new record in New Orleans on Tuesday last, having sold up to 15c., though this value was more or less of a local character. In New York even, however, it touched 14.56c. during the present week.

Flour and Grain.—Considerable firmness prevails in the flour market, and for ninety per cent. patents $3.10 is bid and $3.15 asked for carload lots in buyers' bags, middle freights. Manitoba is steady. Millfeed has shared in the general advance in grain stuffs, and the usual quotation for shorts is $16.50 to $17, with $14.50 for bran, in sellers' bags. Oatmeal keeps steady at the recent advance. There have been no price quotations altered for wheat since last week's price current. It, and in fact all other grains, continue very strong under light receipts.

Fruits and Vegetables.—Oranges are a trifle weaker this week, though prices so far have held up pretty well. Apples hold up well in the Old Country markets. We quote: Apples, 75c to $2.25 per bbl., according to quality; cocoanuts, $4 per sack; oranges, Florida, $3 to $3.50 per case; Jamaica, $2.75 per box, $4 to $5 per bbl; California navels, $3 to $3.50; Mexican, $2.25 to $2.75; Valencias, ordinary, $4.50; large, 420's, $5, and large, $5.50; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; celery, 20 to 40c. per doz.; cranberries, $9.50 to $10 per bbl., $1.25 per basket; Spanish onions, $2.75 to $3 per large case and $1 for small; Malaga grapes, $5 to $6.50 per bbl.

Hardware.—With the exception of a small decline in cut nails, prices remain the same. These nails, which usually are a little less than wire nails, have for some time past been equal, so that the present reduction only restores their natural position. A fairly good trade is passing, especially in seasonable lines. Metals continue to experience a good movement at steady prices, which, in view of expectations caused by the weakness of pig iron and other structural materials in the United States some time ago, has caused surprise to a good many people.

Hides, Skins and Leather.—In hides the market is quiet. The demand for sheepskins at 90c. is good. Calfskins are steady. In tallow there is no change. The leather trade is on the dull side just now, but improvement is looked for.

Live Stock.—At the cattle market this week, a considerable falling off in interest was manifested. The offerings, however, were light, so that everything sold, though an easier tendency was discernible in values. The export cattle sold pretty well, though there were few of good quality offered. In butchers' animals, only really good animals took much attention, as dealers stocked up pretty well in the two weeks previous. The run of milch cows was light. Sheep and lambs went a trifle easier.

GRIFFIN & WOODLAND
MANAGERS. 3

Provisions.—For high grades of butter, the demand is good, but most of that coming forward is poor and finds but a dragging sale. Prices remain similar to those of last week. Cheese keeps steady. Eggs are even a little higher than before; blocked roads in the country helping receipts to be exceedingly light. Chickens are higher-priced, owing to the heavy demand, it is said, for use of grippe patients. Choice dressed are quoted at 12 to 14c. per pound. Other poultry keeps about as before. There is a quiet market for hops, though stocks are small. Hog products are quiet as is usually the case at this season, but prices are fairly firm.

Wool.—Trade is very quiet. For fleeces there is no export demand, while pulled wools are in some request from the domestic mills.

Nineteen Hundred and Three was the **best year** the **SUN LIFE OF CANADA** ever had.

Applications received amounted to $19 672,773.06, an increase over 1902 of $3,987,086 84.

Mercantile Summary

WARIN & JACKSON'S boat-building establishment in Toronto was the other day damaged by fire to the extent of $2,000, partly insured.

THE Canadian Pacific Railway Company will shortly place the steamship "Princess Beatrice" on the route between Victoria and Seattle in competition with the Puget Sound Navigation Company, which owned the ill-fated "Clallam."

THE Canada-South Africa Lumber and Produce Company, Montreal, capital stock $50,000, has been incorporated by the Dominion Government for the purpose of acquiring and dealing in timber lands, operating sawmills, etc. Lewis Skaife, of Montreal, is among the charter members.

A REPRESENTATIVE of Jas. J. Hill, of the Great Northern Railroad of the United States is said to be now in Victoria negotiating with the Dunsmuir interests for supplies of anthracite from the newly discovered Comox fields for the mammoth steamships "Dakota" and "Minnesota," which will shortly ply between Puget Sound and Oriental ports.

A MEETING of the Montreal Transportation Co., Limited, was held on 21st January. The former directors were elected, save Justice Britton, who had resigned because of his appointment to the bench. Mr. Bartlet McLennan was re-elected president and Mr. J. M. Kinghorn secretary. Mr. J. A. Cuttle was chosen managing director.

THREE railways are applying to the Dominion Parliament for extensions of time in which to build lines: the British Columbia Southern Railway Company, for its eastern and western sections, also branch lines and the one from Fort Steele to Golden; the Canadian Pacific, for the branch line from New Westminster to Vancouver; the Atlantic and North-West Railway Company; the C.P.R. for a line from near Pile's Junction on the North Shore Railway to Shawinigan Falls and Grand Mere.

AT Montreal a demand of assignment has been made upon J. A. Lamarche, planing mill proprietor, and he has filed consent. His liabilities will probably reach about $30,000, if not $35,000.—S. C. Durand & Co., tea jobbers, are offering 30 cents on the dollar. We noted their failure a week ago.—Mrs. A. Latour, carrying on a small dry goods business, has made an assignment, and owes about $2,000.—Napoleon Bedard, barber and tobacconist, has assigned, and shows an indebtedness of about $900.

A YOUNG man with some experience as a boot and shoe traveller, A. L. Poirier, of Bienville, Que., began business for himself, retailing in that line, just about a year ago. He has already failed. J. O. Giroux, of Nicolet, Que., also a comparative beginner in boots and shoes, whose insolvency we noted in a recent issue, is reported as trying to arrange a compromise on liabilities of $3,800. His creditors profess their willingness to settle at 65 cents.

Mercantile Summary.

HON. GEO. E. FOSTER was to lecture in the Academy of Music, Halifax, on Monday evening last on the Chamberlain campaign. He will speak on the same subject during the week at a number of the towns of Nova Scotia.

FREQUENT suits appeared during the fall against J. D. Cameron, general dealer at Mabou, N.S., and he has now assigned. He is reported to have previously failed in 1882, in 1885, and again in 1893. —W. J. Allan, jeweller, Glace Bay, N.S., who was reported several weeks ago as offering 35 cents on the dollar, has now assigned as the result of several suits by creditors who declined his offer.

THE Dominion Oilcloth Company held its annual meeting in Montreal last week. The report and statement were adopted. Directors elected are: J. O. Gravel, Andrew A. Allan, J. J. McGill, Hugh A. Allan and John Baillie. Mr. Gravel is president; Mr. A. A. Allan, vice-president; Mr. J. J. McGill, treasurer, and Mr. John Baillie, managing director. The directors expressed by resolution their "sorrow at the loss of their late trusted and esteemed auditor, John MacDonald, who had filled the position so ably for the past thirty years."

CALL OPTIONS

Advantages Explained

Options offer considerable advantages to those wishing to operate prudently and successfully in Stock and Mining Shares. They avoid the payment of Fortnightly Differences, and also Contangoes.

GEO. A. STIMSON & CO.,

24-26 King Street West TORONTO, Ont.

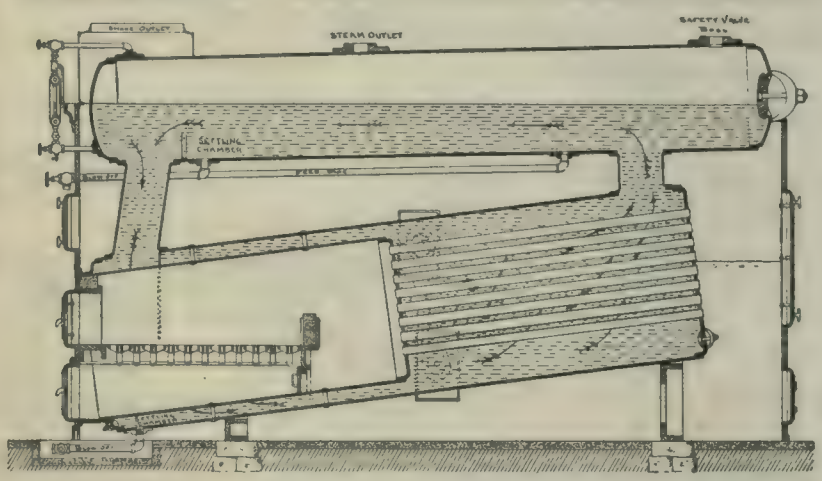
D. G. MCDONNELL, doing a boot and shoe business in Cornwall, Ont., finds himself cramped financially, and asks an extension. He claims to have a surplus of $1,400, and to owe only $1,200.—A. C. Quade has been doing a small planing mill business at Strathtay, in the Renfrew district, since 1894, subsequently also doing a little in a general store way. His assignment is now reported.

Two years ago Israel Slonemski failed in the clothing business at Ottawa. He resumed business under the style of the Palace Clothing Store, his wife, Ethel Slonemski, being the legal owner. In connection with this latter business an offer of 40 cents is now made.—H. J. Hurley, haberdasher, of the same city, doing business under the style of Hurley Bros., has assigned. He claims that the withdrawal of his brother's capital last July seriously hampered him, and that business has since been poor.

"AN Inspiration" is what the company calls it, the life-size picture, in oleograph, of a young woman (French, we should think, both from the features and the name), entitled "Babette," and issued by the Akron Rubber Works. The voluminous drapery which protects Babette's delicate chest from the churlish biting of the wintry blast is admirably colored, and the picture is one which might well ornament the walls of a bachelor's snuggery. A copy may be obtained by sending seventy-five cents to the B. F. Goodrich Co., of Akron, Ohio.

THE direct liabilities of Kenny & Co., wholesale dry goods merchants, Halifax, N.S., whose failure we lately noted, are shown at $144,417, of which $102,600 is due to T. E. Kenny, the former proprietor of the business; the indirect indebtedness is $68,500. The assets are estimated at about $72,000, after deducting an allowance of $33,000 on book accounts shown at $48,400, which would not indicate very close discrimination by the firm in the matter of credits. A proposition has been made to pay general creditors 40 cents on the dollar, T. E. Kenny agreeing to accept 25 per cent. of his claim. The matter is under consideration.

PAYS FOR ITSELF.



A MUMFORD Standard Internally Fired Boiler requires from 10 to 25 per cent. less fuel than a return tubular boiler.

A saving of only 10 per cent. will cover the cost of the boiler in five or six years.

A MUMFORD BOILER will therefore PAY for itself several times during its lifetime.

TORONTO Board of Control has decided to award the contract for a year's supply of paving cement to a Canadian company in spite of the fact that an American company had sent in a tender offering a price lower by over $1,000.

"APARTMENTS, Limited," is the name of a company recently incorporated by the Ontario Government, with an authorized capital of $200,000, for the purpose of building a large new apartment building in Toronto.

Mercantile Summary.

THE Sherbrooke (Que.) Electric Light Company has decided to accept the offer of the city to pay $200,000 for the electric light plant and other property of the company, provided the latter will also take over the gas plant.

THE Commercial Travellers' Mutual Benefit Society held a meeting in Toronto on Saturday to elect officers. Results were as follows: President, S. R. Wickett, of Wickett & Craig; vice-president, Joseph Taylor, of the Canada Paper Company; treasurer, John A. Ross; secretary, E. M. Rowley.

IN October, 1898, Fred. Elliott left Brantford and started a tinware and hardware business in Toronto. After running one store here for some time, he opened a branch at 1030 Queen Street West. A statement made last November showed assets of $1,000 and liabilities of $500. The latest report we have is that he has assigned.

THE following is a list of the patents granted last week to Canadian inventors in Canada and the United States: Canadian—A. J. Cross, upholsterings for caskets and the like; A. A. Barthelmes, piano actions; C. E. Johnson, fuel composition; D. Taylor and W. M. Taylor, gas igniting appliance; R. C. Smith, machine for washing clothes; J. Mills, dental instruments; N. C. Best, crude oil burners; J. D. Nasmith, baking ovens; R. L. McCaskell and T. J. Jamieson, grain doors; J. W. Virtue, machine for quartering or cutting apples; H. Spurrier, combined vacuum gauge and alarm; F. J. Mathers, automatic gate; F. Cords, gates. United States—A. J. Burton, band saw clap board machines; H. Dreany, explosive; F. Gregoire, railway brake; S. Lount, turbine engine; W. L. McLean, steam engine for card cutting machine.

THE regulations pertaining to the payment of a bounty on steel production have been approved in a recent Dominion Government order-in-council. On rolled round wire rods sold to wire manufacturers for use in making in their own factories in Canada, the bounty is $6 per ton. On rolled angle ties, joists, girders, and other rolled shapes of iron, as well as rolled plates, when sold for consumption in Canada only, the bounty is $3 per ton. The regulations provide that the manufacturer must furnish satisfactory evidence to the Minister of Trade and Commerce that the articles referred to have been produced in Canada and sold to Canadian consumers. The manufacture of articles subject to the bounty, is to be under the supervision of such officer as may be appointed or detailed by the Minister of Customs, while the books of the company or individual claiming the bounty are to be subject to the inspection of an officer authorized by the Minister of Trade and Commerce. A claim for bounty under the provisions of the Act must be made to the department within four months after delivery of the articles for use or consumption in Canada

Mercantile Summary.

THE Dunnville Natural Gas Co., the Consumers' Natural Gas Co., of Dunnville, and the Imperial Natural Gas Co. have been amalgamated under the title of the People's Natural Gas Company, with head offices at Dunnville. Among the provisional directors are H. Cockshutt, of Brantford, and John Brown, of Dunnville.

THE following remark was made by Prof. Goldwin Smith in reference to the campaign for an unscalable tariff wall advocated for the moment by Mr. Tarte and some others: "I am not the least afraid that by hurling epithets he will lead Canadians to believe that they can make themselves richer by taxation, or that when competition is excluded they will get better and cheaper goods."

THE city of Vancouver is trying to make an arrangement on a satisfactory basis for the payment to it of a percentage of the earnings of the British Columbia Electric Railway Company. It already pays a percentage on the profit of its city line on a basis of from 1 per cent. on earnings under $75,000 up to 8 per cent. for those under $2,000,000, and up to the end of last October the city had received $2,809 as its share for the current year. But no proper agreement had been made regarding a percentage on inter-urban railroad profits within the city limits, and this is what is now being arranged.

THE Dominion Government has granted letters patent to J. S. Brierley, Smeaton White, A. MacNab, of Montreal; John Ross Robertson, W. J. Douglas, J. A. Macdonald, J. E. Atkinson, J. S. Willison, W. F. Maclean, of Toronto; J. W. Dafoe and W. Sanford Evans, Winnipeg; J. H. Kellaher, Wm. Dennis, of Halifax; P. D. Ross, W. M. Southam and Alfred Wood, of Ottawa, incorporating them under the title of "The Canadian Associated Press, Limited," in a mutual and co-operative organization for the collection and interchange with greater economy and efficiency of intelligence for publishing in the newspapers.

NOVA SCOTIA Engines in Australia is the heading of an item which appeared recently in the Halifax Chronicle. Mr. D. H. Ross, commercial agent for Victoria, South and West Australia and Tasmania, writes to his father as follows. (His address is P.O. Box 140, Melbourne): "At the power house of the Perth Electric Tram Company I was pleased to observe two 300 horse power engines, manufactured by the Robb Engineering Co., of Amherst, Nova Scotia. These engines (Nos. 472, 473) have been working almost continuously 18½ hours daily for over three years. The engineer in charge intimated the excellence of their work. The general manager and engineer of the Perth Electric Street Railway is Mr. H. J. Somerset, formerly of Winnipeg, to whom I am indebted for many courtesies. Mr. Somerset is also engineer of the Kalgoorlie Tram Company, and the chief authority on electric traction in Western Australia."

Mercantile Summary.

THE Quebec Parliament has granted a charter to the Shawinigan Lake Power Electric Company, capital $100,000, which will acquire water powers and land, build mills and dams for the production of electric power, operate flour and saw-mills, etc.

THE large and handsome calendar for 1904 issued by the British Australasian and New Zealand Mail contains portraits of the Prime Minister of the Commonwealth of Australia, Hon. Alfred Deakin, and of the Prime Minister of New Zealand, the Right Hon. R. J. Seddon.

IN Germany, the science of forestry is looked upon as one of the most important studies. Not only this, but forestry pays its way. Wurtemberg has a million and a half acres of forest land, and in the year 1900, this showed a profit of something like $4 per acre in direct cash, let alone advantages in climate influences, too numerous to mention.

THE Canadian Scoria Block Co., Ltd., of Toronto, was incorporated in April, 1902, with an authorized capital of $150,000, of which $75,000 was in common stock, and $75,000 accumulative preference stock. A considerable portion of the capitla has been spent in experimenting, and recently the concern made an assignment to E. R. C. Clarkson, of this city.

STE. CUNEGONDE Roman Catholic Church, near Montreal, one of the largest and finest in the Province, has been burned to the ground. The steeple, which was 229 feet in height over all, fell with a crash. The firemen experienced some difficulty in preventing the fire from spreading to surrounding buildings. The loss is estimated at $140,000.

THE Richelieu and Ontario Navigation Company's steamship "Montreal," which is now being rebuilt at Sorel, Que., is expected to be ready for service at the opening of navigation in 1905. Several other of this line's passenger boats are also undergoing renovations, so that the company will be prepared for an unprecedented rush of tourist traffic. The annual meeting will be held on February 18th.

WHITTAKER WRIGHT.

A tragic sequel to the trial of Whittaker Wright by a jury in England for fraud and his sentence to seven years' penal servitude, was his falling dead on the floor of the court room after having declared in a loud voice, "I am as innocent of any intention to deceive as any one in this room." To understand how a man with his history could make such a statement one must believe either that he was afflicted with what French alienists call *la folie des grandeurs*, or that he had the sort of vague and shadowy conscience possessed by some stock gamblers. Having begun as an assayer in Colorado, and been a broker in Phila-

delphia, Whittaker Wright is said to have been a millionaire at 31 years of age. About 1891 he became a company promoter in England, starting the West Australian Exploring and Finance Corporation in 1894, and the next year the London and Globe Financial Corporation. These were afterwards amalgamated with a capital of £2,000,000. The London and Globe, the Standard Exploration and the British American Corporation—which he subsequently started—smashed in 1900 with an apparent deficit of about £5,500,000, involving Lord Dufferin and many others. He was examined in bankruptcy in 1902, and towards the close of the same year the British Attorney-General decided that his case was not one to be taken up by the Director of Prosecutions. After his leaving for Paris in 1903 an order for his prosecution for fraud in issuing deceptive statements was granted by Mr. Justice Buckley, and he was arrested at New York in March. He was extradited after some months' delay, charged at the Guildhall in August, and liberated on £50,000. Shortly afterwards came his trial, conviction and death at the age of 47. Such a career as this man's shows, among other things, how easily a bold and confident operator can get control of enormous sums of money from the English public, and how for years he can live the life of a prince and escape punishment for his misdeeds.

BRANDON BOARD OF TRADE.

The Board of Trade of Brandon, Man., held its annual meeting on Tuesday of last week with a large attendance, Mr. F. Nation, the president, in the chair. The presidential report spoke of some very satisfactory features in the growth of Brandon. For instance, the customs collections for the past year amounted to $113,106, as compared with $84,372 for 1902. Last year the value of the dutiable goods brought in was $320,000; of free goods, $300,000. Everything, it was said, indicated that Brandon would continue to be the best and largest commercial city between Winnipeg and Vancouver. Several instances were given of cases in which the board had successfully attempted to bring about improvement in various matters in which the city was interested. A strong resolution was passed by the meeting asking the Government to locate the agricultural college at Brandon rather than at Winnipeg. The election of officers was then proceeded with, and resulted as follows: President, John Inglis; vice-president, W. J. Lindsay; secretary, Kenneth Campbell; council, Dr. Harcourt, G. R. Coldwell, A. D. Rankin, F. Nation, F. W. Smith, Dr. McDiarmid, W. Warner, John Hanbury, A. F. Campbell, J. D. McGregor, C. E. Bowker, Dr. S. W. McInnes.

HIS LAST CIGAR.

Nobody could have been much fonder of tobacco, in the shape of snuff, than the famous German general, Moltke. While working out his wonderfully successful strategies in the war of 1871 he is said to have consumed from six to eight ounces in the course of a week. Prince Bismarck was another no less enthusiastic German devotee of the weed. There is on record, in his own words, a delightful story of how, at Koeniggratz, he had only one cigar left in his pocket, which, during the whole of the battle, he guarded as carefully as a miser guards his treasure. Said he, "I did not feel justified in using it. I painted in glowing colors in my mind the happy hours when I should enjoy it after the victory. But

THE PURITY AND EXCELLENCE OF
COWAN'S
PERFECTION
COCOA
IS ACKNOWLEDGED BY THE WONDERFUL SALE IT IS HAVING

I had miscalculated my chances. A poor dragoon lay quite helpless, with both arms crushed, murmuring for something to refresh him. I felt in my pockets, and found that I had only gold, which would be of no use to him. But stay—I had still my cherished cigar. I lighted it for him, and placed it between his teeth. You should have seen the poor fellow's grateful smile. I never enjoyed a cigar so much as that one which I did not smoke." Tobacco was, indeed, a great and potent factor in the success of the German arms, many of the soldiers going into action pipe or cigar in mouth.—Exchange.

QUEBEC DAIRYMEN'S ASSOCIATION.

The twenty-second convention of the Province of Quebec Dairymen's Association opened at Sherbrooke on Tuesday last, with every prospect of a highly satisfactory reunion and useful discussion of the scientific aspects of the dairying industry. Among those present were: Mr. C. H. Parmelee, president of the association; Hon. S. A. Fisher, Hon. A. Turgeon, Prof. J. H. Hills, of Vermont, and Mr. J. C. Chapais. Great interest was taken in Inspector Plamondon's report, which dwelt upon the low average quality of the cheese made in Quebec Province. The remedy, thought the inspector, lay in the direction of reducing the number of small factories, or of consolidating them into larger, more up-to-date concerns. Some Quebec cheese was fully equal to that made in Ontario or anywhere else, but the percentage of this was small, with the result that the ruling price was ¼ to ½c., or even 1c., per pound lower. These matters came up at the morning session on Tuesday; in the afternoon much of the same ground was covered in French for the benefit of those delegates who did not understand the English language. A report by Mr. J. D. Leclair, inspector of creamery syndicates, created warm discussion, especially on the clauses relating to the sending of poor milk to the creameries.

In the evening President Parmelee gave a general review of the dairying interests during the year, premising his remarks by congratulating Quebec farmers on the comparative success of their operations. Production was curtailed by drouth in the spring and fall, but in spite of this the make of cheese was larger and the average price higher than ever before in the history of the trade. The Province of Quebec had now over 2,000 butter and cheese factories, and the farmers were going into dairying more largely every year. The present production of cheese and butter had shown the fine increase of 350 per cent. in the last ten years. It was with pleasure the president noted that the relations between factorymen and buyers had become more satisfactory than heretofore, claims for inferior quality and short weight having been comparatively rare.

UNREADINESS IN CASE OF FIRE.

It would be a good thing if there were in every Canadian town which possesses fire appliances some one person who would constitute himself the watch-dog of the town in the matter of fire—would see that the fire alarm was always workable; that the water tanks were always filled; that the steam fire engine had no broken wheels or missing bolts; that the hose was all right; that even if the town had no fire protection but ladders and water buckets, would at least see that these were in order and get-at-able. Such a man would, in following out a self-imposed duty, doubtless get himself called "a crank." But such cranks would have saved hundreds of thousands of dollars in the last few years.

We have just been reading in a Montreal paper a letter signed "Inspector" which asks some questions as to the kind of ignorance or negligence as to fire appliances which prevail in cities and towns just because the people, officials included, often take it for granted week after week that the fire fighting apparatus or the water supply is all right without looking to see that it is so. The writer of this letter asks the Montreal fire chief, referring to the latest important fires in Montreal: (1) Why the hydrants near the burning buildings were only found to be frozen when they were urgently needed? (2) Why there was no one in the brigade who knew that the building burning on Recollet Street extended through to Notre Dame Street, and that the fire could have been at least as effectually fought on that side as on the other? Then he tells of frozen hydrants on St. Catherine Street a few weeks ago, by reason of which a trifling fire in a drug store was allowed to extend and become a heavy loss.

Some uniformly cautious officials there are, we have no doubt, in many towns and villages, who feel their responsibility, and have such a well-founded dread of fire that they look after the danger points every week of their lives. But there are careless officials, who take things for granted without looking. And the residents of communities are, as a rule, so careless about fire-breeding faults in their own homes or in public places that the conscientious fire guardian, even if self-appointed, is a treasure.

The Shawinigan Water and Power Company held its annual meeting on Monday last. It was stated that the company was now selling in Montreal 6,000 horse power of electric energy and about 20,000 at Shawinigan Falls. It is estimated, however, that the total capacity for power possessed by the Falls is not less than 100,000 horse power. The election of officers resulted as follows: President, Hon. Robt. Mackay; vice-president, J. N. Greenshields; treasurer, J. E. Aldred; directors, Hon. Robt. Mackay, Thos. McDougall, Wm. MacKenzie, W. R. Warren, J. N. Greenshields, John Joyce, Denis Murphy, H. H. Melville and J. E. Aldred.

RECIPROCITY.

The agitation in favor of a reciprocity treaty between Canada and the United States is being kept up in the latter country. Not only commercial bodies in the American cities along the south side of the Great Lakes, but public associations in Boston and prominent newspapers in New York are harping, week by week, and month by month, on the resources of Canada, the growth of Canada, and what is more, the importance of Canada as a market for United States goods. "Hurry up," they seem to urge, "hurry up and get Canada committed to reciprocity with the Union before that dangerous man, Chamberlain, succeeds in reaching his goal of an Imperial reciprocity of tariffs, for that is precisely the thing we Americans do not wish to happen."

A report was submitted the other day by a special committee of the Detroit Chamber of Commerce bearing upon the subject of reciprocity with Canada, which that body has long been advocating. After dwelling upon the points of interest between the countries and giving some eloquent praise to Canada, the report declared that the ultimate and ideal relation between the United States and the Dominion is one of absolute free trade between the two countries, with identical tariffs against all others. But seeing that this ideal, which is essentially an "American" one, cannot be reached, what then? The Detroit Chamber thinks the rate at which United States capital has been pouring into Canada these last five years both significant and hopeful of a reciprocal awakening. It says:

> The movement of capital from the United States to Canada has served to pave the way for more intimate trade relations. Many millions of dollars of American capital have within the last five years gone into Canadian mines, forests, oil fields, manufactories, electric and steam railways, hotels, and other enterprises. This is in striking contrast to the indifference of British investors; and it is a matter of unpleasant comment in Canada that if an Englishman sees equal chances of investment there and in the States he will generally go to the States. He does not appreciate the opportunities which his own colonies offer.

Precisely. The Englishman does not appreciate the opportunities which Canada offers, but the better informed United States business man does. The average Englishman in his aloofness looks upon Canada as a huge and mostly frozen barbarous territory, with the merest fringe of settlement conducted by "colonists," (who are curious and inferior persons), while the dwellers in the Northern United States know Canada to be a country marvellously gifted by Nature and with a population equal in intelligence, ability and resolve to their own or any other people under the sun. This is why so many of her neighbors to the south desire reciprocity with her—this is why Canadians so often get hints that we should be a part of that great country. We find in the Montreal Gazette some sentences, taken from an article on this proposal of reciprocity, which very well express a widely held view among Canadians. We append them: "The average Canadian, when he reviews this situation of affairs, knows what is required—a readjustment of the tariff so that the United States manufacturer will not only find it profitable but imperative, if he would retain his Canadian trade, to produce for the Canadian market in Canada. We want capital and we want men. The British investor prefers the United States. He will prefer that country until he discovers that United States capital is finding a profitable source of employment in Canada. Then, and not until then, will we secure our share of the capital Great Britain has to invest. Herein lies one more reason for a revision of the Canadian tariff on lines that will give adequate protection to Canadian industries. That is what we want—not reciprocity."

FINANCIAL REVIEW.

The Government Statement for December 31st now to hand enables a comparison to be made for the whole year, and an estimate of the real financial position of the country, as compared with former years. We have referred again and again to the large expansion in every department of business and finance that distinguished the year 1903. It might by some be called a year of inflation, but that would be too strong a word. It has certainly been a year of expansion, of large profits, and almost unexampled pros-

perity. The recent statements put forth by banks have been distinguished by this feature of expansion of business and large profits to an extraordinary degree, and when the statements are summarized in this Government return, the question cannot but arise, whether this expansion has had a sound basis. With respect to this, we must mainly direct our attention to the two most significant items, namely, of deposits and discounts. That there has been a considerable expansion in deposits our readers are well aware, for we have called their attention to it again and again. But the expansion in discounts is far more noticeable than that in deposits, for while deposits have increased from 420 millions to 447 millions, discounts have increased from 360 millions to 410 millions. Now certainly such an enormous expansion of discounts in a single year is calculated to give rise to the question whether they have all been done on a sound basis. If they have, there is no reason to fear, large as the increase has been, but if any considerable amount of discounts had been made on an uncommercial basis, or on a basis of articles that have an inflated and unnatural value, the seeds of trouble will have been sown which will not fail to germinate at some future day.

It does not appear probable that any large increase of discounts can have been based on land or fixed property to any considerable extent. This was the case before the great revulsion in Australia some years ago, which brought about such disasters to the banks of that country. There has been no wave of land speculation in Canada for many years back. To ascertain whether this increase of discounts has had a mercantile basis, we must look at the trade returns of the country, i.e., the statement of Exports and Imports, as well as (so far as can be ascertained), the value of the general productive forces of the country, and here we find considerable ground of satisfaction, for the foreign trade of the country increased about $45,000,000 during the year, while there has, undoubtedly, taken altogether, been a considerable increase in the value of products of the country, not yet reflected in the returns of exports. This has a close correspondence with the increase of discounts. On the whole, we are inclined to think that, so far, there is no reason to apprehend that the country is in that condition of inflation which is always followed by a revulsion.

There are persons, undoubtedly, who take a pessimistic view of the circumstances now being developed, and are apprehensive that there must shortly be a breaking down in our financial and mercantile position. To ascertain whether this supposition is well founded, it will be well to look back upon such revulsions as have already taken place in Canada and other countries, with a view to ascertain whether the present circumstances correspond to those that preceded such revulsions. Now experience shows that all such financial crises were preceded by three things: First, a period of extraordinary mercantile prosperity and abounding harvests or productions; second, a period of general speculation (not partial), in one or more of the great lines of industry and development, such speculation being so general as to involve a large majority of mercantile persons in long and heavy obligations unconnected with their own business; third, a general prevalence of a high style of living and indulgence in expensive luxuries of all kinds; and this not on the part of a small number of persons, but as a general habit of the mercantile classes of the community. Looking to the other side, the revulsion has always been preceded by three things, a bad harvest, or possibly two or three; a heavy fall in the total value of staple exportable productions; combined with a continuance of imports on a scale suited to extravagant development in living. These invariably result in a draining off of gold or their available resources, going on steadily month after month, until the danger point is reached and the collapse ensues.

Looking then at our own position in the light of this summary of past experience, we may conclude it as certain that we are passing through a period of good harvests, increased production, and extraordinary financial and business prosperity. There has been speculation over a partial area, which speculation has run its course; but there has been no general wave of speculation like, for example, the land boom of Ontario in 1857, or the Winnipeg boom of 1882; and there has certainly been no such general development of luxury and extravagance in living as characterized those periods, though, of course, there are in evidence here and there on the part of individuals of what may be called ostentatious and luxurious display. And certainly there are no signs as yet of any serious draining of the available resources of the banks as a whole. Yet the diminution of call loans from $95,000,000 to $74,000,000 is noticeable, offset, however, by the increase of specie and legals from $37,000,000 to $47,000,000, the latter of course being by far the most valuable form of reserve of the two.

One of the most striking developments of modern banking in Canada is the extraordinary increase in the "Rest" or, as it may be fairly called, the Guarantee Fund, of the banks; and this, not only from profits, but by contributions of stockholders.

The operation of this Rest fund is twofold. In the first place it operates to prevent such a suppression of dividends as is necessary when the capital of a bank is impaired; this we know is an experience which has befallen more than one bank in Canada. It is contrary to the Banking Act to pay any dividend whatever when the capital is impaired; therefore the more the capital is hedged about with reserves and guarantees, the more certainty there is of dividends, and of course the more satisfactory is the stock as an investment. But beyond this, there is the consideration of the Double Liability; not at all a matter that may be put aside as out of the realm of practical consideration. Bank stockholders in Canada have more than once found out to their cost that the double liability is a serious practical fact. Here, again, the value of a large guarantee fund, over and above the capital, is apparent; for the whole of that must be lost, as well as the whole of the capital, before any action can be taken on the double liability. There is, too, another consideration, which applies rather to the managers of a bank than to the public, namely, that the larger the figure the Rest fund reaches, the more easy it is to earn good dividends. The movement, therefore, is a

reasonable and salutary one, although it cannot be continued indefinitely, otherwise stockholders will reasonably ask for a division in some form of funds which appear to have accumulated beyond any reasonable figure.

ABSTRACT OF BANK RETURNS.

Description.	Dec. 31st, 1902.	Dec. 31st, 1903.	In Month 1903.
Capital paid up	$72,795,000	$78,563,000	Inc. $165,000
Circulation	60 574,000	62,539,000	Dec. 4,886,000
Deposits	420,767,000	447,191,000	Inc. 5,416,000
Loans, Discounts and Investments	424,976,000	472,448,000	" 1,733,000
Cash, Foreign Balances, Net & Call Loans	177,347,000	169,517,000	Dec. 375,000
Specie	12,892 000	16,101,000	Inc. 624,000
Legals	24,720,000	3),941,000	" 477,000
Call Loans	95,089,000	74,020,000	" 1,690,000
Investments	61,259,000	63,590,000	Dec. 337,000

Government Savings Banks,	$ 61,269,000

Small	$ 12,917,000

Gold held, $28,679,000. equal to 69 per cent.

MORTGAGE LENDING ON FARMS.

The remarks of the president at the meeting on Wednesday of the Canada Landed and National Investment Company suggest a backward glance at the origin and purpose of Ontario mortgage lending companies. Fifty years ago the rapidly growing farm population of this country were mostly poor. They needed money to clear their farms and to stock them, to provide implements, to build houses and barns. The primary purpose of the loan companies formed in Ontario was to furnish money for such purposes; and it is not too much to say that many a farmer, now comfortably off, with his mortgages paid, and with money of his own to lend, was put in the way of prosperity by the money first advanced to him by a loan company. Similarly, there are thousands of farmers in Manitoba and the Territories to-day who find mortgage loan companies of the most signal service. And indeed the farmer of the Western plains has a great advantage over the bush farmer of Ontario (who had to clear his land of trees), for he gets a quicker return for his labor than the latter can do. But in either case, the farmer is most often virtually beholden to a company or private lender for his start in life. And it is only fair to say that no mortgagee need look for a better borrower than an honest farmer or for better security than farm lands, especially in an agricultural country. Indeed, if some of the companies had stuck to farm lending and kept out of town and city properties and away from "booms" they would have been saved from irritating losses.

THE WOOLEN TRADE.

While no particular increase in the demand for Canadian wools can yet be chronicled, there would appear to be foundation for the belief that an increased demand will arise in the not very distant future. This will not be, however, because our wools themselves are becoming better known in the world's markets, but because the latter seem, owing to recent circumstances, to be calling more for a class of wool to which Canadian grades closely approximate. Last year at the London sales there was a deficit shown in the Australian clip of nearly a quarter of a million bales. While this falling off of quantity, however, was counterbalanced by a great rise in value, this rise did not take place, as might have been expected, in merino, the class of wool which was notably short, but in the coarser crossbreds. As a matter of fact, the finer grades may be said for all practical purposes, not to have profited by their scarcity at all, for the public taste instantly turned, as we have said, in the direction of the coarser grades. As a matter of fact, the decreased offerings last year, consequent upon the long-continued drought in Australia had been fully foreseen in the year 1902, and, as to value, were discounted by the rapid rise towards the end of that year. Experience quickly proved that when fine wools ascend to that level, fashion steps in to show that they are not absolutely necessary, and that coarse wools, through their comparatively low price, can easily carry the day in competition. That the latter benefited, however, in the fray may be judged from the fact that, compared with an average merino, coarse crossbred, which a year ago stood 60 per cent., and medium crossbred 50 per cent. lower, now stand at only 50 and 36 per cent. lower respectively. At one time of 1903, namely, in September, both medium and coarse crossbreds stood at double their lowest value in 1901. Then there was a reaction, but even then, a month ago, they stood at fully 20 per cent. higher than a year ago. At the same time, it should be remembered that there are still people in the trade both in England and the United States, who predict a broadening range in the call for merinos; and while this may not tend actually to bring down the new high level for coarser wools, it is very apt to prevent them making further notable advances.

In Boston and other wool centres in the United States, a firm feeling for all grades of raw wool prevails, though so far the upward tendency has not materialized into higher prices. Stocks, however, are light, and there is reason to believe that a nominally active trade is in sight.

So far as the Canadian markets are concerned, pulled wools are in fair demand from the various domestic mills, but little business is being done in fleece. In fact, the export enquiry does not amount to anything, but this is not a strange condition at this time of the year.

PROSPECTS IN THE FUR TRADE.

As yet it is too early to write intelligently at any length on the conditions likely to prevail during the ensuing year in the fur trade, because only brief reports of the London sales, which have been going on this week, have come to hand. Such as have been received, however, say that there is a very distinct tendency in prices to go down. This threatened de-

cline is not to be wondered at. It simply shows that the values which reigned in furs last year, the highest in the history of the trade, were really too high to last; as in the case of many other commodities, they reached a level out of proportion to the means of purchase. The present year opens up with signs, perhaps not of actual depression, but of a certain amount of reaction in business generally throughout the world; and fur is an article which feels the effect of less prosperous times at least as quickly as any other.

In the meantime, so far as Toronto is concerned, some of the people interested in the trade seem to have a somewhat unsettled idea as to intrinsic values. In Montreal, dealers are buying raw furs very carefully, and report a disposition on the part of holders to hold back country shipments. Skins which are of very ordinary worth are being offered here at prices naturally only obtainable for those of the very best grade. Trappers, too, seem to recognize no difference in size; that is, they apparently believe a skin is worth exactly the same whatever may be the size of the piece of fur which may be obtained from it, the truth being, of course, that quality and quantity both count. Some capital has been made out of the threatened hostilities in the East. This is scarcely warrantable, however, at any rate at the present moment. Any real scarcity of Chinese furs will depend upon the outlets at the ports being speedily blocked, and there is no particular indication that this will come to pass.

SCHOOL OF RAILROAD ENGINEERING AND TRANSPORTATION.

That the best practical men of this continent are no longer so devoted, as they once had the reputation of being, to the idea that only the exclusively practical in education is of any value, is evidenced in many ways. The old rule-of-thumb notion that university training is useful only to those who mean to follow those professions in which a knowledge of the classics forms a large part is giving place to the recognition that no matter how valuable to a young fellow who has his way to make in the world, may be the fact that he is rising from office to office or shop to shop, with fresh practical experience at each step he takes, a clear understanding of the ultimates of his chosen business, of the theory upon which its practice is based, is of co-ordinate worth. We learn that a plan is being considered by the authorities of McGill University, Montreal, for the institution of a school of railroad engineering and transportation in general. The idea was first definitely put forward by Sir Thomas Shaughnessy, president of the Canadian Pacific Railway, and was approved by Sir Charles Rivers-Wilson, president of the Grand Trunk Railway and by Mr. C. M. Hays, its general manager. These gentlemen, as well as other railway magnates, we believe, have agreed to give substantial assistance, while Dr. Bovey, dean of the McGill faculty of Applied Science, aided by prominent transportation men, has been engaged for some time past in working out the details of the scheme. With the establishment of such a school as is proposed, it is felt that the railway companies would enjoy the advantage of being able to draw a regular supply of men, well trained for the work, while the country at large would benefit from the fact that in whatever part of Canada railway extension might be proposed, there would always be a sufficiency of properly qualified engineers to look into any plan for development of its transportation facilities. From its very nature, such a training and college would be non-sectional.

COLD DAYS FOR BUSINESS.

An extended editorial on the weather is scarcely what the readers of a commercial and financial journal would expect. No record of extreme temperatures, no recital of private and public discomfort, no comparison, even, of this month with previous Januaries would be considered to justify the gravity of an editorial article. Winter in the abstract is commonplace, or at best it is regarded as a theme for poets and scientists, for curlers and hockey players. But winter in the concrete has a very definite and immediate interest for men when it affects their business and strikes the pockets. That the present January has a peculiar interest for business men, by reason of the weather, becomes manifest when we consider the interruption to communication and correspondence that has been caused by the unusual atmospheric conditions of the present month.

So intense and prolonged has been the cold, so deep the snow, that for a fortnight the regular means of travel have been irregular. The isolation of some places of northern Ontario is complete: we hear that Milverton, seventeen miles from Stratford, has not had a mail for a week. Manufacturing towns, Preston, for example, are threatened with a coal famine, the railways being unable to get their coal trains through. On Detroit river the ferries take hours to cross, when they cross at all, so thick is the ice. From Quebec province come accounts of excessive cold and violent storms, and indeed these conditions have applied over a great portion of the northern United States. Interruption to correspondence has been a feature which incommoded business men and doubtless caused inconvenience to bankers. Still worse, probably have merchants found the snowing up or otherwise delaying of commercial travellers. Our Montreal correspondent tells us of the way in which the volume of remittances from country retailers has been sensibly affected.

In Quebec, where they are more accustomed to cold weather, the low temperatures of January do not seem to occasion so much comment. But in Ontario, when fires of fence rails have to be built around a locomotive boiler to "thaw her out," and to enable her to pull two cars ten miles, as was the case on the G.T.R. the other day, it seems to the inhabitants that the mercury has struck a low level. Our Maritime Provinces, and indeed the whole northern part of this continent, have suffered discomfort and hardship from this exceptionally cold snap. There is ground for hope that the worst is over and that we shall have better weather and more regular communication in February.

OUR HALIFAX LETTER.

Probably the most important event of the last two weeks so far as this city is concerned was the visit of the Transportation Commission. The members of this important body during their stay in this Province heard evidence at Halifax, Sydney, North Sydney, Louisburg, Glace Bay and New Glasgow. The gentlemen composing the commission are Mr. John Bertram, of Toronto, chairman; Mr. Robert Reford, of Montreal, and Mr. E. C. Fry, Quebec, and the people with whom they have come in contact in this part of Canada are well pleased with the painstaking manner in which they are conducting the investigations, and have every confidence that they will present a well-considered report to the Government, recommending all that is needed to make the transportation system of Canada thoroughly adequate for national purposes. To review the evidence presented to the commission at this point would occupy more space than can be given it here, but one incident in connection with the work may be mentioned. Through the courtesy of Mr. Geo. S. Campbell a small steamboat was placed at the disposal of the Commission, and in it the members spent several hours on the harbor, visiting the several points of interest, the railway terminals, the harbor approaches and lighthouse facilities, thus gaining by personal experience a knowledge of the peerless position of the port for the handling of the mid-winter trans-Atlantic business. One of the members of the Commission is interested in the project for the building of steel steamships. The Nova Scotia Government as well as the corporations of Halifax and Dartmouth have offered large bonuses for the establishment of a plant for this purpose, and this gentleman while here had a conference with the representatives of these and other local interests, which resulted in an understanding which, it is believed, will hasten the undertaking. In fact, the mayor of the city at the close of the conference informed a reporter that the work of constructing the shipyard would be started at an early date, providing the Federal Government guaranteed the expected bonus on the vessels constructed.

A year ago the Nova Scotia Legislature voted a sum of money for the erection of a monument to the late Joseph Howe, the father of Responsible Government. A commission consisting of Sir Malachy Daly, Hon. J. W. Longley, Hon. A. Drysdale and Messrs. J. J. Stewart, C. C. Blackader and W. E. McLellan, the latter three being the editors of the three Halifax daily newspapers, was appointed, and models for the proposed memorial were invited. Two models were submitted in response to this invitation, the one from Mr. Hamilton McCarthy, of Ottawa, and the other from Mr. Philippe Hebert, C.M.G., of Montreal. These models have been exhibited in the provincial building for some weeks, and were much admired. The commission finally decided to accept that of Mr. Hebert, and it is hoped the statue will be completed in time for unveiling on the 100th anniversary of Howe's birth, next December. It will be erected in the open square to the south of the Parliament Building. The square to the north of the building is occupied by the monument to the Nova Scotians who fell in the South African campaign, which was erected from the model of Mr. McCarthy.

The financial statement for the Province of Nova Scotia for the past fiscal year shows a surplus of $66,000. The total revenue was $1,243,381, an increase over that of 1902 of $103,000. The total expenditure was $1,177,330, leaving a balance in the treasury of $66,250. This is the second largest surplus in the history of the Province in recent years, being only exceeded in 1900, when the surplus was $76,000. The revenues of the Province have increased steadily since 1898, when they amounted to $855,060. The increase in royalty since 1901 shows the rapid development of our coal mining industry, the receipts from this source being as follows: In 1901, $242,657; 1895, $251,010; 1896, $274,028; 1897, $270,387; 1898, $277,070; 1899, $310,150; 1900, $413,874; 1901, $437,726; 1902, $487,018; 1903, $610,234.

A deputation of lumbermen recently waited on the Attorney General and presented the draft of a bill empowering the Government to appoint a chief forest ranger and eighteen county rangers under his jurisdiction. These rangers are to patrol their districts during the season of danger from forest fires. Regulations provide severe penalties for the setting of fires during the summer season. The Attorney-General agreed to the payment of the chief ranger, but held that the county rangers should be remunerated by the county councils. The Canadian Forestry Association holds a meeting in Halifax next week for the purpose of discussing forest preservation.

Free lectures in seamanship are being given in this city every Tuesday and Friday evening during January, February and March. They are under the auspices of the Department of Marine and Fisheries; and, as a large proportion of our population follow the sea, they are much appreciated.

A movement has been inaugurated in connection with our herring fisheries which may be the turning point for that industry. Hitherto these fish have been taken chiefly in nets and weirs in our harbors, and for some years the numbers taken have shown a decline. Rivers of fish pass up and down the coast, and an attempt will be made to follow them after the method practised in the British Isles. A steam drifter will be brought out in the spring with a crew from Scotland to inaugurate the Scotch method of catching and curing these migratory fish, and it is expected that local fishermen, after witnessing the success of this plan, will adopt it.

Plans for the Government railway bridge across the Strait of Canso have been submitted. It will be a cantilever structure, the centre span of which will be the longest in the world. The total length of the bridge is to be 3,300 feet, and the cost will be $5,000,000. The steel in its construction (35,000 tons) is to be supplied by the Dominion Iron and Steel Co.

The Nova Scotia Mining Society, a very practical and progressive body, held its annual session in this city last week. Important papers were read, and the discussions were interesting. Regarding the agitation of the Lord's Day Alliance, a resolution was adopted memorializing Parliament to prevent the introduction of such restrictions on Sunday labor as will hamper the working of the mines and other great industrial enterprises of this Province.

Halifax, 25th January, 1904.

THE NEW C.P.R. OFFICES IN LONDON.

Several of the London newspapers have described the handsome building which the Canadian Pacific Railway has for some time past been building for itself in Trafalgar Square, which has been described as the finest site in Europe. It was opened on January 7th by Lord Strathcona. The British Canadian Review describes these new railway offices as being both by their position and architectural magnificence worthy of the corporation and of the Dominion. The business of the railway will be carried on therein in three departments: (1) Devoted to the settlement of the great West; (2) the encouragement of tourist travel among British and European visitors; and (3) the circular tour offered by the company via Japan, China, and Australia. The building has a frontage of polished Swedish granite below and of Portland stone above. The frontage on the square is 54 feet, and the extreme height 96 feet. It is a fireproof construction, and has an electric elevator. The interior decorations are lavish for a building of the kind. The staircase is lined throughout, from floor to ceiling, with Devon and Italian marbles, and a portion of the woodwork is birch, imported from Canada. The general office is a very handsome apartment. Surmounting a dado of Cuban mahogany with teak framing the walls are lined with French, Grecian, and Italian marbles. The mosaic flooring has in the centre the arms of the Dominion and of the Provinces of Canada. In the basement are four strong rooms, a motor room, etc., and there are five storeys above the ground floor. A fine bird's-eye view of Trafalgar Square is obtained from the top floor in front, and in the rear the view embraces the new Admiralty Offices, the Houses of Parliament, Westminster Abbey, and the new Roman Catholic Cathedral. Mr. Archer Baker, the European manager of the railway, may well be proud of his new quarters.

Since the above was put in type a Montreal man, who was in London at the opening, sends us a cut of the building and some printed notes descriptive of it "supplied by the architect." Evidently our correspondent believes the architect one of

those who consider that no good thing can come out of Canada. We subjoin his letter.

Editor Monetary Times:

Sir,—I send you a couple of fly sheets that were distributed on the opening of the new Canadian Pacific Railway offices in this city. They are very handsome offices, and will, of course, be a great advertisement for Canada. It struck me, however, in looking over the description of the building prepared by the architect that as Canada virtually built the C.P.R., and did so much for the present company, a little more of the products of Canada might have been used in constructing this building. In fact, as the C.P.R. is claimed to be a purely Canadian institution, Italy, Greece, Belgium, France and all the foreign countries put together could not have raised a single voice against even the employment of purely Canadian material in the building. That would have been an advertisement, if you like!

But what do we find? In looking over the list you see that the front is of polished Swedish granite and Portland stone. What is wrong with our Canadian granite and stone? The staircase is lined with Italian marble, with a dado of Escallette from the Alps and a wall lining from Italy; teak framing with Cuban mahogany panels; wall linings from Greece; alabaster moulded string from Derbyshire; ingle nook arch from the Pyrenees; columns from Greece; Brazilian onyx; Italian chimney pieces; counter of polished teak; Otis American elevator. Don't we make elevators in Canada? The only thing from Canada in the building seems to be some doors of birch supplied by Gilmour & Co., of Trenton, Ontario, notwithstanding the variety and beauty of our Canadian woods.

Now, in my opinion this is hardly fair. It seems to me that everything but the brick and mortar contained in this building could have been supplied by Canada. If the architect knew nothing or cared nothing about Canada, the authorities of the railway might have had something to say. Surely Mr. Archer Baker has not become so much of a cockney already as to have lost his love for what I believe is his native land.

MONTREALER.

London, 14th Jan., 1904.

ONTARIO AGRICULTURAL CONDITIONS.

The chief feature of the November Crop Bulletin, issued by the Ontario Bureau of Industries recently, is the scarcity of suitable labor. To such an extent is this noticeable that of quoted letters from correspondents probably four out of five of the remarks deal with this subject. Not only has labor been scarce, but the quality offered has been so poor. This, taken in conjunction with the fact that the wages asked have been excessively high, has produced a state of things in some sections where farmers are actually retiring from the business, not from age or ill-health, or the fact that it is not profitable, but because of the constant worry caused by expensive, inefficient help. Part of the trouble has been caused, no doubt, by the exodus of so many of Ontario's most stalwart young men to the North-West, part by the fact that in these days it is so usual for some at least of the farmers' sons desiring to leave the old homestead and make their way in the cities. A mistaken policy doubtless in only too many instances; but this they do not realize until too late. On the other hand, of course, there has been considerable immigration into Ontario from Great Britain, and this kind of farm help is not, as a rule, very satisfactory. One thing which will in time do a good deal towards applying a remedy is the fact that farmers are more and more devoting themselves to pasturage and the feeding of stock, and to buying improved machinery, by both of which means the labor difficulty will be less acute.

Even the dairy industry has suffered considerably from the scanty labor supply, though the increasing use of separators and the sending of milk to the factories are a help. One correspondent writes that dairying is becoming more and more the backbone of the country, being promotive of so many other branches of farm enterprise. The cheese factory is the mainstay of many farmers. Another writer remarks upon what a boon to the farmers would be improved roads, and rural mail delivery would be another great step of improvement in country life. One thing it is very satisfactory to dwell upon in reviewing agricultural conditions in Ontario just now, and that is the general prosperity of the farmers; they are getting out of debt, and many have fair-sized bank accounts. In one county it is calculated that fully three-quarters of the mortgages have been paid off. The ubiquitous financial agent seems to have been drawn into the rural districts by these prosperous conditions, and several cases have been heard of where they have succeeded in getting rid of large quantities of stock in various companies, some of them of a more or less doubtful character.

TORONTO HARBOR REPORT.

Mr. C. W. Postlethwaite, the Toronto harbor master, sends to the commissioners his report for the year 1903. It shows that while the number of vessels arriving, which was 3,164 did not reach that of the previous year by 107, yet there was an increase in the tonnage of nearly 50,000 tons' register, which sets forth in an unmistakable manner the modern tendency in favor of large vessels. Cash receipts from all sources amount to $14,686.81. Expenditure of all kinds amounts to $16,784.17, leaving a shortage of $2,089.36, a deficit caused by the heavy cost of repairs at the Queen's Wharf, amounting to $6,345.86. Coal receipts for the year per vessel were: Anthracite coal, 132,368 tons; bituminous coal, 39,414 tons; in all, 171,787 tons, being 45,588 tons in excess of 1902, and 12,044 tons less than in 1901. The total quantity of coal imported into Toronto per rail and vessel for the year, according to Government returns, is: Anthracite, 483,188 tons; bituminous, 614,563 tons; in all 1,097,651 tons, or an increase of 320,473 tons over last year, which, however, was an exceptional year. Dredging was done in the harbor at a cost of $6,452, or $2,109 more than 1902, the extra cost being chiefly caused by the longer haul to the place of deposit, in compliance with instructions from the city Board of Health. The fruit receipts show a slight falling off, occasioned by the increased shipments by rail. There were 13,595 tons of ice, 641 bundles of shingles and 334,000 feet of lumber, as compared with none of these products last year. Oil in bulk increased from 10,159 barrels to 18,626 barrels.

MEAFORD BOARD OF TRADE.

The annual meeting of the Meaford Board of Trade was held at Meaford, Ont., on 21st January, when the following officers were elected for the current year: President, Mr. Geo. Brown (re-elected); vice-president, Mr. S. A. Gray (re-elected); secretary-treasurer, Mr. C. T. Sutherland (re-elected). Council—Ex-officio members are: Messrs. E. Sewell and W. T. Moore (past presidents). Elected: Messrs. G. A. Brown, H. R. Cleland, F. L. MacGachen, Geo. Dyce, F. Kent, F. A. Mott, S. McClain, Jas. Randle, R. F. White, G. B. Carnahan, W. Butchart, E. Y. Godfrey; auditors, Messrs. F. L. MacGachen and S. McClain.

The board meets on the third Thursday in each month. We are authorized to say that the secretary will be pleased to correspond with manufacturers looking for a site on which to build.

THE ST. LOUIS EXHIBITION.

This Exhibition promises to be one of uncommon interest. So great is the crowd of American visitors expected to be that the Grand Trunk Railway of Canada has applied for and been allotted a space in the Forestry, Fish and Game building of this great fair, where Muskoka will be especially commended to travellers. Mr. Charlton, of that road, is now having the company's booth erected. Among the scenes which the Grand Trunk will reproduce in it are: a panorama of the city of Quebec; views and fish products of the Maine seacoast; among the New England hills; specimens of game and fish of the White Mountains; the Grand Trunk Victoria

Jubilee Bridge; the shooting of the Lachine Rapids; views of Canadian cities. The Highlands of Ontario will also be reproduced by specimens which will prove it to be, indeed, the sportsmen's paradise. The admirable photographic views on a large scale issued by this company have already been a notable feature of various exhibitions, Buffalo included. At the St. Louis Fair they cannot fail to attract wide attention.

CANADA LANDED AND NATIONAL INVESTMENT COMPANY.

The Canada Landed and National Investment Company does business both in Ontario and the North-West, and the president's address states that its loans are principally upon farms occupied by their owners. The company has evidently found 1903 a satisfactory year and been well paid, for its interest earnings are increased, its net profits are larger, and the losses are less. There is an increase in assets, too. Among the assets call loans and municipal debentures held both show larger figures, while loans on mortgage securities are higher by $120,000. Of liabilities to the public, the increase is in sterling debentures, for the currency debentures are lessened The profit and loss account shows that after paying the usual dividend, it is able to add $20,000 to reserve and place the considerable sum of $33,000 to contingent fund. What the president has to say about the ability of the company to pay all they owe and, if necessary, restore the capital with a premium of nearly 37 per cent. must be gratifying to shareholders. The only further part of Mr. Blaikie's address for which we can make room is this cautionary paragraph upon the mania for stock speculation: "The past two years will be long remembered as periods of wild speculation in industrial stocks by vast numbers of people bent upon "making haste to be rich," but which to their sorrow turned out the short road to ruin. The great gambling fever, buying far more than they had money to pay for and getting the stocks carried on margin, has now received a decided check, and business transactions in securities of real merit are being carried on upon sound business principles."

THE DOMINION BANK.

By reason of a change in the date of the annual general meeting from the last Wednesday in May to the last Wednesday in January the report of the Dominion Bank, submitted on the 27th instant, is for eight months only. The profits for this period were $321,073, equal to the rate of $481,609 for twelve months, which would be a substantial increase over the $445,567 earned in the twelve months ended with April, 1903. Adding to the $321,073 the balance of profit and loss account brought forward, and $16,135 derived from premium on new capital stock, there remains, after paying the usual dividend of 10 per cent. and placing $16,135 to reserve, the sum of $474,902 to carry forward. The capital stock paid up stands now at $3,000,000 and the reserve fund at a like amount.

The general statement shows an extraordinary increase in deposits, namely from $23,389,000 in April last to $26,377,141 now. And there is an addition to circulation as compared with the former date. The total of assets reaches $35,745,198. Of this amount $13,843,000 consists of readily available assets, including something over four millions of bonds, debentures and other securities owned, and four millions more in loans on call secured. The current discounts and advances amount to $21,409,000. Almost the only matter mentioned in the report except the earnings and their disposition is the opening during the eight months of branches of the bank at Fort William and St. Thomas. The directors were re-elected. The statement is an excellent one.

NATIONAL TRUST COMPANY, LIMITED.

The address of the president at the yearly meeting, just held, dealt very fully with the progress of the company and the nature of its transactions. The business of the company is reaching large proportions, and that it is fairly profitable the increase of net profits from $83,206 in 1902 to $89,359 in the year just closed shows. The National Trust Company now holds $2,732,169 of assets, which have come into its possession as trustee, executor, administrator, guardian or agent. Besides this the sum of $2,661,978 has been received, and is invested under the company's guarantee, making $5,394,147 of assets held and being administered under the terms of the several trusts. The total assets, capital and trust, under administration at the close of last year amounted to $6,773,342. Of the net profits, to which a balance from the previous year was added, $60,000 was devoted to paying 6 per cent. dividend and $20,000 to strengthening the reserve, which has reached $320,000, while $10,000 was written off for office premises. The totals of assets and liabilities are about the same as a year ago, but we observe that while among the assets there is a distinct increase in real estate owned, and in cash on hand, the loans on real estate are less, and in particular the loans on the collateral of bonds and stocks are reduced by $46,000. This reduction is accounted for by lessened demand and changed conditions. The company has a valuable business, and the president is quite justified in considering its premises in Montreal, Toronto and Winnipeg as being excellent investments.

INSURANCE MATTERS.

The Canadian Fire Insurance Company is applying to the Dominion Parliament for authority to reduce its capital stock to $250,000, and, when this has been fully paid up, to increase it.

La Fonciere Compagnie d'Assurance Mutuelle contre le Feu, Maisonneuve, Que., is asking the Quebec Parliament for authority to carry on fire insurance business either under the mutual or the cash premium system.

La Provinciale Mutual Fire Insurance Company of Montreal is applying to the Quebec Legislature for power, to issue capital stock to the minimum amount of $50,000, or a maximum of $500,000, and to transact every kind of fire insurance or re-insurance, in any place, without submitting to the proportion of 25 per cent. in the cities exacted by certain statutes.

The business of the Travelers' Insurance Co. in 1903 makes a striking showing, and the magnitude of its total figures is great. The payments to beneficiaries last year were $4,200,000; the number of accident claims paid in the twelve months was 17,100. In the life department there was $16,880,000 new insurance paid for in 1903, and the increase in reserve was $2,800,000.

Human "cussedness" takes many forms. A despatch of 20th January from Hartford says 'that "Jack the Smasher,' who has been causing such havoc among plate glass windows in this city, was captured last night by the police just as he finished wrecking two large store-fronts. The man is thought to be insane, and his capture will bring much relief to the owners of mercantile property here. With one exception, all the lights broken have been insured.

During last year the Central Life Insurance Company issued and revived 354 policies for $365.750. The total in force at end of December was $487,750, showing a gain of $128,000 over 1902. The company values at the ultimate Government standard of 3½ per cent. Total receipts during the year were $23,456—over $6,000 of which, however, was payments on capital stock—and total expenses of management, $16,239, besides which claims of $4,000 were paid. and $426 disbursed for re-insurance.

In a letter from Copenhagen dated 11th January the actuary of the Northern Life Assurance Company (Nordisk), M. V. E. Gamborg, says: "I have received your favor of the 28th inst. and eight copies of the Monetary Times of different dates in previous years, for which I thank you. You are right in saying that the assessment system is wrong, and I have here in Denmark made a war against the Independent Order of Foresters. I, therefore, should be very much obliged if you kindly would send me such further issues which occasionally may be written concerning Foresters or other assessment insurance."

FINANCIAL ITEMS.

A typographical error made us describe the statement of the Royal Bank of Canada for 1903, which appeared on page 961 of last week's Monetary Times, as the thirty-third annual statement. It should have been styled the thirty-fourth.

The annual meeting of the Metropolitan Bank was held on January 26th. The report was adopted, and the following named gentlemen were elected directors: R. H. Warden, D.D.; S. J. Moore, D. E. Thomson, K.C.; His Honor, W. Mortimer Clark, Thomas Bradshaw. At a subsequent meeting of the directors, Dr. Warden was elected president, and S. J. Moore, Esq., vice-president.

—We learn that Mr. G. H. Balfour, who was manager of the Montreal branch of the Union Bank of Canada, becomes the general manager of that bank, taking the place of the late general manager, Mr. Webb, whose death we have chronicled. To replace Mr. Balfour at the Montreal branch, Mr. F. W. Ashe has been appointed manager. Mr. Ashe goes to Montreal from Smith's Falls, where he was manager.

The town of Fraserville, Que., wants authority to contract obligations and issue debentures for an amount not exceeding $150,000 for water works and other improvements.

Notwithstanding recent changes in the building of the Union Bank of Halifax, in that city, the accommodations are too limited for the increasing business, and it has been decided to take the caretaker's apartments on the third floor for offices, a residence for that official being provided outside the bank premises. An elevator will be put in the building, thus giving access to the office space on the top floor. It is reported that Mr. R. E. Saunders, who has been messenger of this bank for more than twenty years, is to be given a retiring allowance on May 1st prox.

The annual meeting of the Montreal Trust and Deposit Company was held on 21st inst. The capital stock was increased to $1,000,000, of which one-half is to be paid up. Most of the shares have already been subscribed, we are told. The following were appointed directors: Messrs. J. P. Dawes, R. Wilson-Smith, George Hague, Robert Archer, A. Burnet, S. H. Ewing, Thomas Fyshe, Sir William Hingston, Thomas Long, Allan R. Macdonnell, Albert MacLaren, Lt.-Col. Prevost, F. W. Ross, David Russell, James Robinson, M.P.; John M. Smith. Subsequently, Mr. Dawes was elected president, and Mr. R. Wilson-Smith, vice-president. Mr. John M. Smith is the general manager, and Mr. Crombie, manager of the company.

A subscriber in St. John flatters us and reproves us in the same breath by means of the following letter, addressed to the Editor:

"Sir,—The further removed an institution is from error the more interesting is it to prove the rule by finding one, and it may also be observed that the more correct and high class a journal devoted to financial matters is, the more readily do they invite the public to point out errors; therefore, I venture to call your attention to your article on the subject of the Bank of Nova Scotia in your issue of 22nd January, page 953, and your reference to their Reserve Fund. You are not far wrong in stating that it is the largest fund of the kind carried by any Canadian bank, but there is one other bank which has a fund of one hundred and fifty-five per centum of its capital, and that is the somewhat older and also Maritime Province institution, the Bank of New Brunswick, headquarters in this city."

Another of the Canadian banks to issue a special map, showing the placing of its branches, is the Eastern Townships Bank. This map is attached to the annual report which that bank has just issued in book form. Besides the report of the bank for 1903, this publication contains a comparative statement showing the growth of the bank since its establishment in 1859. This particular page forms a record of growth of which the bank has reason to be proud. In forty years its capital was ten times multiplied; its deposits grew from $100,000 to $8,500,000; its loans from $300,000 to nearly $11,000,000. The map is interesting, as showing how generally the branches of the Eastern Townships Bank are scattered over that part of the province of Quebec known as the Eastern Townships. They not only spread from Sherbrooke southward to Rock Island, near the Vermont boundary, but westward to Huntingdon, northward to St. Gabriel de Brandon, and eastward to St. Joseph, Beauce. Its more recent extension to Montreal, to Manitoba, and to British Columbia are also pleasing features in the bank's history.

—The annual meeting of the St. John, N.B., Tourist Association was held last week. That the public-spirited members of this body do not shirk work is evidenced by the fact that during last year no less than 18,000 illustrated booklets were issued, besides 7,000 guide books and 50,000 illustrated post cards. The city and province were advertised in other ways as well, to all of which there were good results. At the meeting several topics of local interest were discussed, and a resolution was passed in favor of a Provincial Tourist Association under Government control being established.

—The Maritime Merchant has entered upon the laudable task of pointing out to the young men of the Maritime Provinces the various opportunities which exist at home. This interesting and beautiful part of the Dominion has made great progress of late years, but it has not gone ahead to the degree it should have done. The Merchant seeks the cause of this, and at the same time points out in how many cases young men have cast themselves upon the mercies of taskmasters in the United States, when they would have been more amply rewarded had they found suitable openings in their own country. It then sets forth to show what these openings are, starting with brief articles on the profits offered by sheep ranching, establishing export trade, etc., all with special reference to the eastern provinces of Canada.

—The following facts should be pondered over by those who still claim that the labor market in Canada is glutted. The Canadian Manufacturers' Association recently issued circulars to 1,306 industrial concerns. To these the replies received were 434. A summary of these answers shows that the number of employees actually needed at the present time by these manufacturers is 1,763 men, 385 boys, and 2,168 females. In Ontario alone the number of men needed is 810, of females 1,460, and of boys 312. These naturally only represent a small proportion of the requirements in various parts of the country. As a general rule, those required are skilled mechanics, the need for ordinary laborers having been supplied largely owing to the cessation of navigation and of the building and some other branches of work. Female help, too, as has been seen above, is largely needed.

—The threat made by the Canadian Pacific Railway to establish sawmills of its own unless the alleged combine between the North-West Lumber Dealers' Association and the lumbermen of British Columbia be cancelled is still exciting controversy. The C.P.R. claims that it is justified in adopting this means for the protection of settlers who have taken up railway lands, because the British Columbia mills are charging too much for lumber, while the lumber interests, on the other hand, argue that no company which has received Government aid by grants of timber or other lands has the right to compete with private individuals in business or manufacturing enterprises, as, for instance, in conducting a lumber trade with C.P.R. funds, and losing a clear sight of the actual profit and loss in the general estimate of transportation profits.

—The widening of some of Montreal's too narrow streets is a matter of constant concern, as the traffic is increasing steadily. At a recent meeting of the city council the sum of $147,000 was voted for the city's share in expropriating St. Antoine street, Amherst street, and Notre Dame street East. Ald. Laporte stated that for years the improvement of the aforesaid streets had been wanted. Many proprietors, he added, were holding back their invest-

ments to see what the city was to do in the matter. And as the city had the funds available this year, he urged going ahead with the work. The city's share on St. Antoine street, from Craig to Inspector, is $37,000; on Amherst, from Craig to St. Catherine, it is $44,000; and on Notre Dame street it is $66,000. The improvement of the street last named will be especially welcome.

—The Good Roads Association is making progress in its fight against the method of road making at present in vogue in Nova Scotia. Criticism so far has been directed chiefly against the statute labor system. One municipality, that of West Hants, at its recent sitting adopted the County Roads Act, thereby abolishing statute labor within its jurisdiction. It is believed that a good roads instructor will shortly be appointed by the Local Government. An amendment was made to the Provincial law last year whereby the amount of property in respect to which persons over sixty years of age are exempted from statute labor is reduced from $1,000 to $500. The bringing of this amendment into effect was left to the option of the county councils, and at the January session the Colchester Council adopted this course, being the first in the Province to do so.

—A writer in an American magazine dwells upon the evil advice often given by interested persons or speculative fools to women or other dependent persons who have recently come into possession of a few thousands of dollars, by inheritance or otherwise. Ten to one, he says, they will meet some person who will advise them to invest in some of the stocks that are favorites on the market; and this may be a very unwise thing for people who need a steady income. "Financial conditions now prevailing in the United States make this question of small investments a peculiarly trying and difficult one. I am writing this in order to say that nearly all the standard life companies now offer policies which will supply the need thus described. They provide for the payment to beneficiaries of fixed annuities for a term of years, or for life, under such safeguards and conditions as to make these annuities absolutely safe, certain, and beyond danger of impairment even by the whims or follies of those to whom they go."

—The municipal census of Rossland, British Columbia, has been taken, and the following particulars are furnished to the Miner by Mayor Dean. The population is 6,133, namely, 4,085 males and 2,048 females. There are 1,393 families in 1,367 dwellings. Children and unmarried males number 2,727; children and unmarried females, 999. No fewer than 1,823 of the population come from the United States, 931 from Ontario, 284 from Quebec, 406 from the Maritime Provinces, 103 from Manitoba and the North-West, 478 from British Columbia, 970 from the United Kingdom, 238 from China. The Chinese are nearly all Buddhists; Roman Catholics number 1,410; Presbyterians, 1,241; Church of England, 1,014; Methodists, 940; Lutherans, 465; Baptists, 318, and so on. Rossland is thus what an English visitor called a rather mixed community; but for a mining town it bears a very creditable record for order and for progress.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, January 28th, 1904, compared with those of the previous week:

Cities	Jan. 28th, 1904	Jan. 21st, 1903.
Montreal	16,993,396	18,264,510
Toronto	12,328,950	15,729,805
Winnipeg	4,202,752	4,907,065
Halifax	1,321,561	1,507,300
Hamilton	866,302	1,058,273
St John	797,778	824,215
Vancouver	1 035,641	1,080,624
Victoria	422,826	486,443
Quebec	1,135,781	1,338,338
Ottawa	1 502,352	2,5 9,941
London	630,864	795,266
	$41,238,203	$48 499,780

—One of the things we Anglo-Saxons pride ourselves upon is the right of free speech. But there is a limit even to this when a man's speech in public becomes indecent. And this limit was reached in one of the election addresses in North Oxford by R. R. Gamey, "the man from Manitoulin," in his vituperation of the judges who tried him, reported in the Globe of Monday last. There should be some means of checking violence of language which, not content with applying terms of opprobrium to the judges of the land, publicly descends to vile innuendo concerning the families of officials whose shoes the detractor is not worthy to clean. The wonder is that a great political party should permit without rebuke a person to use such language on its behalf on a public platform.

—Last week we mentioned the names of the recently elected officers of the Montreal Board of Trade. In addition, the following have been elected members of the council: Messrs. Andrew A. Allan, shipping; Herbert H. Ames, manufacturer; R. M. Ballantyne, dairy produce; George Caverhill, hardware; Leslie H. Gault, dry goods; Albert Hebert, groceries; F. H. Mathewson, banking; Charles Meredith, stock broker; Donald Munro, live stock; G. F. C. Smith, fire insurance; F. W. Thompson, flour milling, and John T. Wilson, importer. At the annual meeting on Wednesday, after an address by Dr. Thomas Barclay, ex-president of the International Arbitration Board, the following resolution was passed: "That the council of the Montreal Board of Trade is hereby instructed to appoint a committee, with power to add to its members, to promote the adoption of a permanent treaty of arbitration between the British Empire and the United States."

THE HEALTH OF ONTARIO.

The December bulletin of the Ontario Board of Health, giving 750 reports from 770 boards in the Province, shows that in a population of 2,051,900 there were 2,081 deaths from all causes in November, or an annual death rate of 12.17 per thousand. There are detailed reports upon seven contagious diseases. Smallpox was shown in three counties, all in the east of the Province, but there were no deaths from it; scarlet fever existed in 41 municipalities to the number of 276 cases, with only 9 deaths; of diphtheria there were 476 cases reported in 73 municipalities, a decrease from the previous month, and 64 deaths, average mortality rate therefore 13.4, but a great variation in mortality is shown. The efforts of health boards and the use by physicians of anti-toxine show an increasing control of this disease that is gratifying. From typhoid there were 30 deaths out of 109 cases in 34 municipalities; of measles and whooping cough, 5 and 14 deaths, respectively; consumption claimed 137 fatal cases in 91 municipalities, a lower mortality than other months. Says Dr. Bryce, in conclusion: "Writing at the end of 1903, it may be said that rarely if ever in Ontario has a year been marked by a greater evenness of fine climate or a higher general average of health."

Meetings.

THE CANADA LANDED AND NATIONAL INVESTMENT CO., LIMITED.

The Annual General Meeting of the Shareholders of the Company was held in the Company's office, 23 Toronto Street, Toronto, on Wednesday, 27th of January, 1904, at 12 o'clock (noon), the following being present:

John L. Blaikie, Esq., president; John Hoskin, Esq., K.C., LL.D., vice-president; Sir John A. Boyd, LL.D., K.C.M.G., Rev. R. C. Moffat, D.D., Rev. James Thom, Dr. Andrew Smith, Dr. Thomson, K.C., and Messrs. John S. Playfair, W. L. Hime, Frank Turner, C.E., Newman Silverthorn, J. Kerr Osborne, James Robertson, Wm. Thomson, John Aitken, Alex. Nairn, Geo. F. Burns, Thomas H. Bull, H. E. Hamilton, John Stark, Samuel Nordheimer, W. B. Mc Murrich, K.C., B. E. Bull, George Porter, Alfred Hoskin, K.C.

The President John L. Blaikie, Esq., having taken the chair, the Manager, Mr. Saunders, acting as Secretary, the Report and Balance Sheet were read.

REPORT.

The directors have pleasure in submitting herewith a statement of the company's affairs for the year ending 31st December, 1903.

The earnings for the year show a total profit of		$239,394 67
After defraying cost of management, paying interest on debenture bonds, and all other charges, there is a net profit of		96,041 92
Disposed of as follows:—		
Interim dividend of 3% paid 2nd July, 1903	$30,120 00	
Dividend of 3% payable 2nd January, 1904	30,120 00	
Transferred to reserve fund	20,000 00	
Transferred to contingent fund	15,801 92	
		96,041 92

The general business for the year just closed has been satisfactory. Payments by borrowers have been well met, and funds have been actively employed at profitable rates of interest.

The success of the company's operations depends to a large extent upon the farmers realizing handsome profits as the result of their industry and skill. It can be confidently stated that they were never as prosperous throughout the Dominion of Canada as they are at the present time.

Under these favorable circumstances your directors have succeeded in disposing of a considerable amount of property that was on hand.

In the selection of new securities your directors have at all times exercised the greatest possible care.

During the year two members have been added to the board, Sir John A. Boyd, LL.D., K.C.M.G., and Alfred Hoskin, K.C., and you will be asked to confirm a by-law passed by the directors, increasing their number.

The officers of the company continue to perform their various duties with satisfaction to the board.

The books, vouchers and securities of the company have been audited and examined by the company's auditors.

JOHN L. BLAIKIE, President.

Toronto, 15th January, 1904.

FINANCIAL STATEMENT, 31ST DECEMBER, 1903.

EDWARD SAUNDERS, Manager.

AUDITORS' CERTIFICATES.

We hereby certify that we have examined the books, accounts and securities at the Head Office of the Canada Landed and National Investment Company, Limited, for the year 1903, and have found them correct.

All our requirements as Auditors have been complied with, and the statements of Assets and Liabilities, and Profit and Loss, as above, exhibit a correct view of the Company's affairs at 31st December, 1903.

H. W. WILLIAMSON,
T. E. P. TREW,
Auditors at Head Office.

Toronto, January 15th, 1904.

I hereby certify that I have examined the books, accounts and securities of the Canada Landed and National Investment Company, Limited, at their Winnipeg office for the year ending 31st December, 1903, and have found the same correct. All my requirements as auditor have been complied with.

J. B. PEPLER, Auditor at Winnipeg.

Winnipeg, January 4th, 1904.

In moving the adoption of the Report the President said:

Ladies and Gentlemen,—It affords me great pleasure to meet so many of you at this Annual Meeting, and to submit to you for your approval and adoption a Report and Balance Sheet showing the result of the operations of the Company for the year 1903.

The main facts of interest to the Shareholders are that after payment of all expenses and paying two half-yearly dividends of 3 per cent. each there has been transferred to Contingent Fund $15,801.92 and to Reserve Fund $20,000.

At the 31st December, 1902, the Contingent Fund was	$30,374 20
To which, as already stated, out of surplus profits for the year there is added	15,801 92
Making	$46,176 12
After deducting losses we carry forward a Contingent Fund with which to start the new year of	$33,081 29

I am surely entitled to congratulate the Shareholders and all who are interested in the Company upon the fact that we not only go forward with a larger Contingent Fund than we did a year ago, but have added $20,000 to Reserve, making that $370,000. And let me say what ought to be gratifying to all of you that I am persuaded we have assets sufficient in value to not only pay all our liabilities, but pay back to Shareholders all their capital and a premium thereon equal to the amount at credit of Reserve Fund. Of course, you know that this Company has never had to reduce its capital stock, neither has it ever had to encroach upon its Reserve Fund or withdraw from it a single dollar. It has now been my privilege to occupy the position of President of this Company for the long period of thirty-three years, and it gives me great satisfaction and comfort in being able to say as I now do, that I believe the Company was never in a sounder or more satisfactory condition than it is to-day.

Toronto, our own city, steadily increases in population and wealth. The new City Directory for 1904 makes an addition of 4,450 names over the previous year, which would indicate a population of about 279,500. I cannot but think that this is an over-estimate but beyond any doubt there is a continuous growth and a great amount of real property.

The two past years will be long remembered as periods of wild speculation in industrial stocks by vast numbers of people bent upon "making haste to be rich," but which to their sorrow turned out the short road to ruin. The great gambling fever, buying far more than they had money to pay for and getting the stocks carried on margin has now received a decided check, and business transactions in securities of real merit are being carried on upon sound business principles.

Now for a few remarks as to the outlook for the future.

As you all know, the great bulk of our assets are first mortgages upon productive real estate or heritable property, principally upon farms occupied by their owners. Experience, all must admit, should count for a great deal, and over forty-six years' experience enables us to say that no safer investments can be made than these first mortgages, selected with care and good judgment.

The municipal and Government debentures owned by the Company are undoubtedly good, and what may be considered liquid securities, easily converted into cash, if at any time it should be considered desirable to do so.

The call loans are only made upon the choicest stocks, and may also be called liquid securities.

The charter of the Company does not authorize speculating in any kind of securities, and this law is always rigidly adhered to. Such business at times may yield large profits, though at times it may result in large losses. By following out our long-tried course we can the easier keep "the quiet mind" and avoid times of nervous fear or anxiety.

The rapid development going on in Manitoba and the North-West Territories has opened a wide and inviting field for lending on first mortgages at profitable rates of interest. The organization possessed by this Company for doing this business with safety and accurate knowledge is very thorough, and so great is the rush of settlers into these regions that for very many years money will be required to assist in the erection of buildings, for the buying of agricultural implements, buying stock and making many permanent and useful improvements.

The number of new settlers during the last two years especially has been very great. A large number have come from the United States, bringing with them their families, horses, cattle, agricultural implements, and not a few of them considerable sums of money. These people are a very valuable addition to the population of the country, having had experience of the kind of farming to be followed. Many of them went from Ontario many years ago to certain States in the United States, and having sold out there, they or their families return to the shadow and shelter of the Union Jack, where they shall enjoy as great an amount of liberty and justice as any country in the world can offer them.

Fears are being frequently expressed in some English newspapers and from the platform there that the settlers from the United States may Americanize the population to such an extent as to lead to agitation for union with the United States. This is a very groundless fear. These settlers will prove as loyal to King Edward and to British connection as any other of our mixed population.

It will not be many years until there are millions of a population in these regions that not very long ago were spoken of as "the great lone land"; and, without troubling you with statistics to show what quantities of wheat, flour, oats, butter, cheese, cattle and horses are already being exported, it is manifest that it will not be long until there will be sent to the toiling millions of Great Britain and elsewhere enough of the great necessaries of life to render the Old Land, so dear to us all, independent of foreign countries, upon which she has in the past been largely dependent.

The total yield of cereals of all kinds in the Province of Manitoba for 1903, as set out by the Manitoba Department of Agriculture, was 82,576,519 bushels, which is a considerably less yield per acre than in 1902, and owing to a very serious and unusual storm of snow and rain in September the quality was inferior; yet as prices ruled higher, the farmers have realized about as much for their crop as they did for that of the previous year.

An occasional unfavorable season, such as every country experiences, does not discourage the settlers, and this is shown by the fact that they have ploughed in the autumn of 1903 about 654,510 acres more than in 1902, making the total area to be under crop this year about 2,385,505 acres.

It is difficult to realize that not many years ago these same regions were only occupied by a few tribes of wandering Indians and countless herds of buffalo.

To transport the products of the farm to the markets of the world requires railway facilities on a large scale. In the past the Canadian Pacific Railroad Company has secured the most of the transport business of that country, but the Canadian Northern has about 440 miles of road built from Port Arthur to Winnipeg. From Winnipeg to Edmonton is about 880 miles, and that portion from Winnipeg to the western boundary of Manitoba is already in operation. There are branch lines to Prince Albert, to Brandon, Harkney, Neepawa, Carberry, Carman and Portage la Prairie. There are already 1,366 miles in operation, and a large force of men are engaged on the work of construction, so that before another season's crop is ready for the market there will be many more miles of road ready to carry it. Both of these companies, having a number of branch lines of railway running north and south, an outlet is given for the products of the farm, and serve as feeders of business for the main railway lines.

As is well known, another great trans-continental railway is to be built, the Grand Trunk Pacific, extending from the Atlantic to the Pacific, and running to the north of any exising line of railway, which will open up vast and valuable regions for settlers, and will in due time yield much profitable business for the Company. Sometimes we hear doubt expressed as to whether railway building is not being overdone, but that is usually by people who have failed to grasp the fact of the immensity of fertile territories yet to be developed.

Between carrying the products of the farm to the markets of the world, and carrying into these regions supplies for the settlers, there will yet be abundance of profitable business for all the railways.

Canada has now enjoyed several years of great prosperity, as is evidenced by the enormous increase of both its exports and imports and by nearly all manufacturing industries being pushed to fill all their orders.

Another evidence of wealth is found in the immense amounts of money on deposit in the banks and also in certain loan companies, and in Government savings banks.

The moral, temperate, frugal and industrious mechanics and farm laborers can do well in Canada, but the lazy, intemperate and shiftless had better keep away from it.

I fear I have wearied you by the length of my remarks, but cannot conclude without bearing testimony to the fact that for our success we are largely indebted to the ability and assiduity of Mr. Saunders, our Manager, also our Winnipeg Manager, Mr. McLaren, and, indeed, of all our office staff.

I have now to move that the Report and Balance Sheet be adopted, which will be seconded by our Vice-president, Dr. Hoskin.

Before putting the resolution I shall be pleased to answer any questions should anyone desire further information.

In seconding the motion the vice-president, Dr. Hoskin, said:—

Ladies and Gentlemen:—We have listened with much pleasure to the remarks of the President, interesting now as on former similar occasions; dealing not only with the affairs and position of the company, but also with matters generally relating to the material and gratifving progress of our country; a speech which will be read with interest by the absent shareholders and our numerous debenture holders, many of whom reside in the Old Land.

The affairs of the company, as shown in the statement, and enlarged upon by the president, must be eminently satisfactory to the shareholders. We have safely passed through a period of depression, and to-day stand with a reserve fund of nearly forty per cent. to buttress our intact capital. Some present may remember that some years ago at an annual meeting I said our stock was intrinsically worth 120. I was, as the figures show, much below the mark. Our progress is in no small degree due to the excellent service rendered by our manager, Mr. Saunders, supplemented by the work of our local manager at Winnipeg, Mr. McLaren, and I bear cheerful testimony to the zeal and ability of these officers. I have much pleasure, gentlemen, in seconding the motion for the adoption of the annual report.

The motion was unanimously adopted.

The scrutineers reported the following gentlemen elected directors for the ensuing year:—John L. Blaikie, Esq.; Sir John A. Boyd, LL.D., K.C.M.G.; Hon. Senator Gowan, LL.D., C.M.G.; Dr. Hoskin, K.C.; Alfred Hoskin. Esq., K.C.; J. Kerr Osborne, Esq.; J. S. Playfair, Esq.; Newman Silverthorn, Esq.; John Stuart, Esq.; Dr. Thomson, K.C.; Frank Turner, Esq., C.E.; Hon. James Young.

At a subsequent meeting of the directors John J. Blaikie. Esq., was elected president, and Dr. Hoskin, K.C., vice-president.

NATIONAL TRUST COMPANY, LIMITED.

The sixth annual general meeting of the shareholders of the National Trust Company, Limited, was held in the company's board room, 20 King street east, Toronto, on Wednesday, 27th day of January, 1904.

Among those present were:—Hon. Mr. Justice Britton, Messrs. J. W. Flavelle, C. D. Massey, Alex. Bruce, K.C., Elias Rogers, A. E. Kemp, M.P., F. W. Gates, H. H. Fudger, William Davies, E. H. Bickford, Andrew Gunn, George W. Gouinlock, S. R. Parsons, B. E. Bull, M. A. Thomas, David Smith, E. R. Wood, E. W. Cox and Robert Kilgour.

The president, Mr. J. W. Flavelle, having taken the chair, the general manager, Mr. W. T. White, was appointed secretary of the meeting.

After reading the notice convening the meeting, the secretary read the sixth annual report and the accompanying financial statement as follows:—

REPORT.

The directors have pleasure in submitting herewith their sixth annual report, showing statement of the assets and

liabilities of the company as at 31st December, 1903, together with the profit and loss account for the year ending on that date.

The net profits after providing for all costs of management, salaries, advertising, auditors' fees, and other expenses, amount to $89,359.94. The sum of $12,443 18 brought forward from 1902 makes the total at credit of profit and loss account $101,803.12, which has been appropriated as follows:

(a) To pay four quarterly dividends at the rate of six per cent. per annum, amounting to $60,000.00.
(b) To increase reserve fund $20,000.00.
(c) To write off office premises $10,000.00.
(d) To carry forward in profit and loss account $11,803.12.

The reserve fund now stands at $320,000.00.

Respectfully submitted,

J. W. FLAVELLE,
President.

GENERAL STATEMENT FOR THE YEAR ENDED 31ST DEC., 1903.

ASSETS.

Loans secured by first mortgage on real estate		$298,688 63
Bonds, stocks and debentures		448,514 13

Transferred from profit and loss	20,000 00
	$320,000 00

W. T. WHITE, General Manager.

The president, in moving the adoption of the report, said:

The statement presented by your directors shows that the company continues to make steady and satisfactory progress. The profits for 1903 amounted to $89,359.94, an increase of $6,153.89 over the preceding year, and being about 9 per cent. upon the paid-up capital stock of the company. As you are aware, the sources of the company's earnings are twofold; firstly, the income derived from the investment of its capital and reserve funds, and, secondly, commissions and remuneration for services rendered as Trustee, Executor, Administrator, Agent or other capacity within the scope of the company's charter, and in connection with the investment of monies entrusted to it by clients and corporations. It is gratifying to be able to report that the past year has witnessed a large increase in all these departments of the company's business, thus indicating unmistakably the continued and increasing good-will and confidence of the public, upon which this company, like all other institutions, must rely for permanent success. Following the policy of building up a strong reserve, which was determined upon at the beginning, your directors have added out of the earnings of the year the sum of $20,000 to this fund, which now stands at $320,000. The sum of $11,803.12 carried forward in profit and loss account also represents undistributed earnings, so that, during the five years since the incorporation of the company, which began with a reserve of $250,000, a total of $81,803.12 has been added to our resources, contributing alike to the income of the company from its investment and to the security offered to the public for the proper conduct of business entrusted to our care.

You will observe that the company's capital assets comprise real estate, mortgages, loans upon bonds and stocks, bonds and stocks owned by the company, and cash to our credit with our bankers. The first item which I have mentioned, viz., real estate, shows an increase over the figures of last year by reason of the addition of our office premises in the City of Montreal, which were acquired by the company during the year. The purchase of this valuable and advantageously situated property ensures the company permanent quarters in Montreal, where its business has been carried on with success and the favor of the business community since we first opened an office there. Your directors feel that the company's three buildings, situate in St. James street, Montreal; King street, Toronto, and Main street, Winnipeg, are excellent investments and stand quite within their value at their purchase prices upon the books of the company, and that they will gradually appreciate with the growth of the cities mentioned. Following what they believe to be a sound policy, however, the sum of $10,000 out of the year's earnings has been written off office premises account, and this policy will be from time to time continued in the future. With regard to the other assets, our mortgages are all for comparatively small amounts and upon security double in value the sums advanced. Our call loans, now inconsiderable on account of lessened demands and changed conditions, are, and always have been, upon collateral of the most select and easily convertible class, the object of the company in making loans of this nature being to have funds awaiting investment or maturing payments properly employed in the meantime. As to bonds and stocks owned by the company, the sum of $104,842.94 is invested in municipal and school district debentures, $107,957.50 in the first mortgage railway and traction company bonds, and $220,174.74 in stocks of financial, insurance, and street railway companies. The value of the securities under this heading is at actual market quotations, considerably in excess of the figures at which they stand on the books of the company.

On the trust side of its business the company now holds $2,732,169.14 of assets, which have come into its possession as Trustee, Executor, Administrator, Guardian or Agent. In addition to this the sum of $2,661,078.48 has been received and is invested under the company's guarantee, making a total of $5,394,147.62 of assets held by the company in trust and being administered under the terms of the several trusts upon which they have been received. The total assets, capital and trust, under administration by the company on December 31st last amounted to $6,773,342.60. All securities taken on trust account, whether guaranteed or otherwise, are kept entirely separate from the company's own assets and are properly entered upon the books of the company so as to show clearly the trust to which they belong.

The several offices of the company have all contributed to what will doubtless be deemed by the shareholders the satisfactory result of the year's operations. Your directors are pleased to make acknowledgment of the valuable services rendered by the Advisory Board at Winnipeg and the Resident Directors of Montreal, and to the officers and staff of the company for the zeal, fidelity and capacity with which they have discharged their duties to the company and its clients.

I beg to move, seconded by Mr. E. R. Wood, the adoption of the report.

A vote of thanks to the general manager and staff of the company was passed, after which the following were elected directors of the company for the ensuing year:—

PRESIDENT.

J. W. FLAVELLE, Managing Director The Wm. Davies Company, Limited, Director Canadian Bank of Commerce.

VICE-PRESIDENTS.

Z. A. LASH, K.C., of Messrs. Blake, Lash & Cassels, Barristers.

E. R. WOOD, Vice-President and Managing Director Central Canada Loan & Savings Company.

HON. MR. JUSTICE BRITTON.

HON. MR. JUSTICE MACMAHON.

HON. GEO. A. COX, Senator, President Canadian Bank of Commerce.

GEO. H. WATSON, K.C., of Messrs. Watson, Smoke & Smith, Barristers.

CHESTER D. MASSEY, President Massey-Harris Company, Limited.

ELIAS ROGERS, Director Imperial Bank of Canada.
ROBERT KILGOUR, Vice-President Canadian Bank of Commerce.
F. W. GATES, Hamilton, President Hamilton Gaslight Co.; Vice-President Canada Life Assurance Company.
JAMES CRATHERN, Montreal, Director Canadian Bank of Commerce.
H. S. HOLT, President Sovereign Bank; President Montreal Light, Heat & Power Company, Limited.
H. MARKLAND MOLSON, Montreal, Director Molsons Bank.
ALEX. BRUCE, K.C., Hamilton, of Messrs. Bruce, Bruce & Counsell, Barristers.
E. W. COX, General Manager Canada Life Assurance Company.
H. H. FUDGER, President The Robert Simpson Co., Limited; President the Goldsmiths' Stock Company.
H. B. WALKER, Agent Canadian Bank of Commerce at New York.
A. E. KEMP, M.P., President Kemp Manufacturing Company.
WILLIAM MACKENZIE, President Toronto Railway Company; President Canadian Northern Railway Co.
J. H. PLUMMER, late Assistant General Manager Canadian Bank of Commerce.
W. T. WHITE, General Manager National Trust Company, Limited.

ADVISORY BOARD.—WINNIPEG OFFICE.

I. M. ROSS, ESQ., Winnipeg, Chairman.
HON. MR. JUSTICE BAIN, Winnipeg.
HON. F. W. G. HAULTAIN, Premier Northwest Territories, Regina, N.W.T.
THE RIGHT REVEREND BISHOP MATHESON, Winnipeg.
HON. J. D. CAMERON, Ex-Attorney-General for Manitoba, Winnipeg.
A. McT. CAMPBELL, ESQ., Manager Canada Life Assurance Co., Winnipeg.

THE DOMINION BANK.

The thirty-third annual general meeting of the Dominion Bank was held at the banking house of the institution, Toronto, on Wednesday, January 27th, 1904.

Among those present were noticed: Messrs. William Ince, William Spry, E. B. Osler, M.P., W. D. Matthews, Thos. Walmsley, W. G. Cassels, David Smith, G. W. Lewis, A. R. Boswell, P. Leadlay, G. N. Reynolds, A. Foulds, J. J. Foy, K.C., John T. Small, Anson Jones, H. Gordon MacKenzie, J. Gordon Jones, W. Crocker, J. F. Kavanagh, Ira Standish, E. W. Langley, Lieut.-Col. Pellatt, William Hendrie, J. G. Ramsay, W. C. Lee, W. C. Crowther, F. J. Phillips, Richard Brown, G. B. Sweetnam, J. A. Proctor, H. B. Hodgins, H. Johnson, T. G. Brough, Miss H. M. Robinson and others.

It was moved by Mr. William Ince, seconded by Mr. Anson Jones, that Mr. E. B. Osler do take the chair, and that Mr. T. G. Brough do act as secretary.

Messrs. A. R. Boswell and W. G. Cassels were appointed scrutineers.

The secretary read the report of the directors to the shareholders, and submitted the annual statement of the affairs of the bank, which is as follows:

REPORT.

The directors beg to present the following statement of the result of the business of the bank for the EIGHT MONTHS ending 31st December, 1903:

Balance of profit and loss account, 30th April, 1903		$353,355 48
Premium received on new capital stock		16,135 00
Profit for the EIGHT MONTHS ending 31st Dec., 1903, after deducting charges of management, etc., and making provision for bad and doubtful debts		321,073 86
		$690,564 34
Dividend 2½ per cent., paid 1st August, 1903	$74,710 50	
Dividend 2½ per cent., paid 2nd November, 1903	74,853 05	
Dividend 1 2-3 per cent., payable 2nd January, 1904 (2 months)	49,963 16	
	$199,526 71	
Transferred to reserve fund	16,135 00	
	$215,661 71	
Balance of profit and loss carried forward		$474,902 63

RESERVE FUND.

Balance at credit of account 30th April, 1903	$2,983,865 00
Transferred from profit and loss account	16,135 00
	$3,000,000 00

Branches of the bank have been opened during the past eight months in Fort William and St. Thomas, Ont.

All branches of the bank have been inspected during the past year.

E. B. OSLER,
President.

Toronto, 27th January, 1904.

The report was adopted and the thanks of the shareholders were tendered to the president, vice-president and directors for their services and to the general manager and other officers of the bank for their efficient performance of their respective duties.

The following gentlemen were elected directors for the ensuing year: Messrs. A. W. Austin, W. R. Brock, M.P., T. Eaton, J. J. Foy, K.C., William Ince, Wilmot D. Matthews and E. B. Osler, M.P.

At a subsequent meeting of the directors, Mr. E. B. Osler, M.P., was elected president and W. D. Matthews vice-president for the ensuing term.

T. G. BROUGH,
General Manager.

Toronto, 31st December, 1903.

NORTHERN NAVIGATION COMPANY.

People have been looking forward for weeks to the annual meeting of the Northern Navigation Company in the expectation that certain members of the board of direction would without doubt be turned out of office. The meeting was not as acrimonious as was expected. It was held at Collingwood on Tuesday last, when the management was arraigned by Mr. Acton Burrows, of Toronto. Messrs. Clarkson & Cross, accountants, at the request of a number of shareholders, had examined the company's books and prepared a report, which was presented. This report attributed losses of the past season to faulty management, and pointed out that the appointment of a general manager entirely untrained had proved a costly experiment. Part of the loss was credited to the method of purchasing for the Georgian Bay division.

The annual report of the directors explained a large decrease in the company's net earnings in 1902 by increased expenses of operation, and reduction in eastbound freight, several accidents and increased competition. In moving the adoption of the annual report J. J. Long said, in part: "In a recent press report Long Bros. are accused of reducing their holding in the company from almost $200,000 to less than $10,000 now. It is not true that the joint holdings of stock by Thomas and J. J. Long at any time amounted to almost $200,000, nor has it been at any time less than $10,000, and, while it is admitted that the Messrs. Long and certain other directors have reduced their holdings of stock in the company, which they had a perfect right to do, it is only fair to the Messrs. Long to say that they have invested largely in a new elevator, which they, together with some friends having no interest in the Northern Navigation Company, have succeeded in erecting at Point Edward, solely, so far as the Messrs. Long are concerned, for the use and advantage of the Northern Navigation Company, without any aid either from the company or their co-directors."

The election of directors then took place. It resulted in the substitution of H. Y. Telfer for Thomas Long, and the substitution of C. D. Warren for Charles Cameron. The board now consists of Messrs. J. J. Long, W. D. Matthews, E. B. Osler, W. Hendrie, H. Y. Telfer, C. D. Warren, F. A. Lett, W. J. Sheppard, C. E. Stephens and H. B. Smith. The new board met afterwards and accepted the resignation of C. T. Long from the position of general manager. The head office was transferred to Toronto.

TORONTO STOCK TRANSACTIONS.

A better tone has prevailed on the local stock exchange of late, and business during the week has been in somewhat greater volume. Considerable attention has been attracted to Commercial Cable, which seems to be distinctly bullish, though not in a very ostentatioos manner. Canadian General Electric also has a fairly strong upward tendency. Most of the traction stocks are firmer. Dominion Iron and Steel and Dominion Coal show some amount of strength.

The Crown Bank of Canada

Provisional Offices: 23 King Street West, Toronto, Ont.

Now opened to complete organization.

The following have consented to act as Directors upon election:

PRESIDENT:

EDWARD GURNEY, President of the Gurney Foundry Co., Limited, Toronto.

VICE-PRESIDENT:

CHARLES MAGEE, President Ottawa Fire Insurance Co.; President C. Ross Co., Limited, Ottawa; late President of the Bank of Ottawa, Ottawa.

DIRECTORS:

R. Y. ELLIS, Director of the P. W. Ellis Co., Limited, Toronto.

CHARLES ADAMS, of Messrs. Adams Brothers, Wholesale Saddlery, Toronto.

JOHN L. COFFEE, of Messrs. L. Coffee & Company, Grain Exporters, Toronto.

JOHN C. COPP, Manager Toronto Land and Investment Corporation, Toronto.

JOHN M. GILL, President of the James Smart Manufacturing Company, Limited, Brockville.

JOHN WHITE, Merchant, Mayor of the City of Woodstock.

LIEUT.-COL. JEFFREY H. BURLAND, President of the Canada Engraving & Lithographing Co., Limited, Montreal.

GENERAL MANAGER:

GERALD de COURCY O'GRADY, Late Manager at London, Ont., of The Canadian Bank of Commerce.

SOLICITOR:

FRANK ARNOLDI, K.C., of Messrs. Arnoldi & Nisbet, Toronto, Ont.

Authorized Capital, $2,000,000 in 20,000 shares of $100 each, issued at $110 per Share.

It has been decided for the present to confine the issue of stock to ONE MILLION DOLLARS, being one-half of the authorized Capital.

TERMS:—$5.00 per share of the par value on application, $25.00 per Share of the par value on allotment, and the balance in eight successive monthly instalments of $10.00 per share, commencing on the first day of each of the eight months immediately succeeding the date of such allotment.

Application for stock or for further information including prospectus, forms of application, etc., may be made to

G. de C. O'GRADY, General Manager,
The Crown Bank of Canada,
Provisional Office, 23 King St. W.,
Bank of Commerce Building, Toronto.

THE eighteenth annual meeting of the Canadian Society of Civil Engineers took place in Montreal on Tuesday and Wednesday last. One of the papers which proved most interesting to members on the first day was by Dr. Stansfield on "Recent Developments in Electro-Metallurgy, with Special Reference to Iron."

FINANCIAL CONDITIONS.

Aemilius Jarvis & Co., Toronto, in their letter dated January 22nd, say:

The stock exchanges had, as usual, the earliest advice of the peace developments, and two days ago traders advanced stocks all along the line, notwithstanding the efforts of the bears to bring about reactions. We have several times recently pointed out the great improvement in underlying conditions. This improvement is making itself felt by the material easing up of money in New York, and, while our own banks have not showed a disposition to lend more freely, should the rates keep down in New York for a little longer, it must have its effect on local institutions. For the past two weeks the market has held strong and fairly steady in the face of what appeared to be almost certain war, and, now that there seems to be a good chance of a peaceful conclusion to the diplomatic struggle taking place between Russia and Japan, the improvement is material and general. We have no doubt manipulators on the bull side have taken advantage of the better feeling to work the market to a certain extent. We feel satisfied this has been done in our own markets, more especially in ,Montreal and we think that such a sharp advance as took place in, say Richelieu, is not of advantage to the general market. The demand for this stock in our own market certainly appeared to be strictly professional, the buying probably being for Montreal brokers. The quick variations, both up and down, in the price also pointed to professional dealings. However, the price of this stock and of many other standard stocks in our market is, in our opinion, below their real intrinsic value, so that no great damage should be done even by such a rapid advance. The market both here and in New York may very well sell off a little after the bulge of the last two days.

STOCK GAMBLING WORST OF ALL.

With so many forms of gambling to choose from, it is not easy to say which particular one exercises the most pernicious effect on the growing generation, but if I were called upon to award the palm to any special class, it would go to the stock gamblers. Time was when this particular vice was restricted—as other and not more degrading forms of vice have been—to its own particular district, but of late years the stock market has become a hideous octopus, with its thousands of tentacles in the shape of telegraph wires running direct into the hearts of cities and villages and private houses. Touch a bustling, wealthy manufacturing town with one of these private wires and it will not be long until it has drained it of nearly all its superfluous dollars and begun to gnaw at the heart of its invested capital. And the amazing part of the whole business is that the Newport millionaire, the Connecticut manufacturer, the New Hampshire farmer, the woman of society, the school teacher, the lawyer, the doctor, the actor and the green grocer are all pitting their feeble wits against the keen and absolutely unscrupulous manipulators of the market, and flattering themselves that they are clever enough to beat a game that is practically invincible.—Leslie's Monthly.

ANNAPOLIS ROYAL BOARD OF TRADE.

The third annual meeting of the Board of Trade for Annapolis Royal, Nova Scotia, was held on the 11th inst. It may be mentioned that the name of this town, which used to be Annapolis, being found liable to be confounded with the place of that name in Maryland, was quite recently altered to the name which heads this paragraph. The president in his report spoke cheerfully of trade conditions and of the large amount of money which had been put in circulation by the apple crop. A matter which drew a good deal of interest from members of the board was the state of the county jail, and the hope was expressed that prisoners would be set to work breaking stone for the streets instead of being left in complete idleness. It has been decided to hold the tercentenary of the founding of Annapolis Royal in June next, and several prominent persons have already expressed their intention of being present, including the admiral of the North American fleet. The direct shipments from the port of Annapolis Royal during the year were: Lumber to the amount of $164,210; cordwood, $4,242; piling, $3,348; apples, $42,337. The election of officers for the board resulted as follows: F. C. Whitman, president; A. D. Mills, vice-president; A. E. Atlee, secretary and treasurer; E. D. Arnaud, A. M. King, W. J. Shannon, S. W. W. Pickup, S. Riordan, J. A. Delap and J. M. Owen, council.

Distinctly
in Your Interest
IS THE SERVICE RENDERED BY
The Canadian Casualty
& Boiler Insurance Co.
This service explained to you by writing to-day to the Company at its Head Offices, 22 Adelaide E., Toronto. A large staff of employees who are

A STRONG COMPANY

—Professor—The three elements are fire, water and air. Each is separate and distinct from the other. Student—Yes, but firewater and hot air usually go together.—Catholic Standard.

At the annual meeting of shareholders of the Barrie Carriage Co. on Monday last the following directors were elected: N. Dyment, L. Evly, J. C. Irwin, J. R. Hambly, W. C. Hunter, F. A. Lett, Dr. Smith and H. H. Strathy. The directors subsequently elected Mr. Lett, president; Mr. Dyment, vice-president, and Mr. T. T. Young, secretary-treasurer.

MONTREAL MARKETS.

Montreal, 27th Jan.

Ashes.—Receipts continue very light, and for all first pots offering of desirable tares $6.10 is readily realized, good figures being realized in England. Second pots may be quoted at $5.60 to $5.70. In pearls there has not been a transaction for weeks.

Cements and Firebricks.—The continued Arctic weather is an effectual stopper on all outside work, and there is practically nothing doing in cements; prices, however, are steadily held. We quote: Belgian cement, $1.80 to $2.05; English, $2.15 to $2.25; German, $2.15 to $2.35; firebricks, $18 to $24 per M.

Dairy Products.—There was a very fair volume of shipments of cheese last week, via St. John and Portland, aggregating 40,601 boxes. Of butter there were shipped 1,594 packages. Holders of cheese continue pretty firm in their ideas, though present business is quiet. For finest fall makes quotations range from 10⅝ to 11c. A fair jobbing busi-

ness is being done in butter, with from 19 to 20½c. quoted for winter creameries; full grass goods are quoted at 21½ to 22c. Dairy makes realize about 16 to 16½c. per pound.

Dry Goods.—The week has not developed any specially new or interesting features in this line of trade. Travellers are reported as doing very fairly considering the amount of trouble they are having in getting around by reason of the railway blockades of snow, and the wholesale warehouses all show considerable activity. The stormy weather has interfered to some extent with city retail trade, but collections as a whole are very fair.

Furs.—Cable advices to hand up to the moment of writing with regard to the London sales now on indicate that the offerings are exceptionally large, and that as far as the sales have progressed it is shown that beaver has declined 12 per cent. as compared with last January, while rats have sold 15 per cent. higher than January last. Red fox realized 10 per cent. lower than March, 1903, and lynx 15 per cent. lower than March. We quote prices here for prime skins as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No. 1 choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—The month has on the whole been a quiet one in wholesale circles. December trade was unusually good, which may account to some extent for the present slackness, but the late heavy storms and severe cold have also interfered quite materially with the movements of travellers, and some houses find remittances from interior points affected from the same cause. The only notable feature with regard to values is a decline of 2c. a gallon in molasses, owing to anticipations of easier values when new goods come to hand next summer. Fresh advices from the island are to the effect that the crop is expected to be a fairly early one, and that the yield will likely be from 35,000 to 40,000 puncheons. The local sugar refineries report the demand throughout January as somewhat slow, and the market shows a tendency to easiness, but the quotation for standard granulated is still unchanged at $4, with yellows ranging from $3.35 upwards. Teas are quiet on spot, but continue firm in tone.

Hides.—No change is noted since last report. The advance in calfskins, established last week, is maintained, No. 1

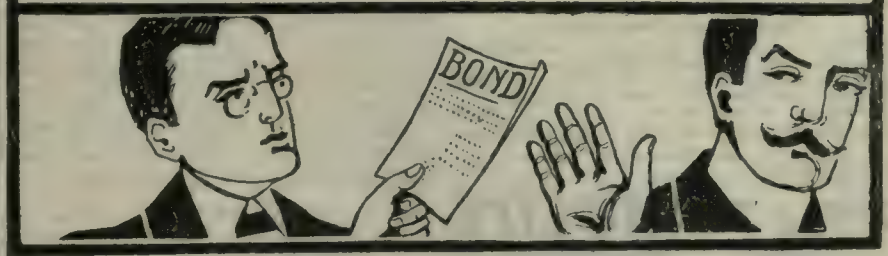
Canadian Industrial Blue Book

THE MANUFACTURERS' LIST BUYERS' GUIDE OF CANADA, 1904.

Contains a list of over 12,000 Manufacturers' Addresses and the character of their business—9,000 more than any other publication of its kind in Canada. No Progressive Manufacturer has been left out that would furnish us a list of his products. The smallest as well as the largest producer is indexed free of charge. The advertiser in the book only has the advantages of his advertisement over those who do not advertise. This is all important to the buyer. The advertiser wants your trade, and says so here, while the non-advertiser does not say so, and as many manufacturers sell only through certain channels, get in touch with the advertiser first, and save time, it is money for you.

MANUFACTURERS' LIST CO., Publishers,
128 St. Peter Street, MONTREAL.

An Unreasonable Request



An antiquated custom that of asking one's friends to go on your bond. Would you ask him to insure your house?

When required to furnish a bond of any nature, write to THE UNITED STATES FIDELITY & GUARANTY CO.

Kirkpatrick & Kennard, Managers for Canada, 6 Colborne St., Toronto.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name **THE GREAT-WEST LIFE**; but the above statement exactly describes the happy position of its policy-holders.

INSURANCE COMPANY

All Policies Guaranteed by the LONDON AND LANCASHIRE FIRE INSURANCE COMPANY OF LIVERPOOL.

NOTICE.

The Queen City Fire Insurance Company.

The Annual General Meeting of this Company will be held, pursuant to the Act of Incorporation, on **Saturday, the 13th Day of February, 1904,** at One o'clock p m , at the Company's Office, Queen City Chambers, 32 Church Street, Toronto.

By order, THOMAS WALMSLEY, Secretary.

Toronto, January 27th 1904.

NOTICE.

The Hand-In-Hand Insurance Company.

The Annual General Meeting of this Company will be held, pursuant to the Act of Incorporation, on **Saturday, the 13th Day of February, 1904,** at Twelve o'clock noon, at the Company's Office, Queen City Chambers, 32 Church Street, Toronto.

By order. HUGH SCOTT, Manager and Secretary.

Toronto, January 27th, 1904.

being now quoted at 11c., and No. 2 at 9c. per lb. For No. 1 beef hides dealers still pay 8c. per lb., and for lambskins 75c. each.

Metals and Hardware. — Hardware travellers are getting fairly to work on the road again, and are sending in satisfactory business, but in the heavy metal trade there has not been any very general renewal of activity. Pig iron is dull, with an easier tendency, and stocks coming out by first boats are expected to cost materially less than last year. Domestic bars are fairly steady at $1.85; ordinary mild steel, $2; tire steel, $2.15; toecalk, $2.60; cast, 7½ to 7¾c. Boiler plate is steady at $2.10; iron pipe easy at $4.35 for inch. Canada plates are easy at $3.25, though the home market is said to be a little firmer than it was at £7 10s. a ton, but offerings for spring importation are being made for very low figures, it is said. Tinplates, galvanized sheets, etc., are unchanged in price. Copper is a little steadier at 13¼ to 13½c.; ingot tin fairly firm at 33c. for Straits; lead, $3.15; antimony, firmer at 7¼c.; spelter, firm at $5.75.

Oils, Paints and Glass.—Orders in these lines are now coming in quite freely, but the shipping out of the same will not become general for some weeks yet. Turpentine has shown further advance, and is now up to 95c., but is hardly expected to go higher. Linseed oil remains dull and easy. We quote: Single barrels, raw linseed oil, 47c.; boiled, 50c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 95c., single barrels; olive oil, machinery, 90c. to $1; cod oil, 35 to

of good Canadian Business; and that in all other respects the Company has had a most successful year.

40c. per gal.; steam refined seal, 50 to 55c. per gal.; tinged and brown ditto, down to 35c.; castor oil, 8 cents, for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.50; No. 1, $4.25; No. 2, $4; No. 3, $3.80 to $3.90; No. 4, $3.60; dry white lead, 4¼ to 4½c. for pure; No. 1 do, 4 to 4½c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in barrels, $1.90; do., in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75c.; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, January 28th, 1904.

Chemicals, Drugs, Etc.—Nothing very new has developed in the drug trade this week. Business continues on a normal basis and prices remain much as last reported. In New York, the chief drugs are for the most part quiet. Opium and quinine are dull and so is menthol. Cod-liver oil is a little easier. Carnauba wax is considerably stronger. The fertilizing markets are beginning to show great activity.

Dry Goods.—The demand for staple goods continues strong, in spite of the big advances in some lines of cottons reported last week. Travellers report good indications for the spring trade, and are sending in plenty of fair sized orders. The sorting trade just now is also brisk. There is really no important feature to report.

Merchants Fire
INSURANCE CO.
CAPITAL AND ASSETS OVER
HALF A MILLION
HEAD OFFICE
TORONTO.
Agents Wanted in All Unrepresented Districts.

Flour and Grain.—The flour market is quite dull, and though ninety per cent. patents hold firm at $3.15, choice brands are 10 to 20c. higher. Millfeed is steady. Oatmeal has a normal demand at the recent advance. Wheat is firm, and other grains are steady, but receipts are very light owing to blocked roads.

Fruits and Vegetables.—No change to speak of has taken place in prices. Trade continues fairly active. We quote: Apples, 75c. to $2.50 per barrel; cocoanuts, $4 per sack; oranges, Florida, $2.75 to $3 per case; Jamaica, all sizes, $2.25 to $3.50 per box, $3.50 per barrel; California navels, $2.75 to $3.75; Mexican, $2.25 to $2.50; Valencias, ordinary, $4, large, 420's, $5, and large, $5.50; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; celery, 40 to 75 per dozen; cranberries, $9 to $9.50 per barrel, $1.25 per basket; Spanish onions, $2.75 to $3 per large case, and $1 for small; Malaga grapes, $6.50 to $7.50 per barrel.

Hides, Skins and Leather.—Trade in hides is dull, and quotations remain as before. Ninety cents continues to be the price for sheepskins. Calfskins are steady. Tallow remains unchanged. Some little improvement is discernible in the leather market.

Live Stock.—Prices at the cattle market this week showed generally a stiffer tendency owing to the small receipts, consequent upon the blocked state of the railroads. The few export cattle offered were not of primest quality, but prices kept steady at about $4.20 to $4.40 for ordinary, with 25c. more for the best. Butchers' cattle fetched $4.20 to $4.60 for picked lots, but most fetched $4 to $4.20. Calves and milch cows were very quiet. All sheep and lambs sold early, as there were so few offered.

Provisions.—Butter is coming forward plentifully, especially dairy rolls. Except for the good qualities therefore there is some little accumulation of stocks. Eggs are in very light supply and they fetch very high prices. There is a good demand for chickens, but few are coming forward. For dressed hogs, the market is a little firmer, but for products it is somewhat easier.

Seeds.—Prices show practically no change. There is but little export demand.

The Metropolitan Life INSURANCE CO. OF NEW YORK.

"The Leading Industrial Company of America."

Is represented in all the principal cities of the United States and Canada

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty-five years.

THE METROPOLITAN has Assets of over 89 Millions of Dollars Liabilities of 78 Millions, and a Surplus of over 10 Millions.

THE METROPOLITAN pays Death Claims, averaging one for every minute and a half of each business day of eight hours, and has nearly Seven Million Policy-holders.

THE METROPOLITAN offers remunerative employment to any honest, capable, industrious man, who is willing to begin at the bottom and acquire a knowledge of the details of the business. NOTICE

Is hereby given that the Annual General Meeting of the Policy-holders and Guarantors of the

North American Life Assurance Co.

will be held at the Head Office of the Company, North American Life Building, 112-118 King St. West, Toronto, Ont., on

Thursday, 28th January, 1904,

at 11 o'clock in the forenoon,

for the reception of the Annual Report, a Statement of the Affairs of the Company, the Election of Directors, and the transaction of all such business as may be done at a General Meeting of the Company.

Participating Policy-holders have one vote for each $1,000 of insurance held by them.

L. GOLDMAN,
January 13th, 1894. Managing-Director.

Agency Organizers Wanted.

The Royal Victoria Life Insurance Company wants January 1st, 1904, Two Agency Organizers, one for their Maritime Province Division and the other for their Northwest Division. Must have a good knowledge of the territory, with successful experience in canvassing and in selecting and developing agents. A good opportunity for energetic young men.

DAVID BURKE,
General Manager, - Montreal.

Sometimes a revision of policy forms means little. It stands for

THOROUGHNESS

in every detail in the changes that have been made by the Union Mutual—re-arrangement of features, reduction of rates, liberalizing of rights, a contract modern to the highest notch. A policy that looks well, sells easily and pleases long.

FENSOM'S ELEVATORS

"ONE GRADE"

OUR BUSINESS,

from the ground up, is confined exclusively to designing, constructing and installing elevators. It is generally conceded that Fensom's Elevators are right in all respects.

THE FENSOM ELEVATOR COMPANY, LIMITED, TORONTO

Protection from Loss.

The business of boiler insurance is an engineering business; the insurance is only a guarantee of the trustworthiness of the engineering services.

Measure the value of those services and then consider the guarantee. In doing this remember that EXPERIENCE, SKILL, and ABILITY are the determining qualifications of the value of those services.

Insure your boilers in

THE BOILER INSPECTION & INSURANCE CO. OF CANADA,

Canada Life Bldg., Toronto,

which has been in this business for nearly THIRTY YEARS.

Then Insurance.

WILLIAM F BULLEN,
Manager.

London Ontario, 1903.

Though the exceptional strength of the CANADA PERMANENT MORTGAGE CORPORATION, Toronto Street, Toronto, with a paid-up capital only equalled by three of the largest of Canada's strong financial institutions, makes it a favourite with depositors of large sums, a deposit account may be opened with one dollar.

That dollar, and every dollar added thereto, will bear interest at three and one-half per cent. per annum, compounded half-yearly.

The depositor of a dollar receives the same considerate, prompt attention as the depositor of thousands.

It is not necessary to reside in Toronto to be a depositor with this Corporation.

No matter where you may live, you will find it quite convenient to have your account with it. Send your address for Booklet, "SAVING MONEY BY MAIL."

The Safest Way

To Invest Money is in a Debenture.

We will issue you a debenture for any amount over one hundred dollars for 1, 2, 3, 4 or 5 years at five per cent. Interest coupons payable to bearer half-yearly. . . . . .

Do not let your money lie idle any longer; have it invested and earning something for you.

PICKFORD & BLACK,
HALIFAX.
R. M. MELVILLE, TORONTO.

Mercantile Summary

THE will of the late E. W. Rathbun, of Deseronto, has been probated, the estate being entered at $216,825.

THE Central Ontario Counties Railway Company wants authority to build and operate a line from near Ivanhoe on the C.P.R. westerly to Agincourt.

ACCORDING to the Winnipeg Directory's estimate, that city's population is now 77,304, an increase over the previous year of 13,774.

A COMPANY is being formed under the name of the Walkerton and Lucknow Railway Company to build a line from Walkerton to Lucknow by way of Teeswater.

THE Guelph Junction Railway Company wants Parliamentary sanction to dispose of its line, or part thereof, by lease or otherwise, to increase its capital stock and bonding power and to build branch lines.

THE Keewatin Flour Mills have received a Dominion charter as a limited liability company, with a capital stock of $2,000,000. Among the charter members are John Mather, of Ottawa, and R. L. Borden, K.C., of Halifax.

DURING the year ending June 30th last the total number of people killed on Canadian steam railways was 420, divided between 53 passengers, 186 employees, other persons 181. For the year previous the number was 19 passengers, 146 employees and 165 others; total, 330.

THE Campbellford, Lake Ontario and Western Railway Company is applying to Parliament, as a work for the general advantage of Canada, for power to build and operate a line from a point on the C.P.R. between Blairton and Ivanhoe to the town of Cobourg, and thence to a point on the C.P.R. between Locust Hill and Leaside Junction.

ONTARIO letters patent have been granted to the William A. Greene Company, Limited, Waterloo, Ont., capital stock $50,000, to empower them to manufacture any textile fabric into shirts, collars, cuffs and similar articles. The provisional directors mentioned are Messrs. W. A. Greene, F. S. Kumpf, C. Kumpf and J. Uffelman, all of Waterloo.

IN describing the Ojibway Indians who recently arrived in Montreal from Manitoulin Island to take part in an entertainment, entitled "Hiawatha," at Windsor Hall, a Montreal paper says: "The tenor, Taleebahbun (Chibiabos), his son, the dancer, and four others, Wabunosa (the man who walks to the east wind); Shawanoe (the south wind); Shingwauk (Little Pine), and Sagatcheweosa (sailing with fair wind). They are all fine looking men, and made a striking group as they stepped from the cars. They take their parts in the performance most seriously, for the story of Hiawatha is to them no mere legend, but is a real history passed down to them and listened to with awe around the camp fire."

THE Canadian Pacific Railway, acting in conjunction with Mr. Jas. J. Hill's lines, the Great Northern and the Northern Pacific, has advanced freight rates on a large number of commodities.

A DOMINION charter has been granted to J. T. Marchand & Co., Limited, Montreal, capital $45,000, to carry on business as manufacturers and dealers in lumber and all kinds of wood products; also as ship liners and general contractors, operate sawmills, factories, etc.

AT the annual meeting of shareholders in the Canadian Transfer Company, Limited, in Montreal, Lieut.-Col. F. C. Henshaw, Hugh Paton, Charles Cassils, Geo. R. Starke, and H. Montagu Allan were re-elected directors, and Mr. F. M. McRobie, manager and secretary.

THE annual meeting of shareholders of the Rolland Paper Company was held last week in Montreal. The following directors were elected for the ensuing year: Hon. J. D. Rolland, president; Mr. O. Rolland, vice-president; Mr. R. Bedard, secretary-treasurer. Directors —Mr. S. J. B. Rolland, P. D. Rolland, J. L. Archambault, A. A. Foucher and Hon. R. Prefontaine.

THE thirteenth annual meeting of the Quebec Association of Architects took place in Quebec on the 28th January. The following officers were elected: President, J. P. Ouelle; first vice-president, S. H. Archibald; second vice-president, A. Chaussie; secretary, J. E. Vanier; treasurer, D. R. Brown; councillors, L. P. Lemay, A. A. Cox, W. J. Carmick, J. C. Kesther, J. Venne; auditors, Prof. P. E. Nobbs, L. Lemieux.

Mercantile Summary.

THE Great Northern Lumber Company, Ottawa, has been authorized by the Dominion Governmen to increase its capital stock from $50,000 to $150,000.

THE Edmonton, Athabasca and Mackenzie River Railway Company will ask the Ottawa Government for power to build and operate a line from Edmonton, Alta., to the Hay River, south-west of the Great Slave Lake.

ON the 2nd inst., the premises of E. Fair & Co., dry goods merchants, Collingwood, Ont. were destroyed by fire, at a loss of $13,000 on the building and $20.000 on stock. Partially insured. On the same day, the Fabre building in Montreal, occupied by a restaurant and some stores and offices was burned at a loss of over $40,000.

MRS. O. POIRIER, doing a general store business at Shediac, N.E., has suspended. She is the widow of the late F. Poirier, who was prominently in business for forty years, eventually failing in 1899. He resumed under the style of F. Portier & Son, who were obliged to compromise in 1901. Mr. Poirier died last August, when the widow bought in the estate.

ACCORDING to a report of the United States Commissioner of Patents for 1903 the patent business transacted during that year exceeded all previous records. The total cash receipts of the office were $1,616,698, leaving a surplus of $189,000. There were 50,123 patents applied for, and 31,699 issued. The patent office, since its inception in 1836, has furnished a net balance of $5,682,540 to the Government.

MR. BADENACH has sent us a copy of the Union Assurance Society's calendar for 1904. It deserves a good place in any competitive list of such things. The design, by Geo. E. Davies, is comprehensive enough. In front of a grove of trees a blue-eyed Ceres sits in a purple and gold arm chair, her head crowned with maple leaves and her lap full of wheat sheaves. To her right is a landscape filled with factories and wharves; to her left, fields, orchards and the products thereof. The coloring is especially good, and it is a further pleasure to observe that it was "Made in Canada," for the Montreal Litho. Co. produced it.

THE development of the Canadian Portland Cement industry has been rapid during the last two years. In 1902 eight factories produced 62,000 barrels, 350 pounds to the barrel, with imports of 460,000 barrels for the same year. With five new cement mills now under construction with a capacity of 5,600 barrels per day, with several new companies organized, which, if completed, will add over 4,000 barrels per day, the entire future output claimed will exceed 3,500,000 barrels. We believe these estimates are much too high. With thirteen plants finished we estimate the output at 2,275,000 barrels at the outside.—Cement & Engineering News, Chicago, Nov., 1903.

THE assignment is noted at Smith's Falls, Ont., of W. H. Willis, a hotelkeeper.

FOR twelve years, J. M. Sirois has been in the general store business at Cacouna, but was reported slow pay, and is said to have compromised in 1897. He has now assigned.——Joseph Dupaul, was formerly in the hotel line at Valcourt, Que. He, however, sold out in 1902 and engaged quite extensively in the sale of carriages, implements, etc., in which he has not prospered, and is reported assigned, owing $16,000, and showing nominal assets of $23,000.——From Becancour, Que., we learn of the assignment of J. R. Dubé, a general merchant of nine years' standing, whose liabilities are put at about $4,000.

LATE failures are reported from Nova Scotia as follows: A Halifax druggist, named G. H. Colwell, in business since 1898, makes a proposition to pay his creditors 25 per cent. in liabilities of $8,000. Of this liability some $6,000 is due to his brothers, and assets are shown of only $3,000.——Arthur Hood, of Shelbourne, has been in business for a lengthy period. He is a jeweler by trade, but has also built ships, in which way he has quite a considerable amount invested. He has hitherto always paid in full, but now wishes his creditors to accept 50 per cent. of their claims, amounting to about $10,000.——A Yarmouth tinsmith, R. W. Williams by name, has assigned. He is a young man who started business in 1902.——A. G. McLeod, keeping a general store at the International Pier, Sydney, is asking extension indulgence. He has been a good deal of a rolling stone, having originally started business at St. Anns, thence he went to Baddeck, subsequently returning for a time to St. Anns, and coming here in 1902. He has always had the name of renewing considerably.——Patton & Co., manufacturers of boots and shoes at Hebron, have assigned. They were unfortunate in being burned out last October, with insurance of only $4,500, while their loss was estimated at somewhere about $10,000.

JAS. YOUNG-THOMSON, MGR.

A. R. KERR & Co., of Hamilton, one of the oldest retail dry goods houses in that city, have recently made an assignment to C. S. Scott.

AFTER some years' experience as a clerk, J. A. Fraser opened a dry goods store at Napanee, about October, 1883. Up to June, 1902, he had always paid his way, but then felt compelled to offer his creditors 65 cents on the dollar cash, which was accepted. Since then he has been in poor credit with wholesale houses, which has handicapped him and we now hear of his assignment.

NOTICE is given that the partnership between Ellsworth Maybee, Joseph Wilson and William Murby, trading under the name of E. Maybee & Co., dealers in live stock at the Western cattle market, Toronto, terminated January 31st, last, by the retirement of William Murby. All accounts owing by the firm will be paid by E. Maybee. Messrs. Joseph Wilson and E. Maybee announce that the business will be taken over by them on and after the first day of February, 1904, under the style of Maybee & Wilson, live stock commission dealers.

HIS TREASURE.

I like to sit and look at all my stocks
and bonds and shares,
And think of how I almost joined the
multimillionaires.
Here are six million dollars' worth of
stock certificates
In Jiggsby's Giant Company for Propagating Dates,
The stock is lithographed so fine; the
dividends are due;
And I'd be clipping coupons, but
The floor
fell
through!

'Way up there in the attic is a heap of
ancient bonds—
The Guarantee Subscription for the
Suckers' Own Fishponds;
And tumbled round about them is about
a million's worth
Of shares in Some One's Scheme to
Make Pure Diamonds from Earth.
They cost me almost nothing, and it
makes me rather blue
To think I would be wealthy, but
The floor
fell
through!

O yes, and here's my special lot of Superheated Air;
My line of Salted Copper, too, is stacked
up over there;
Why, underneath the carpetings and all
about the place
Is Kansas Coffee—common—just ten
million on its face.
They gave me first chance at it—'twas a
splendid thing to do,
And I'd be wearing sparklers, but
The floor
fell
through!

I've got a lot of other stock—there's
Sagebrush Tea, preferred;
And Mountain Air Condenser (now that
agent was a bird!)
And Summer Snow Supplier, also Ocean
Water Gold—
I had some Endless Motion, but that
stock, by jinks, I sold!
I get my good twelve weekly, but I want
to say to you
I' have them all agoing, but
The floor
fell
through!

For some years Jacob Rothschild ran a liquor store at Sudbury, and later on at Mattawa. He sold out that business in May, 1902, and moved to the Soo, where he opened a clothing store. He has now assigned to J. McD. Hains, of Montreal.

Wm Wooley, confectioner, lately reported failed, is offering 30 cents, cash; in liabilities of $6,300.——P. Sicard, plumber, has arranged to pay his creditors 25 cents on the dollar.—— Miss Eugene Labelle, doing a retail dry goods business under the style of E. Labelle & Co., has assigned. She is the daughter of P. E. Labelle, who was for many years in the dry goods trade, but with poor success, his record being marked by two failures in the past. He has also managed the present business which dates back from 1897. The above are all in Montreal.

MONTREAL MARKETS.

Montreal, 3rd Feb., 1904.

Ashes.—The market has lost none of its strength, from $6.05 to $6.10 being still quoted for 1st pots; seconds, $5.65 to $5.70. For pearls $7 would be an approximate quotation, but there has not been a transaction in these for some weeks.

Cements and Firebricks. — Business continues of a very slow character, but prices are steadily held. We quote: Belgian cement, $1.80 to $2.05; English, $2.15 to $2.25; German, $2.15 to $2.35; firebricks, $18 to $24 per M.

Dairy Products.—Shipments of cheese last week were fairly liberal for the season, aggregating 35,946 boxes, making total shipments since the close of navigation 220,576 boxes, as against 167,329 boxes for the same period a year ago. Last week's butter shipments were only 1,462 packages. Cheese values in England incline to easiness, owing to reported fair supplies in hand, and the local market has ruled rather dull, but quotations are pretty firmly held at 10¼ to 11c. for desirable grades. For butter there is a fair jobbing demand. Best winter creameries is quoted at 20 to 20½c., with undergrades at 18½ to 19½c.; dairy makes in tub and rolls quote at from 16 to 17c.

Dry Goods.—Travellers continue to be much hampered in their movements by the continued Arctic cold and severe snow storms, from which no portion of the Dominion appears to be exempt, and it is not unreasonably expected that the average of customers' payments, on obligations falling due to-morrow in considerable volume, may be affected to some extent by the difficulties attending general traffic at the moment. Warehouse hands, however, are all busy getting out spring orders. City retail trade has been somewhat dull since the close of the January discount sales. A general advance, ranging from 5 to 15 per cent., on all lines of cotton goods produced by the Colonial Bleaching &

10 per cent. lower; badger, 25 per cent. lower. Results as above shown will certainly lead to a closer sorting by purchasers of raw furs, and probably some revision of prices, but in the meantime we repeat quotations for prime pelts as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No. 1 choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1, dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—The easiness in sugars referred to in last report, resulted in a decline of 5c. a cental several days ago,

making the present factory price for standard granulated $3.95 in bbls., with yellows ranging from $3.30 upwards; bags 5c. less. Since then New York prices have taken a turn upwards of 5c., but local quotations stand. In other lines there is nothing specially new. Further quotations of new Barbadoes molasses have been received, giving the f.o.b. cost at 16c., but cane cutting is not expected to begin till about the 15th inst. Teas continue dull. Considerable consignments of Ceylon and Indian teas are reported, but values are pretty steadily held. Canned goods are good property to hold.

Hides.—Beef hides now coming in show considerable evidence of the grub, but prices have undergone no change, and it is said all the good stock in warehouse has been bespoke by tanners. We quote dealers as paying 8c. for No. 1 beef hides, 11 and 9c. for calfskins, and 75c each for lambskins.

Leather.—Quebec shoe men are said to be doing some fair amount of buying, but local manufacturers are comparatively slow buyers, and jobbing business is also quiet. On the other hand sole leather men report excellent export demand, and values in this line are firm on the basis of 24c. for Mfrs. No. 2, and 25c. for No. 2 jobbing sole. Black leathers are comparatively neglected.

Metals and Hardware.—The movement in these lines shows a little more activity, but our report of last week covers the situation pretty fairly. Bar iron is easier, and $1.80 appears to be now the general quotation in a jobbing way, car lots $1.75. Canada plates have been sold in quantity as low as $2.15, it is said, and have been quoted to the trade for spring delivery as low as $2.05. Ingot tin is rather easier at 32c., in a jobbing way for Straits. Owing to the general derangement of traffic caused by the repeated heavy storms some of the railways are declining to receive car lots of goods for immediate shipment, which is creating some inconvenience to the trade.

Oils, Paints and Glass.—Turpentine has receded somewhat from late high figures, being now quoted at 91½ for single bbls. Linseed oil is still very low, but some hardening of prices is deemed not improbable shortly, as local crushers are said to be getting short of seed. Fish oils are very dull. We quote: single barrels, raw linseed oil, 46 to 47c.; boiled, 49 to 50c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 91½c., single barrels; olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gallon.; straw seal, 45 to 50 to 55c. per gallon; tinged and brown ditto, down to 35c.; castor oil, 7½ to 8c. for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.50; No. 1, $4.25; No. 2, $4; No. 3, $3.80 to $3.90; No. 4, $3.60; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4½c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in bbls., $1.90; ditto, in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75c.; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

THE TRUSTS & GUARANTEE CO.

Seventh Annual Meeting of Shareholders.

The seventh annual meeting of the shareholders of the Trust & Guarantee Company, Limited, was held Jan. 27th, at the offices of the company, 14 King street west. There was a large and representative attendance of shareholders from various parts of the Province. The reports presented made a very credible showing, indicating a highly successful year's business, and showing a substantial increase in the revenue of the company.

The operations of the year have resulted in sufficient net profits, after paying all expenses of operation and management, to permit the payment of two half-yearly dividends at the rate of 5 per cent. per annum, and to carry forward a balance of $34,466.92. The amount at the credit of profit and loss account is now $82,918.12. The subscribed capital is $2,000,000, and the paid-up capital now amounts to over $800,000.

In moving the adoption of the report of the directors, the President referred to the growing confidence of the public in the management of the company and appreciation of the facilities the company affords for the transaction of the various classes of trusts committed to its care. This is indicated by the large increase in volume of the general business entrusted to the company during the past year, and the large number of wills which have been made appointing the company trustee and executor.

Some remarks were made by Mr. D. W. Karn, the Vice-President, commenting on the very gratifying nature of the report, and also by several other shareholders present expressing the general feeling of confidence in the company's methods and management which exists among the shareholders residing in the districts represented by the various speakers, after which the report of the directors was unanimously adopted.

In every respect the annual report of the company affords a showing which must be gratifying to the officials and shareholders and to the general public desirous of availing themselves of the special features the company presents.

The retiring Board of Directors was re-elected, and at a subsequent meeting of the directors Hon. J. R. Stratton was re-elected President and Messrs. D. W. Karn and C. Kloepfer Vice-Presidents for the present year.

Reduced Cost of Production

is the goal all are striving for.

One of our Band Mill customers in comparing the **Band** with the **Gang** said:

"It's quality, not quantity, I'm after. I have stood over my men this year and insisted on quality. In selling my cut I arranged for an advance of 25c. per M for every 1% advance in quantity of the cutup and better grades By the use of the Band I have secured 8% advance, which means $15,000 extra profit this season."

Several gangs have been discarded for the Pony Band double cutting, adding much to quality while only slightly reducing quantity. Many hundred single and double cutting bands running in Canada. Simple—easily managed—it's worthy of investigation.

MONTREAL BUSINESS VIEWS.

In his address, when vacating the presidential chair of the Montreal Board of Trade, Mr. Hodgson was at no loss for subjects from which to frame an interesting address. And his auditory (of 140 members), will admit that he made good use of his materials. Transportation matters in general and Montreal Harbor in particular, were prominent features. While we have done much already in this direction, the growth of our great West imposes upon this country still greater efforts. "If that country is to expand and develop, increased transportation facilities will have to be provided to bring about such development. . . There is still much to be done, and in the policy of 'Canada and her resources for the Canadian people,' increase in transportation will have to play an important part, especially if we are to hold our own with our neighbors to the south."

It is evident that in the important body he addressed, as well as among other Canadian commercial bodies, there are differences of opinion as to the need for the proposed extension of the Grand Trunk Pacific Railway to Moncton. Still the speaker expressed the view that, speaking generally, the greater the transportation facilities we enjoy, the better for the country's development. In this connection the appointment of a Government commission to examine the transportation question is mentioned with approval. Water transport being not less important to us than that by rail, Mr. Hodgson regarded the further development of our waterways as a matter of commensurate moment.

Broad-mindedness marked the speaker's reference to our future Atlantic mail service. Speaking of the need for Canada of a fast Atlantic line, equal in speed to that between Great Britain and New York, Mr. Hodgson said plainly: "I would prefer to see the terminus in the St. Lawrence, but if Halifax or any other port is considered more desirable, Montreal will not mind so long as it runs to a Canadian port." If it should be determined by actual experiment that fast steamers to Halifax, Sydney, or St. John fulfil the need felt for more rapid communication with Europe, that fact will, in our opinion, tend to lead other fast steamers to come to Quebec and Montreal.

The lighting and buoying of the river between Quebec and Montreal has made navigation possible both day and night, and for this shippers are thankful; but the channel between these points still needs deepening. In his opinion, while insisting on the importance of Montreal as an inlet and outlet for all traffic with Canada, that port fell far short of being worthy the name of a national port as far as terminal facilities are concerned. It is satisfactory to find a man so well qualified to judge expressing himself thus frankly; and we commend the above expression to the attention of the Montreal Harbor Commission, some of whom seem disposed to "rest and be thankful" much too soon. "I feel strongly," said Mr. Hodgson, "that the Government, to make the port really national, should build it up and that further borrowing of money from the Government should be strenuously opposed. The provision of interest on any additional borrowed money would only mean increased terminal charges." It is worth while to note that the president of the Montreal Corn Exchange, Mr. Carruthers, and the representative of that body on the Harbor Commission, Mr. McFee, have stated that if the Government would make Montreal a free port, it would mean that port would be second to none on this continent, and that the traffic via the St. Lawrence would be doubled and even trebled within a very short time.

The reference by Mr. Hodgson to the assemblage in Montreal last year of the fifth congress of Chambers of Commerce of the Empire was very happy. He further stated, respecting the new building of the Board, that the rent roll and revenue for light has increased during 1903 to some $53,000. This result, which means that the revenue of the building is already about equal to its expenditure, is decidedly gratifying.

TORONTO'S WATER SUPPLY.

The city of Toronto is in serious danger by reason of inadequate water supply. People generally do not seem to recognize the fact, but the city engineer sees it and has reported upon it; the council of the Board of Trade are aware of it, and at a meeting held on Wednesday last unanimously memorialized the council in the following terms:

"Resolved, That having heard the conditions of the present waterworks system, as explained by the City Engineer and others, and realizing the constant danger to the community of shortage, and possibly complete cutting off of supply at any time, involving the safety of life and property, as well as increased cost of insurance.

"Therefore, this Council strongly urges upon the City Council the necessity of immediately providing funds for the construction of such additions to the waterworks as will give assurance of an adequate supply and guarantee safety." Carried.

Twice within a week, in bitter zero weather, messengers and telephone messages have been sent hastily to dwellers in the upper areas of the city warning them that their water supply was likely to be stopped. And down-town merchants and manufacturers were asked on Tuesday last not to use their hydraulic elevators, so low was the water in the reservoir. The Fire Brigade, too, have been under special orders to be on the alert with fire-fighting arrangements in case pressure from the reservoir could not be relied upon. In fact a whole community—or at least the portion of it who have sense enough to realize what deprivation of water really means, and who have the honesty to admit that we have been and possibly still are on the verge of this calamity—has been in a state of apprehension for days and nights together.

Will the council of Toronto, this city which has a wide reputation for good government, and is credited with virtuous conditions, show themselves awake to what confronts us. Will they *do anything*? Can the citizens generally be aroused to the needs of the city in respect to water supply? We are pleased to see that a further meeting is intended on Monday next, which the members of the Board, of the Canadian Manufacturers' Association, of the Retail Merchants' Union, and other bodies, as well as citizens generally, are asked to attend.

It is very necessary to remember that the present waterworks system was designed when Toronto was a place of 70,000 people, and that it is entirely inadequate for a place with 240,000 people. This should commend itself to anybody's reason. One of the gentlemen who spoke at the Board of Trade meeting, was very doubtful whether a by-law for extending the waterworks could receive the assent of the voters, and he justified his doubt by citing previous votes. All the more reason, then, if this sullen refusal is the attitude of mind of the ratepayers now, that they should be shown unmistakeably in what danger the city lies. The last vote for the pumping plant carried because people were really aroused to the need of it. Equal earnestness ought to succeed now.

The recommendation which the city engineer makes to the council, and for the completion of which the president of the Board of Trade thinks debentures should be at once issued, is briefly as under: A tunnel under the bay, with a capacity of 75,000,000 gallons. The present consumption is sometimes 30,000,000 gallons a day, and the maximum quantity available is but 27,500,000. A 36-inch main from the corner of Bathurst street and College street to the Rosehill reservoir is very urgent. This will enable the reservoir to be filled in one-third of the time now needed with the existing 24-inch main, which was laid about thirty years ago, and intended to provide for consumption of only 9,000,000 gallons of water daily. The 24-inch main, laid along Front street, from Simcoe to Church, a very few years ago, urgently needs extension to Sumach street; thence a 16-inch main should be carried along Queen street across the Don to Broadview Ave. Mr. Rust thus estimates the cost of features of his scheme, under which he suggests the raising of a million dollars to improve the waterworks. The distribution is as under: Tunnel, $325,000; extension of six-foot conduit, $200,000; water mains, $300,000; new pumping engine for high level station, $50,000; meters, $100,000.

The recommendation of Mr. Rust is approved by Mr. W. T. Jennings, C.E., a high authority. He distinctly states that Toronto lacks adequate fire protection, and the whole system of water supply should be overhauled. He emphasized a point which we are glad to see has been noticed and action taken upon it by the city council, namely, the tremendous quantity of water wasted by citizens letting their water-taps run during the very cold weather. The council has authorized the city engineer to appoint temporarily at once as many inspectors as are needed to report upon cases where city water is being wasted, so that action may be taken to enforce the law against persons so offending. So there are already a dozen inspectors at work checking the waste of water. Public-spirited people can show their sympathy with a good cause and can help to inspire lukewarm or ill-informed persons with knowledge by attending Monday's meeting, of which due notice will be given.

BRITISH COLUMBIA AFFAIRS.

We have received from the Bureau of Provincial Information for British Columbia, bulletin No. 18, a review of the industrial conditions in that province for the year 1903. Information is given, carefully summarized by Mr. R. E. Gosnell, the secretary of the Bureau, upon mining matters, agriculture, and the commercial conditions which have prevailed during the year. It is pleasing to be able to note that the state of labor throughout the province has greatly improved. As the secretary observes, from a condition in the earlier part of the year in which almost every department of industry was seriously disturbed, the situation changed to one of absolute immunity from trouble at the close of the year. Mining, also, as compared with a year ago, is in a prosperous condition. What we note elsewhere about low grade ore treatment at Rossland camp is important. Lumbering was active and prosperous during a large portion of the year, though towards the close it was somewhat depressed owing to over-production. Foreign export declined a little. Apart from the shortage in

the entire Pacific Coast pack of salmon, the fishing industry showed substantial development. In agriculture and particularly in fruit-growing, the development was of a very encouraging character. In general trade, shipping and financial institutions, etc., the year's record was gratifying, and, towards the end of it, particularly so.

Sir Thomas Shaughnessy, president of the Canadian Pacific Railway, once said that British Columbia would never have permanent prosperity until her agricultural resources were developed. Of late, it is true that these resources have begun to be developed to a very pleasing extent. But—and here comes in the point of the above remark—the progress which has been accomplished is as nothing compared with what might be the case if the wonderful capabilities of the province were only realized and the knowledge acted upon. It must be admitted, too, that British Columbia has been something of a laggard in the race, compared with some of the other portions of the Pacific Coast.

Twenty years ago the State of Washington produced very little wheat, whereas to-day she produces nearly thirty million bushels, only three States, Minnesota, Kansas, and California exceeding it in production. The crop of Oregon is about twenty million bushels. Washington produces considerably more wheat to the acre than any other State in the Union. Washington and Oregon furnish about one-quarter of all the wheat exported from that country.

In 1901 Washington packed over seven million dollars worth of fish, and Oregon over two million dollars worth. The agricultural development of Oregon and Washington in recent years has been so rapid that few people realize the important part they now play in the agricultural production of the United States. Of course we do not forget that Washington and Oregon have nearly half a million of population each. The aggregate of people in the two rose from 16,000 in 1850 to 931,000 in 1900, while British Columbia has but 200,000. The great agricultural development of the surrounding country enables the people of the cities of Seattle and Tacoma to live as cheaply as in the East, because the State of Washington not only feeds its own population, but exports largely of every kind of farm produce. It is time that British Columbia should take these object lessons to heart. She has wonderful agricultural possibilities in her rich soil and agreeable climate; yet needs to import vast quantities of foodstuffs for mining camps and other regions every year. If Washington and Oregon can do what they have done in the way of feeding their inhabitants and exporting wheat and other products, British Columbia can surely do the same. Far be it from us to belittle what this golden province of ours has done. What we wish is to see her energetic population, who have done so much, stimulated to make the most of their opportunities in agriculture and in other directions than mining.

THE VALUE OF LOW-GRADE ORES.

The successful application of the concentration process to some of the ores in the Rossland, B.C., camp has been the means of drawing much attention to the possibilities which it opens up for the profitable working of other ores, which in the past have been deemed almost valueless. It is pointed out by the Rossland Miner that at the Le Roi mine there is, on one dump alone, some 50,000 tons of ore, the average value of which is not less than $5 per ton. It has been demonstrated that with a 200-ton concentration mill, the cost of milling would hardly be more than $1.50 per ton; allowing for smelting and other necessary charges, there would still remain a very fair net profit, and this out of material, a large proportion of which is considered waste. This is surely a very important finding. With a concentrator plant of the named dimensions, the tonnage of milling ores already in sight would be sufficient to keep it running for nearly three years. This refers more particularly to ore, either waste or similar to that, which has proved more or less unprofitable during the past year or two. With better grades, profits would, of course, be correspondingly increased.

Mine-run ores, the Miner says, carry a charge of $2.50 to $3 for costs of extraction. "Added to $2 for milling, smelting, and indirect charges, such as refining, the total costs of realizing on such ores would be $5, or possibly $5.50, in view of freight charges to be met. On the $9 ore which the Le Roi shipped in quantity during 1903, the application of milling would obviously have left a profit of $3 at least, instead of entailing a loss, as was the case in various months."

THE FUR SALES.

It will be seen from the following cable report of the London January fur sales that there was a marked decline in the prices realized for several important kinds of skins on that occasion. It should be remembered, however, that, until further details come to hand, they should only be accepted with a good deal of reserve. That is to say, that until we have more definite information as to comparative qualities and so forth, it would hardly be safe to generalize very largely. While it appears true that a considerable lowering of values has come about, and that this has resulted in some cases to a more marked extent even than thought by those who believed an era of lower prices was at hand, yet this certainly should not be understood as betokening a slump in furs. The truth is that last year, as was the case in many other commodities, a condition almost approaching inflation was attained; values were reached which put furs really beyond the power of purchase of many ordinary consumers; and now these have descended to a more normal and reasonable basis. That this is so is shown by the fact that even at the recent sales most furs sold at prices which, although considerably below those of nine months or a year ago, are yet markedly higher than those obtained two or three years ago. The following is the summary of prices realized last month. All these prices have come by cable:

AT C. M. LAMPSON & CO.'S SALES.

Mink	10%	lower than last March.
Skunk	20%	lower than last March.
American opossum	....	Same as last March.
Raccoon	25%	lower than last March.
Muskrat, spring	12½%	lower than last January.

Muskrat winter	5%	lower than last January.
" fall	5%	higher than last January.
Fox, white	15%	lower than last March.
" red	10%	lower than last March.
" grey	35%	lower than last March.
Cat, wild	....	Same as last March.
" house	....	Same as last March.
" civet	....	Same as last March.
Bear, black	40%	lower than last March.
" brown	30%	lower than last March.
" grizzly	30%	lower than last March.
" white	....	Same as last March.
Beaver	12½%	lower than last January.
Marten	20%	lower than last March.
Lynx	15%	lower than last March.
Otter	....	Same as last March.
Badger	25%	lower than last March.
Wolverine	10%	lower than last March.
Wolf	....	Unchanged.

AT THE HUDSON BAY CO.'S SALES.

Muskrats	15%	higher than last January.
Beaver	12½%	lower than last January.

As suggested above, these prices will probably require to be modified when full particulars come to hand. Mink, for instance, is cabled 10 per cent. lower than in March last; this probably represents only an average decline; we want to know what was the condition of the various lots, their quality, and so on. There is a great discrepancy, too, between the two reports about muskrat—the one referring to the Lampson sales and the other referring to the Hudson Bay sales. Perhaps this fur was all cleared out and the scarcity brought about an immediate rapid rise; but this we do not know, and it is clear, as we have said, that full details must be received before the prices are accepted. One thing which may be worth noting is that while skunk fur is 20 per cent. lower than at the March sales last year, American opossum, so often used as a substitute, remains the same, which leads one to the belief that the imitation, which has all along been more within the reach of the great consuming public, is believed to give better value.

The only summarization which appears to be safe to make at this stage, is that a more reasonable standard of values has now been reached, that the probabilities are that trade will follow in greater volume than heretofore, and that skins will find their way to the market more freely. The fur trappers are a class of people who cling a long time to a high water-mark of values, forgetting that that high water-mark, below which they refuse to sell their catch, however slow may be the demand, is a long way removed from the fair average profits with which they used to be content. Perhaps there were never so many small parcels of skins being held back for high prices as there are now in Canada and the United States. The result of the sales should show the unwisdom of such a course.

GROWTH OF CANADIAN INDUSTRIES.

We are all of us aware, and indeed proud of the wonderful increase in the productiveness of our Canadian factories during the past few years. But this is in a general way. The statistics of the census department, which are on the point of being issued, will set forth the great industrial development which took place during the decade between 1891 and 1901, in detail. The following table summarizes the figures collected:

	1891. Establishments. No.	1891. Value of products.	1901. Establishments. No.	1901. Value of products.
Canada (total)	13,679	$363,156,797	14,650	$481,053,375
Agricultural implements	95	7,252,005	114	9,597,386
Boilers and engines	42	2,433,878	59	4,626,214
Boots and shoes	269	12,706,215	179	18,481,215
Bread, biscuits and confectionery	269	8,374,306	258	11,637,808
Brick, tile and pottery	520	3,701,721	573	3,299,017
Bridges, iron and steel	6	728,075	6	1,693,000
Butter and cheese	1,735	10,697,897	3,576	29,462,402
Carriages and waggons	367	5,942,559	349	6,650,912
Car works	18	9,450,525	33	11,500,818
Cement (Portland)	11	227,275	7	765,876
Clothing, men's	1,373	18,669,652	735	8,775,439
Factory product	....	.....	58	8,980,291
Clothing, women's	768	4,931,779	334	4,368,380
Factory product	....	.....	26	2,190,627
Evaporated fruits and vegetables	30	142,436	50	395,540
Fish, preserved	805	5,661,144	1,097	8,025,630
Flouring and grist mills	230	30,721,846	400	31,835,873
Furniture and upholstered goods	234	6,625,811	169	6,949,384
Hog products	2,143	46,749,996	2,075	50,805,084
Iron and steel products	23	4,356,730	29	6,912,457
Leather, tanned and finished	170	9,711,781	143	12,068,600
Lumber products	420	13,443,802	467	10,754,959
Oil	43	2,128,112	14	3,519,493
Painting and glazing	75	1,089,620	3	103,000
Paper	32	2,570,722	28	4,380,776
Patent medicines	14	421,100	35	1,350,993
Printing and bookbinding	66	1,966,653	84	2,748,356
Printing and publishing	349	7,672,310	412	10,319,241
Rubber goods	9	2,040,000	7	1,173,422
Ships and repairs	132	3,067,475	39	1,899,836
Slaughtering and meat markets	62	5,264,143	157	22,217,984
Smelting	15	3,016,200	12	7,082,384
Soap	30	1,909,390	23	2,143,945
Sugar refining	7	11,627,100	4	12,595,000
Tobacco, chewing and smoking	31	2,347,650	22	6,469,961
Tobacco, cigars	93	3,280,114	138	5,332,151
Wood pulp	23	1,053,842	25	4,246,781
Woolen goods	213	7,845,386	157	7,359,541

It will have been noticed that while the total number of factories in Canada increased by nearly a thousand during the ten years named, yet in several branches of industry, there was noticeable a distinct tendency to combine interests, as is manifested by the fact that though in several cases the number of working establishments was actually smaller in 1901 than in 1891, yet the production in the former year was much larger. In boots and shoes, clothing, and woolens, furniture, and leather, this tendency was especially noticeable. Among the most noteworthy increases in the production of ordinary manufactured goods may be mentioned the item of agricultural implements, value increased from $7,252,005 to $9,597,686; boilers and engines, from $2,433,878 to $4,626,214; boots and shoes, from $12,706,215 to $18,481,215; bread, biscuits and confectionery, from $8,374,306 to

$11,637,808; leather, from $9,711,781 to $12,068,600; printing and publishing, from $7,672,310 to $10,319,211; smelting works, from $3,016,200 to $7,082,384; wood pulp, from $1,053,842 to $4,246,781. But it is in the industries primarily depending upon agriculture that the most extraordinary advance is to be seen. For instance, butter and cheese, the value of which in 1891 was $10,697,897, had reached in 1901 a production valued at $29,462,402; slaughter and meat products, valued at $5,264,143 in 1891 were $22,217,984 in 1901. Among the declines, jewellery fell from $1,416,409, in 1891, to $996,313 in 1901; ships from $3,067,475 in 1891, to $1,899,836 in 1901; lumber products from $13,443,802 in 1891, to $10,754,959 in 1901. The table is full of interest, but a little puzzling here and there. For instance, we find it stated that 230 flour and grist mills in 1891 put out $30,721,000 of product, while the 400 similar establishments of 1901 produced only $31,835,000 worth. And again: Of Portland cement works there were 11 in 1891 turning out $227,275 worth of cement; while in 1901 only seven establishments are stated to have been working, turning out $765,876 worth.

TRADES' UNION METHODS COMPARED.

In some respects it would scarcely be fair to compare the methods of trades' unions on this continent with those in Great Britain. In the latter country, where great manufacturing centres are so much closer together and the population so much denser, it is only natural that the development of trades' unionism should have reached a higher plane than it has done so far in the United States and Canada. It would surprise most of us, probably, to learn what real progress has been made in England during the last decade in this respect; not, we mean, merely in any increase of power on the part of the unions, but in the gaining of a clearer understanding of what should constitute their true purpose. The Washington, D.C., Bureau of Labor has issued a report, compiled by Mr. A. Maurice Low, in which this gentleman tells of the present condition of unionism in Britain, and incidentally compares it with that of the United States. It may be remarked that Canadian labor leaders may also find in it considerable food of thought.

Mr. Low states that in former times the English unions were prone to make the mistake of resisting the introduction of labor-saving machinery and improved methods, on the ground that they diminished the demand for labor. This error has not been largely imitated on this continent for several reasons. But there are other mistakes which certainly have been followed here, such, for example, as the curtailment of a man's maximum output as a mechanic or laborer, and the consequent putting of a premium on inefficiency. But let us hear what Mr. Low says as to what the British unions have learned through bitter experience, and then express the hope that their confreres here will take the lesson to heart for their own good, before greater injury has been wrought, not only to the country's industries, but to themselves as well. He says:

> Trade organizations (in England), have not been so affiliated or confederated as to give one control over another or a voice in its management, and while there has been a bond of sympathy and common purpose between them, they have not been wont to support each other by sympathetic strikes or boycotts. They have been little addicted to using coercion or intimidation to bring the competent men of a trade into its unions, and so far as they formerly resorted to that they have found out its lack of wisdom as well as of justice, and have abandoned it. They have to a large degree abandoned the attitude of antagonism and hostility to employers, or to capital, and sought to obtain agreements on the ground of mutual interest by "collective bargaining." This has induced a sense of responsibility and a respect for contracts which afford the most notable contrast with the spirit of some of our labor unions. Commenting on this, the New York Bulletin says that the result is a much better system of management than has yet been developed in this country, for no arbitrary power is given to walking delegates or business agents, but difficulties with employers are soberly considered by executive committees which are made up of the most capable men in the unions. They have learned the serious consequences of bitter disputes and contests and the wasteful loss of strikes, and endeavor by every reasonable means to avoid them and to settle them peaceably when they cannot be averted.

THE WHITAKER WRIGHTS OF AMERICA.

That a man is convicted of fraud and dies in disgrace by his own hand is no reason why his own version of his career should not be listened to with respect, even by those who have never been arraigned in a law court. Whitaker Wright, at the time of his capture in New York, said, or is reported to have said: "There is no difference between what I did in England and what your industrial companies are doing in America." Now, Wright may have fully believed what he said, but this does not exculpate him from the guilt for which his tragic death was such a sorry atonement, because the deeds for which punishment was meted out to him were committed not in America, but in England, where he must have known they were criminal acts.

But his terse statement does lead to a train of reflections upon the question, what constitutes a crime? Nominally, a crime is that which is contrary to and forbidden by the law. Moreover, at this stage of the world's civilization, it may generally be taken for granted that what is looked upon as a crime in one country is, or should be, considered a crime in other countries. Now, in this case, the methods of financing companies, which Whitaker Wright adopted in England, are there deemed distinctly fraudulent, and punishable by the law, while, on the other hand, they may be indulged in in this country and in the United States with impunity. Which, then, of the two alternatives does this more likely imply—that such methods are not really fraudulent, or that the law here is itself faulty in not touching them?

In England, Wright, the bold financier, came to be looked upon as little better than a buccaneer, and, as such, the law speedily came into play. The interesting way in which his subsidiary companies bought from and sold to one another at an immense so-called profit, just before annual-meeting time, the rapidity with which thousands paid in became millions on paper, the extraordinary facility with which dividends were paid out of profits as yet unearned, the oceans of "water" in his vaunted stocks, all were looked upon

by the courts, not as high finance, but as the sure evidence of a very acute desire to deceive the public. This was enough; he was found guilty; and the judge decided that no punishment within his power to measure out was too much for the man who would carry on such practices. On this continent, the same methods are used: dividends are paid out of unearned profits; worthless shares are loaded on a confiding public; companies are grossly over-capitalized, and the public, in order that shareholders may be paid dividends on a vast quantity of "water," has sometimes to pay through the nose for the necessaries of life. Yet nothing is done! In England, this sort of thing is criminal; is it less a crime here?

We have, of course, not so much to do with what goes on in the United States, but it is surely time that the Canadian laws which have to do with the formation of companies, should be so amended as to afford more protection to the public than they do now. We remember noting the surprise of one of the English delegates to the recent Chambers of Commerce Congress, expressed at the way in which common stock is sometimes issued in this country at a merely nominal price to bondholders, giving the rein to the gambling element in its worst form. There are, however, several directions in which our joint-stock companies might be improved with advantage. What is so emphatically criminal in England cannot properly be deemed legitimate business here. That this is becoming recognized by business men is manifested by the passing of a resolution at the annual meeting recently of the Montreal Board of Trade calling for such changes in the Dominion and Province of Quebec Joint Stock Companies Acts as will put a stop to the fictitious over-capitalization of companies.

SCHOOL ROUTINE.

An idea which seems to be in the crystallization process, is that our present Ontario system of school routine leaves a good deal to be desired. In Toronto the other day, a meeting was held at the instance of the Hon. Richard Harcourt, Minister of Education, at which members of the Provincial Board of Health and others interested in education and sanitary matters were present. Several suggestions were made for the better prevention of outbreaks and of infectious diseases in schools, and for the general physical improvement of the pupils. Dr. Sheard, Toronto Medical Health Officer, advocated, among other things, shorter school hours, longer vacations, and, what we believe will meet with the approval of the scholars themselves, and of a majority of their parents, the abolition of home work. The acquisition of knowledge is important, but most thinking people will agree that of more primary importance still is the gaining and retention by a child of a sound body. By a scholar of quick mind the extra work can scarcely be required, while, as the Doctor observes, the system of night work makes a dull child duller. Then, too, even though the time required for the evening home task be actually short, it is apt to weigh upon a scholar's spirits. Released from school in the afternoon, he should be able to realize that labor is over for that day, and it will then be resumed in the morning with all the greater zest.

MONTREAL LETTER.

As you were previously informed about the impending mayoralty campaign, the personnel of the candidates and the chances, as then estimated, I do not need to tell you how the election has gone. The man whose candidature was from the first favored by Montreal business men, Alderman H. Laporte, has been elected by a pronounced majority, having polled more than 17,000 votes, while Dandurand got only 4,410, and ex-Mayor Cochrane, 2,716. The liquor vote, as it is called, did not "pan out" well for Dandurand. The new Mayor is a man deservedly respected because of his good sense and his enlightened public spirit. There is also much to be hoped from the choice of a reform element among the members of the aldermanic board. A feature of last week was the letter of ex-Mayor Cochrane from the South declaiming against Larry Wilson and "the people's Jimmy," and showing to what financial extent he had befriended the latter. Much hot criticism has been indulged in, and many threats, the makers of which will probably let die, now that the result, unexpected to many, has been shown.

Something may have been accomplished in the way of a change of votes by means of a circular addressed by the Local Council of Women to the 5,500 female voters of the city a few days before the election. This circular prayed women who had votes to go to the polls, and so lessen the chances of other women impersonating them; it urged the exercise of the franchise by both men and women if they would avert the evils of civic mismanagement; and finally it cited the state of the city's streets, the need of inspection of food, the condition of the water supply, the proper education of children, as matters peculiarly the interest of the female voter. The diet dispensary, in its annual report, indicates that 1903 has witnessed fewer cases of poverty than usual, and each month of the twelve has seen the society with a good balance in hand. "This has been the first year on record when the pinch of poverty has not been felt some time during the season.",

The Canadian Society of Civil Engineers has been in session at its rooms on Dorchester street for some days of last week. The retiring president, Mr. K. W. Blackwell, in an address on ton mileage, treated the important question of land and water transportation very fully. He showed that improvements in the West of Canada had conduced to better conditions and lower freights. Professor Bovey and Mr. Kennedy, the Harbor Commission engineer, reported as to the results of testing pressure in grain bins at the C.P.R. elevators and elsewhere. I have also observed that the Kingston convention of marine engineers has appointed a committee to confer with the Dominion Marine Association on subjects affecting the marine interests of Canada. At Quebec, on Thursday last, the Province of Quebec Association of Architects held its thirteenth annual meeting, the president, Mr. W. E. Doran, of Montreal, in the chair. The result of the election of officers was that J. P. Ouelle, of Quebec, was chosen president; 1st vice-president, S. H. Archibald; 2nd vice-president, A. Chaussie; secretary, J. E. Vanier; treasurer, D. R. Brown; councillors, L. P. Lemay, A. A. Cox, W. J. Carmick, J. C. Resther, J. Venne; auditors, Prof. P. E. Nobbs, L. Lemieux. Although these are not all strictly commercial or financial matters, I have assumed that some of your readers are interested in them. This month will witness perhaps as many meetings as January has done of companies and associations of a commercial kind.

The Corn Exchange of Montreal held its annual meeting on Wednesday last, when the views of the members on transportation and harbor elevator rates were freely given. I send you a paper containing an account of the proceedings. The retiring president, Mr. James Carruthers, urged that the Exchange make their views on lake and rail matters known to the Transportation Commission, soon to meet in Montreal, by means of a deputation, or a series of well considered resolutions. "We are all," he said, "deeply inter-

ested in this transportation problem, and feel sure that if strong resolutions were brought forward by the Corn Exchange they would have considerable weight with the Government." A committee will deal with the matter. Mr. McFee told the meeting that the harbor elevator would be completed in April. It was remarked by a member that more elevators were needed, but another pointed out that the Canadian Pacific already has two, while the Grand Trunk is building one. But there is the Canada Atlantic to be considered. A proper tariff for the handling of grain in the elevators was one of the subjects discussed. This is a matter of much moment to grain dealers. The election of officers then took place, resulting thus: President, G. A. Thomson; treasurer, Joseph Quintal; committee of management, Norman Wight, E. S. Jacques, A. E. Labelle, A. E. Cook, M. A. Overend, R. W. Oliver, C. R. Taylor; board of review, Edgar Judge, chairman; T. A. Crane, C. B. Esdaile, G. M. Kinghorn, John B. McLea, and James Norris.

Montreal, 2nd February, 1904.

OUR SAINT JOHN LETTER.

Messrs. D. W. Hoegg & Co., who have canning factories at Fredericton and elsewhere in New Brunswick, are negotiating with the farmers in the vicinity of Sussex, and if the latter promise them a sufficient supply of Indian corn and other vegetables they will build and equip a factory there. All the indications are that a satisfactory arrangement will be arrived at between the two parties, and that the new enterprise will be established. The Messrs. Hoegg & Co., have made a very great success of canning vegetables and have built up a large trade.

The Salvation Army branch in the Maritime Provinces is becoming such a large and important section that the management has decided to establish in this city a tailoring shop, in which all the uniforms for the male officers will be made. Heretofore these have all been brought from Toronto. It is understood that the Army shop will not confine itself to Army work, but will compete for trade from all classes, which news is heard with mixed feelings.

The condition of the raw cotton market is giving the owners of the local mills much anxiety. Already they have been compelled to cease manufacturing some lines of textiles, and there is talk of closing down the mills if the price of raw cotton goes much higher. It will be a great misfortune if the five or six hundred employees of the two mills are thus thrown out of work in midwinter.

Tenders for the proposed St. John dry dock close tomorrow. A number of contractors from different parts of Canada and the United States have been here during the past few weeks, looking over the plans, examining the site, etc., and the indications are that there will be considerable competition for the contract. The dry dock company has not made known whether or not it has perfected all its financial arrangements, but the call for tenders is taken to indicate that this important matter is arranged for.

The Dalhousie Lumber Company, which last year bought out George Moffatt's interests in Dalhousie, now have men at work enlarging and modernizing the Moffatt mill. They will instal much new machinery, and will so arrange matters as to greatly increase the output of the company. American capitalists.—The Bearinger Syndicate, of Saginaw, Michigan, have just completed the purchase for a hundred thousand dollars of the W. S. Montgomery lumber mill at Dalhousie, and his timber limits on the Restigouche river. It is a valuable tract of land, and the new owners will operate it.

Messrs. T. C. Dobson, of Moncton, and Theophilus Dupuis, of Dorchester, have purchased the Boudreau quarry property twenty miles from Moncton. There is 600 acres well wooded, and the new owners will energetically work the quarry.

English capitalists.—Messrs. O. G. Anderson and W S. Y. Anderson;—are now in Fredericton, negotiating for a property there, with wharf privileges on the river front, and will establish a furniture factory. They are also negotiating the purchase of some timber tracts on which hardwood can be cut. They expect to begin building operations early in the spring.

Messrs. R. P. and W. F. Starr, local coal merchants, have Messrs. John H. and George G. Proctor, of Boston, here at the present time, and with them are a number of workmen who are to build a modern coal pocket at the Messrs. Starr's wharf. The work will take about three months, but when it is completed it will be the most modern plant in St. John.

Up to January 30th, the value of shipments by the winter port steamers from St. John have been $7,687,308, of which $4,753,419 was Canadian goods, and only $2,933,889 foreign or American goods. This total is an increase of $1,477,316 over the shipments to the same date last year. There have been 46 steamers this year against 40 in the same time last year. The indications are that the business of the winter will exceed by well on to $3,000,000 that of last year, which was the heaviest on record.

The Canadian Government has placed at the disposal of St. John, two dredges, which will be put to work at once digging on the site of the proposed new berths for winter port business. It is understood that other and more powerful dredges will be sent here when spring opens, and that the Government will assume the responsibility of doing all the dredging. The city will pay the cost of a new wharf with four steamship berths, and the C.P.R. will rent it for forty years. The city is arranging to give the C.P.R. forty acres near the proposed new wharves, on which it will lay out a new yard.

Saint John, New Brunswick, 3rd February. * * *

NORTH AMERICAN LIFE.

The president's address, at the meeting this week of the North American Life Assurance Company, dwelt at some length upon the satisfactory condition of the country generally. This he regarded as gratifying in the interests of the company, for, "the progress and prosperity of a life insurance company depends very largely upon the general business of the country being in a satisfactory condition, as without that state of affairs existing, people generally, whether employer or employee, are not in a position to make provision for those dependent upon them, as they are when times are good, and everyone's earning power is being adequately remunerated." Speaking of the loss and disappointment to those who were carried away with the wild speculation which existed on the stock market, Mr. Blaikie naively said: "I know that myself and others who remained steadfast in what we believed to be the old-fashioned ideas of finance and business, were not looked upon with much favor by those who were in a hurry to get rich. I feel sorry, indeed, for those who suffered so severely from the crash on the stock market which occurred some months ago, and I hope the lesson they received will be learned and will stand them in good stead in the future."

The table submitted, showing the progress made by the company since 1882 is of interest. There is a steady growth in the twenty-one years in new business, in business in force, income and assets; while the net surplus, which in 1896 was $421,456, and last year $515,044, is now $550,237. A strong feature is the large percentage of assets to the liabilities; another, the large proportion of net surplus to liabilities. And a point warrantably insisted upon is that the only source from which profits can be apportioned by any company to shareholders must come out of the fund known as net surplus. It is important to observe that this company follows the safe practice of keeping its securities on its records at their cost value, and does not take credit for such fluctuating increases in price as the stock market may from time to time indicate. The interest income of the North American Life has again proved more than sufficient to pay its death losses, which were $196,871. Another feature which is emphasized by the auditor, is the interest and rents due, being on $1,380,000 of mortgages and real estate held, only $7,110. The net return on its real property is more than five

per cent. Great earning power and a very creditable ratio of growth are shown by this now well known company. A novel departure, and one pleasing to the agency staff, was the entertainment given them by the management after the annual meeting.

THE ÆTNA LIFE.

A condensed report of the operations of the Ætna Life Insurance Co., of Hartford, Conn., appears to-day. The record is a good one. In fact, we believe it is one seldom previously equalled by this company in the great gains in all departments of the business during 1903. It is a proud record, as a whole, to have paid to its policy-holders, or their widows and orphans, the large sum of $138,946,127 during the fifty-four years. That would be only about two and a half millions a year. But during the past year it paid to the insured no less than $6,562,153, and laid aside an increased reserve fund of $4,661,633 with which to help pay the increasing obligations assumed during the year. These increased obligations are stated at $12,002,866, showing that the agency staff has been busy. The total new insurance written during 1903 in the Northern States and Canada, was upwards of thirty-three millions of dollars. Unlike most large American companies, the Ætna confines its operations to the above two safest sections of the globe in which to transact life insurance. It steadily refuses to incur the expense and risk of going to distant or dangerous climates for new business, and claims that on this account it is able to afford very much better results to its patrons. The company is fortunate in having such solid and steady workers in charge of its Canadian branches as Messrs. W. H. Orr & Sons and T. H. Christmas. They have, all of them, now been with it a round thirty-eight years from February, 1866, at which date the Ætna's Canadian business may be said to have practically begun. They and their field force are, all of them, as enthusiastic as ever, in praise of the old Ætna's splendid results to the public on all classes of policies. In this important particular, the company occupies no second place, taken as a whole.

TRAVELERS' INSURANCE CO.

A brief notice was made of the progress of the Travelers' Insurance Company among our insurance notes last week. We had not then received the full figures of the annual statement for 1903. Now that they are before us, a healthy growth is shown in the company's various departments. Total cash income has grown from $10,200,000 to $11,670,000; the reserves to insure payment of life policies and to protect accident policies are increased from $31,285,000 to $34,460,000; and the total resources of the company, which were a year ago $37,078,000, are now $40,100,000. As already stated, the payments to beneficiaries during the twelve months amounted to $4,200,000, or at the rate of more than $13,400 every working day. These are gratifying results, and show the vast benefit that can accrue to a community from the working of a well founded and strong life and accident insurance company.

Some attention may be profitably given to the separate departments. The accident claims paid since the company's inception number 411,100, amounting to more than $31,000,000, while the number of accident policies issued exceeds 3,400,000. This department is able to boast of new policies, new methods, and improved organization. And an improvement in the quality of risks is shown by reduced loss ratios in the accident and health policies, a saving which will go far towards paying the accumulation dividend of five per cent. for renewals during 1904. In the life department, the new insurance paid for last year amounted to $16,880,000, an increase of more than a million over 1902. The amount added to the reserve was $2,800,000, and the payments to policy-holders, $2,300,000. The report contains some strong words in reprobation of rebating and special inducements of an unfair kind and compliments the agents, and their confidence in the company's disposition to "play fair." The Travelers' has deserved well of its patrons these many years, and it continues to add steadily to its strength and popularity.

BRITISH MORTGAGE LOAN COMPANY.

A satisfactory report was laid before its shareholders last week by this company. It shows an increase of $45,000 in assets during 1903, and earnings sufficient to pay the usual dividend and add $10,000 to reserve fund, which now amounts to nearly 37 per cent. of the paid capital. This is doing well, when we remember the competition for farm lending and the low rates of interest on such business that now prevail. There is evidence in the avoidance of losses of prudence in valuing and watchful administration. We observe that, in the receipts of money, more of it is in the shape of debenture and less on deposit, which to a mortgage loan company must always be a relief. A reference in the report to events in St. Thomas mortgage lending circles during 1903 is worth quoting. Thus: "If the offers of higher rates of interest on speculative securities—if laxer modes of loaning—might have brought greater gains, the risks and chances, with their attendant results, have pointed directly the other way, the ruinous examples of the last few months teaching their own calamitous lesson. We have always kept away from such dangers; and therefore the shock that was brought by disastrous losses from rash ventures to numbers of unfortunate persons elsewhere, was not felt by us in the slightest degree."

TRUSTS AND GUARANTEE COMPANY, LIMITED.

Something like a year ago, a call of ten per cent. was made on all the partially paid up stock of this company. It is now reported that the payment of the call has been met in a very satisfactory manner, the amount received being $189,790, the paid-up capital now amounting to $818,870. The report submitted at the seventh annual meeting, held last week, shows that two half-yearly dividends at the rate of five per cent. per annum have been paid, and as a result of the year's operations there remains a balance of $34,466, after payment of all expenses for the year This, added to the balance of $48,452, at the beginning of the year, makes a total of $82,918 at the credit of profit and loss account. The directors have continued the policy of endeavoring to extend the knowledge of the company's standing and methods and the various branches of business it undertakes.

GUARANTEE COMPANY OF NORTH AMERICA.

The annual meeting of the shareholders of The Guarantee Company of North America was held in Montreal on the 28th January, the president, Mr. Edward Rawlings, in the chair. The annual report was submitted, which gave the figures which follow: Amount of bonds in force, $57,203,271; gross revenue, $301,528.22; assets, $1,201,354.35; surplus to shareholders, $751,325.39; total resources, $1,565,354.65. The total amount paid and provided for indemnity to employers to date is $1,716,990.09. The usual dividend of six per cent. on the paid-up capital, together with the bonus of two per cent. out of the ascertained profits of the year, was paid. The following directors were elected: E. S. Clouston, George Hague, Hartland S. MacDougall, Edward Rawlings, Wm. Wainwright, Robert Kerr, H. W. Cannon, of New York; E. C. Smith, of St. Alban's, Vt., and James B. Forgan, of Chicago. Mr. Rawlings is president, and Mr. MacDougall, vice-president. The large share of the company's business which is done among United States institutions accounts for the unusual proportion of American bankers and financiers on the board.

—Word comes that the metric system has been adopted by the Parliament of New Zealand. It is intended to have it go into effect in three years. It will take much longer than that if the New Zealanders are half as self-satisfied and apathetic as the people of the United Kingdom.

THE METRIC SYSTEM IN GREAT BRITAIN.

An English subscriber forwards us a copy of the petition in favor of the metric system, which, we are told, is being largely signed by merchants, members of chambers of commerce, schoolmasters, teachers, ministers of religion, shopkeepers and retailers, manufacturers, engineers, trades unions, members of trades unions and workmen in the Old Country for presentation to the House of Lords. The reasons urged for the adoption of this system of weights and measures are so numerous and so cogent that one would think they must make headway, in time, against the ingrained conservatism of England. Some of these reasons are: Because it has already been adopted by nearly all the civilized countries. Because, as our consuls frequently reiterate, we lose trade in consequence of our weights and measures not being understood in other countries. Because the colonies desire the change, but feel that the lead must, on account of intercolonial trade, be taken by the Mother Country. Because it would lead to the abolition of a large number of anomalous, customary, or local, but illegal, weights and measures, still largely used in various parts of the country.

The petition likewise urges that a select committee of the House of Commons in 1895 reported in favor of the compulsory adoption of the Metric weights and measures within two years, and that the colonial Premiers at the Coronation conference resolved in its favor. That by reason of the fierce competition for foreign trade, the need for the change is even more serious now than in 1895, there being indications that the metric weights and measures will before long be adopted by the United States for use in trading with countries using the metric system, especially the Republics of South America. This last argument ought to appeal with peculiar force, one would think, to the Old Country in the present state of the public mind on the subject of American and other competition in export trade.

THE TYPEWRITING MACHINE AND ITS USERS.

The typewriter business in the United States, that is to say, the business of making typewriting machines, has grown to remarkable proportions. And the variety of machines made, some preferring one "improvement" or "attachment" and some another compels a person to think that there must be a large proportion of faddists among the users, if not among the makers, of these very common and necessary machines. Just how commonly they are in use in the States may be inferred from the census figures referring to the making of them. The report prepared for the United States Census Office in 1900 showed that the capital then invested in the manufacture of typewriters and supplies throughout the country was approximately $8,500,000, which represented the value of lands, buildings, machinery, implements, and live capital utilized, but did not include capital stock. The value of the products turned out was about $7,000,000. But in the three years that have elapsed since, it is estimated that the capital in the industry has increased to $12,000,000, with a corresponding increase in output.

Some typewriting machines are very simple in construction, others extremely complicated. There are dozens of kinds, and probably more than dozens of patents, but the popular demand seems to centre upon fifteen, or at most twenty. Of course, the price of a typewriter has much to do with its popularity, but there are plenty people who willingly pay high prices for the machine they like. Being asked to explain why some machines are especially liked, a New Yorker, experienced in the ways of typists, tells the New York Times: "In the first place, no two operators write alike, because no two are of precisely the same temperament. One may depress the keys with a slow and even touch, another's touch may be quick and jerky, that of a third exceedingly irregular and awkward in style. The would-be expert strives to cultivate a quick and methodical style of fingering the keyboard, and naturally chooses a machine capable of fine adjustment. . . . Others have queer notions about the cause of 'sticking,' that is, the refusal of the typebars to strike, and will not buy a machine which appears to be intricate in construction.

"There is another body of operators who invariably insist on having the very latest machines produced. They resemble the bicyclist, who will willingly exchange a wheel that is in good working order and practically new for another of a later model and pay $25 to boot. [This is very characteristic of Americans.] If they get the impression that their machines are out of date, that settles it; they must get rid of them. On the other hand, there are old pioneer operators who claim that the machines made five or ten years ago are superior to those of the present. To some operators, the sound of a typewriter is exceedingly objectionable, and they try to obtain the most silent machines to be had. They are not particular about the size of a machine or its peculiarity of action, but it must be, as they say, noiseless; or, maybe, it is the employer who objects to the noise.

"In recent years the light-weight typewriter has won a host of friends. Hundreds of people, among them clergymen, authors, and newspaper reporters, desire a machine which they can pick up and carry easily, and, perhaps, put in their travelling bag; they have no use for one of large frame, which occupies almost as much space when encased as a small trunk. The bare appearance of a typewriter also has much to do with its sale. There are people who would not think of buying one which is not to their mind artistic in design and highly finished. They usually like a machine which glistens all over with nickel-plating, and whose mechanism is for the most part concealed by the exterior. Such operators cheerfully spend five or ten minutes every day in polishing their machines, and refuse absolutely to let others use them."

A SOURCE OF FIRE RISK.

Chief Benoit, of the Montreal Fire Brigade, has written a letter to the Underwriters' Association urging upon insurance companies the necessity for paying more attention to the placing of furnaces in private dwellings and business houses. It is calculated that fifty per cent. of the fires in that city are caused by over-heated furnaces. The parties to blame are largely the landlords, who seem to care very little about heating arrangements in their houses. Many dwellings, says Mr. Benoit, are fire-traps of the worst description. Furnaces are placed under stairways, in cupboards, and in some of the most ridiculous places. Some of the so-called furnace-rooms were lathed and plastered when the house was constructed, but in ninety-nine cases out of a hundred the plaster has grown beautifully less from the wear and tear of years, leaving nothing but the laths, which were as dry as paper. Some of the holes in which furnaces are placed have wooden floors, that were probably covered with tin at one time, but this, like the plaster, has disappeared.

Under these conditions, it is surprising that the number of fires is not even larger than at present. During warm weather the danger is not so great, but at the beginning of each winter or during such weather as we are experiencing this year, the risk of conflagration is very great. Building inspectors should have greater powers for the regulation of heating arrangements.

TRADE OPPORTUNITIES.

The following were among the enquiries received at the Canadian Government Office, in London, during the week ending 15th January, 1904:

London steel and iron merchant would act as buying or selling agent for Canadian firms or corporations. Firm of Australian wine importers wish to negotiate with a first-class house for an agency for the Dominion. Makers of gas and electrical light fittings make enquiry respecting business in Canada. An enquiry comes from Antwerp for iron pyrites, in lumps, from Canada. A firm of paper exporters wish to get into touch with Canadian stationery houses with the object of introducing a specialty. The makers of a sheep-dip and other disinfectants seek to do business in Canada. Some additional agencies are sought

by a person who is shortly proceeding to Canada, with a knowledge of the textile trade.

The following enquiries were received at the Canadian section of the Imperial Institute, London, in the week ending 13th January: A Manchester timber merchant wishes to buy supplies of birch veneer lengths, 24, 30, 36, and 43 inches, by 8 inches wide and 1-30 in thickness, and invites quotations from Canadian firms. A firm manufacturing cane and wicker furniture and children's mail carts, etc., is prepared to appoint an agent in Canada. A firm manufacturing picks, shovels, spades, and other implements used in railway construction, asks to be placed in communication with Canadian importers of these lines. A firm making hosiery (cashmere, worsted and merino, and cotton stockings, and socks), is open to appoint a resident Canadian agent.

Canadian Government Office in London,
22nd January, 1904.

A Sheffield firm is seeking supplies of spade, shovel and fork handles from Canada. A gentleman knowing the hardware, paint and glass trades will undertake the representation in England of a Canadian house of good standing. A Dublin firm wants names of Canadian exporters of oaken and soft wood shives. A firm making metal shelf brackets, door handles, hinges, hat and coat hooks, etc., are seeking a market in Canada. Address wanted of a Canadian manufacturer of cement or glue used by musical instrument makers. A Glasgow firm of grain and flour merchants would represent a Canadian house. Enquiry is made for Canadian exporters of oak mouldings for picture frames. A timber firm in the Australian trade wants a list of the lumber mills in Canada, and of lumber exporters.

ELECTRIC LIGHTING IN CANADA.

The report of the Electric Lighting Act inspectors shows that at the end of last June there were in existence in the Dominion no less than 324 plants, with 14,780 arc lights, and 1,212,861 incandescent. Taking an arc light as equal to ten incandescent, there were 1,360,661 lights in use or an increase in the twelve months of 236,865, or over 21 per cent. Of the 324 electric lighting plants in use throughout the Dominion, Ontario possessed no fewer than 203. Thirty-four municipalities supplied themselves with electric lighting. The province of Quebec, in spite of its enormous waterpowers, has not adopted this system of illumination to anything like such an extent as Ontario. It had 53 plants, 3,853 arc lights, and 409,503 incandescent. During the past five years, however, it has made rapid gains. On the average, too, Quebec's plants are larger than those of Ontario. The largest plant in Canada is in Toronto, with 170,000 lamps (each arc light being taken as equivalent to ten incandescent), next to which come the Lachine Rapids Hydraulic Company, with 158,503 lights, and the Ottawa Electric Company, with 111,927. During the five years from 1898 to 1903, Manitoba increased its arc lights from 162 to 373, and its incandescent from 13,800 to 31,905. The largest comparative provincial increase has been in British Columbia, arc lights having increased to 377, or 82 per cent., and incandescent to 74,297, or 257 per cent. In 1897 the Maritime Provinces had 951 arc lights and 46,977 incandescent, while in 1903 they had 1,267 arc lights, an increase of 33 1-3 per cent., and 93,120 incandescent, an increase of 98 per cent.

BRITAIN'S COINAGE.

Editor Monetary Times:

Sir,—In your article in the issue of the 1st January on decimal currency you call attention to the need of a simpler and more modern system of coinage in the Old Country. You rightly described the present currency of the United Kingdom as a "haggis of farthings to guineas," and the description should stick.

To give your readers some idea of the enormous hourly waste in business offices, banks, etc., and also the needless educational tax upon the time and brains of children and teachers in every class of school and college I append hereto the table of coins in daily use and tabulation. Its publication will bring home the truth that the people in the United Kingdom have seriously crippled the national progress by not seeking an earlier cure for the national disease, which Lord Kelvin (in his evidence before the United States Committee on coinage, weights and measures, sitting at Washington in April, 1902), diagnosed as "residual sluggishness."

TABLE OF COINAGE.

¼d.	Farthing	Copper.	
½d.	Halfpenny,	"	Usually called "ha'penny."
1d.	Penny	"	
3d.	Threepence	Silver	Usually called "thru'pence."
6d.	Sixpence	"	
1/-	Shilling	"	
2/-	Two shillings	"	Slang term "dollar."
2/6	Two shillings and sixpence	"	Usually called "halfcrown."
4/-	Four shillings	"	Not in popular use.
5/-	Five shillings	"	The name "crown" is obsolete.
10/-	Ten shillings	Gold	Usually called "half sovereign."
20/-	Pound sterling	"	Usually called "sovereign."

In addition to the above described coins there are the value of one guinea, in the new postal orders, and the denomination of ¾d., both of which are popular "retail shopping figures" in constant use.

Yours truly, DECIMAL COINAGE.

London, England, 14th Jan., 1904.

THE CAUSES OF BUSINESS FAILURE.

The following is Bradstreet's summary of failures in the Dominion of Canada and Newfoundland, including St. Pierre and Miquelon, classified as to causes. It will be seen that, as in the past, the two great predisposing causes for failure are incompetence and lack of capital:

Failures due to	No. 1903.	No. 1902.	Assets, 1903.	Assets, 1902.	Liab., 1903.	Liab., 1902.
Incompetence	118	134	$451,051	$402,779	$990,202	$888,555
Inexperience	20	44	21,590	40,574	56,926	93,162
Lack of capital	666	733	2,111,453	2,149,188	4,808,679	5,221,202
Unwise credits	5	9	30,390	37,230	40,550	60,721
Failures of others	7	4	363,700	9,700	486,300	19,000
Extravagance	3	7	8,000	94,589	23,500	281,050
Neglect	26	34	41,257	111,350	99,409	434,540
Competition	1	15	15,000	10,469	18,300	26,782
Specific conditions	41	48	203,560	130,773	460,055	328,775
Speculation	9	7	483,600	402,700	1,012,800	505,764
Fraud	62	60	130,977	213,200	399,290	686,724
Totals	958	1,095	$3,870,605	$3,602,542	$8,372,011	$8,546,365

CANADIAN CIVIL ENGINEERS.

The Canadian Society of Civil Engineers, to whose annual meeting, last week in Montreal, we briefly referred in last issue, elected the following officers: President, Col. W. P. Anderson; vice-presidents, C. E. W. Dodwell, C. H. Keefer, E. Marceau; treasurer, H. Irwin; secretary, C. A. McLeod; librarian, E. G. M. Cape; council, G. H. Duggan, John Kennedy, W. McLea Walbank, M. J. Butler, H. J. Cambie, Phelps Johnson, P. W. St. George, D. Macpherson, W. R. Butler, R. B. Rogers, C. B. Smith, W. B. Mackenzie, R. B. Owens, E. H. McHenry, St. G. J. Boswell.

Mr. K. W. Blackwell, the late president, in his valedictory address, dwelt largely on the transportation problems of the country. One very interesting remark he quoted from James J. Hill, as follows: "Regarding land transportation in Great Britain, it costs $2.35 on an average to haul a ton of freight 100 miles;

on the continent of Europe it costs $1.90, and in the United States 70 cents. We pay four times the wages they pay, and yet we furnish the transportation for little more than one-third of the average of Europe, and still," as he added, "we are hardly happy." Mr. Blackwell then quoted figures to show the difference in rates between the all-rail, the lake and rail, inland water, and the ocean rates. These proved beyond question that in point of cheapness the ocean rates stood first, the inland water second, and the lake and rail third, while the all-rail route, for equal distances, cost more than twice as much as the inland water rate. While, however, it is generally conceded that ocean freight rates have reached a level when they are more or less unprofitable, and are practically at rock bottom, railway men, on the other hand, appear to be keenly alive to the possibility of further economies. One of the most important and most fully discussed questions before the latter at the present day was the improvement in the grading and curvature of their roads, by means of which sometimes wonderful reductions can be and are made in the cost of hauling freight.

ANSWERS TO ENQUIRERS.

D. M., Woodstock.—You live in a community sufficiently Scotch to have taught you the meaning of the phrase "a stoot heart tae a stey brae." The circumstances are hard, but not insurmountable. You are not blameworthy, so far as we can see. Keep up your heart; take the first job that offers, and by this time next year you will have made yourself independent of that concern.

Banker, Moncton, N.B.—By the last census, there were 645,517 persons in the Western Provinces and Territories of Canada. Namely, in Manitoba, 255,211; in British Columbia, 178,657; in the Territories, 211,649.

FINANCIAL ITEMS.

We learn that premises on King Street in Toronto have been secured for the head offices of the Crown Bank of Canada. The work of reconstructing them is to go on at once. It is a fair proof of the confidence entertained by the projectors of this bank in its future success that so pronounced a step as the securing of head office business has been thus early taken.

According to the Chronicle, expert cracksmen in and about New York are rapidly discarding the use of dynamite and other high explosives in safe-breaking, and instead are resorting to the less dangerous though equally effective plan of turning a safe upside down and drilling through the bottom—the most vulnerable part. This method has been successfully employed in a number of recent robberies, and the probabilities are that it will soon entirely displace the use of explosives.

INSURANCE MATTERS.

The Christmas number of the Insurance Chronicle of Montreal is an interesting publication. Besides a good many pages of reading matter pertaining to insurance and financial subjects it contains portraits and brief biographies of fifty or sixty of the best-known underwriters in Canada and of several bankers. The portraits are all good and the printing excellent.

The oldest living policyholder of the Mutual Life of New York, William E. Shephard, of Englewood, N.J., died last week. Mr. Shephard, who was ninety-three years old, was insured under Policy No. 11 in 1843, the year in which that company was organized, and he has seen its growth to one of the greatest corporations known, with assets approaching $400,000,000.

It was shown at the annual meeting of the Montreal Firemen's Benefit Association that the three funds of the association amount to $67,716, divided as follows: Superannuation, $37,146; widows' and orphans', $17,975; reserve, $6,595. The secretary's report said the total membership on December 31, 1903, was 221, an increase of 20 over the previous year. The total of all the funds reaches $4,605.41 over last year's figures.

Some time ago the consulting engineers of the National Board of Fire Underwrters adopted new specifications governing the construction and installation of gasoline stoves for cooking and heating. The laboratories have now issued the first list of stoves which comply with the requirements, and announce that the stove manufacturers are co-operating heartily in their efforts to increase safeguards and reduce the manifold hazards of gasoline.—United States Review.

A well-deserved promotion that will interest business circles is announced by the Canada Life in the appointment of Mr. E. H. Bisset, of Brockville, as city manager of that company here. Mr. Bisset has for many years energetically represented the company in the St. Lawrence district, and there is no doubt that he will make successful use of the larger opportunities now afforded him. His office will be in connection with the eastern Ontario branch, of which Mr. H. C. Cox is manager.

The Chicago Argus declares that if evidence were wanting to stamp a fire insurance company as a fraud and a swindle, and its managers and promoters as arrant knaves, it is to be found in the practice of a large number of concerns, claiming headquarters in Chicago, which are constantly sending out circulars and alluring literature to agents in adjoining States where these nondescript concerns have not been admitted or authorized to do business. The Argus might include Canada in the range of activity of these pernicious concerns.

While it is to a large extent true that the life insurance solicitor is born, not made, says the Investigator, it does not follow that the born solicitor has nothing to learn. On the contrary, it is certain that many good men have been lost to the profession because they were unfortunate enough to run up against an abnormally large number of difficulties at the start and became discouraged. In many cases their withdrawal from the business has also meant a loss of valuable time and money to their general agent. Hence, courses of instruction in life insurance in colleges and universities must be considered of very practical benefit, provided they are found to reach the right class of men.

The final settlement of the Tarrant building losses in New York in 1901 caused by fire and explosion, has recently been made through the receivers. The building policies were payable to mortgagees. The companies all paid total losses and took subrogation of the mortgage interests. The Tarrant receivers brought suit against all the companies for total loss, and the companies, as the mortgage holders, then brought suit to foreclose the mortgage. The Tarrant people were anxious to sell the property, and made a contract of sale with responsible parties who were anxious to purchase. The latter, however, refused to take title or complete the sale until the mortgagee interests were satisfied. This was in effect a cloud upon the title and the final settlement was delayed. It was finally completed, according to a New York paper, early in January. The companies received forty-five per cent. upon their total loss payments, and thus escaped with a fifty-five per cent. loss upon their original policies.

—A Kingston, Jamaica, newspaper of last month notes the establishment in lower King Street in that city by Mr. G. Eustace Burke, the popular and energetic commercial agent in Jamaica for the Dominion of Canada, of a showroom for Canadian products. This, says the journal in question, is another step in the direction of direct trade between the Island and Canada.

—The Department of Trade and Commerce will, we are pleased to learn, issue in future weekly reports of commercial agents and other information of a similar nature. This is an improvement upon the monthly blue book. Until a short time ago there was only one agent of the Canadian Government devoting his full time to the representation of Canadian interests abroad, namely, Mr. Larke in Australia, but the following were recently appointed: Mr. Jardine, in South Africa; Mr. Ross, in Western Australia; Mr. A. Poindron, France; Messrs. Ball, Jackson and MacNamara, in England; Mr. Edgar Tripp, in Trinidad. The new departure should render the information collected by these gentlemen of much greater value than formerly. Canada should be well represented abroad.

—As a result of the Chicago theatre fire the civic authorities of St. John, N.B., have instructed the Chief of Police, the Chief of the Fire Department and the Director of Safety in that city to make a report on the condition of the St. John play-houses, churches and other buildings where people congregate. It is expected that extensive changes will be found necessary and recommended in many buildings, including some of the largest churches. This is a step every city should take. Montreal and Toronto have already moved in it.

DRY GOODS ITEMS.

The store and stock of Graham Bros., men's furnishings, etc., London, Ont., were on the 31st ult. completely destroyed by fire. Loss about $22,000; mostly insured.

Last week took place the death of James Williams O'Hara, who was well known in Toronto and many other centres as the European buyer for Gordon, Mackay & Company. He was 57 years of age, and had been connected with the dry goods trade ever since he came to Toronto from Ireland, about thirty years ago.

The annual meeting of the Cornwall and York cotton mills, at St. John, N.B., was held last week, and the following officers elected: George West Jones, president; James F. Robertson, vice-president; J. B. Cudlip, manager; S. P. Gerow, secretary and treasurer; G. W. Jones, Thomas McAvity, W. H. Thorne, J. M. Robinson, James F. Robertson, James Manchester, directors.

According to a report, compiled by the Dry Goods Economist, it has been possible to secure price concessions for silk in the primary markets on fine as well as coarse sizes, whenever firm offers for good-sized lots were forthcoming. Even European markets have participated in this weakness, although many reelers continue to hold firmly at full prices. The bottom prices quoted by sellers have been accepted by many manufacturers as being as low as are likely to be touched this season, and they have operated quite freely for future as well as near delivery. Demand has been well distributed, but European fine sizes at concessions were in largest demand. Asiatic markets show little open price change, but the tendency in all is still in the buyer's favor. Stocks at Yokohama have been further reduced and considerable resistance is being shown to the efforts of buyers to secure further concessions.

Meetings.

BRITISH MORTGAGE LOAN COMPANY.

The annual general meeting of the shareholders of the British Mortgage Loan Company was held in the company's offices, Market Street, Stratford, on January 28, 1904, Hon. Thos. Ballantyne, president, in the chair, and Mr. W. Buckingham, the manager, acting as secretary. There were also present: Miss Crerar, Miss C. J. Fraser, ex-Mayor Stamp, Dr. J. A. Robertson, Messrs. W. Maynard (manager Canadian Bank of Commerce), John McMillan, G. G. McPherson, K.C., Andrew Johnston, R. Morton (Hamilton), H. M. Johnson, Geo. Hamilton (county treasurer), P. P. Hamilton, M. MacFarlane (Montreal), W. Lawrence (city treasurer), W. Gillard, John Parker, George Innes (Woodstock), James Trow, John McIntyre, W. Spence, D. M. Scott, F. Buckingham. For the first time since 1877 Mr. J. W. Scott, banker, Listowel, was absent, owing to the snow blockade on the railroad.

The reports and the financial statements were read as follows:

REPORT.

Once more we have experienced the satisfaction of a successful season. Since the shareholders last assembled, the assets of the company have increased from $1,335,421 to $1,381,124—a gain of $45,703. These are invested in Western Ontario, our capital being loaned on but two classes of security—mortgages of real estate and the company's own shares. The loans on shares are in the aggregate the trifling sum of $6,119, or one-half of one per cent. of the whole; the remaining $1,375,005, or 99½ per cent., is invested in real estate. But as the shares of the company, as well as its deposits, debenture money, and reserve fund, are secured precisely in the same manner, all the money is thus founded upon land, mostly on farm lands in the immediate neighborhood. The shareholders, and all else who have dealings with us, are thus environed with such absolute safety that, coupled with the exercise of good judgment and watchfulness, there has not been the loss of the smallest amount for many successive years, or a law suit, or a call upon the company to take any man's property out of his hands in order to make good a default in repayment. Close examination by our experienced valuator of the lands and buildings offered, careful selection, and constant scrutiny of the mortgage accounts, result in the capital being preserved at all times intact.

With so considerable an amount of funds to be frequently turned over, the entire avoidance of bad debts during a lengthened period can, we think, be pardonably referred to as a remarkable and highly gratifying circumstance, for it is almost solely owing to this one important fact that in the past year we were able, for the seventh time consecutively, to add to the reserve fund the sum of $10,000, without impairing the customary dividend of six per cent.

We have still to encounter, as the older loans more frequently fall in, decreases in the average rates of interest as well as keener competition for choice new business. The point we make is that any deviation from sound judgment in the selection of good loans, or constant vigilance over them, might easily result in larger losses than the yearly gains to the rest account.

If the offers of higher rates of interest on speculative securities—if laxer modes of loaning—might have brought greater gains, it will be admitted that the risks and chances, with their attendant results, have pointed directly the other way, the ruinous examples of the last few months teaching their own calamitous lesson. We have always kept away from such dangers, and, therefore, the shock that was brought by disastrous losses from rash ventures to numbers of unfortunate persons elsewhere was not felt by us in the slightest degree. It was a great test of strength and stability; but it caused no disturbance to the business of this company whatever.

Our four per cent. debentures, which show a gratifying increase in number and amount, have become an established and favorite form of security. The sinking funds of the County of Perth and the reserve funds of the Perth Mutual Fire Insurance Co. are invested in them at a fair rate of interest, and they are being widely availed of by people with large means and by the executors and trustees of estates.

Owing to other business arrangements, Mr. W. Davidson, county clerk, after many years of efficient and faithful service, retired from the auditorship, with sincere expressions of good will on both sides. The directors deemed themselves fortunate in securing for the vacant position Mr. George Hamilton, county treasurer. Mr. C. J. Macgregor, M.A., was auditor of the company in 1878, and is in office at the present time. His services are highly valued.

THOMAS BALLANTYNE,
President.

Stratford, January 28, 1904.

FINANCIAL STATEMENT OF THE BRITISH MORTGAGE LOAN COMPANY OF ONTARIO FOR THE YEAR ENDED DECEMBER 31, 1903.

CASH ACCOUNT.

RECEIPTS.

Repayments on loans, including interest	$ 267,951 56
Payments on capital stock	4,070 86

		$1,381,124 61

WM. BUCKINGHAM, Manager.

AUDITORS' REPORT.

We certify that we have carefully audited the books of the British Mortgage Loan Company of Ontario for the year 1903; that we have examined all vouchers, and find them to correspond with the entries therein; and that the foregoing statement indicates the financial position of the company on the 31st day of December, 1903.

C. J. MACGREGOR,
GEO. HAMILTON,
Auditors.

Stratford, January 12, 1904.

The president, in moving their adoption, said they were extremely satisfactory; so much so that, in spite of the low loaning rates which yet prevailed, by good and careful management we had been able once again to place the goodly sum of $10,000 to the rest. Whether that agreeable operation could be repeated in future years, with such a narrow margin of profit, we could not, of course, pretend to say; for what was now the maximum rate for money loaned was not many years ago quite below the minimum. But we had to make the best of things as they presented themselves, and continue, if we could, to square the account by the avoidance of losses. That had been their great good fortune for many past years, and he hoped it would still attend them. With the vice-president and the manager he had recently made the usual inspection of the mortgages, and had found them in splendid shape through the care exercised in the first place in taking them over, and the subsequent watchfulness of them by the manager.

The vice-president, Mr. McMillan, confirmed the correctness of this representation, remarking that he had a personal knowledge of most of the properties, and to him there was not in sight an appearance of the loss of a single dollar. Good loans were taken at low rates, and doubtful loans, whatever the inducements, were invariably rejected.

Mr. George Hamilton, as auditor, testified to the high standing of the company, and to the accuracy and excellence in all respects of the book-keeping. In conclusion, he congratulated his fellow-shareholders on having here a strong, sound, and excellently managed financial institution.

Mr. Maynard, when called upon, said he could give no better advice to those in charge than to go on in the course they had taken—avoid losses and build up the reserve.

The manager, on invitation, passed the year's operations in review, dwelling particularly on the element of safety, even if the resultant profits were small—after which the resolution was adopted unanimously.

The auditors, Messrs. C. J. Macgregor, M.A., and George Hamilton, were reappointed, and then the scrutineers, Messrs. James Trow and Wm. Maynard, reported the election, without opposition, on a single ballot, of the previous board of directors: Hon. Thomas Ballantyne, Messrs. McMillan, Scott, Parker, Innes, MacFarlane, H. M. Johnson, and Morton.

In requital of the services of the president and vice-president, the customary grants were made to them, accompanied by the cordial thanks of the shareholders, who also gave warm expression to their appreciation of the zeal and faithfulness of the manager and the assistant manager, and voted them a little bonus as well.

Subsequently the directors assembled, with Mr. Johnson in the chair, and made choice again of Hon. Thomas Ballantyne for president, and Mr. John McMillan for vice-president. The previous executive committee were also re-elected.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, February 4th, 1904, compared with those of the previous week:

Cities	Feb. 4th, 1904.	Jan. 28th, 1904.
Montreal	17,687,272	16,993,396
Toronto	13,028,986	12,328,950
Winnipeg	4,457,008	4,202,752
Halifax	1,604,105	1,321,561
Hamilton	1,070,878	866,302
St John	805,457	797,778
Vancouver	1,180,335	1,035,641

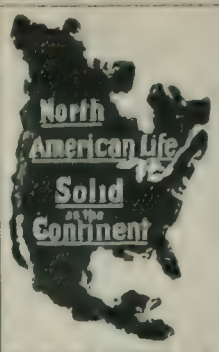
Something Really New in LIFE INSURANCE.

THE
ADJUSTED INDEMNITY POLICY
ISSUED BY
The NORTHERN LIFE
Assurance Company
has no equal.

It gives the necessary Home Protection for less money than the Regular Policies. Write for Booklet explaining it.

JOHN MILNE, Managing Director.
Head Office. - London, Ont.



Strength and Stability

Are the important elements required in effecting insurance, —guaranteeing, as they do the absolute fulfillment of the contract.

The financial position of the

NORTH AMERICAN
is unexcelled, making it a most desirable Company for Policy-holders and Agents.

Vacancies for active, energetic men to act as representatives.

North American Life
Assurance Co., Home Office, TORONTO, Ont.

J. L. BLAIKIE, - - - - - - - PRESIDENT.
L. GOLDMAN, A.I.A., F.C.A., - MAN.-DIR.

Agency Organizers Wanted.

The Royal Victoria Life Insurance Company wants January 1st, 1904, Two Agency Organizers, one for their Maritime Province Division and the other for their Northwest Division. Must have a good knowledge of the territory, with successful experience in canvassing and in selecting and developing agents. A good opportunity for energetic young men.

DAVID BURKE,
General Manager, - Montreal.

Sometimes a revision of policy forms means little. It stands for

THOROUGHNESS
in every detail in the changes that have been made by the Union Mutual—re-arrangement of features, reduction of rates, liberalizing of rights, a contract modern to the highest notch. A policy that looks well, sells easily and pleases long.

UNION MUTUAL
LIFE INSURANCE Co.
Portland, Maine.

FRED E. RICHARDS, President. ARTHUR L. BATES, Vice-President.

Agents always desired—the kind who write policies and hold them.

ADDRESS:
HENRI E. MORIN, Chief Agent for Canada, 151 St. James St., Montreal, Canada.

Smoking Tobacco

BEST

Selling Line in the trade.

SOLD BY ALL LEADING WHOLESALE HOUSES

TORONTO MARKETS.

Toronto, February 4, 1904.

Chemicals, Drugs, etc.—A fair trade is going on in the local market. Baltimore advices speak of an especially active demand for all kinds of animal fertilizers. New York reports a quiet drug and chemical trade without special features.

Dry Goods.—With an erratic though generally speaking, continued rising market for raw cotton, and the possibilities of larger increases in the price of staples every week or two, retailers are sending in frequent and fair-sized orders for what they need. Activity is the rule, therefore, in the dry goods houses, and they report satisfactory trade. This applies practically to all lines of goods.

Flour and Grain.—Flour is steady at about $3.15 for ninety per cent. patents in buyers' bags, middle or east freights. No change has taken place in millfeed or in oatmeal. In wheat the only alteration is in Ontario winter, which has gone up 1c., and is firm at the advance. Very little business is possible at country points, owing to the impassable condition of the roads.

Every Precaution

has undoubtedly been taken by you in the maintenance and safety of your Steam Plant. The fact of your taking precautionary measures is the

Knowledge of Danger

and your responsibility. . . . . Has it occurred to you, the great advantage you gain by insuring your Steam Plant in . . . . . .

The Canadian Casualty & Boiler Insurance Co.

If not, write this Company, who—if you insure your Boilers—will regularly inspect same internally and externally. Tell you how to save fuel, economize in the use of your steam and power. Give you Consulting Engineers' advice free. Insure your engineers and firemen free.

Write on your Business Stationery for Booklet to Steam Users. . . . .

Fruits and Vegetables. The continued extremely cold weather has brought about considerable dullness in the fruit trade. Oranges are somewhat easier as a consequence. Lemons are a little firmer for choice grades, but a good deal of the stuff at present in the market has been more or less frosted, and for this prices are low. We quote: Apples, 75c. to $2.50 per barrel, according to grade; cocoanuts, $4 per sack; oranges, Florida, $2.75 to $3.50 per case; Jamaica, all sizes, $2.25 to $3 per box, $3.50 per barrel; California navels, $2.75 to $3.25; Mexican, $2.25 to $2.50; Valencias, ordinary, $4, large, 420's, $5, and large, $5.50; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; celery, 50 to 75c. per dozen; cranberries, $8 to $9.50 per barrel, $1.25 per basket; Spanish onions, $2.75 to $3 per large case, and $1 for small; Malaga grapes, $6.50 to $7.50 per barrel.

Groceries.—The price of all grades of sugar have taken 5c. The movement is fair. Coffees are quite strong, and Rios are quoted at 10 to 13c. Peanuts have advanced about ½c. owing to comparatively scanty crops and the heavy demand. Canned fruits and vegetables continue quite firm, though there has been no recent upward move in prices. In teas, some little business is passing, but nothing out of the way, and prices are very firm. General trade may be described as fair considering the bad state of the roads.

Hardware.— No price changes have taken place since last report. Trade at present is a little quiet compared with last year at this period, but this may be attributed to the severe weather. There is no notable feature to report, but indications are good for a fair season's business. In the metal trade the movement continues quite fair, with no abnormal conditions to report.

Hides and Skins.—Under moderate offerings, there is a somewhat easier market to report. Receipts of sheepskins are fair and the tendency is towards full prices. Calfskins are steady. In tallow, no change has taken place.

Provisions. — The demand for butter, especially dairy rolls has improved under light receipts from the country, and prices have moved up a little. Cheese is steady under a moderately active demand. Eggs, while the receipts continue light, are slightly easier owing to the excellent prices for fresh laid. Except in the case of chickens, there is not much demand for poultry and prices are easy. Old Country reports speak of similar conditions just now. Little trade is passing in hops. For hog products there is a fair demand, but quotations are a shade easier.

Wool.—No movement is taking place in domestic fleeces, but prices keep firm. The domestic mills are taking good-sized parcels of pulled wools, and there is a steady market. At the London wool sales on the 31st. the offerings numbered 13,807 bales. Scoured and medium and fine merinos were in large supply and were quickly taken by French and Ger-

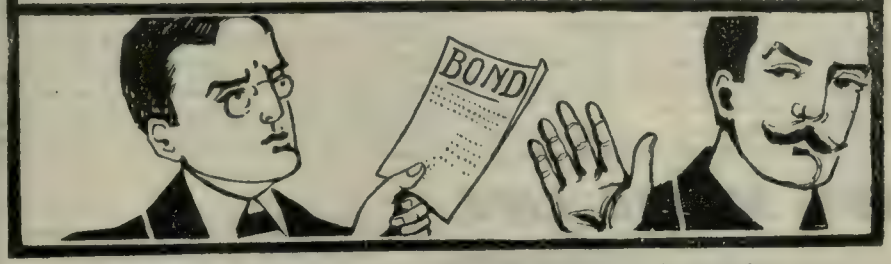
Canadian Industrial Blue Book

THE MANUFACTURERS' LIST BUYERS' GUIDE OF CANADA, 1904.

The Canadian Government Department of Trade and Commerce, as well as other Departments of the Government, buys this book, as any individual does, on its merits and value to themselves and their representatives abroad, each one being furnished with a copy for his better information of the country he represents, while large numbers go to notable public men as an eye-opener to Canada's importance and industrial standing at the present time, all of which is of the greatest moment to Canada in the years to come.

MANUFACTURERS' LIST CO., Publishers,
128 St. Peter Street, MONTREAL.

An Unreasonable Request



Excuse me! I don't go on bonds any more. If you have to furnish a bond write to THE UNITED STATES FIDELITY AND GUARANTY COMPANY. They issue all kinds of Surety Bonds and Draft-Checks for Travellers.

Kirkpatrick & Kennard, Managers for Canada, 6 Colborne St., Toronto.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name **THE GREAT-WEST LIFE**; but the above statement exactly describes the happy position of its policy-holders.

Toronto, January 27th, 1904.

man buyers. A fine selection of Victorian caused eager competition. A few lots of superior greasies were taken by Americans. Greasy, broken fleece, realized the highest prices of the series. Withdrawals were frequent, prices being against buyers. Following are the sales in detail: New South Wales, 3,200 bales; scoured, 1s a 1s 11d; greasy, 7d a 1s. Queensland, 700 bales; scoured, 1s 4½d a 1s 9¼d; greasy, 7¼d a 10½d. Victoria, 3,000 bales; scoured, 7½ a 2s 1½d; greasy, 7d a 1s 3d. South Australia, 800 bales; greasy, 5d a 11d. West Australia, 1,900 bales; greasy, 5¾d a 11½d. New Zealand, 3,200 bales; greasy, 6½d a 11d. Cape of Good Hope and Natal, 700 bales; scoured, 1s 5d a 1s 7½d; greasy, 7¾d a 9½d.

BANKING AND THE LIBERAL ARTS.

H. F. Gadsby's latest sketch in the Toronto Daily Star of Saturday, under the heading of "In the Gallery of Notables," describes in that writer's fantastical way Mr. B. E. Walker as the Doge of Bankers, and compares him with the Medici. And recounting Mr. Walker's many activities, speaks of his efforts to transplant early Italian art to this climate. The sketch is very clever, but we wonder why H. F. G. left out of it any reference to the acquirements as a geologist of the man whose many accomplishments he is so pleasantly caricaturing. In one sentence the characterization says, referring to the Canadian Institute, of which Mr. Walker was vice-president: "It (the Institute) exists

Forging Ahead . . .

In Tendering to its Policyholders and Well Wishers

THE SEASON'S HEARTY GREETINGS

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

is pleased to announce that it has written during the past year

Over Five Millions

of good Canadian Business; and that in all other respects the Company has had a most successful year.

to keep the Encyclopedia Britannica from straying into error." Our banking readers will probably thank us for a few quotations from this ingenious extravaganza. Its freedom is delightful. Dilating upon architecture—true art versus Philistinism—and the need of a sort of arbiter elegantiarum for Canada, Gadsby dares to say:

"Bank managers behave like mitred archbishops toward the public. With a little stretch of imagination, their frock coats become palliums, their handsome offices cathedrals, and the checks and money we pass through the brass wickets take the place of votive offerings of candles, altar pieces, and orphreyed vestments. In the Middle Ages it was the Church that raised these skiey monuments and lifted men's thoughts to the stars; to-day and in Canada, it is the bank. You doubt it? Well, go down to Front Street and take a look at that Doric fane in which the Bank of Montreal houses itself, as simply beautiful as anything in Athens in the days of Pericles; or walk along King Street until you come to the Corinthian facade of the new Bank of Nova Scotia. And if the head offices are cathedrals, the branches must be little gem-like chapels, if they are conceived in the same exquisite spirit. . . .

Objecting to some ornamentation at the entrance to the Bank of Commerce, again:

"Carrying out Ruskin's idea that the human body is the highest form of ornament, we should have suggested a frieze something like the Elgin marbles, the figures in high relief, and the details nicely subordinated, portraying the seven stages of a banker from junior to general manager. First, the junior, with his shining morning face punctuated with a cigarette, on his daily round of collections; next the discount clerk, off duty trousers turned up, briar pipe, followed by a terrier pup so thoroughbred that he's almost an idiot; then the teller, peering through his cage, but something in his face to indicate that he is a dancing man and a favorite with the ladies; then the accountant, trying out his balance; then the branch manager, with bland manners and an easy corpulence, a golf stick in the background to hint at gentlemanly pastimes; then the inspector, keen of scent, on the trail of certain desperate sports who play poker for a cent ante; last of all, the general manager, haughty and enthroned, corporation magnates and finance ministers grovelling in the dust before him and tendering all sorts of collateral security. This would be good art and true to nature."

UNITED STATES EXPORTS.

According to a despatch from Washington, dated last week, the United States again stands, at the close of the calendar year 1903, at the head of the list of world's exporting nations so far as relates to the exportation of domestic products. This fact is shown by a series of tables presented by the Bureau of Statistics.

There are only three "billion-dollar countries" considered from the standpoint of exportation of domestic products, and they are, in the order of the magnitude of their exports, the United States, the United Kingdom, and Germany. In 1903 the exports of domestic products were: From the United States, $1,457,565,783 in value and from the United Kingdom, $1,415,617,552. From Germany the figures for the full year have not been received, but an examination of the figures of the year for which statistics are available justifies an estimate of $1,200,000,000, for last year.

THE assignment is reported of Mrs. Margaret McDonald, widow of the late D. A. McDonald, of Port Hawkesbury, who died a year ago, and whose moderate general store business she continued. Liabilities are stated at about $2,000, with nominal assets of $2,500.——J. L. Cleveland, of Morden, is reported embarrassed, and at a meeting of his creditors held in St. John, N.B., liabilities were shown at $2,400, with assets of $1,900. An offer of 60 cents on the dollar would be accepted by most creditors, otherwise an assignment will have to be made. Cleveland has carried on a small general business for a year or so, attended mostly by his family, while he sells nursery stock, canvasses for insurance, etc., a sort of ideal out-door life.

—The sixty-third annual general meeting of the Quebec Board of Trade was held last month. Mr. Wm. Fry was re-elected president, and Mr. P. J. Basein first vice-president. Mr. William Power, M.P., was elected second vice-president, and Mr. D. J. Rattray was re-elected treasurer.

Merchants Fire INSURANCE CO.

CAPITAL AND ASSETS OVER HALF A MILLION

HEAD OFFICE TORONTO.

Agents Wanted in All Unrepresented Districts.

SEVEN TO ONE

That is about the ratio. About seven times as many persons are injured as die from all causes yearly.

Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidently killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

Protection from Loss.

The business of boiler insurance is an engineering business; the insurance is only a guarantee of the trustworthiness of the engineering services.

Measure the value of those services and then consider the guarantee. In doing this remember that EXPERIENCE, SKILL, and ABILITY are the determining qualifications of the value of those services.

Insure your boilers in

THE BOILER INSPECTION & INSURANCE CO. OF CANADA,
Canada Life Bldg., Toronto,

which has been in this business for nearly THIRTY YEARS.

WILLIAM F. BULLEN,
Manager.

London Ontario, 1903.

Though the exceptional strength of the CANADA PERMANENT MORTGAGE CORPORATION, Toronto Street, Toronto, with a paid-up capital only equalled by three of the largest of Canada's strong financial institutions, makes it a favourite with depositors of large sums, a deposit account may be opened with one dollar.

That dollar, and every dollar added thereto, will bear interest at three and one-half per cent. per annum, compounded half-yearly.

The depositor of a dollar receives the same considerate, prompt attention as the depositor of thousands.

It is not necessary to reside in Toronto to be a depositor with this Corporation.

No matter where you may live, you will find it quite convenient to have your account with it. Send your address for Booklet, "SAVING MONEY BY MAIL."

IF you invest your money in the Debentures of the Standard Loan Company you will not only be saving your money, but you will be placing it where it will earn more money. . . . . .

Money begets money only when it is judiciously invested—not if it is tied up in your wallet or hidden away in an old sock. . . . .

Do not let your money lie idle any longer, have it invested and earning something for you. . . . . .

If you wish to investigate we can give you the best of references. . Write to-day.

Mercantile Summary

Arrangements are being made at the Kootenay mine, Rossland, B.C., for the installation of reduction works, and developing work is at a standstill there pending these.

The customs returns at Vancouver, B.C., for the month of January amounted to $94,613, as compared with $77,430 for the same month of last year, though the latter included $10,000 for Chinese immigration fees.

In our issue of the 5th inst. it was stated that "Jacob Rothschild, of Sault Ste. Marie, has now assigned to John McD. Hains, of Montreal." We should have said that he has assigned to John McD. Hains, Jr., of Ottawa.

The "Journal of Commerce" building in Montreal was on Friday last destroyed by fire, together with its contents. The escape of the "Star" building and that occupied by S. Hyman, tobacconist, is attributed to the presence of a thick dividing wall.

The Toronto Electric Light Company have given a contract to the Canadian General Electric Co., Peterborough, for the supply of two Curtis steam turbine generators of a capacity of 2,500 horse-power each. This will be, we understand, the first manufacture in Canada of Curtis turbines.

The Jesse Ketchum public school, Toronto, was partially gutted by fire on Monday last at a loss of about $32,000, with an insurance of only $9,825. As in the case a few weeks ago, the pupils, of whom there were over 800 in the building, all escaped without the slightest injury, a consummation attributed largely to the excellent system of fire drill, which trains the children to make their exit in an orderly manner.

The vest pocket reference annual compiled by Mr. H. J. P. Good is published this year by the Copland Brewing Company, of which Robert W. Davies is president and J. E. Davies managing director. Its records of winners for many years past on the turf, on the water, on the ice, on the diamond, the cricket crease, the lacrosse field, the bowling green are all in convenient compass. Then there are provincial game laws, close seasons, etc. It is a very convenient little book.

The shipments of ore from the Rossland, B.C., mining district for the week ending Saturday last were as follows: Le Roi, 4,860 tons; Centre Star, 1,200 tons; War Eagle, 1,080 tons; Kootenay 100 tons; Jumbo, 150 tons; Le Roi No. 2, 580 tons; ditto (Elmore process mill), 340 tons; total for week, 8,310 tons; for the year up to date, 48,738 tons. There have been some remarkable developments in the 200-foot level of the Spitze mine, it being reported that the drift at that depth is now in eight feet of $20 ore. At this mine there are ample facilities for the treatment of ore, including low-grade, so that its development is likely to place it in the front rank.

Mercantile Summary.

J. A. RENAUD has only been about five years in the general store business at St. Ephrem de Tring, Que., but he has now failed for the second time. In February, 1901, he is reported as having compromised at 50 cents. This time he owes $6,350, and shows assets about equal.

THE general contracting and lumber business of Simon Peters, of Quebec, is one of the oldest established of its kind. Mr. Peters died in 1888, but the business has been carried on since by the widow, under the management of a son. Business matters, however, have not been going well of late, and an assignment has now been made. It is estimated that the liabilities will reach somewhere about $70,000.—A Montreal trader, Gabriel Lachance, is making an offer to his creditors of 25 cents on the dollar.

THE assignment is reported of G. W. Robbins, who has long been engaged in the tanning business at Yarmouth, N.S., but with generally poor results, and he has been reported as more or less hard up all along. His real estate is said to be mortgaged to its full value, and his business liabilities are estimated at about $10,000, with available assets not exceeding $1,500.—A. B. Atkinson, doing a small general business at Minudie, in the same Province, is also insolvent. He was formerly a farmer, and became a "merchant" some five years ago. Let us hope he will go back to the farm

THE People's Light and Power Company, Limited, Fredericton, N.B., have obtained the necessary authority from the council to erect poles and put up wire in the city. They are now making preparations, therefore, to instal a plant for generating and supplying electric light. The company agrees to furnish electric light for city buildings free of charge for ten years. Heretofore Fredericton has been dependent both for gas and for electric lighting on the Fredericton Gas Light Company, which, it is stated, charged $3 per thousand for gas.

FROM Three Rivers, Que., we hear of three late failures. Gariepy & Panneton, dealers in dry goods, have assigned to the court, owing, it is said, from $12,000 to $15,000. They began business in 1893, and in 1901 were reported as arranging a compromise at 65 cents on liabilities of $17,250.—J. P. Godin & Co., also in the dry goods line, have been served with a demand of assignment by Kyle & Cheesbrough, of Montreal. Godin, who has been in business since 1863, has had a rather unfortunate record. He is reported to have first failed in the early eighties; in 1891 he effected a compromise at 70 cents, and again became involved in 1896. Getting no settlement on that occasion, he has since done business under cover of his wife's name. And yet wholesale dealers have gone on selling him goods on credit! His present liabilities are not yet ascertained.—J. D. Hamel, grocer, in trade since the spring of 1901, makes a proposition that his creditors accept 20 cents. cash, on their claims, amounting to about $4,000.

Mercantile Summary.

THE Fredericton and Woodstock Steamboat Company held its annual meeting at Fredericton, N.B., last week, and re-elected the old board of officers, with Mr. Jas. S. Neill as president.

IT has now been definitely decided to convert the Ottawa and New York Railway, which runs from Ottawa to Tupper Lake, N.Y., into an electric system, though the cars and general equipment will remain as at present. Power will be obtained at Ottawa, Cornwall and Massena Springs, N.Y. It is hoped to effect the necessary alterations this year.

A WINDING-UP order has been applied for in the matter of the Kinetic Heat Co., Limited, of Montreal. The company, which had a patent contrivance, which it was claimed would greatly increase the heating capacity of furnaces, etc., by the introduction of a tiny spray of water in the burning coal, was incorporated in June, 1902, with an authorized capital of $50,000. Apparently the little machine could not be worked into the public confidence.

WE hear that A. S. Beaune, who has carried on a little grocery business in Huntingdon for thirteen years, is reported insolvent.——An assignment has also been made by C. Breault, who has only been a short time a general dealer at La Macaza, in the lately opened-up district of Labelle, North of St. Jerome, Que. A judgment recently recorded against him in favor of a Montreal grocery house, for some $300, evidently brought Breault's affairs to a climax.

D. RANCOURT, who is in the dry goods line at St. Johns, Que., is offering his creditors 60 cents on the dollar. He is reported to have been before unsuccessful five years ago.—M. Desilets, dealing in groceries, feed, etc., at Grande Mere, Que., whose failure we noted several weeks ago, is trying to arrange a settlement, offering 65 cents on liabilities of $13,500, in instalments at one, three and six months.—J. B. Bornais, saw and planing mill proprietor at St. Raymond, Que., makes a proposition to pay his creditors 20 per cent. of their claims, amounting to $6,200.

On the first day of this month the Newmarket, Ont., factory of United Factories, Limited, which is the largest exclusive woodenware establishment in the Dominion, resumed operations at full capacity. From the very day of the explosion, which partially wrecked the building, the company has been straining every nerve to place the factory in running order again at the earliest possible moment, and they have seized the opportunity to make considerable increases to the plant. The four old boilers of a combined capacity of 400 horsepower have been replaced with Babcock & Wilcox water-tube boilers of latest pattern, and with a capacity of 750 horsepower, while the old chimney has been replaced by a new one 100 feet high, and with an outlet capacity greater by 300 per cent.

Mercantile Summary.

A LONDON dispatch refers to the resignation of Mr. Joseph Price, vice-president of the Grand Trunk Railway, through ill-health. It is stated, however, that he will retain his position as a director.

A FIRE in Winnipeg did damage to the extent of $15,000 to the premises of Richardson & Bishop on the 7th inst. On the same day there was a blaze in Quebec, in which J. G. Routhier experienced a loss of $20,000, partially insured.

THE business formerly carried on by the late J. F. Ruttan at Port Arthur, Ont., as real estate, loan, insurance and investors' agent, will be continued in all branches by his brother, Mr. R. A. Ruttan.

MESSRS. Wallace and Little, of Woodstock, are interested in a plan for building an electric railway from Brantford to Hamilton, passing through the township of East Brantford and the village of Ancaster, and to distribute electrical power to the municipalities traversed by the line.

THE Canadian Horse Breeders' Association has decided to unite with the Union Stock Yards Company in erecting an arena for exhibition purposes at Toronto Junction, the cost not to exceed $60,000, half of which would be subscribed by the above two bodies and the remainder by various live stock associations.

THE Berlin, Waterloo, Wellesley and Lake Huron Railway Company will apply to the Dominion Parliament for power to build a line from Wellesley, by way of Stratford and St. Mary's, to Clinton, thene south-westerly to Bayfield. They also wish for authority to acquire steam or electric railways, and to own hotels, sanitariums, etc.

THE T. Eaton Company, Limited, Toronto, are having plans prepared for a considerable enlargement and improvement of their mammoth store. We understand that two stories are to be constructed under the street level, while the foundations are to be made sufficiently strong to bear ten stories above ground if necessary.

THE C.P.R. has placed another order for passenger rolling stock to be built in its Montreal shops, which is said to be one of the largest single orders ever placed by a railway in Canada or the United States. It comprises five luxurious diners, fifteen standard sleepers, and twenty-five tourist sleepers, and delivery of all the cars is to be made in May and June.

Two demands of assignment having been made upon Bruno Charbonneau, dry goods retailer in Montreal, he has put his estate in an assignee's hands, and is said to owe $35,000, a considerable proportion of this amount being in connection with the recent purchase and rebuilding of his present premises, which was regarded as an unwise move. He was unsuccessful before in 1900, when he compromised at 60 cents.

Mercantile Summary.

G. D. BURKE & COMPANY'S boot and shoe store and Wm. Burke's dry goods store in Winnipeg were burned out last week at a loss of $15,000, with $5,000 additional damage to the building. Insurance about half.

A CLOTHING concern at Prescott, Ont. (Mundell & Co.), is reported in embarrassed shape, and Mr. Richard Lee, of Toronto, has been named liquidator. The business is an old-established one, but the founder died some years ago, and the business has since been continued in the interest of the widow, with poor results.

HON. J. M. GIBSON is presenting to the Ontario Legislature a scheme for a railway from Hamilton to London, St. Thomas and other West Ontario points. The name of the proposed company, in which Canadian and some American capital is interested, is to be the Hamilton, London and Lake Erie Railway Co., to operate by electricity, compressed air or other force. They would start by building lines from Aylmer to St. Thomas, Port Stanley to St. Thomas, St. Thomas to London, London westerly to Glencoe, passing through Delaware and Strathroy, and from London easterly to Hamilton, passing through Ingersoll, Woodstock, Brantford, Paris, St. George and Harrisburg.

ONE of the pretty spots of Ontario is Detroit river near its mouth. And for fifty years the residents of Detroit have been in the habit of making a summer resort of the Canadian shore of that river, or the islands that cluster at its debouchure into Lake Erie. They used to go mainly by boat, but now the Sandwich, Windsor and Amherstburg electric railway carries them at any time of the year. That road earned gross, last year, we are told, $89,160, and its surplus income was over $37,000. The road runs to Walkerville, too. It is going to extend and improve its plant, and for that purpose will issue bonds, which are to be guaranteed by the Detroit United Railway Co. The earning power is already good and we should think will grow steadily better.

ON the 5th inst. a disastrous fire took place in Buckingham, Que. It started in the Cosgrove block, and soon destroyed the Commercial Hotel. From there it spread rapidly, and caused a loss of something like $100,000, divided principally among the following: Pearson block, loss $15,000, insurance $6,000; McCallum & LaHaie, general store, loss $30,000, insurance $15,000; I.O.F. Hall, loss $10,000, insurance $500; Cosgrove's block, loss $10,000, insurance $4,000; Brule's Hotel, loss $7,500, insurance $2,400; Dr. Roderigue's drug store, loss $1,000, fully insured; John Cosgrove's general store, loss $8,000, no insurance; Lapierre's block, loss $6,000, no insurance; F. A. Thomson, general store, loss $8,000, insurance $4,000; Cameron's block, adjoining Lapierre's, loss $1,500, no insurance; Bernadin's block, loss $4,000, insurance $2,000; Senecal's Hotel, loss $2,000, insurance $1,220; Jos. Bernadin,

Neepawa, Feb. 6, 1904. Sec'y-Treas.

Sr., loss $1,500; Miss Bernadin, boots and shoes and fancy goods store, loss $1,200, insurance $500; F. J. Wilson's stone residence, loss $10,000, well insured; Campbell's Hotel, loss $5,000, insurance said to have expired February 1st; F. Bonsall, agricultural implements, loss $5,000, insurance $1,000; M. Gauthier, residence, loss $5,000, insurance $2,500. In a fire which took place on the same day in a dwelling house on Cadieux Street, in Montreal, four persons were killed and three others seriously injured.

A NOVEL DOCTRINE ABOUT OATMEAL.

It is well that Sydney Smith, or the other clever founders of the Edinburgh Review, who "cultivated literature on a little oatmeal" in their young manhood, are no longer in the flesh. Else would their scorn fall upon the alleged Scotch doctor in London who has been telling the Daily Mail what a dreadful scourge oatmeal is. He admits it to be good food for those who do hard manual bodily labor, but declares it an overrated article of diet, and "little short of poison to people who work with their brains and are subject to digestive disturbances." Dear, dear! Are there no other kinds of food that do not agree with the stomachs of literary dyspeptics? And are healthy people to discard a simple and nourishing food because London writers cannot use it? What does he say about potatoes, and how in the world do so many Irish people manage to subsist, and even to thrive mightily on them alone? It is absurd to generalize on such a matter. There are people who cannot eat apples without suffering indigestion. Would he, therefore, taboo the apple to those who love and enjoy it? Some folks have a horror of pork and beans, which makes them ill; but it would be difficult to persuade a Boston schoolboy or a French Canadian lumberman that there is anything wrong with them as a food. This alleged Scotch doctor further avers that "appendicitis is caused by oatmeal, and avenoliths, or oat-stones, are often found after operation." This must be the hundred and first article, the eating of which has been blamed for this modern and fashionable disease; and we no more believe the accusation against oatmeal than we would a like one against grapes, if he should tell us that uvaliths would form in one's appendix from swallowing them.

This North British bred doctor may have some reason, based upon the finical peculiarities of his la-de-da Cockney patients, for recommending them to go back upon his accustomed "porridge, Scotia's darling food." But when he declares that "it causes a dry mouth," and "is responsible for much drunkenness," and tenthly and finally that it "has transformed many hundreds of healthy persons into martyrs to indigestion," we take the liberty of saying he talks through his professional hat. Anyhow, there have been plenty of persons, and doctors among them, to answer him, and to stand up for the oatmeal diet, "parritch, Scotland's halesome fare." Here are some quotations from various letters sent to the Daily Mail upon the appearance of this professional man's letter:

"Your doctor says it causes indigestion," writes one man. "A friend of mine, whose digestive organs were out of order, paid a guinea to a specialist, who prescribed its use. A plateful of oatmeal taken every morning soon cured him." "How ridiculous it is to say that the chances of suffering from appendicitis are increased by its use," says another. "There is less appendicitis in Scotland than anywhere." A well-known army surgeon asks: "What Englishman nourished on his beef and beer—the real curse of the nation—can endure the fatigue and exertion of a Scotch gillie fed on oatmeal, milk and a drop of whiskey? Even for Scotsmen who live in towns and work with their brains, oatmeal, if eaten judiciously, is far more wholesome, nourishing, and digestible than an ordinary town diet of meat and potatoes." The following are a few quotations from letters received: "Oatmeal is veritably a king among foods." "I have cured men of indigestion with exercise and a diet of oatmeal, wheatmeal, and mutton." "Does a Highlander know what indigestion is No; he eats oatmeal," "Oatmeal has made Scotland foremost among the countries of the world as the land possessing the greatest proportion of clever people,' says Scott.'" After all we cannot think this Scotch doctor in London is in earnest when he speaks as he does about oatmeal. Either he is joking or he is no Scotchman at all when he would wind up with such a sentence as this: "Dr. Johnson, you remember, said that oatmeal was a food only fitted for Scotchmen and donkeys. I entirely agree with him. The Englishmen who attempt to digest it are the donkeys mentioned by Dr. Johnson."

pressed his belief in the future prosperity of that region. Routine business was transacted and the election of officers for the ensuing year was proceeded with. G. O. Buchanan was unanimously elected president and J. W. Cockle vice-president. The following gentlemen compose the council for 1904: Messrs. Giegerich, W. E. Zwicky, A. T. Garland, George H. Winter, A. W. Goodenough, Robert Irving, John L. Retallack, R. F. Green, G. Whitside, George E. Martin, C. W. Webster and C. F. Caldwell.

PRINTERS' MISTAKES.

"The printer who makes the most errors is the one called the 'blacksmith,' or 'machine' printer," a publisher said. "This fellow has too much self-confidence. If he can't make out the word 'cosmic' he puts 'comic' instead, and lets it go at that. He will set up 'plant' for 'planet,' 'bottle' for 'battle,' 'scared soldier' for 'scarred soldier,' and so on. It was a machine printer who made 'No cross, no crown,' read 'No cows, no cream.'"

A number of famous misprints were then quoted. Among them was the phrase from Proctor's "Spectroscopic Analysis," which should have read: "Lines, bands and stria in the violet part of spectra," but which did read: "Links, bonds and stripes for violet kinds of spectres." Another was the tract title which should have been "Drunkenness is Folly," but which was "Drunkenness is Jolly." A third was the newspaper paragraph (it appeared at the height of a a quarrel between England and the Emerald Isle), which said that Sir Robert Peel and a few guests were shooting peasants in Ireland. Finally there was quoted a good specimen of the nonsense which misplaced commas create. The specimen was this:

"He entered on his head, his helmet on his feet, his sandals on his brow, a cloud in his right hand, his sword in his eye, an angry glare. He sat down."

WILL MANUFACTURE PAPER.

The Belgo Pulp and Paper Company (formerly the Belgo-Canadian Pulp Company), of Shawinigan Falls, P.Q., expects to begin to make paper on February 15th. Its manager is said to have contracted to ship paper from Shawinigan Falls to London (England) via West St. John during the winter months, and via Montreal during the season of navigation. Other shipments are talked of to the United Kingdom, South Africa and Australia.

—Chocolate brown, royal purple, deep gray, canary—such are the prevailing colors in the calendar just issued by the Millers' & Manufacturers' Insurance Company. A good Canadian and even Imperial idea runs through the design, which blends the maple leaf with the oak, and groups Macdonald, Chamberlain and Strathcona above Sir John's motto: "A British subject I was born; a British subject I will die." At the back of the monthly sheets appears a song by Alexander Muir, entitled, "The Land of the Maple Tree," from the chorus of which, Muir tells us, Sir John derived the stirring phrase. This striking calendar cannot fail to be extensively popular among business men.

ACCORDING to a Winnipeg despatch of Monday last, eighteen cars of raw silk and silk goods passed through the city for Weehawken, N.J., mills Saturday being the most valuable cargo ever shipped across the continent by the C.P.R.

A PROMINENT lumberman in New Brunswick estimates that this season's total cut on the Upper St. John will be about the same as last year's, 125,000,000 feet. This with 35,000,000 feet hung up last year, will give 160,000,000 to be driven down the river.

A DISASTROUS collision took place on the 9th inst., between an eastbound and a west bound "Soo" train, on the Canadian Pacific Railway, half way between Renfrew and Arnprior. Fourteen people were killed and twenty seriously injured, all of them railroad employees.

THERE is a growing scarcity of white newspaper in Ontario, due mainly to the difficulties of transportation. Many car loads of wood pulp and other material are lying in various sidings throughout the country, which it is impossible, under present conditions, to get to the mills. These are working up all available material so much as possible, but, unless the weather makes a quick change, they will be seriously handicapped. Their operations are also interfered with, especially in Quebec province, where they depend largely upon the water-power, by the low water.

FOR some days commercial matters have been overshadowed, says a letter of Monday, by the appalling wreck of thte C.P.R. express train at Milford, near Halifax. The entire train while going at a speed of fifty miles an hour broke loose from the engine and plunged down a twenty-eight foot embankment. Four passengers escaped unhurt, forty of the passengers and train crew were injured, and two were killed. The latter were Mrs. John Glassey, wife of John Glassey, of the wholesale wine and spirit house of Kelly and Glassey, of Halifax; and Conductor Rupert G. Duncan, who had seen 47 years of active railroading. General regret is expressed for the loss of the genial "Bob," who was the best known and most popular conductor in the Government service on the Intercolonial, and a prime favorite with the travelling public. "So far as the destruction of rolling stock is concerned, this was the worst wreck in the history of railroading in this province, and that more fatalities did not result is a marvel to all who viewed the scene of the disaster and the destruction wrought."

DRY GOODS AND THE WEATHER.

Not a little interference with general trade, from which the dry goods branch has been far from exempt, has been caused by the extraordinary and long-continued severity of the winter, and the consequent partial paralysis of traffic. Not only have the railroads been blocked with snow, preventing the arrival of trains, but commercial travellers have been unable to get from place to place to take orders, and the state of the high-roads in the country also has prevented farmers from marketing their produce. Retail and wholesale dealers have both been affected adversely by these conditions. However, they are not discouraged by any means, for they see the slowness of trade is due to fictitious causes which in the ordinary course of nature must pass away before long. Even as it is, the volume of trade which has been transacted is not to be despised by any means; it has been better than might have been expected under the circumstances. For one thing, retailers have felt anxious to send in orders as soon as possible for staple goods, realizing that prices might any day advance still further.

The situation in raw cotton continues to be a source of anxiety to the domestic mills, as indeed to those in all parts of the world. There have been the most extraordinary fluctuations of late, and though for the present the value has dropped considerably, yet there can be no certainty as to when it will make a renewed rapid rise. Last week it touched 17c., the highest price known in thirty years, and a safe opinion, as to whether this is to be the maximum, or whether it will go still further in an upward direction is impossible to form. No further changes have occurred since our last report, but values continue very firm, and some of the mills have again notified the trade that orders will only be received subject to their confirmation by factory at time of receipt. Indeed, it may be said that the attitude of the manufacturers is more strongly taken than at any previous time since the rising markets began. Stocks of manufactured cottons held by wholesalers are limited, so that each further change on the part of the mills must be rapidly followed by a similar one by the former, who, from the circumstances in the case, are buying mostly from hand to mouth.

Spring trade has been hampered for the above-named reasons, but there is every indication in favor of the season proving a good one. There is plenty of money in circulation, and from experience in the last two or three years it may be calculated that consumers will be ready to spend it on wearing apparel and other dry goods of good quality. The spring millinery openings are likely to begin on the last day of February. Payments thus far this month have hardly been up to a full average but this might have been expected under the weather conditions prevailing.

FOODSTUFF PRICES AND THE WAR.

For some time past, in fact ever since the trouble between Russia and Japan took a really serious aspect, there have been rumors of coming high prices for Canadian food products. A week or ten days ago, this feeling had already brought about an increase in the price of Ontario wheat of something like 4c. per bushel; since then it has made another, almost sensational, rise of 4c. to 5c. per bushel. Manitoba wheat has also gone up between 2c. and 3c. Barley and oats have gone up during the week about a cent each, while the other grains remain, though quite firm, practically unaltered. Ontario farmers have been holding back their wheat to an extraordinary extent this season, in the belief, no doubt, that a war in the East would tend to enhance prices, and this has in some measure already resulted. At the same time, the blocked condition of the country roads should be borne in mind, as this has in some cases forced farmers who would otherwise probably have marketed their produce, to stay at home. So soon as the roads improve, whatever may be the outcome in the East, it is by no means unlikely that a considerable quantity of grain will be forthcoming, and this may bring values down a little. It is very possible, however, that Ontario farmers may reap benefit from their postpone-

ment of shipments, though, on the other hand, they are running risks. In the case of Manitoba province, the farmers have already sold the larger portion of their product, so that any enhancement of value will be placed to the credit of the speculators.

At present there is a good deal of divergence in the views of holders and export buyers, for the state of the British market does not warrant such high prices as prevail in Canada. It is stated in a recent report, however, that offerings of wheat from Odessa have entirely ceased, but too much attention should not be paid to this fact. The present demand in Ontario comes from the home millers, who have barely enough in hand to go on with. That we shall see the time this year, when wheat will reach one dollar, that is, for the grower, seems to us very doubtful, but in the present complicated state of things in the trade, taken in connection with the Far East, it would be folly to foretell too surely. And it is interesting to note the opinion reported to have been expressed the other day by Mr. F. W. Thompson, vice-president of the Ogilvie Milling Company, to the effect that No. 2 northern wheat would be selling at Fort William for a dollar before the 1st of April.

CANADIAN FURNITURE.

It has long seemed to us, and we have repeatedly expressed the belief, that Canada ought to make a name for herself the world over for excellent household furniture. We possess beautiful woods; we have skilled workmen; and we have also, but perhaps in lesser degree, enterprise in making known our wares of this kind to other countries. It is now some years since a visitor to Canada, residing in Port Elizabeth, South Africa, expressed to the writer surprise that such admirable parlor and dining-room furniture as he saw here, of Canadian make, was not sent in quantity to that colony, where he felt sure it would meet with ready sale.

There is being held, at the Crystal Palace, in London, England, an exhibition of Canadian furniture which attracts admiring attention. According to a London writer there is to be seen not only every variety of the cheap furniture, which has already found a market in England, but also "many very beautiful specimens of more artistic and costly manufacture, which are interesting the general public, to whom high class furniture from Canada comes as a surprise." There are still many directions in which Canadian products come as a surprise to English people, but it ought not longer to be a marvel to them that this country, which many of them look upon as merely "a wooden country," a corn country, an ice country, should be known now as one which possesses manufactures worthy the attention even of an Englishman. This writer tells us that:

"London is having its attention directed to the enormous possibilities of this industry in Canada, and, no doubt, by this excellent display, manufacturers here will be led to take a share in the development of Canadian furniture manufacture, while our warehousemen will be prepared now to rely on Canada for supplies of the finest high-class furniture, as well as the cheapest. The inexhaustible supply of woods in every variety at the very doors of the Canadian furniture manufacturer points to this as one of the leading industries of the Dominion in the near future. The British investor and the general public have been greatly impressed with this fact, and also with the skill and exquisite workmanship and the artistic design already developed in those centres, especially in Ontario and Quebec, where the furniture trade has assumed a position of importance, which buyers in England had little idea of."

The Canada Manufacturers, Limited, take a very prominent part in the Crystal Palace exhibition of furniture, which has thus excited the attention of Londoners. Visitors to Canada during the year just past had seen, too, at the Toronto Industrial Fair and elsewhere, specimens of Canadian handiwork, which drew from them expressions of wondering admiration. These, doubtless, will make known what they have seen. It needs, however, care and continued effort on the part of shippers as well as a knowledge of local methods of exhibition and canvass, to get Old Country folk to recognize the attractions and virtues of our workmanship, and to get acquainted with our designs.

CANADA PERMANENT MORTGAGE CORPORATION.

The lengthy unfolding of this company's business and position made by its vice-presidents at the annual meeting will serve a good purpose. Not only are the company's affairs explained with great fulness, but any whose faith in such associations may have been shaken by the recent fate of two, the Atlas and Elgin, in St. Thomas, should be reassured. It says a great deal for the earning capacity of a concern to find it making profits of 8.64 per cent. net on the paid capital, as the Canada Permanent Loan Corporation has done, by sticking to the business of lending money on real estate, narrow as the margin in profit is, and upon stocks and bonds, while rigidly keeping away from alluring but dangerous speculative practices which may sometimes enrich either persons or institutions, but may just as likely ruin them. It is not only an achievement but a good example to other concerns—a demonstration in financial ethics, and on a large scale, for the Canada Permanent does business from the Atlantic to the Pacific, and its total loans exceed twenty-two millions of dollars.

Among the features of the report and statement brought to the special notice of the meeting by the chairman is the decrease in borrowings in Britain, and the increase in those at home. This arises largely from a stiffening of the price of money in Great Britain, which led to paying off debentures rather than renew them. But this is a condition of affairs which may be altered in subsequent years. It is noticeable, too, that the the cash assets of the company, comprising call or short date secured loans, municipal debentures and money in banks, nearly equal the deposits, the great bulk of which require notice before withdrawal. The company does not own any shares or bonds of private corporations. Mr. Mason is justified in dwelling upon the conservative management of the company, its encouraging progress, and its strong position.

In his very definite and strongly-worded summary of what the company's management will not do and

has not done, Mr. Beatty let it be known what opinion is held by this corporation of its safest and most appropriate functions. He also indicated what were, in the opinion of the directors, undesirable branches of business for it to undertake. His statement of the new avenues being found for the company's debentures is further interesting. They are being invested in by insurance companies, trustees under wills, and treasurers of municipalities. In a generous paragraph he complimented the branch managers and other officers for the success of their efforts in the company's interests. The number of directors having been lessened by the regretted death of one of them, Mr. George Lewis, it was resolved not to fill the vacancy, but allow the number to be reduced by subsequent vacancies to ten instead of fourteen.

THE BALTIMORE CONFLAGRATION.

In the presence of a calamity so great as the conflagration of Sunday and Monday last in Baltimore, it would be a false sympathy which prevented a journalist from probing into the causes of the disaster. To call such a fire an act of God, or to say that it could not have been averted by preparation beforehand, is to beg the question altogether. The impression made by the business quarter of Baltimore upon a Canadian observer who visited it two years ago, was that many of the streets were too narrow, and the newer buildings too high, and that consequently it would be a bad place for a big fire. It turns out now that some 2,500 buildings have been destroyed, that the old buildings in the business quarter were sometimes fire-traps, not easily in any case defended from fire; and the presence, sandwiched among these, of new and high so-called fire-proof structures, was useless as a defence against an extensive fire, since the overwhelming sweep of the flames, fanned by a high wind, made both a prey.

The most enlightened opinion of to-day in the construction of buildings points to the use of non-combustible materials, such as steel, brick, stone; and where wood is used that the construction should be of the slow-burning kind. But it may be pointed out that this great Baltimore fire proves it to be of little use to erect new buildings, even if well-equipped from an underwriter's standpoint, if to the right and left of them, before and behind them, are old buildings, dry as timber and combustible as elaborate wooden fittings can make them. What is known as a fire-proof modern building, standing by itself, may be moderately safe from either internal or external attack, provided the external fire were an ordinary one. But surround that building with combustible structures and subject it to the conflagration test—and the Baltimore fire tells us what to expect. It appears, too, that the Fire Department of that city was not of a calibre suited to contend with a fire on such a vast scale as last Sunday's holocaust.

Other cities need to learn from this disaster, as we may assume the Baltimore authorities will learn in rebuilding, to pay heed to the conflagration hazard. Detroit, Chicago, Quebec, Boston, Galveston have all suffered in the past. Wider streets and lower buildings, the best construction, sane municipal regulation, an amply adequate fire department—these are some of the safeguards that may help to avert another such catastrophe. It may be costly to learn the lesson fully and to do all that ought to be done. But a few millions spent by Baltimore ten years ago in preventive economic measures might have averted her loss of a hundred millions during the present week.

JANUARY FIRE WASTE.

The following comparison shows the fire loss in the United States and Canada, for January of the present and two previous years, as compiled by the New York Journal of Commerce and Commercial Bulletin:

	1902.	1903.	1904.
January ...	$15,032,800	$13,166,350	$21,790,200

This is a remarkably bad showing for last January, when it is considered that there was no very great conflagration to increase the total. In fact, it was the worst month, from a fire insurance standpoint, since May, 1901, when the great Jacksonville, Florida, fire took place. When to these figures of twenty-one millions loss last month are added the February total, embracing the appalling figures of the Baltimore conflagration of the present week, the underwriters may well be depressed at the prospects for the year.

A RESOLUTION ON BRITAIN'S FISCAL POLICY.

A battle royal may be expected when the associated Chambers of Commerce of the United Kingdom meet in March. The fiscal policy of Chamberlain will be attacked and defended on that occasion by horse, foot and artillery, so to speak. The programme for the meeting of 1904 has been issued. Lord Avebury (Sir John Lubbock), will preside. The British-Canadian Review tells us that thus far there are five resolutions presented for discussion on the fiscal policy, by the London, Dublin, Nottingham, South of Scotland, and the Paris (British) Chambers. The London Chamber's resolution is as under:

"That Great Britain has just cause of complaint of certain restrictions and unfair arrangements directed against the commerce of the Empire, and that the Chambers of Commerce would support His Majesty's Government in measures of negotiation or retaliation, provided that before retaliation is adopted:

"1. Every effort had been previously made in the way of friendly representation and remonstrance;

"2. That retaliation should afford a reasonable prospect of being effective for its purpose;

"3. That it should not seriously injure other branches of British manufacture or commerce; and

"4. That the specific mode of retaliation is in each case submitted to the consideration and subject to the assent of the House of Commons."

MORE RECIPROCITY TALK.

Reciprocity with Canada is evidently an issue creating much interest in the United States to-day. On the 4th inst. Mr. Stevens, of Minnesota, introduced into Congress his bill for the improvement of trade with this country. This provides that when wheat is imported into the States to be ground in bonded mills, and then exported as flour, the bran

and other by-products may be withdrawn for domestic consumption after the payment of such duties as would have accrued had those by-products been imported direct.

Discussing the bill, Representative Stevens is reported to have said: "I would like to see free lumber from Canada, but we must make concessions ourselves if we would secure them in return. We may have to take the initiative, and, if so, well and good. At first I doubted the wisdom of the idea contained in the bill, but after careful thought I endorse it very cordially. Canadian wheat is 25 cents less per bushel in their markets than on this side of the line. The bill will not affect our farmers one way or the other."

Mr. Lind, Governor of Minnesota, has also advocated, publicly, friendly arrangements with Canada. But he is bitten by the "Continent to which we belong" idea. Indeed, he thinks Canada cannot refuse what the States ask.

OUR HALIFAX LETTER.

The Committee of the House of Assembly appointed some time ago to investigate the standing and business methods of certain financial corporations doing business in this Province has had a number of sessions lately. The attentions of the committee have been paid chiefly to the York Loan and Savings Company and the Metropolitan Life Insurance Company. These companies were represented by counsel, and their contracts and business methods explained at length. Judging from opinions expressed by its members since examining into the York County Loan Company the committee will report, recommending legislation for the better safeguarding of the public interests at the hands of such institutions, the chief complaints being against the form of the contracts, which, it is claimed, are too complex; also against its system of forfeitures.

Some important legislation has been before the local House during the last two weeks. In this class may be mentioned a bill respecting the registration of titles to lands, introduced by B. S. Pearson, M.P.P., and reported upon favorably by the Committee on Law Amendment. The bill practically substitutes the Torrens System of registration, now in force in New Zealand, in the place of the cumbersome system now employed in this Province. Important amendments to the Education Act have been introduced by the Government to facilitate the consolidation of the weaker school sections. Arrangement is made for defraying at public expense the cost of conveying to and from school children residing at a greater distance than two miles. To ensure the weaker sections getting a proper share of the municipal school fund a limit has been put to the amount to be drawn by the more populous sections. The county councils are given the power to add to the Municipal Education Fund by increasing the per capita tax for education to a sum not exceeding sixty cents per annum.

At the request of the Miners' Associations iron and steel tamping rods are forbidden to be used in the coal mines of the Province. The entrance to submarine areas to coal mines in Cape Breton must hereafter be 9 by 6 feet instead of 6 by 6 feet. All classes of engine-men in connection with coal mines must submit to an examination, and be granted certificates of competency.

Business has been hampered a good deal by the severe weather and heavy snowfall, which, however, has been a boon to the lumbermen. The thermometer has touched a lower mark and we have experienced more zero weather than for a great many years. It was ten below at the Halifax citadel Saturday morning, 19 below at the head of the Basin, and even lower temperatures were reported in other parts of the Province. It is reported that several Halifax people, including a high civic official, cleared a thousand dollars each on Friday by going short on cotton.

The blast furnace at Londonderry, N.S., is now turning out 120 tons of excellent iron daily. A vein of first class ore has been discovered back of the furnace, and the outlook for the future is most encouraging.

The fire is all out at the Joggins mines, and the water is now being pumped out. Miners are at work on the 2,500 foot level, and will also be at work in the deeper level in a few weeks. The first Maritime auction sale of pure bred cattle took place at the winter fair buildings at Amherst last week, and was largely attended by representative stock men from the three provinces. The Bank of Nova Scotia opened an office in the building for the purpose of cashing buyers' cheques, etc.

The Halifax Board of Trade will engage in a "forward movement" in the future. A scheme of reorganization has been recommended by a special committee, and has been sent to the Executive to act upon. The scheme includes amalgamation with other local organizations, such as the "Tourist Association"; the employment of an active permanent secretary; the creation of a large annual income, and the working of the Board on lines similar to that which made the Los Angeles Chamber of Commerce so successful.

Halifax, Nova Scotia, 8th February.

DEATH OF MR. WIMAN.

Erastus Wiman died on Staten Island, New York, on Tuesday last. To those who did not know the man personally, or who had heard of him only as an apostle of Commercial Union with the United States and as a man who made a fiasco of his business affairs, the news will cause possibly neither interest nor regret. He had made great mistakes; he had suffered severe punishment for them. Carried away by ambition, which destroyed his sense of proportion and eclipsed his judgment, he went to lengths which wronged the man who had bestowed upon him life-long trust, and which brought him at last to the violation of law. It can do little good to dwell upon the later years of Mr. Wiman's life, unless, indeed, it were to do so in the way of warning.

Far more agreeable is it to recall him, as hundreds of Canadians will recall him, as a man who made a creditable name for himself in commercial circles, first of Canada, and later of the United States. He may be said to have made the mercantile agency business in Canada; and when R. G. Dun & Co. took him to New York and appointed him manager for the whole United States, he built up their business all over the world to enormous proportions with a skill, industry and versatility that were marvellous. Up to a certain point his success was great, for his knowledge of commercial affairs was extensive, his opportunities wide, his aptitude in making friends unexcelled. Up to a certain point, we say, for that point being attained he began a career for which neither his means nor his further equipment fitted him. And he failed lamentably. His friends — and he had many — will remember and admire his warmth of heart, his frequent and large generosity, his power of work, his indomitable spirit, his almost romantic career. There are thousands of Canadians on this continent whom he has helped to positions of trust, and thousands more to whom his purse was open in their hour of need.

Erastus Wiman was born at Cooksville, Ontario, in 1834. Began life, he used to say, as a newsboy; worked at the case as a printer in Toronto, where he was afterwards an alderman at the age of 26; made market reports for the Globe; superintended the Corn Exchange; became in 1860 manager at Toronto of the Mercantile Agency, and travelled the country in its interests; was promoted to Montreal, where he founded the Trade Review and the Saturday Reader; went to New York to reside in 1866. Of sanguine, even enthusiastic, temperament, his life was one of intense activity, of ceaseless endeavor. The number of subjects with which he was acquainted was remarkable, for his reading was varied, though not deep. Of personal acquaintances no man probably had ever a larger list, and he continued to the last to be open-handed to a fault. As an instance of his unceasing industry it may be mentioned that when almost physically helpless from paralysis he dictated, as lately as April, 1903, an article upon the resources of Canada for the North American Review.

A PECULIAR INSTITUTION.

The York County Savings and Loan Company, whose methods and investments have been so often criticized here, and into which credulous servant girls, stable helpers, and even rustic profit-loving school masters and ministers of the Gospel have yet continued to put their savings, is having an unhappy time in Nova Scotia this month. A committee of the House of Assembly of that province has been examining into its true inwardness. We take an account of the proceedings from the Halifax Evening Mail of the 5th inst.:

Mr. McLeod said he could not see why this concern, that takes no risk as does an insurance company, should not pay back money advanced by investors when they require it, Mr. Finlayson added that he would like to know about the company's security. The company's solicitor answered that an investor can get his money back. If asked for before the termination of the contract it is returned less 10 per cent. for expenses. Now this very point is one which scores of persons have written to and told us quite a different story about. They say they cannot get the company to pay their money back. An interesting feature about this company is its method for forfeiting the shares of members. The report of the scene goes on to say:

Mr. Finlayson mentioned the forfeitures in 1902 of $77,000, and Mr. Gillis followed this up by quoting figures as follows in this connection: Forfeitures in 1897, $44,440; forfeitures in 1899, $34,793; forfeitures in 1901, $62,163; forfeitures in 1902, $77,050.

Mr. Black—Business of one and one-quarter millions and forfeitures $77,000.

Mr. MacInnes stated that these were not "forfeitures" in the ordinary meaning of the word, and appealing to Mr. Phillips that gentleman said: "When a man cannot keep up his payments, his money lies with us to his credit till the expiry of the term, when he gets it with the statutory deduction of 10 per cent.."

This Mr. J. W. Phillips, the president, is a man of ready wit, and can easily make kaleidoscopic changes in his views or the methods of his company to suit novel or threatening emergencies. Although he comes of a race that is supposed to be not jocular in disposition, he yet described himself and his co-workers among the illiterate, as "missionaries for the banks." The banks, or the banks' customers, must be heathen indeed if they need such missionaries. When asked if by their contract shareholders gave the president [himself] their proxies—as they have done by the hundred, poor things, Mr. Phillips answered: Yes, but it can be revoked.

Mr. Black—You don't invest your money in Nova Scotia?

Mr. Phillips—Not in Nova Scotia, but we do in Ontario and the west.

Mr. Black—Do you do any business in musical instruments, magazines or insurance?

Mr. Phillips—No.

Mr. Keefe—Are you aware that your canvassers solicit subscriptions for the National Monthly Magazine? [which Mr. Phillips is supposed to own.]

Mr. Phillips—The company does this as agents.

Mr. Keefe—Do you ever solicit people to purchase a piano?

Mr. Phillips—Yes, they solicit orders for pianos, too, as agents (laughter.)

Mr. Keefe—Would you be good enough to let us know if your officials seek applications for insurance in the Toronto Life Insurance Company?

Mr. Phillips—Yes sir, as agents.

Mr. Keefe—They are a sort of general agents, doing a commission business as it were. (Laughter.) Do you build houses for sale and to rent?

Mr. Phillips—Yes; we do not confine our investments to mortgages.

He might have told the committee, but he did not, about the tens of thousands of depositors' money the company has spent during these two years in cutting down sand hills and filling up valleys; plotting boulevards and suburban streets; erecting five and ten thousand dollar houses, in the region between Roncesvalles Ave. and High Park, in Toronto, some of which are severely vacant. It would not suit his large speculative ideas at all to have farm-hands and that sort of folk bothering about getting their money back from the clutches of the company, when it was really needed. Those poor wretches, he argues, do not need the money half as much as the York County Suburban Splurge Company does. It is to be Mr. Phillips' monument, and we should not wonder if he has laid out a family burial plot somewhere among the works and crannies of this municipal No man's land, sheltered by his ancestral trees.

These hard-headed Nova Scotia legislators have evidently no notion of their citizens being humbugged by the empirical processes of this variorum concern. For in analyzing its contract with its shareholders, Mr. Keefe interjected that "it would need a lawyer to understand the contract."

Mr. Black could not see the justice of a contract that withheld 10 per cent. of a man's deposits if he stopped paying and that gave him no interest, while no risk was assumed by the company, as is the case with insurance.

Mr. Mackenzie submitted a contract he had received from Ontario, with a clipping from the Monetary Times, criticizing the character of the investment in this company. Mr. Phillips examined the contract and said it was the "juvenile scheme," not now in use by the company. [What! have they ceased to scatter about the country their ingenious and beautiful mantel safes?]

Mr. Mackenzie submitted a contract he had received with the forfeiture part of the contract, and that Nova Scotia investors must be protected. There should be absolutely no forfeitures, and he thought that after bare expenses were defrayed by the company, any man withdrawing should be able to get all his money back. He believed there was much laxity in this kind of business and one of the reasons for this legislative enquiry was to take measures to minimize the evil from such laxity.

WINNIPEG GRAIN AND PRODUCE EXCHANGE.

The sixteenth annual meeting of the Winnipeg Grain and Produce Exchange was held on the 1st inst., Mr. A. R. Hargraft, the vice-president, in the chair. The address of the president referred to the listing of Manitoba grain as being deliverable in London on option trading, which showed that it was making a position for itself in the world's markets, a circumstance due to the permanency of the standards. It has been proposed, too, to permit the delivery of Manitoba wheat in New York against option trades in that market, under certain conditions. The council's report, which dealt with the large number of questions, great and small, which had cropped up during the year in connection with the business of the exchange, was taken as read. It showed, among other satisfactory signs of growth, that the membership roll now numbers 230 active members, a considerable increase over last year. The council recommended that an exact date for the opening of navigation should be settled on as April 22nd, 1903. The election of officers resulted as follows: President, Mr. A. R. Hargraft (by acclamation); vice-president, Mr. John Love; secretary and treasurer, Mr. C. N. Bell. Council, Messrs. H. N. Baird, W. A. Black, G. R. Crowe, A. B. Ellis, W. D. McBean, W. W. McMillan, W. H. McWilliams, C. Tilt, T. Thompson, and W. L. Parrish.

NEW ENTERPRISES IN SYDNEY, C.B.

The city of Sydney is branching out for more industries. It has a bill before the Nova Scotia Legislature intended to give it authority to grant a bonus of $10,000 and tax exemption for ten years to a company which is being formed to make cement from the slag and waste of the Dominion Iron and Steel Company's works. The cement concern promises to have an output of two hundred barrels daily. Concessions are also being given the Sydney Manufacturing Company, which expects to have a plant covering an area of seven acres for the building of all classes of railway cars. The Dominion

Glass Company proposes to establish works at Sydney, and has applied for tax exemption and a free site. The company wants the city to appropriate for their use a site comprising twenty acres of land and to exempt them from taxation for at least twenty years. The company is heavily capitalized, it is said, and promises to employ at Sydney from 150 to 300 men.

CONFEDERATION LIFE ASSOCIATION.

The statement of business issued by the Confederation Life for 1903 and its comparison with the previous year are interesting. There are increases in premium and interest income, total assets, and cash surplus over all liabilities. This last item is shown to be by the Government standard $736,394, but by the company's more exacting standard $535,384; either figure is sufficient to show the strength of the company. The amount of the reserve on policies and annuities is $8,833,366 by the company's standard; the assets total $9,663,853. A very large sum, no less than $684,376, was paid during the twelve months to policyholders. Only $264,000 of this—less than in the previous year—was for death claims; $279,000 of it was for endowments; $18,000 for annuities; $46,900 for surrenders, and $75,928 in the agreeable shape of cash profits. These cash profits are what the average policyholder most enjoys. The death claims are this year again met by the interest earnings and rents; in fact this has been the case every year since the company began, and there is left $630,000 of interest revenue after covering the death claims of thirty-two years—good testimony to careful administration.

New business written during 1903 ($4,137,000) was the largest in the history of the company, exceeding that of the previous year. The field and office staffs, therefore, deserve the encomium passed upon them in the report. The total assurance in force is now $36,687,000, an increase of more than two millions. Turning to the balance sheet we see that while the largest item among the assets, namely, mortgages, shows an enlarged amount, and while the holding of bonds and debentures is likewise larger, the real estate owned is less by nearly $100,000. Loans made on the security of stocks are not so large, but loans on the company's policies exceed a million. The large business of the Confederation Life has been built up by adherence to prudent and well-considered rules and by a careful economy. It has large resources, and is able to offer many advantageous plans of life assurance to the Canadian insuring public.

MANUFACTURERS' LIFE INSURANCE COMPANY.

This company has another successful year to its credit. In the preceding year it had reached a gratifying position among Canadian life companies, having more than thirty millions of insurance in force, and having issued six million dollars of new policies. Last year it issued seven and a quarter millions of new insurance, and the total at risk amounted to $34,392,000, a striking increase over any previous year. Increases are shown in 1903 in net premium income, in payments to policyholders, and in policy reserves. The total assets now reach $5,136,668, as compared with $4,406,329 at the close of 1902. Such figures argue successful effort on the part of the field staff and the management at a time when, if conditions are favorable because of general prosperity, competition for life assurance is decidedly keen. The record of $7,764,000 in applications for insurance and $7,294,000 in new policies issued, each of them in round numbers half a million ahead of the preceding year, is testimony to the activity of its agents and the popularity of the company.

A very noteworthy statement in the report is that made respecting total abstainers. The Manufacturers' Life has a separate section for total abstainers. During the year just closed it was found that while in the general section of the company's business the death losses amounted to only 75.7 per cent. of what the mortality tables taught the company to expect, yet in the abstainers' section this record was far exceeded, since there the death losses amounted to only 41.3 per cent. of the expectancy. Thus the saving from low mortality in the abstainers' section was more than double that in the general section. There is much room for congratulation on this handsome result. It means larger dividends for those who do not use spirituous or malt liquors as a beverage. Payments to policyholders reached last year $366,533, which is, in round figures, $50,000 in excess of the previous twelve months. And the policy reserves are increased by $707,908, namely, from $3,753,892 to $4,461,800. This seventeenth annual report is one upon which the company is entitled to take credit.

UNION MUTUAL LIFE COMPANY OF MAINE.

The fifty-fourth annual meeting of this well-established life assurance company was held in Portland, Maine, on January 26th, forty-one policy-holders being present from points scattered from Chicago to the Atlantic coast. The report was read and adopted, after which the meeting proceeded to choose a board of directors. The board subsequently met and re-elected Fred. E. Richards, president, and Arthur L. Bates, vice-president. Later in the day, the president entertained the directors and officers of the company to a complimentary luncheon at the Lafayette Hotel.

The prosperous growth of the company is illustrated by the figures of the report. From a comparative table it is learned that a steady increase year by year in the number and amount of policies in force in Maine has been maintained since 1893. In that year the number was 1,807 or $2,778,000, while last year the number was 9,071 for $9,947,116. The receipts of the year were $2,386,627, of which premiums constituted $1,978,289, and interest and rents, $408,338. There was paid out for death claims, $605,965; for endowments, $166,327; for surrenders, $93,193; for dividends, annuities, taxes, etc., $827,313. The gross assets at the close of the year exceeded ten millions of dollars and the surplus is $563,-565. These figures show the progress and stability of the company.

It is noticeable that this company has paid out to policyholders since it was founded more than half a century ago, $35,654,000, and its dividends to policy-holders are steadily increasing. The working of the Maine Non-forfeiture Law is well exemplified in the report which reminds us that misfortune or neglect are factors that usually occasion backwardness in premium payments. During 1903, nineteen death claims were paid where the protection had been kept in force by the terms of the Maine Non-Forfeiture Law, the amount of insurance being $52,962, while within the time that this statute has been in effect, 500 death claims have been paid under policies that it has kept in force, reaching the significant total of $1,003,204 of insurance.

CONTINENTAL LIFE INSURANCE CO.

A report calculated to give much satisfaction to those present was submitted at the annual meeting of the Continental Life Company on Wednesday last. A substantial increase over 1902 was made in the amount of new business written, and the amount at risk was $700,000 greater than at this time twelve months ago. Revenue from premiums and interest showed a very agreeable increase, while $28,528 was received on capital account. Assets have grown during the year from $259,439 to $337,118, and the reserve is now $192,015, where a year ago it was $128,831. One item deserves special favorable mention, namely, that the expenses of management were actually less in 1903 than in 1902. And it is a good showing for a young company to make, that its ratio of expense to premium is reduced in one year by so much as 18 per cent. The balance sheet shows total assets of $337,118 (of which $32,536 consists of what is due by shareholders for calls on stock premium), and the surplus on policyholders' account is $140,141.

UNION LIFE INSURANCE COMPANY.

At the second annual meeting, held last Monday, a much increased business for 1903 was shown by this company, which does industrial and other insurance. It issued the remarkable

number of 33,665 policies, covering five millions and a half, and it paid 176 claims during the twelve months. The receipts from premiums, interest, etc., were $172,713, or double those of the previous year. Disbursements were nearly as large; but this is in accordance with the course outlined in the preceding year's report, namely, that to properly establish an industrial company large expenditures would be necessary on agency account. The year's transactions encourage the hope that quite an extensive industrial insurance interest may be built up, and the company's business appears to be carried on with energy.

TEMISKAMING AND NORTHERN ONTARIO RAILWAY.

The second annual report of the Temiskaming and Northern Ontario Railway Commission shows that during last year the sum of $1,842,451 was spent on that road, making a total expenditure up to December 31st last of $2,020,092. Efforts have been made, it states, to build a road which shall be first-class in every way. The principal items of expenditure last year were: Engineers' construction, $1,156,527; rails and fastenings, $326,103; rolling stock, $73,789; ties, $65,425; ballasting, $37,599; pay rolls $40,098; telegraph line, $9,489; track-laying, $20,579. The following is an estimate made by the commissioners of the cost of the railroad complete, with equipment: Grading, including trestle work, bridging, etc., $18,000 per mile; rails and fittings, ties, ballasting, telegraph line, track-laying, etc., $7,000 per mile; terminals, sidings, stations, water-tanks, etc., $1,755 per mile; rolling stock, $3,000 per mile; total, $29,755 per mile, or a total for the whole railroad of $3,332,560. Seventy-six of the 112 miles have already been graded, while on 57 miles track has been laid, and telegraph lines put up for the same distance. The maximum grade found necessary on the first 32 miles was 1.25 per cent. rising north, and 1 per cent. rising south, while on the rest of the 80 miles it was 1 per cent. rising north, and .75 per cent. rising south. Surveys to the northward of New Liskeard show that a line can be located on the entire route to the Abitibi river, with a maximum grade of ½ to 1 per cent, and a maximum curve of 4 degrees. Here connection is to be made with the projected Grand Trunk Pacific. Though the grading of this will be light, considerable expense will be incurred by the crossing of streams in deep ravines. The proposed extension passes through a comparatively flat clay loam country from twelve to twenty miles wide. There is an almost unlimited quantity of pulpwood, and the prospects of mining development are good. The commission, by a recent enactment, now has power to issue debentures for $30,000, instead of $25,000 per mile, also to take over ungranted lands to the extent of 1,000 acres each, along the line of railway, for town sites. The act also provides that the Lieutenant-Governor-in-Council may from time to time transfer to the commission by way of loan out of the consolidated revenue fund, a sum or sums not exceeding in all $2,000,000, and may accept the bonds of the commission as security for the repayment of the loan with interest at 3½ per cent. per annum.

NIAGARA FALLS PARK.

It is stated in the eighteenth annual report of the Queen Victoria Niagara Falls Park Commission, which was presented to the Ontario Legislature last week, that the Canadian Niagara Power Company has prosecuted its various works energetically, with a view to the completion of their first installation by July 1st, 1904. But it recommends that the company be granted a six months' extension from this time limit. If this be granted, it is calculated that the initial output of power on January 1st, 1905, shall be 50,000-h.p., instead of 20,000, as agreed before. The Ontario Power Company is also reported to have made good progress, and this company arranged lately to pay $20,000 additional for new restaurant and shelter buildings. The Electrical Development Company of Ontario has succeeded in building a large coffer dam, under circumstances of considerable difficulty, and operations have now begun on the main tunnel under the river. They are also to build a new refectory at a cost of $56,968 to be ready by 1st June, this year.

—La Chambre de Commerce, of Montreal, has elected the following officers by acclamation: President, H. J. A. Brault; first vice-president, C. H. Catelli; second vice-president, Ubalde Garand; treasurer, L. J. A. Surveyer; secretary, Jos. Haynes. Councillors, ex-presidents, D. Masson, J. Grenier, D. Parizeau, L. E. Morin, sr.; H. Laporte, Jos. Contant, L. E. Geoffrion and Senator Desjardins; ex-vice-presidents, J. K. Perrault, G. Boivin, A. Racine, Hon. J. D. Rolland and Treffle Charpentier.

BANKING AND FINANCIAL ITEMS.

Some weeks ago, a meeting of bank officials was held in Montreal, to consider the formation of an institute for bank clerks, to be under the auspices of the Canadian Bankers' Association. Mr. J. Gillespie Muir, of the Merchants Bank of Canada, was in the chair, and addressed the sixty or seventy persons present. Mr. Muir is himself a member of the Institute of Bankers of London, Eng. A resume of his remarks upon the occasion is given in the Journal of the Canadian Bankers' Association, from which we make the following extracts:

"The object of the proposed Institute is to afford to the younger members of the profession opportunities for the acquisition of knowledge of the theory of banking, and to encourage them to read and discuss, from time to time, papers of practical interest. By these means, they would become thoroughly acquainted with every branch of their profession. As a rule, young bank officers have their evenings to themselves, free from care and worry. It is, therefore, possible for them to devote their leisure time to mental culture, and to the acquisition of useful knowledge. What we acquire in early life clings longest to our memory. The present moments are the most precious, and should we let the occasion for improvement slip by, it is gone beyond recall. . . The intention, therefore, of this Institute is, that younger members should make a special study of any subject or paper to be submitted for discussion, and then to take part in the discussion, and thoroughly sift the points brought up. (I may mention the Bankers' Institute, in London, which was founded in 1879 with a membership of 1,400, nas, now over 3,000 members, and a few years ago a "Bankers' Debating Society" was formed, the outcome of a movement among the members themselves, which has proved to be very successful.) With a little practice our members would soon learn to think *with precision*, and feel quite at home when giving expression to their views and opinions." A committee was appointed to ascertain if support enough would be given to justify the founding of such an institute. We now learn that from the canvass made the outlook is favorable, a large number of subscribers having been obtained.

The head office of the Bank of Montreal once had a dome, which forty years ago or more was removed. Now again it is to have a dome the apex of which will be some 120 feet from the ground. Spanish workmen have been brought over to erect it, perhaps to decorate the great panels of it, we are told. The main rotunda, as entered from St. James street, is to be lighted by a skylight in the centre of the dome. This will 100 feet from the floor. Work is progressing rapidly on Wighton, Morrison & Co.'s main contract, about 125 men being employed. The main corridor from the rotunda to the present banking room is being pushed ahead rapidly. The walls and ceiling are of the same design as the handsome completed banking room on the Craig street side, and there will be more of the splendid green columns. The main passage way leading from the rotunda to the banking room measures 34 feet wide and 35 feet high. The new building will contain forty office rooms in all. The offices of the general manager are to be on the left of the rotunda, and those of the assistant general manager on the right. The board and the annual meeting rooms are situated on the first floor above. The Savings Bank Department will also be on the ground floor.

The Sovereign Bank of Canada has opened a branch at Burk's Falls, Ont., where the private banking business of Clay, Sharpe & Co. is taken over. Another branch just opened is at Stanbridge East, Que., where the business of Col. Gilmour, private banker, has been taken over.

Five-cent pieces, expanded by hydraulic pressure to the size of ten-cent pieces, are in circulation in Nova Scotia. Our Halifax correspondent, writing on Monday last, says that they are so like the genuine ten-cent pieces that "no less than three were taken in one day recently by a leading bank."

The Montreal Gazette tells its readers that Mr. J. A. Ready, secretary of the Sovereign Bank of Canada, has been appointed assistant to the general manager of the Crown Bank. At the office of the former bank in Montreal on Tuesday, Mr. D. M. Stewart, on behalf of the staff, presented a gold watch and a Morris chair to the departing secretary.

We learn that Mr. Oscar N. Gagnon, who has been for years inspector in connection with the Montreal office of the Canada Life Assurance Co., has been appointed manager for that company for the eastern section of the Province, with headquarters at Quebec, in the Hochelaga Bank building. Ms. Frank Glass, who has been so long the successful city agent in Quebec, continues as heretofore.

An employee of the American Express Co., named Albert Smith, who is wanted in New Hampshire for forgery, was arrested at Windsor by instruction of Chief of Police O'Sullivan, of Halifax, on Saturday last. Early in December one of the American Express Company's offices in New Hampshire was robbed of a bundle of money orders, and about the same time Smith disappeared. Soon after forged orders were discovered in several New England cities, and the police have since been on the lookout for Smith. Smith, who has relatives residing in Halifax, will be extradited.

After being in business for a number of years as a private banker at Tottenham, Ont., G. P. Hughes has at last made an assignment. He suspended payment on the 30th of November last. His liabilities amounted to $35,000 to depositors. His assets consisted of real estate, $16,000; good notes, $1,771; equity on collateral with the Bank of Hamilton, $1,194; printing plant, $10,000; bad notes, $10,000. At a meeting of creditors held at that date a committee was appointed to continue the business. This committee has apparently been unable to dispose of the property and the assignment has been made.

The following is given by an insurance journal as a conversation overheard in a well-known life insurance home office the other day between a new agent and one of the officers: "I wish you would tell me something against the —— Insurance Company," said the agent. "Why, what do you want to know anything against them for?" asked the officer. "Because I want to be ready for them where I meet them in competition," explained the agent. The officer leaned back in his chair and looked steadily for a moment at the agent. He then said: "I do not know anything against them, and if I did I would not repeat it. As to meeting them in competition, you need not be afraid to stand squarely on the merits of your own company and the contracts we give you to sell. It will pay you better to become thoroughly familiar with the good points of your own company than it will with the weaknesses of our competitors."

INSURANCE MATTERS.

The Provident Savings Life Assurance Society, of New York, whose Toronto office was formerly in the Temple Building, has moved into new and more commodious quarters in the Bank of British North America building, corner of Wellington and Yonge streets.

At the recent election of officers of the Manufacturers Life Insurance Company, for 1904, there were two important changes. Mr. L. A. Winter, who has been for some time past assistant secretary of the company, was made secretary, and Mr. J. T. Franks, of the investment department, was made assistant secretary.

An error has crept into the notice made last week in these columns, of the North American Life Company's report. In the 32nd line, the word "shareholders" should be "policy-holders." The point to be emphasized is that the only fund out of which profits can properly be allotted to policy-holders by any life company is the net surplus.

What are called electrical fires, that is to say, fires which have their origin in defective electric light or heat wiring, or negligence of workmen or ignorance of employers, where electricity is in use in premises, continue to occur in the United States and Canada. The electrician of the National Board in the United States gives quarterly reports. Here are some facts from the January one: Eighteen fires are reported as due to crosses of telephone, telegraph and signal wires with high potential circuits. Fifteen fires were caused by crosses of low and high potential circuits. Twenty-five fires from grounding of circuits; fourteen on building fronts, eight at gas pipes and two at metal ceilings. Seven fires were caused by the heat from incandescent lamps. Six fires occurred in electric cars. Forty-eight fires, losses aggregating $420,000, reported as due to electricity during the last quarter have, upon further investigation, been found to have been due to other causes. The principal causes of these fires were reported as follows: Stoves and furnaces (eight fires), spontaneous combustion, cigar stubs, candles, matches, hot ashes, kerosene lamp, incendiaries.

FOR GROCERS AND PROVISION DEALERS.

A large parcel of British Columbia hops was recently sold in London at the top price of $50 per cwt. of 112 pounds.

The shipment of apples to the Old Country from the port of St. John had been for the season about 30,000 boxes and cases, of which about one half went to Liverpool and Manchester.

The last report to hand from England stated that the demand for Canadian cheese had not been quite so active, but prices remained at 53s. to 54s. for choicest, and 51s. to 52s. for finest.

We hear from Wiarton, Ont., that the beet sugar factory there, for which so much was prophesied a year or so ago, is closed and that the plant is in the hands of banks which had advanced sums of money to carry on the business. This must be a heavy blow to people in that vicinity who took stock in the concern, as well as a disappointment to farmers who put themselves to some trouble to grow the raw material for sugar manufacture.

We note in a report on colonial produce emanating from London, that the low values at which Australian and New Zealand butters are being offered in the Old Country at present is having the effect of creating a very wide demand. It is remarked that when such excellent butter can be retailed at a shilling, the demand always increases to a very large extent. A reaction in favor of higher prices, however, is now looked for as a result of the overtaking of the supply by the demand.

Mr. Fullerton, of the Minnesota State Game and Fish Commission, says that sturgeon are caught in Lake of the Woods in such numbers that unless something is done to re-stock the lake it will soon be depleted. He recommends that steps be taken by the State or National Executive to co-operate with the Canadian Government in the construction of hatcheries in the lake for the propagation of fish peculiar to its waters. So long, says he, as both countries permit net fishing and make no provision to keep up the supply of fish, the lake's gradual exhaustion is unavoidable.

Numerous complaints have come to hand from Great Britain to the Fruit Division of the Department of Agriculture, Ottawa, as to irregularity in the size of apple barrels. Probably much of this variation in size has been due to shortage of barrels, but it is important for the future of the fruit export business that growers should come together and arrive at an understanding. The law prescribes the minimum size, which is a barrel 26¼ inches between heads, inside measure, and with a head diameter of 17 inches and a middle diameter of 18½ inches, representing as nearly as possible 96 quarts.

The Japanese Government is reported to have given an order direct to one of the British Columbia canneries for 390,000 cases of dog salmon. There is a stiffening in price for practically all kinds of canned salmon in consequence of the war.

At the recent meeting of the Western Ontario dairymen in St. Thomas one of the speakers, a butter expert of Montreal, stated that Canadian butter was as far behind as the cheese of this country was in advance. On meeting English dealers, he said, he had often met with the remark that Canadian butter was not so very bad, but that it was sold as a second cut. The reputation for bad keeping quality which had been saddled upon it was due to the practice of speculators, who in former years held large quantities over into winter. Now the New Zealand article came in about December, and being pasture butter, precluded all chance of high prices for Canadian. At the creameries a daily gathering of cream would tend to improve matters.

The Province of Quebec Dairymen's Association elected officers as follows: Honorary presidents, Hons. Sydney A. Fisher and A. Turgeon, and Mr. J. A. Vaillancourt; president, C. H. Parmelee; vice-president, Charles Milot; secretary-treasurer, M. E. Castel. Directors—Arthabaska, P. Veilleux; Beauharnois, Robert Ness; Bedford, E. Lepine; Charlevoix, D. Simard; Chicoutimi, Jos. Girard; Iberville, S. J. Roy; Joliette, J. P. Archambault; Kamouraska, Charles Prefontaine; Montmagny, E. Cote; Montreal, R. E. Scott; Ottawa, J. B. A. Major; Quebec, U. Garneau; Richelieu, A. Denis; Rimouski, A. Michaud; St. Francis, Rev. Mr. Charest; St. Hyacinthe, Jos. Morin; Terrebonne, Rev. J. A. Vaillancourt; Three Rivers, M. Desmarteau.

DRY GOODS ITEMS.

The employees of S. F. McKinnon & Co., the wholesale millinery house, Toronto, held their seventh annual banquet on Monday evening last. About sixty were present, including three of the directors, namely, Messrs. J. D. McKinnon, Alex. Mackie, and Wm. Guthrie.

In the United States markets there has been a marked improvement in demand and in sales during the last few days. Both small and large mills have been represented in the market and the purchases of two of the largest concerns are said to have aggregated over 4,000,000 pounds. The "combine" has been a large buyer and is reported to have contracted for more than 3,000,000 pounds—mostly territories. Demand as a whole, however, has been well distributed and of a diversified character. The strength of wools abroad and the impossibility of securing further concessions in domestic markets have been more influential in stimulating demand even than the situation in the American markets.

Last reports from Belfast, Ireland, say that the tone of the linen market continues very firm, and the high and rising prices for flax and for yarns are having a very restricting influence on the demand for cloth. Business in the yarn market is fully maintained, and prices show a further advance. Spinners are acting cautiously in reference to new business, and are reluctant to commit themselves to any great extent. Stocks keep very low. The shipping trade is fairly good. There is a further slight improvement with the United States, and Canada continues a good buyer, while there is a fairly satisfactory number of orders from the Antipodes. Continental demand remains much the same as before.

At the present time there are no indications in Bradford, England, of any falling off in the demand for crossbred colonial wool. Although there was some little giving way in values in October, all the lost ground has been now more than recovered, and the price of the cheaper kinds is to-day higher than it has been since 1895, even including the time of inflated prices in 1899. Very large quantities of both medium and coarse qualities of this wool continue to be used, both in the home woolen districts and on the Continent, as worsted yarns. These outlets of consumption are being so well maintained that there seems to be no possibility of the supply more than meeting the demand during the present year. We may, therefore, confidently look for distinctly higher prices in the fine, medium, and coarse classes at the approaching London sales.—Drapers' Record.

A Parisian correspondent of the New York Dry Goods Economist says that one of the novel laces of the season in that fashion centre is white silk guipure. It is really beautiful, with its glossy and almost silvery appearance, but looks its best in somewhat broad widths; that is to say, from 3 to 10 inches, the latter width suitable for flounces only, the others serving to adorn waists, silk petticoats and headwear, also tea gowns. Although the designs of this new lace are extremely rich, it is not in itself heavy, and is quite suitable for the adornment of light-weight textiles.

The Drapers' Record tells us that there is an appreciable increase in the funds of the British Cotton Growing Association, the total amounts of which now exceed £45,000. In the meantime the association is pressing on with its work, and one day recently, some cotton experts from Mississippi, left Liverpool for Sierra Leone. They were accompanied by three negro cotton farmers from the Southern States, with the intention of conducting experiments in cotton-growing among the natives of Sierra Leone. Up to now the amount of American cotton imported into Britain this season is about 50,000 bales less than what it was this time last year, and the Egyptian shipments are also down about 5,000 bales.

The cotton trade of Lancashire is at the present time undoubtedly in an awkward position, says a London exchange. Cotton, which for at least two years ranged, some five years ago, in the neighborhood of fourpence a pound at one period touching threepence three farthings a pound—has been forced up to eightpence a pound. Planters can sell their cotton crops at twopence half-penny a pound, and come out with a satisfactory working profit. There was no scarcity of cotton for Lancashire when cotton was at fourpence or less per pound, and no mention was ever made of planters complaining of low prices. How comes it about that cotton costing less than twopence half-penny to grow and deliver has been rushed up to eightpence? There is only one answer to this question. Lancashire cotton spinners have forgotten the old and wise adage to the effect that "the cobbler should stick to his last." The spinners, or rather the managers or managing directors of spinning companies—nine-tenths of the trade—have not kept to spinning, but have dabbled in cotton. Instead of being content to make, say, one hundred pounds a week profit by spinning they have tried and hoped to make hundreds of pounds by speculating in "futures." But the foolish attempt has failed of its object. There has not been a failure of a cotton spinning company for years past in which the cause of breakdown has not been speculations in cotton.

American advices report that sales of wool have been better distributed. Buyers from all sections of the industry have been in the market, but the dress goods mills have been the largest and most confident operators. Some have been waiting for lower prices, and their liberal buying is believed to indicate that they are satisfied that wools are as low as they are likely to be this season. Demand has been as well diversified as it was well distributed. Low-medium wools, mediums, fine-mediums and staple grades have all sold freely. The low-mediums are firmer, although not quotably higher, in sympathy with the strong situation abroad on crossbreds. Certain large domestic manufacturers are now reported liberal buyers of South American crossbreds.

Disquieting reports are becoming alarmingly numerous as to the state of the Scotch textile trade, and as every advance in raw cotton makes business more difficult, a curtailment in running in the various mills is fast approaching a period of crisis. Manufacturers of colored goods are the worst off, those engaged in the white end of the trade having more work on hand. Indications also point to a serious crisis in the jute and linen trades. Glasgow tweed manufacturers are still finding business difficult, retailers positively declining to anticipate wants. The trend of fashion to change from stripes to fancy and indefinite patterns is looked forward to as likely to stimulate trade. Cheviots, in brighter colors, are coming more into favor.

SOME NOTES FROM WINNIPEG.

It would not be fair to say that this city is quite given over to curling, but from the looks of things there will be such an incursion of those enthusiastic folk this week as will make their broom-and-stone play overshadow in interest any other topic. One hundred and thirty rinks are already entered for the annual "Bonspeil," to begin on Wednesday. These come from Regina and Medicine Hat in the West, to Toronto in the East. If the United States folk turn out in force there may be 150 rinks say six hundred men. This, of course, includes the city rinks.

There is abundance of curling weather in stock, and no likelihood of a thaw before the "Spiel" closes on Saturday. About Calgary, and in the mountains beyond, snow storms have interfered greatly with railway traffic. A train from the Coast had to be sent round by Kootenay Landing on Sunday. There is said to be six or eight feet of snow on the C.P.R. track in the mountains. Snow plows and gangs of men are busily at work fighting the snow at various points.

A crowd of four or five hundred people coming at once taxes the hotel accommodation here, and many of the visiting curlers will no doubt be taken care of in private houses. This lends interest to the fact that the new hotel to be built by the C.P.R. people on Fonseca and Maple streets will fill a felt want. It is to be in connection with a railway station, will be eight stories high, built of native stone and pressed brick. The dimensions, 208 by 123 feet, illustrate what Winnipeg of the future will be. Everything about this palatial structure is to be of the latest and best. There will be 320 guest rooms. The rotunda on the ground floor will measure 130 feet by 110; the dining-room, 122 feet by 50; smoking and reading room of the generous proportions of 75 feet by 84, so you see there will be nothing small about it. The station is to be in keeping with the hotel in modern arrangement.

Winnipeg, 8th February. A. B. C.

—The paragraph we gave respecting the Quebec Board of Trade's annual meeting was not derived from the board itself, and we find there was an error in it. The secretary writes us that it is Mr. Price who is president, and not Mr. Fry.

—Owing to the extraordinarily severe winter, and the consequent tie-up on the railroads, several Ontario towns have been in the grip of a coal famine, which may assume serious results. In Hespeler, some of the woolen mills had to close down. In Preston some of the industries were at the beginning of the week reported closed down, while in Galt the shortage of fuel is becoming serious.

—We learn with interest that arrangements are in progress for the formation in Montreal of an Economic Society. It will be not merely a university concern for the academic study of political economy, but rather a club where papers may be read and discussed by leading citizens on topics touching the problems which affect civic and colonial trade and intercourse. The organization meeting is to be held to-night, and will begin with a dinner, after which Mr. Archibald McGoun, K.C., will give a paper on "Preferential Trade." Mayor-elect Laporte has consented to act as chairman. In the meantime, Professor Flux, of McGill, is acting as secretary.

—Mr. Thos. Tait, a Canadian who was formerly superintendent of transportation for the Canadian Pacific, and who some months ago assumed the management of the state-owned railways in the colony of Victoria, is receiving very pleasing encomiums in that country. In the quarterly report of the railway commission of the Victoria Parliament, he is highly complimented upon the outcome of his labors, while the Melbourne Argus enters upon a more lengthy analysis thereof. It says the effect of the new management is already showing itself in the form of a considerable reduction of working expenditure, in spite of a falling revenue due to the after-results of the prolonged drought.

—The New York Journal of Commerce has compiled a summary of the newly incorporated companies formed in January. The aggregate capitalization for that month of companies with $1,000,000 or more of stock was $59,508,200, compared with $82,452,000 in December and $56,100,000 in November. These figures show a great falling off compared with former years. For instance, in January, 1903 and 1902, the figures were $177,990,000 and $146,950,000 respectively. It serves to show what a great check was delivered by financial conditions in the United States last year to the promotion of over-capitalized schemes, but may at the same time show that wild-cat financiering has interfered with legitimate investment. It is to be hoped, however, that the placing on the market of unsound enterprises has received a blow from which it will not soon recover.

ANSWERS TO ENQUIRERS.

Elder One, St. Thomas.—There is hardly any recourse that is worth while, in our opinion. Remember what Brutus said: "We must take the current when it serves, or lose our ventures." It is a wise man who is warned by such events and leaves speculation on margin alone for the rest of his life.

E. H., Winnipeg.—Yes, there are statutes in various provinces resembling the Dominion statute in such case made and provided. Will write you next week.

Meetings.

CANADA PERMANENT MORTGAGE CORPORATION.

The fourth annual general meeting of shareholders of the Canada Permanent Mortgage Corporation was held in the head office of the Corporation, Toronto, on Saturday, the 6th inst., at 12 o'clock (noon).

On motion, the chair was taken by Mr. J. Herbert Mason, the first vice-president, and the secretary, Mr. George H. Smith, was appointed secretary of the meeting. At the request of the chairman, the secretary read the report of the directors and general statement for 1903, which are as follows:

Report.

The directors have much pleasure in presenting to the shareholders the fourth annual statement of the affairs of the Corporation, duly certified by the auditors.

After providing for all charges, expenses and losses, together with interest on borrowed capital, the net earnings for the year amounted to $514,219.96, which, with the sum at the credit of profit and loss at the beginning of the year, made the sum of $650,845.94 at the disposal of the directors, which was appropriated as follows:

Two half-yearly dividends of three per cent. each on capital stock	$357,081 00
Carried to reserve fund	159,942 62
At credit of profit and loss	133,822 32
	$650,845 94

All which is respectfully submitted.

George Gooderham,
President.

Toronto, January 25th, 1904.

General Statement.

LIABILITIES.

Liabilities to the Public

Deposits and accrued interest	$ 2,271,538 07	
Debentures—sterling—and accrued interest (£1,796,815 2s. 4d.)	8,744,500 25	
Debentures — currency—and accrued interest	3,577,741 48	

Debenture stock and accrued interest (£91,800)	446,760 00	
Balance due bankers in Great Britain (£47,795 17s. 9d.)	232,606 65	
Sundry accounts	9,525 44	
		$15,282,671 89

Liabilities to Shareholders

Capital stock	$ 5,951,350 00	
Reserve fund	1,750,000 00	
Dividend No. 8	$178,540 50	
Dividends unclaimed	63 90	
	178,604 40	
Balance of profits carried forward	133,822 32	
		8,013,776 72
		$23,296,448 61

ASSETS.

Mortgages on real estate	$20,758,468 17	
Advances on bonds and stocks	1,436,576 93	
		$22,195,045 10
Municipal debentures		509,226 16
Real estate acquired by deed or foreclosure		37,720 13
Office premises (Toronto and Winnipeg)		350,810 65
Cash on hand and in banks		203,646 57
		$23,296,448 61

J. HERBERT MASON,
Managing Director.

We certify that we have audited the books and examined the vouchers and securities of the Canada Permanent Mortgage Corporation for the year 1903.

The accompanying statement is a correct exhibit of the affairs of the Corporation as on December 31st, 1903.

J. E. BERKELEY SMITH,
A. E. OSLER, C.A.,
HENRY BARBER, F.C.A.,
Auditors.

Toronto, January 21st, 1904.

The chairman, Mr. J. Herbert Mason, then addressed the meeting as follows:

Ladies and Gentlemen,—It is said that good wine needs no bush, and, if this be so, a report such as the one just read needs no argument or words of praise to commend it to your hearty and unanimous approval. In moving its adoption the few observations I may be permitted to make will be confined strictly to the affairs of the company in which we are all directly interested, leaving topics of a general character to be discussed in the press and elsewhere.

Compared with the report for the previous fiscal year, several features of an encouraging character may be noted. The amount of mortgages on real estate shows an increase of $318,318. The obligations of borrowers have been well met, and our mortgage accounts are in excellent condition. The funds lodged with the company in Canada increased from $5,404,517 to $5,849,279. The sterling debentures, which matured last year were much in excess of the average yearly amount, and as, in view of the rates obtainable on first-class real estate securities here, the directors did not feel warranted in renewing them at the comparatively high rates of interest which were expected by some of the holders, many of them were paid off. This, together with the voluntary redemption by the company of the Perpetual Debenture Stock, amounting to £200,000, issued by the Canada Permanent Loan and Savings Company about seventeen years ago, and assumed by this corporation at its formation, has caused a considerable reduction in our sterling indebtedness. When the ordinary conditions as to the relative values of money here and in Great Britain are restored this movement will without doubt be reversed. As the result of last year's operations, after payment of the usual dividends, amounting to 6 per cent., and all charges, the directors have been able to add, in round numbers, $160,000 to the reserve, compared with $100,000 added in the previous year. That fund has thereby been increased to $1,750,000, nearly 30 per cent. on the paid-up capital. Comparing the position of the company at the end of its fourth financial year with its position at the end of its first year a marked improvement will be found all along the line. The reduction in sterling money held has been more than made good by the increase in Canadian funds. The amount placed with the company for investment here and held at the end of 1900 amounted to $4,222,671. At the end of 1903 it was $5,849,279. Our mortgage investments increased in the same period from $21,578,714 to $22,195,045. The total assets increased from $22,696,885 to $23,296,448. The net earnings for 1900 were $463,906; for 1903 they were $514,220, equal to 8.64 per cent. on the paid-up capital. The reserve fund increased from $1,490,057 to $1,750,000, and the balance of undivided profits was $106,015 in the former year and $133,822 in the latter. The real estate acquired by deed and foreclosure and held by the company in the former year amounted to $73,447; in the latter year to $37,720. The amount at the debit of office premises has been reduced from $662,254 to $350,810, chiefly by sales, while the item of office furniture has been entirely written off to profit and loss.

As is well known, the chief business of this corporation is to lend money on the security of real estate. It will be observed that the sum of $20,758,468, or nearly 90 per cent. of our total assets, consists of real estate mortgages. The privilege of lending upon approved stocks and bonds has proved to be most useful, by enabling us to keep employed at remunerative rates money which might otherwise from time to time have been lying idle while awaiting more permanent investment. It has the further advantage of furnishing readily available funds, which could be called in and used in the event of a sudden or unexpected demand being made on the company. It is not intended to make this a leading or principal part of the corporation's business, but there can be no doubt that within reasonable limits and properly conducted it is a branch of business which may be of much value to the company. It may be noticed that in addition to the large daily receipts on our real estate mortgages, our cash and easily convertible securities, comprising call or short date loans, municipal debentures and cash in banks, amount to $2,149,448, a sum nearly equal to the full amount of our deposits and interest, much the greater part of which are repayable on notice only. The only personal securities the company owns are municipal debentures to the amount of $509,226. We do not own any bonds or stocks of private corporations.

These facts and figures, I think, prove conclusively not only the conservative management of the company, but that it holds an exceptionally strong position. They also show that its revenue-earning powers are assured and are steadily advancing.

Before concluding I may refer to the change in name of the corporation since our last annual meeting. At the time of the amalgamation it was felt by some that, as a matter of sentiment, a distinguishing part of the name of the two largest of the four companies should appear in the name of the new corporation, which was assented to. It was, however, found in practice that the new name was inconveniently long and rather clumsy, especially by having the word "Canada" appearing twice in it, and many stockholders and others suggested its being curtailed. As we had a bill before Parliament last year relating to other matters, it was decided to apply to have the name reduced to that which the company now bears. The change has been generally approved, not only by the shareholders and by the members of the stock exchange here, but by our correspondents in Great Britain and others doing business with the corporation.

It is with regret that I have to call attention to the fact that quite recently a vacancy has been created at the Board by the death of Mr. George W. Lewis. It is the opinion of the members of the Board that it is not advisable to fill that vacancy, and a resolution providing for a reduction in the number of directors will be brought before this meeting.

I beg leave to move, seconded by Mr. Vice-President Beatty, "That the report of the directors be received and adopted, and, together with the general statement, be printed, and a copy be sent to each shareholder."

The vice-president, Mr. W. H. Beatty, in seconding the motion, said:

Mr. Chairman, Ladies and Gentlemen:—The managing director certainly has not overstated the facts in what he has said to you about the financial statement just submitted to you, and it is not necessary for me to take up your time in making any remarks concerning it, but I would like to draw your attention to some occurrences of the past year.

During that time two loan companies, namely, the Atlas and Elgin, of St. Thomas, have made, through mismanagement and neglect of those in control, most disastrous failures, bringing widespread ruin and suffering to their debenture-holders, depositors and shareholders. This, together with the exposure of their methods of doing business, for a time caused great anxiety through this Province, and fears have been expressed by many that some other companies might be doing their business on the same lines. I have thought it desirable to assure the debenture-holders, depositors and shareholders of this company that none of the methods of those companies have ever been in vogue in this company, and, while it is hardly necessary to say so, the directors of this corporation have not in any way used its funds for the purchase of stocks issued either in Canada, the United States or elsewhere. True, we have, in common with the banks, loaned money on stocks, with a wide and safe margin of security, to responsible people. This corporation has never underwritten nor subscribed to any flotation or syndicate scheme; we never loan upon any stocks that have not been listed on the stock exchange; we never loan upon any stocks that are not assured dividend payers, and we have never made one cent of loss on advances secured by stocks, nor is there to-day the slightest probability of any loss on any of the business that we have or are doing in that way. The most conservative policy has been pursued in this as well as all investments of the corporation. Let me reiterate that I have thought it well to make this definite state-

ment so that our shareholders, debenture-holders and depositors and the public generally may know this directly from the directors, and so as to reassure every one of them, if, indeed, any such reassurance is needed, which scarcely appears to be the case. The confidence of the public has been shown in the most unmistakable way; namely, our deposits have increased at the rate of $20,000 a month for the past year, and this in the face of the keenest competition from banks. In referring to this I do not mean to say that any of our banks in Canada have sought business in the manner described in an article in the New York "Evening Post," which stated that some of the New York banks were making a canvass from door to door for deposits. And not only has there been competition from banks, but from other financial institutions as well, some of which have offered very much higher rates of interest than we do. In addition to what we had some time ago, the increase of moneys placed with the company by Canadian investors on deposit and currency debentures is over $1,500,000, and this during a comparatively short time, coming from all sorts and conditions of men, all kinds of companies desiring investment for their moneys; fire and life insurance companies, some of which are very large holders of our stock as well as our debentures, and some of these companies investing in debentures to make their deposits with the Government. Trustees under wills and under trust deeds are taking them, an Order-in-Council having been passed that we come within the Trustee Act. They are finding them safe and satisfactory. Treasurers of counties, towns and township municipalities are using them as investments for their sinking funds.

Your directors cannot but rejoice with all others at the unexampled prosperity with which this country is at present favored. At the same time they feel that sometimes a bolt comes out of the blue, bringing trouble when it is least expected, and they are guiding their course accordingly in not allowing themselves to be too much influenced by this great prosperity, nor permitting themselves to think it will continue without interruption, but taking the greatest care that no boom or anything of that kind shall affect their conservative ways of doing business.

The magnificent results set out in the report and financial statements are not brought about without an unlimited amount of care, prudence and attention on the part of the whole of the staff to every detail of the business, and, although Mark Twain or Mrs. Partington says, "Praise to the face is open disgrace," I must congratulate the veteran who is at the head of affairs for having handled his helm in the way he has done. He has had favorable wind, but we all know that even in gales he has proved himself equal to the occasion, and will again if necessary. Let us hope it will never be necessary. I must also congratulate all the officers of the company, managers, secretary, treasurer, as well as the branch managers, who have all looked after their business well. Of course, we do not always fall in entirely with the views of the branch managers as to what is in the best interests of the company, but they are not infallible. I don't mean to say that the directors are infallible, and sometimes, perhaps, they may not be as good judges of what ought to be done as those who are on the spot. Even the managers and branch managers could not have given the results that we have before us had they not been ably, loyally and intelligently supported by the staffs of the respective officers. I desire to convey to them here what our opinion is and to convey the same to you. As you are aware, the business of the company now practically extends from the Atlantic, and even out into the Atlantic, to the Pacific, from Newfoundland to Vancouver Island, and such a policy is necessary with our investments spread as they are.

In conclusion, in a few words let me say that the usual thorough and most exhaustive inspection is made of the office at Toronto, the office at Winnipeg, the office at Edmonton, the office at Vancouver, and the office at St. John, in the Maritime Provinces, including the securities held at each branch. It is no perfunctory or formal examination that is made at these offices. Every account which is not satisfactory is reported upon, and the information sent on to the head office; so that we are in possession of the facts every year as to any overdue accounts and overdue instalments, both as to principal and interest. This is not simply an audit made by the company's auditors to see that everything that is paid out is properly vouched for, but goes to the very marrow of the investments of the company.

I have much pleasure in seconding the adoption of the report.

The resolution for the adoption of the directors' report was unanimously carried.

Scrutineers having been appointed, the election of directors was held, resulting in the re-election of Messrs. George Gooderham, J. Herbert Mason, W. H. Beatty, Ralph K. Burgess, George F. Galt (Winnipeg), C. H. Gooderham, W. G. Gooderham, W. D. Matthews, George W. Monk, S. Nordheimer, R. T. Riley (Winnipeg), J. M. Robinson (St. John, N.B.), and Frederick Wyld.

At a subsequent meeting of the Board the following officers were re-elected: President, George Gooderham; first vice-president, J. Herbert Mason; second vice-president, W. H. Beatty.

THE

Continental Life Insurance Company.

ANNUAL REPORT.

The fourth annual meeting of the shareholders of the Continental Life Insurance Company was held February 10th, at the head office, in the City Hall square, Toronto.

The President, Hon. John Dryden, occupied the chair, when the following report was presented.

REPORT.

In presenting their annual report of the operations of the company for the year 1903, your directors take pleasure in announcing that they have been of an eminently satisfactory nature.

The applications for new insurance and revival of policies received during the year were 1,082 for $1,392,250; 57 for $74,000 were rejected or deferred or were still pending at the end of the year. The number of policies issued and received was 1,035 for $1,310,624—a substantial gain over the amount written in 1902.

The total amount of insurance in force at 31st December, 1903, was $3,428,041, a net gain of $723,574 during the year.

The gross premium income was $103,057.19, being $22,215.72 more than in the preceding year. Deducting amount paid for re-insurance, $2,882.71, the net premium income was $100,174.48. The interest on investments, etc., amounted to $9,339.86, a gain of $3,903.99 over 1902. The total receipts on account of revenue were $114,372.10, and on account of capital $28,528.40, making together a total income of $143,400.50 for the year.

The death claims for the year were $10,500, which is much below the amount expected according to the mortality table, and very little more than the interest on investments.

The expenses of management, including office furniture, were $1,438.91 less than in 1902, and the ratio of expenses to premium income was reduced by 18 per cent.

The assets increased during the year by $77.678.89, and now amount to $337,118.33, after paying all death losses, expenses of management, etc.

The reserve for policies is computed according to the stringent standard of the Dominion Government, and now amounts to $192,015, an increase of $63,184.25.

As in former years, a comparative statement of the company's business for 1902 and 1903 is given:—

		1902	1903	Increase.
1.	Policies issued and revived.	$1,214,886	$1,310,624	$95,738
2.	Net premium income.....	78,208	100,174	21,966
3.	Income from investments..	5,436	9,340	3,904
4.	Income from premiums and interest.	83,644	109,514	25,870
5.	Death claims.	7,329	10,500	3,171
6.	Total assets.	259,439	337,118	77,679
7.	Reserve	128,831	192,015	63,184
8	Insurance in force	2,704,467	3,428,041	723,574

The interest on the company's investments continues to be collected with regularity and promptness. Of the $2,296.17 interest accrued on investments at the end of the year only $25 was actually due.

The auditors have made the usual continuous audit of the company's books, vouchers and accounts throughout the year, and the securities, cash and bank balances have been verified. Their report is appended to the Balance Sheet.

The directors and officers take this opportunity to tender their hearty thanks to the company's agents and inspectors in the field for their valuable assistance.

Your directors desire to place on record their sincere

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, February 11th, 1904, compared with those of the previous week:

	$43,701 057	$43.382,076

The Union Life
Assurance Company.

The Second Annual Meeting of the Company was held at the Head Office, Monday, February 8th, 1904.

The Report for 1903, submitted by the Directors, showed the year's business to have been most successful in every respect.

The New Business Issued was $5,557,287.60, being over Two Million Dollars greater than that issued by any other Company of like age; and One Million Dollars more than any other Canadian company issued in Canada in 1902. (1903 figures for other companies not yet available.)

The Net Amount of Insurance in Force is $3,904,978.69, being, with one exception, larger than the amount in force in any other Canadian company in its second year.

The New Policies Issued were 33,665, showing over 100 persons to have been newly insured in the Company every business day during the year.

The Claims Paid were 176, being at the rate of one every second day during the year.

The Total Income for the year, including premiums, interest, and all other receipts, was $172,713.05.

The Paid-up Capital is $100,000.00, and the surplus $102,425.42, indicating a most unusual security to the policy-holders for a company in business less than two years.

General Financial Statement
TO DECEMBER 31st, 1903.

RECEIPTS AND EXPENDITURES.

GEORGE B. WOODS, Managing Director. CHARLES H. FULLER, Secretary.

The report was, on motion, adopted unanimously.

The following gentlemen were elected directors for the ensuing year:—Hon. John Dryden, M.P.P., Minister of Agriculture, president; J. W. Scott, first vice-president; G. T. Somers, second vice-president; A. F. MacLaren, M.P., E. Coatsworth, R. S. Williams, W. Vandusen, Dr. A. McKay, Dr. John Gillies, J. A. Jackson, Sidney Jones, Joseph Rosser; Dr. H. Wilberforce Aikins, medical director; George B. Woods, managing director.

The Manufacturers Life Insurance Company.

SEVENTEENTH ANNUAL REPORT.

The seventeenth annual meeting of the shareholders and policyholders of the Manufacturers Life Insurance Company was held in the Company's offices, Toronto, on Thursday, February 4th, at 2.30 p.m. The report submitted was eminently satisfactory to all interested.

A detailed report of the proceedings will be mailed to all policyholders, but we believe that the average busy reader will get a clearer conception of the progress the Company is making by having, as it were, a bird's-eye view of its affairs.

Below will be found the figures pertaining to the main features of the business for 1902 and 1903 and the increases; also a comparative statement of the Company's growth since its organization.

The growth made in 1903 is well shown by the following table :—

	1902.	*1903.*	*Increase.*
Net Premium Income	$ 1,054,815.72	$ 1,219,435.91	$ 164,620.19
Interest, Rents, etc	186,074.11	215,852.67	29,778.56
Total Cash Income	1,240,889.83	1,435,288.58	194,398.75
Payments to Policyholders	316,556.63	366,533.04	49,976.41
Policy Reserves	3,753,892.00	4,461,800.00	707,908.00
Total Assets	4,406,329.19	5,136,668.52	730,339.33
Applications for New Insurance	6,542,336.00	7,764,542.00	1,222,206.00
New Policies Issued	6,082,336.00	7,294,050.00	1,211,714 00
Insurance in Force	30,152,883.00	34,392,303.00	4,239,420.00

The Manufacturers Life began business in 1887, and the following figures for four year periods taken from its returns to the Dominion Government will illustrate its remarkable growth and steady progress :—

Year.	Income From Interest Rents, etc.	Net Premium Income.	Total Premium and Interest Income.	Assets.	New Policies Issued.	Assurance in Force December 31st.
1887	$ 778	$ 27,184	$ 27,963	$ 165,732	$2,564,500	$ 2,342,000
1891	13,236	184,106	197,342	431,610	2,111,100	7,413.761
1895	39,245	324,449	363,694	1,012,569	3,017,760	10,645,021
1899	72,018	510,560	582,578	1,809,505	3,579,109	14,368,236
1903	215,852	1,219,435	1,435,288	5,136,668	7,294,050	34,392,303

OF INTEREST TO TOTAL ABSTAINERS.

The death ratio in the Manufacturers Life has always been favorable in both sections, but exceedingly so in the Abstainers' Section. The past year shows a continuance of this favorable experience. The death losses in the General Section were 75.7% of the expectancy, and in the Abstainers' Section only 41.3% of the expectancy. The saving this year from low mortality in this section is therefore 58.7% as against a saving of 24.3% in the General Section, which means much larger dividends for Abstainers. Correspondence is invited.

The following directors were elected:—Hon G. W. Ross, President; Lieut.-Col. H. M. Pellatt, and Lloyd Harris, Vice-Presidents; J. F. Junkin, Managing-Director; R. Junkin, Assistant Manager; Robt. Archer, A. P. Barnhill, S. G. Beatty, C. C. Dalton, D. B. Hanna, Hon. V. W. LaRue, E. J. Lennox, Wm. Mackenzie, D. D. Mann, Lieut.-Col. Jas. Mason, R. J. McLaughlin, K.C., R. R. McLennan, James Mills, LL.D., Hon. J. Ald. Ouimet, R. L. Patterson, Hon. J. D. Rolland, Wm. Strachan, A. J. Wilkes, K.C.

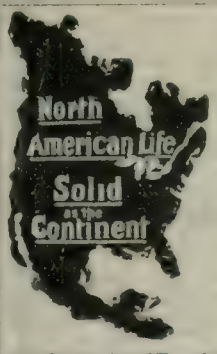
MONTREAL MARKETS.

Montreal, Feb. 10, 1904.

Ashes.—Though there is little doing prices are well maintained at the late high level, with very light offerings. We quote first pots at $6 to $6.10; seconds, $5.65 to $5.70, and pearls approximately at $7.

Dairy Products.—The cheese market is somewhat of a dull, waiting character, with little real business doing on which to base quotations, but from 10½ to 10¾c. seems to be about the accepted figures for fine fall goods. Business in butter is of the ordinary jobbing character, with 19 to 20½c. quoted for winter creamery, and from 16 to 18c. for dairy makes; fine fall grass makes are held at 21 to 21½c. Shipments last week were 15,816 boxes of cheese, and 1,076 packages of butter.

Dry Goods.—On the whole 4th February payments were better provided for than anticipated in some quarters, and several of the larger houses report the proportion of customers' paper met at from 60 to 65 per cent. Travellers' letters, not only from central Canada, but also from the North-West and the Maritime Provinces, all speak of the great difficulty being experienced in covering their routes, and the effects are noticeable in a diminished volume of orders. City retail trade is on the quiet side, the weather being entirely unfavorable to the showing of spring goods.



Strength and Stability

Are the important elements required in effecting insurance, —guaranteeing, as they do—the absolute fulfillment of the contract.

Nothing new is reported in values for the week.

Furs.—The generally blocked state of the country roads apparently affects receipts, which are small for the season. As a result of the apparent decline shown at the recent London sales buyers were disposed to shade prices, notably on black bear, marten, mink and skunk. We quote: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No. 1 choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1. dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—The difficulties affecting traffic in the country are still quite patent in this line, the volume of business reported by wholesalers being only moderate, and collections from interior points show a falling off. In values there have been no late material changes. Refined sugars are reported up 5c. to-day in New York, being the second similar advance in ten days, but local refiners have not yet made any change on quotations. As the result of the war Russian raw beet sugars are up 6c. a cwt. A cable to-day from Barbadoes quotes new molasses at 20½c., cost and freight here, which with duty would make laid down cost about 27½c. Teas continue dull, and the war in the East has not as yet altered local quotations of Japans. Canned corn is held at $1.10 for standard brands in a jobbing way, and tomatoes at $1.05. Shelled walnuts and almonds are reported to be materially advanced.

Leather.—No large sales are reported locally, but boot and shoe men are buying in moderate lots. The freight blockade is affecting business somewhat, as supplies of sole are not coming forward, and there is a notable scarcity of jobbing sorts. We quote: No. 1 B.A. sole, 26 to 27c.; manufacturers' No. 2, 24c.; No. 2 jobbing sole, 25c.; No. 1 jobbing sole, 26c.; No. 1 slaughter, 27 to 28c.; heavy upper, 30 to 33c.; light ditto, 34 to 36c.; French calf, $1.10 to $1.50; splits, Western, 20 to 22c.; pebble, 11c.; buff, 11½ to 13c.; russets, 30 to 40c.

Metals and Hardware.—The continued severe weather, and the difficulty in getting goods moved is also felt in these lines, and business is hardly showing the increase usual to the advancing season, though everybody looks for a good spring trade. In prices there is little new to note. Lead went up 5s. a ton in London as the result of fighting in

Canadian Industrial Blue Book

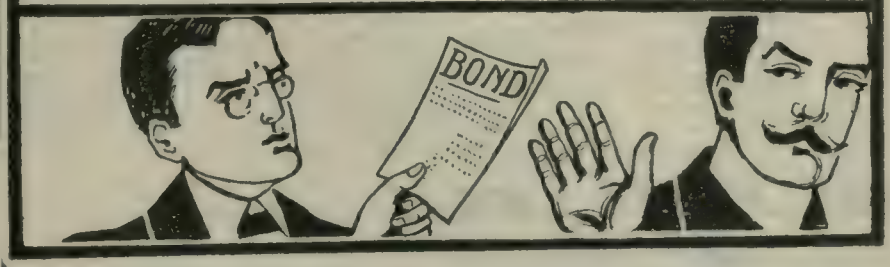
THE MANUFACTURERS' LIST BUYERS' GUIDE OF CANADA, 1904.

Compiled from a personal canvass of all factories throughout the Dominion, covering a period of eighteen months, but revised to November 1st, 1903.

The next issue will date January 1st, 1908, new industries will come, and the old ones will be with us at that date more sound and flourishing than ever.

MANUFACTURERS' LIST CO., Publishers,
128 St. Peter Street, MONTREAL.

An Unreasonable Request



An antiquated custom that of asking one's friends to go on your bond. Would you ask him to insure your house?

When required to furnish a bond of any nature, write to THE UNITED STATES FIDELITY & GUARANTY CO.

Kirkpatrick & Kennard, Managers for Canada, 6 Colborne St., Toronto.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name **THE GREAT-WEST LIFE**; but the above statement exactly describes the happy position of its policy-holders.

INSURANCE COMPANY

All Policies Guaranteed by the LONDON AND LANCASHIRE FIRE INSURANCE COMPANY OF LIVERPOOL.

NOTICE.

The Queen City Fire Insurance Company.

The Annual General Meeting of this Company will be held, pursuant to the Act of Incorporation, on **Saturday, the 13th Day of February, 1904,** at One o'clock p.m., at the Company's Office, Queen City Chambers, 32 Church Street, Toronto.

By order, THOMAS WALMSLEY, Secretary.

Toronto, January 27th 1904.

NOTICE.

The Hand-In-Hand Insurance Company.

The Annual General Meeting of this Company will be held, pursuant to the Act of Incorporation, on **Saturday, the 13th Day of February, 1904,** at Twelve o'clock noon, at the Company's Office, Queen City Chambers, 32 Church Street, Toronto.

By order. HUGH SCOTT, Manager and Secretary

Toronto, January 27th, 1904.

the East, and antimony is firmer from the same cause; local jobbing price for the former is $3.15 to $3.20, and for antimony 7¾c. Ingot tin is steady at 32c. for Straits; copper firmer at 13½ to 13¾c. Prices of iron and iron products are without change.

Oils, Paints and Glass.—Considering the way in which travellers are handicapped by uncertain transportation orders are coming in well. Turpentine has shown some fluctuation, and has recovered some of the decline noted last week, the present figure for single barrels being 92¼c. There is beginning to be a feeling that linseed oil is now on the mend, and that prices will likely stiffen from this out. Sales of fair lots of glass are reported at figures rather below our quotations, which are, however, fairly held for ordinary jobbing bills. We quote: Single barrels, raw linseed oil, 47c.; boiled, 50c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 92¼c., single barrels; olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gallon.; straw seal, 45 to 50 to 55c. per gallon; tinged and brown ditto, down to 35c.; castor oil, 7½ to 8c. for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.50; No. 1, $4.25; No. 2, $4; No. 3, $3.80 to $3.90; No. 4, $3.60; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4½c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in bbls., $1.90; ditto, in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75c.; Venetian boxes, $2.40; 23-lb. tins,

Forging Ahead . . .

In Tendering to its Policyholders and Well Wishers

THE SEASON'S HEARTY GREETINGS

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

is pleased to announce that it has written during the past year

Over Five Millions

of good Canadian Business; and that in all other respects the Company has had a most successful year.

$2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, Feb. 11, 1903.

Chemicals, Drugs, etc.—A fair trade is being done, and prices seem to hold up well. There is practically no alteration in these to record. In New York lycopodium is receiving more attention. Menthol, too, is firmer owing to the outbreak of hostilities in the East. Quinine is also likely to advance from the same cause. Opium is dull. The Baltimore chemical trade is likely to be affected for some time to come by the recent conflagration.

Flour and Grain.—Offerings are light under a good demand, with the result that prices are strong. Ninety per cent. patents fetch $3.25, in buyers' bags, east or middle freights, with extra choice brands a little higher. Manitoba flour keeps steady. Wheat has again made a heavy advance this week, and Ontario is now from 4 to 5c. higher than at last report. Manitoba has gone up from 2 to 3c. Barley is 1c. higher, and so is oats, other grains remaining unchanged. The milling demand is strong, and mills find difficulty in getting their requirements. Receipts are almost nil, owing to the blockaded roads in country districts.

Fruits and Vegetables.—The continued cold weather still affects the sale of fruits to a certain extent. Oranges are on the easy side. A large quantity of frosted lemons are on the market, and help to keep prices down. We quote: Apples: 75c to $2.75 per barrel, according to

Merchants Fire INSURANCE CO.

CAPITAL AND ASSETS OVER HALF A MILLION

HEAD OFFICE

Agents Wanted in All Unrepresented Districts.

grade; cocoanuts, $4 per sack. oranges, Florida, $2.75 to $3.25 per case; Jamaica, all sizes, $2.25 to $3 per box, $3.50 per barrel; California navels, $2.75 to $3.25; Mexican, $2.25 to $2.50; Valencias, ordinary, $4, large, 420's, $5, and large, $5.50; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; celery, 50 to 75c. per dozen; cranberries, $8 to $9.50 per barrel, $1.25 per basket; Spanish onions, $2.75 to $3 per large case, and $1 for small; Malaga grapes, $6.50 to $7.50 per barrel.

Hardware.—Business continues fair, its volume, perhaps, being hardly equal to last year at this time. Shipments have been interfered with, however, by the severe weather, and probably when this changes there will be no cause for complaint. Letter orders for seasonable goods are fairly frequent. The trade in heavy metals is fairly good, and seems to keep on a normal basis with regard to prices.

Groceries.—Sugars continue quite firm, a tendency which is strengthened by an advance of 5c. per cwt. in New York. The trade in general groceries is not active, and there is no feature worth reporting.

Hides and Skins.—A good demand exists for hides and skins, and under a light offering prices keep steady. Sheepskins are firm at 90c. to $1. Calfskins are steady. Tallow remains without change.

Provisions.—A good demand exists for both dairy and creamery butter when quality is choice. For cheese a somewhat easier feeling exists. The receipts of eggs continue very light, and the market for new-laid is, if possible, even stronger than it has been. Chickens are scarce and wanted, and no ducks are coming forward. The hop market is quiet, with 25 to 30c. quoted for new Canadian. Not very much demand exists for hog products. The factories are finding difficulty, however, in getting enough live hogs to keep in operation, and some packers, we hear, have temporarily closed down.

Wool.—Offerings of fleece wool are very light, though a slight export demand is reported. The prices offered, however, show no advance. For pulled wools the demand from the home mills is fair.

The Metropolitan Life INSURANCE CO. OF NEW YORK.

"The Leading Industrial Company of America."

Is represented in all the principal cities of the United States and Canada

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty-five years.

THE METROPOLITAN has Assets of over 89 Millions of Dollars Liabilities of 78 Millions, and a Surplus of over 10 Millions.

Protection from Loss.

The business of boiler insurance is an engineering business; the insurance is only a guarantee of the trustworthiness of the engineering services.

Measure the value of those services and then consider the guarantee. In doing this remember that EXPERIENCE, SKILL, and ABILITY are the determining qualifications of the value of those services.

Insure your boilers in

THE BOILER INSPECTION & INSURANCE CO. OF CANADA,
Canada Life Bldg., Toronto,

which has been in this business for nearly THIRTY YEARS.

Then Insurance.

WILLIAM F. BULLEN, Manager.

London, Ontario, 1904.

Though the exceptional strength of the CANADA PERMANENT MORTGAGE CORPORATION, Toronto Street, Toronto, with a paid-up capital only equalled by three of the largest of Canada's strong financial institutions, makes it a favourite with depositors of large sums, a deposit account may be opened with one dollar.

That dollar, and every dollar added thereto, will bear interest at three and one-half per cent. per annum, compounded half-yearly.

The depositor of a dollar receives the same considerate, prompt attention as the depositor of thousands.

It is not necessary to reside in Toronto to be a depositor with this Corporation.

No matter where you may live, you will find it quite convenient to have your account with it. Send your address for Booklet, "SAVING MONEY BY MAIL."

ARE YOU SEEKING
AN INVESTMENT?

There are a great many people in a large or small way who have money that they wish to place in a safe and reputable investment. We pay five per cent. on our Debentures; interest coupons payable half yearly. . . . . Let us discuss this matter with you. We can show you many good and sufficient reasons why you . should . purchase . our Debentures. . . . . .

We issue carefully revised reference books four times a year.

R. G. DUN & CO.
Toronto, Montreal, Hamilton, London and Cities in Dominion, U.S. and Europe.

In a fire at the works of the American Cereal Company, at Peterboro, on Friday last, the two upper stories of the big mill were badly damaged, the loss being $15,000. It was insured in American companies.

The Great Lakes and North-West Transportation Company will seek the authority of the Dominion Government to construct canals between Lake Superior and Red River, near the city of Winnipeg, and thence north and west through Lake Winnipeg or other waters to the Saskatchewan river and the North-West, to improve the navigation of the Saskatchewan river and tributaries, and generally to improve the navigation of waterways in the North-West, and collect toll for the same and to do a general manufacturing and merchandise business.

A Trip to the British West Indies

is an inexpensive yet delightful way to spend a part of the coming winter. Steamers of our line sail from Halifax every other Monday for Bermuda, Barbados, Trinidad and a number of other Islands. . . .

Write us for a Booklet telling all about the trip.

PICKFORD & BLACK,
HALIFAX.

Mercantile Summary

The St. John Lumber Company, in which a good deal of New Brunswick capital is interested, held its annual meeting in Augusta, Maine, last week, and re-elected its old officers, the Hon. C. E. Milliken, of Augusta, being president. It decided to add to its extensive plant, near Van Buren, Me., a new pulp and paper mill, to work up the forest materials of the St. John river.

Mr. L. B. Contencin, a leading New York fruit merchant, is of opinion that Canada will in the near future be called upon to supply Spanish orange exporters with millions of feet of lumber every year, suitable for orange box shooks. Owing to the development of fruit-growing in California and other states, there is found in the United States a growing difficulty in supplying even the home demand, so that the export of such goods is now largely out of the question.

A paragraph in the Waterloo, Que., Advertiser stated that Mr. N. S. Parker, of Eastman, had expended some labor on his iron mine, situated in East Bolton, and had arranged with the Messrs. McDougall to ship fifty tons per day to their furnaces at Drummondville. It is hematite ore and will mix well with the bog ore of the Drummondville mines. "The Parker mine includes a vein 350 feet long by fifteen feet wide, and it is estimated that there are 300,000 tons of ore in sight." We wrote to a correspondent in the Eastern Townships to ascertain how much of this was true, and received word last Saturday that the statements made were upon the authority of Mr. Parker himself, and must therefore be taken for what an owner thinks his property worth. Our informant says: "Only two cars of ore have been shipped to date; Messrs. McDougall have taken one hundred and fifty tons for experimental purposes, and as yet the results are unknown."

We have received a book entitled "La Compilation des Tarifs avec Tableaux d'Honoraires," by J. L. O. Vidal, advocate of the Quebec Bar. The price, we may mention, is $3. Heretofore, there has been no indexed collection in one volume of the various fees and charges payable to lawyers, notaries, protonotaries, bailiffs, registrars, etc., and it was often times difficult to verify such costs without considerable expenditure of time and labor. This want it is the object of the present volume to fill, and as the larger portion of it is information printed in both French and English, it should prove useful to business men as well as lawyers of both races. It may be stated that while the book was in course of preparation a new tariff of charges for advocates was proposed, but under the circumstances which prevail, it is not unlikely that it will be a long time before the new system is adopted. The author states that when it finally receives authoritative sanction, he hopes to issue an indexed supplement showing the changes.

THE steamship "Whatcom," a sister ship to the "Clallam," which was wrecked with fatal results off the British Columbia coast, a few weeks ago, has been transferred from the Puget Sound Navigation Company to the Alaska Steamship Company, the consideration reported being $125,000.

Mercantile Summary.

THE Coltart-Cameron Company, Limited, has received a charter from the Manitoba Government to carry on a general merchandise business in Winnipeg. Authorized capital is $100,000.

THE Dominion Government has granted the British Yukon Railway Company a right of way to construct a telephone line from White Horse to Dawson City.

THE West Canadian Collieries, Limited, a company incorporated in Great Britain, is applying to the Dominion Parliament for power to carry on mining in the Yukon district. The authorized capital is £1,000,000.

THE J. M. Ross Sons & Company, Brampton, Ont., total capital stock $200,000, have received a charter from the Ontario Government, authorizing them to manufacture stationary and traction engines, threshing machines, etc.

THE Montreal Harbor Commissioners have awarded a contract for supplying 7,500 tons of stone blocks for paving the wharves to Messrs. Wighton, Morrison & Co., Montreal, the price being $38,555. They are also discussing the purchase of a floating crane.

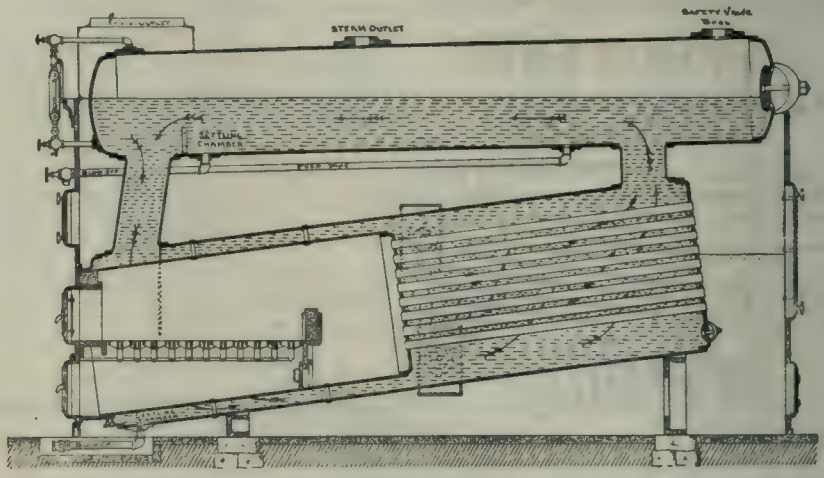
THE weather has been severe this winter in Prince Edward Island as well as in other parts of the Dominion. The Government steamers, which are supposed to maintain the winter service between the Island and the mainland have been icebound for some time past, the "Stanley" at Pictou, N.S., and the "Minto" at Georgetown, P.E.I. Both vessels are safe in harbor, but the ice in the straits is impassable.

NO HEAT WASTED.



The Mumford Standard Boiler

is internally fired, and no heat is wasted by radiation as in an externally fired boiler.

The furnace is long and of large diameter, with greatest height at the back, giving good combustion.

The boiler is built with a sheet steel case ready for use when it leaves our works, or without case, for brick-setting, as preferred by customer.

Mercantile Summary.

A COMPANY is being formed to build and operate a railway from near Chatham Point, Vancouver Island, to Comox, Alberni, and some point on Quatsino Sound.

IT is stated that the Canadian Pacific Railway Company will most likely begin work on the extension of the Crow's Nest Pass Railway into Macleod during the coming spring.

THE Board of United States General Appraisers has handed down a decision that no countervailing duty should be levied on pulpwood coming from the Province of New Brunswick.

H. N. BATE & Sons' grocery store, Ottawa, and the upper part of the same building, occupied by L'Institut Canadien, have been gutted by fire at a loss of about $10,000; mostly insured.

THE Berlin, Waterloo, Wellesley and Lake Huron Railway Company want power to build and operate a railway from the village of Wellesley to Stratford, St. Mary's, Clinton and Bayfield, also to acquire other lines, hotels and pleasure resorts.

THE American Paper and Pulp Association, representing 800 mills, have decided not to employ any man who goes on a strike until the termination of the trouble, and will in future require of new employees certificates from former employers. They have refused a request of the American Federation of Labor that the union label be used.

A POPULAR and generally respected member of the business community of Montreal passed away on Saturday morning last with the death of Mr. Simon Silverman, head of the firm of Silverman, Boulter & Co., furriers, at the age of 60 years. He was born in New York, but had been a resident of Montreal for fifty-five years.

CHAS. SAUVE & Co.'s dry goods store, and A. Belanger's drug store in Point St. Charles, Montreal, were last week damaged by fire to the amount of $9,000.

MR. C. T. DAYKIN, and others, of Lacombe, Alta., are organizing a company for the manufacture of brick. They have acquired 100 acres of clay land at that place, and hope to begin operations as soon as the weather permits.

THE Canadian Pacific Railway Co. is planning extensive operations for its western division during the coming season. Among these will be the building of heavy repair shops, both for freight and passenger equipment, at Calgary, a new station at Medicine Hat, and additions to the one at Moose Jaw. A branch line east to Wetaskiwin, and another to Lacombe are also projected, and both will afterwards probably be extended considerably. Preparations are being made for a heavy influx both of immigrants and stock. A beginning has already been made on the irrigation works in Alberta, and bids are now being considered in connection with the main ditch, which will entail a large expenditure of money.

Mercantile Summary.

THE Canadian Northern Railway Company proposes to lease, purchase, or amalgamate with the Northern Extension Railway Company.

THE Palace and Victoria hotels, at Valleyfield, Que., together with several stores and dwelling houses, were last week destroyed by fire at a loss of about $40,000; covered by insurance.

ENNIS & STOPPANI, stockbrokers, of New York, will, we are told, open offices at 21 Melinda St., in Toronto, about March 1st. Mr. J. L. Mitchell, well known in broking circles, will be manager of the Toronto branch.

THE Hudson's Bay and North-West Railway Company are asking the Dominion Legislature for an extension of time in which to complete their main line and branches, and for authority to make improvements on various rivers and waterways.

IF you have $19 to put to use, pay $10 for the article and $9 for the advertising. I can outtalk any man but a printer. The man who publishes a paper and every week talks to a thousand men, while I am talking to one, is the man I am afraid of, and I want to be his friend. The business man who does not advertise is a poor stick. Trade with the men who advertise if you want to get bargains and the worth of your money.—P. T. Barnum.

LATE failures in the Maritime Provinces are reported as follows: J. P. Hogan, a St. John tailor, has had to close his doors, and is said to owe $7,000, largely to one Montreal house, while assets are only about $2,700.——At Andover, N.B., W. H. Kelly, harness-maker, has assigned to the sheriff. He is a young man who only began three years ago, and previously worked with his father in the same line.——T. L. Cook, who has been in general trade for 15 years, at Murray River, P.E.I., is reported to be asking an extension. A year or so ago he lost a cargo of produce on the Nova Scotia coast, which apparently crippled him somewhat in his finances.——J. D. Cameron, general merchant, Mabou, N.S., lately reported insolvent, is offering his creditors 60 per cent. of their claims, payable in 3, 6, 9, and 12 months.——Reid & Creighton, doing a feed and commission business at Sydney, N.S., are trying to make a settlement of their liabilities at 50 cents on the dollar. They only began business in the fall of 1902.——W. C. Chisholm has long been engaged in general business at Heatherton, N.S., with a hitherto good record, and has been considered a fairly prosperous man. A lumber business in which he became interested lately has, however, proved unprofitable, and he has been found irregular in payments the past year or so. He now makes a proposition to pay his creditors 40 cents, cash, or 50 cents on time, liabilities being reported about $11,000.

Can you Read? Can you Write?

Home Life Association of Canada.

The annual meeting of the Home Life was held at the head office in the Home Life Building, Toronto, and was well attended. The report submitted of the year's business was gratifying in every particular to those assembled. It was shown that applications for insurance to the amount of $1,243,450 had been received and considered by the Association, and that policies were granted for $1,143,000. The net assets now amount to $484,584 at the end of 1903, and with the uncalled capital the Association holds $1,319,401.18 as a security to the policyholders. The premium income increased during the twelve months 28 per cent., or from $93,654.78 to $119,663.73, and the expense account was reduced by $3,741.51. The whole authorized capital of the Association, which is $1,000,000, is now subscribed, and the paid-up capital is $165,183.

Several changes have taken place among the officers. Hon. R. Harcourt, who has been president of the Association since its organization, has retired from that position, and is succeeded by John Firstbrook Esq., of Toronto, president of the Firstbrook Box Company, and A. J. Pattison, Esq., becomes 1st vice-president. The affairs of the Home Life are in a thoroughly healthy state, and prospects for a good year's business during 1904 are considered exceedingly bright.

The directors elected at the annual meeting were: John Firstbrook, president; A. J. Pattison, 1st vice-president; John S. King, 2nd vice-president; John S. King, M.D., medical director; J. W. Curry, K.C.; Rev. W. Briggs, D.D.; F. Diver, John Hillock, R. A. Wood, Toronto; Thomas Elliott, Brantford; Prof. N. F. Dupuis, M.A., Kingston; George E. Amyot, Quebec; James R. Inch, LL.D.; Hon. J. W. Longley, Prof. J. F. Tufts, M.A., D.C.L., Maritime Provinces; Thomas W. Boddy, J. Stanley Hough, Ashmore Kennedy, H. C. Graham, J. H. Spencer, Manitoba and Territories; Thomas McCaffry, Charles E. Stevenson, British Columbia.

Capital Wanted.
$20,000 in a Furniture and Carpet business in a city of 50,000 population, in one of the Maritime Provinces. Business established 50 years. Turnover $120,000 in 1903. For particulars address "B," Monetary Times Office.

A United States syndicate has purchased the deposit of talc recently discovered near Louisburg, Cape Breton, with a view to developing it on an extensive scale so soon as spring opens.

The Mayo Mining and Development Company, Windsor, Ont., capital, $250,000 has received a Dominion charter for the purpose of carrying on all branches of a mining milling, reduction and development business. Among the provisional directors is Hon. Richard Harcourt.

At the annual meeting of the shareholders of the Montreal Cotton Company, held last week, the following were elected directors: Mr. S. H. Ewing, Mr. H. M. Molson, Mr. Jacques Grenier, Hon. J. K. Ward, Hr. Hamilton Gault, Mr. R. R. Stevenson, Mr. James Rodger, Mr. James Wilson. At a later meeting of the directors, Mr. S. H. Ewing was elected president, and Mr. James Wilson, vice-president.

The New York World sends us a post-card in the following terms: "We are sending you by this mail The World Almanac and Encyclopedia for 1904. It is the best almanac The World has ever issued—which means, we think, the best almanac anybody ever issued. Take it and be glad!" We have taken it; and we are satisfied. The book has 594 pages, of which only 120 are devoted to advertisements, while 30 pages are given up to a written and illustrated description of the St. Louis Fair. This leaves 444 pages to tell about the statistical features of the United States in general, New York in particular, and the rest of the world in between. All sorts of information to be found in it. Any one who chooses to send 35 cents to the Press Publishing Co., Pulitzer Building, New York, may get a copy of this very convenient reference almanac.

Sealed tenders endorsed "Tenders for Debentures" will be received by the undersigned for the following Debentures up to Friday, 4th March, 1904.

$25,000 DEBENTURES.

Total amount of issue $25,000.00. Term 20 years. Dated Sept. 1st, 1903, payable Sept. 1st, 1923. Interest 4½ per cent. payable 1st January and July each year. Denominations of $500 each, with half-yearly interest coupons attached.

Purpose of issue to extend the Electric Light and Telephone System, owned and operated by the town. Issued under By-law No. 276

Total Assessment $700,000 (exclusive of exemptions.) Debenture Debt $70,000. Floating Debt nil.

$2,417.00 DEBENTURES.

Total amount of issue $2,417.00. Term 7 years, dated Oct. 1st, 1903, payable Oct. 1st, 1910. Interest 5 per cent payable yearly on 1st October. Denominations, 4 of $500.00 and 1 of $417.00, Interest coupons attached. Local Improvement Debentures. Issued under By-law 284.

JAS. W. PATTISON,
Neepawa, Feb. 6, 1904. Sec'y-Treas.

THE annual general meeting of the shareholders of the Merchants' Cotton Company was held in Montreal last week, when the following board of directors was elected: R. B. Angus, A. A. Ayer, John Beattie, J. P. Cleghorn, Jas. Crathern, Jonathan Hodgson, Hon. Robert Mackay. The statement of business presented for the past year did not show earnings that warranted the payment of a dividend. The directors chose James Crathern president, and the Hon. Robert Mackay vice-president, Mr. W. S. Barker is secretary-treasurer.

Mercantile Summary.

AT the annual meeting of the Ottawa River Navigation Company, the directors' report was adopted. The old board was re-elected: Mr. H. W. Shepherd, president; Mr. H. Wallis, vice-president; Mr. R. W. Shepherd, managing director; Messrs. R. Bolton and A. F. Riddell completing the board.

C. DUCHARME, general store, Magog, Que., has assigned. He has had a rather unfortunate business record, having proved unsuccessful, it is reported, on several previous occasions, the last failure having only been in 1902, when he was operating under cover of his wife's name.——Mrs. Joseph Plante, milliner, Sorel, Que., has compromised liabilities of $1,300 at 40 cents on the dollar.——J. R. Dube, general dealer, Bécancour, Que., lately assigned, is offering 40 cents on liabilities of $4,775.

THE annual report of the Richelieu and Ontario Navigation Company shows an increase of $68,135 in the gross earnings, compared with the previous year, and an increase of $15,047 in the net profits, as under:

....	1903.	1902.
Gross receipts	$1,104,801 97	$1,036,666 27
Operating exp.	894,745 66	840,449 03
Fixed charges	20,423 74	21,632 32
Net profit	$189,632 57	$174,584 92

Two semi-annual dividends of three per cent., amounting to $187,920, were paid. A clause of the report says: Your directors, recognizing the gerat importance of modern improvements, and to effect greater and permanent economy, are enquiring into the construction of a marine railway dry dock to be built at Sorel.

PETRIE'S MONTHLY STOCK LIST. Those in want of NEW and SECOND-HAND MACHINERY should send for this. - **H. W. PETRIE,** 131-145 Front Street West. Toronto. Ont.

IN September, 1902, Sanderson & Mitchell succeeded to the general store conducted by Sanderson Bros., at Wroxeter. A statement made by them last September showed a surplus of $2,900 over liabilities of $1,400. Now they assign with assets and liabilities each about $2,000.

N. E. HICKS started a general store at Norwich, in 1900, having at that time a stock of about $10,000, and owing only $1,500. The business does not appear to have had the care it demanded, and as a result an assignment has been made with liabilities of about $8,000. He has a stock on hand of about the same amount.

ON Saturday last, the annual meeting of shareholders in the Ontario Wind Engines and Pump Co., Limited, was held in Toronto. A prosperous year was reported; the volume of business for 1903 was 25 per cent. above preceding year. The company is opening a branch at Winnipeg in order to take care of their increasing North-West trade. The company are steadily adding to their plant in order to keep pace with increasing demand for their goods. The former board of directors was re-elected.

V. SKAPERDAS, a Macedonian furrier, who started a small manufacturing business in Montreal two or three years ago, has consented to assign. He had previously been for some years in the same line of work in New York.——M. L. Simon, a clothier in St. Cunegonde suburbs, Montreal, has compromised, liabilities of $3,200, at 25 cents.——H. H. Lord, doing a small dry goods business in the east end of Montreal, has assigned. He is now well up in years, and been in the trade as clerk and dealer for some 35 years.

LECKER BROS., who came to Canada from Austria two or three years ago, and have been engaged in a peddling business on the Gaspé Coast, with headquarters at New Carlisle, have assigned on the demand of a Quebec wholesale firm, and are said to owe $4,200.——In business for only about a year, L. Corriveau, general dealer, of Beaupré, Que., has assigned. Previously he was of Fortier & Corriveau, doing business at Montmorenci Falls. A lack of steadiness is said to have contributed to his failure. ——J. K. Milford, harnessmaker at Buckingham, Que., one of the sufferers by the late fire there, is asking creditors to accept 15 cents on the dollar. He owes about $800.——C. Descoteaux, tailor, St. Leonard, Que., recently reported as assigned, is offering 50 cents on liabilities of $1,650.——J. W. Aubin, hotelkeeper, Shawinigan Falls, Que., has assigned, being another of the victims from the "boom" reaction in that town. He is also Postmaster, ran the local telephone office, and acted as railway, steamship and land agent.

Mercantile Summary.

In our issue of February 5th, we were unable to give the figures in connection with the assignment of A. R. Kerr & Co., of Hamilton. They are as follows: Assets, $46,800; liabilities, $48,900.

At the annual dinner of the Montreal Gazette staff on Saturday evening last, Mr. Richard White, the president, stated that if spared till January next, he will have completed fifty years in journalism. He began, if we mistake not, in Peterboro, went next to Hamilton, and then, about 1868, to Montreal with his brother, the late Hon. Thomas White.

Beardsley & Co. conducted a general store at Moorefield, Ont., Mrs. E. Beardsley was sole owner, the store being under the management of her husband. A branch store was also conducted at Dornoch. This business was disposed of recently at 60 cents on the dollar, and the Moorefield branch was destroyed by fire last month. Now an assignment is made to E. R. C. Clarkson.

The Department of Customs has issued new regulations as to the free entry of returned packages and coverings, and of articles of Canadian growth, produce or manufacture, returned after exportation. These regulations provide that any package used in the transportation of goods to and from Canada may be returned into this country within three years free of duty, provided they have not been advanced in value or improved in condition by any process of manufacture, or other means. Collectors are enjoined to take special precautions to see that returned packages admitted free are properly identified, especially noting that they have been used, and are not new.

The following is a record of patents granted last week to Canadian patentees in this country and the United States: Canadian—A. E. Henderson, anti-friction bearings; W. H. Harvey, method of preserving timbers and piles; J. H. Stanton, lamp supports; A. Beauvais, ploughs; J. W. Mackenzie, road-beds for railways; A. E. McLean, car fenders; C. L. Gray, mattress supporting appliances for bedsteads; H. Sauve, potato diggers; C. Schallberger, preservative and protective paint composition; W. S. Bowness and C. L. Jones, drawing instruments; G. B. Baby, electric fuses; J. Maxwell, hay-loaders; H. Dreany, explosive for all blasting purposes; W. B. Jarvis, separable concrete moulding forms; E. C. Mahony, portable wall sections for house building; W. Woods, cigar caps; S. Brown, foot rest attachments for sewing machines; P. Bolton, knives for cutting and matching lumber; J. H. K. McCollum, turbine engines; F. Whitcomb, threshing harvesters; D. S. Garrison, cattle guard; W. L. Park, wagon tongue supports; H. L. Cox, aseptic ligature receptacles; D. Maxwell and D. Maxwell, hay loaders. United States—I. Deutsch, pole-changers for dynamos; J. W. Fraser, crib-work or the like; D. R. Gardiner, pneumatic blower; J. A. Gurd and J. R. Gurd, broom girdle; J. Laurin, seam finisher for shoe sewing machines; P. V. Simmonds, gravity lock; J. F. Templeton, pneumatic straw stacker.

THE BALTIMORE FIRE.

It is not yet possible to get an authentic statement of the loss by the great fire of last week in Baltimore. But some facts help to illustrate what vast confusion there must be. The following despatch, forwarded to us on Thursday afternoon last (too late for that issue), by Messrs. Kirkpatrick & Kennard, the Canadian managers of the United States Fidelity and Guaranty Company, is from the president of that company, Mr. John R. Bland, at Baltimore. It gives a faint idea of the terrible situation existing in that city. The following are the terms of the telegram: Baltimore, Md., via Washington, D.C. Feb. 9th, 1904.

"We, together with portion of central section of city, passed through an ordeal of fire with total destruction of Home Office building, which, however, is fully insured. Our securities and investments are all lodged in deposit vaults of trust company, and are unquestionably safe. The financial condition of the company is unaffected. Books and records al saved, and the business will proceed without interruption at temporary headquarters, 16 West Saratoga street, Baltimore."

It has been estimated that the area of the business quarter of Baltimore burned over is 140 acres, and that the buildings destroyed numbered 2,500, representing a loss of $125,000,000. The Chicago fire, of 1871, burned over 2,124 acres, destroyed 17,450 buildings, and the total loss was $196,000,000 with $88,000,000 of insurance. It will thus be seen that the destruction was vastly greater by the later fire in proportion to the area burned over and the number of buildings destroyed. But in Baltimore fire affected the business part of the town, where buildings were much crowded together, and many of them lofty. In 1871 there were no "sky-scrapers" in existence, thank Fortune.

Reduced Cost of Production

is the goal all are striving for.

One of our Band Mill customers in comparing the **Band** with the **Gang** said:
"It's quality, not quantity, I'm after. I have stood over my men this year and insisted on quality. In selling my cut I arranged for an advance of 25c. per M for every 1% advance in quantity of the cutup and better grades By the use of the Band I have secured 8% advance, which means $15,000 extra profit this season."

Several gangs have been discarded for the Pony Band double cutting, adding much to quality while only slightly reducing quantity. Many hundred single and double cutting bands running in Canada. Simple—easily managed—it's worthy of investigation.

MORTGAGE LENDING COMPANIES.

The lending of money on mortgage has for years given employment in Ontario to large amounts of capital, managed by a group of loan companies. And although there is not to-day the same ratio of profit possible in this business that there was thirty or twenty years ago, because of the lessened margin between the price at which these companies borrow money in Britain or in Canada, and the price at which they lend it, still there is a profit in it. This is exemplified in a very satisfactory way by the operations of the Huron & Erie Loan Company, of London, which has just held its fortieth annual meeting. This is one of the great companies of the kind among us. It has loans exceeding seven millions, and its total assets exceed eight millions. For many years it has maintained its dividend of nine per cent. In addition to $2,394,000 of shareholders' capital and accumulated profits, it has borrowed $1,472,000 in Great Britain, and $4,106,000 at home, all of which, but some half million in bonds and debentures, is invested in mortgages on realty. The profits of the year were good, and besides paying all expenses and the dividend, it was able to add $20,000 to the reserve and to carry forward nearly $20,000 more. Better rates of interest have been found to prevail during the year.

The president entered somewhat elaborately into explanations as to the nature of the lending and borrowing powers conferred upon this company. It is well that he did so frankly and at length, for it is a subject upon which the public is apt to be curious since the lesson that has been given in the recent fate of two St. Thomas loan companies. A rare thing is it to find a board of directors voluntarily limiting their powers of lending, but this is what the Huron & Erie board appear to have done, since they assure us through the president that the private Acts which they have procured give them less latitude in lending than either the Dominion or the Ontario Acts, by both which it is governed. The next paragraph, which describes the regulation of the company's lendings is interesting. Three transactions with the Atlas Loan Company are described very fully: on only one of them is there any chance of a loss, and this has been provided for in the profit and loss account. Mr. Leonard showed how the borrowings of the company abroad have not increased, because of the price of Old-Country money, the borrowings in Canada by way of debentures, and deposits have increased steadily for ten years, and now exceed two and a half millions.

The operations of the Toronto Mortgage Company for its latest year resulted in gross profits of $115,986, but after paying all expenses and the usual dividends, there remain (adding the balance brought forward), net profits of $36,000, which shows a decided ratio of increase over the net results of 1902. This appears to have been achieved, not by any increase in the extent of business, but by realizing upon some long held assets and by the prudent husbanding of resources. For example, where at the beginning of last year the company held $29,000 in vacant lands, the amount is now reduced to less than $15,000. A noteworthy clause in the report gives the assurance that the revenue taken credit for has been actually exceeded by the cash receipts for interest and net rentals. Sterling debentures show a decrease, the company preferring to take some of them up rather than pay four per cent. for renewals or for new money. Currency debentures show an increase. The directors have done a sensible thing in investing a sum equal to half the reserve fund in securities convertible at once into money. Events have shown that the valuation of assets made in 1899 is confirmed by the prices realized on sales of real estate in the company's hands. The shareholders may well feel pleased with the results of twelve months' business.

Not many unusual features are to be seen in the annual report of the London & Canadian Loan and Agency Company, Limited. The volume of its business remains about as before, and its transactions are marked by the usual safety and conservatism of the company's management. It is evident that economy is exercised, for the expenses are not large for the volume of business. The debenture obligations are nearly unchanged, and the amount of debenture stock remains as before. Mortgage loans are somewhat lessened compared with 1902, and call or short date loans on debenture or other security are increased. Net earnings enabled the payment of the usual divi-

dend and the carrying of a larger sum forward than in the preceding year. The report remarks that while there was little or no change in rates of interest in Manitoba and the Territories, the rates in Ontario advanced somewhat in 1903. We observe the extension of the operations of the company into Eastern Assiniboia in September of last year, and the appointment of a Regina firm as chief agents.

A HANDICAP TO MANUFACTURE.

There are some Canadians, we find, who are sceptical about the statement that the preference given Great Britain in duties upon manufactured goods is affecting injuriously certain industries in this country. We have cited the disadvantage at which more advanced kinds of steel products find themselves, as an example of this sort of handicap. Another instance is furnished by the textile trade. A shareholder in one of the Canadian cotton mills wrote to the Montreal Gazette last week pointing out that the importations of white cottons in 1897 were $182,973 in value, and that in the year closing June last, they had increased to $841,191. "The census returns now being published show that the total manufacture of cotton of all kinds in Canada amounts to about $12,000,000 per annum, and the Government returns to June, 1903, give the total amount of imports as $8,756,189. Canada is, therefore, not manufacturing 60 per cent. of its consumption of cotton goods and is prevented from running its mills to their full capacity on account of these importations."

This statement is accentuated by further data, which go to show that the preferential tariff operates more heavily against the mills in this country making white and grey cottons than upon those making colored. It is asserted that the colored cotton companies are earning sufficient to pay dividends, under a 35 per cent. tariff, less one-third, while the mills making white and grey, under a 25 per cent. tariff, less one-third, are not able to pay dividends. This is not because our white and grey cotton mills have not first-class machinery, nor is it, we conceive, because they are ill-managed, seeing that they have, so far as we can learn, the same managers they had when they paid regular dividends. The inference is plain that they are handicapped by the tariff, and that 13 1-3 per cent. is not enough to keep English white cottons out. This is another argument for revision of the tariff which in the case of an important article of universal use discriminates unduly. Why should a colored cotton mill have ten per cent. more protection than one which makes white goods, when the latter is seriously hampered by the difference?

MORE ADVANCES IN COTTON GOODS.

The Dominion Cotton Mills on the 13th inst. issued a list showing still further advances in prices of their goods. The prices will now be as follows: Magog tweeds, 12c.; heavy moles, 18½c.; extra heavy moles, 22½c.; A duck, 10c.; AA duck, 12c.; double drill, 11½c.; H twill, 13½c.; HHH print, 10c.; XXK apron print, 12½c.; Salisbury and velour suitings, 9½c.; G. C. indigo prints, 12½c.; twill cretonnes, 9½c.; Ottoman cretonnes, 12c.; oatmeal cretonnes, 13½c.; sateens, 12½c. The mills claim that these prices are based on 12½c. raw cotton, and that if the latter stops at its present excessively high market value, further advances are bound to follow so soon as present stocks are exhausted. To give the retail trade an idea of the extraordinary increase in values it may be noted, for example, that heavy moles, which six months ago stood at 14c., are now selling at 18½c., and that Salisburys and velours, which at the same time sold for 6¾c., are now held at 9½c. the yard.

Staple goods of all descriptions are very firm in price, and there seems no likelihood of any reduction for a long time to come. Wholesale merchants report that orders for spring delivery were plentiful and that these are now being shipped out, though the tied-up condition of the railways is causing a good deal of inconvenience to consignees.

FARM PRODUCTS.

Creamery butter is scarce, because owing to the bad state of the roads throughout the country, not only have deliveries been short, but little milk has gone to the factories. Prices are consequently higher and the chances are that if receipts do not increase soon, they will become higher still within the next few days. These remarks apply also to roll butter, which has been coming forward in but small quantities. Nothing new has developed in the cheese situation. The conditions which apply to the butter market do not apply to cheese, none being now made, but there is a fair quantity in stock and this keeps the market supplied.

Trade in hog products continues quiet, though prices keep pretty firm. The receipts of hogs have been small. Lard is firmer, though there is no quotable change in prices. Packers do not appear to be anxious sellers, as the stocks in hand are not large.

With regard to eggs, the famine still continues. Practically no stocks are now held, and the dealers who have any in hand are getting practically any price they choose to ask. The result is that very few eggs are being consumed. Toronto and several other centres have probably never been so bare of eggs at this season of the year as they are to-day. A few new-laid were delivered in Toronto last week, but, perhaps, owing to the railroad difficulties, practically none have made their appearance this week. The former have sold at 38 to 40c., which certainly is a prodigious price for eggs. At the same time, why should people not look upon out-of-season eggs as luxuries of the same kind as any other out-of-season articles? For good oranges they will pay 50c. or 60c. per dozen just now. A small box of strawberries, which in their season will fetch 5c. to 8c., would at this time of the year realize 50c. or 75c. Eggs intrinsically are certainly worth just as much to those who have the money. An egg is not only a delicacy to the epicure, but an almost necessary food to the invalid. Why, then, should it not be worth 5c. at a time like the present, when it is so rare an article, and the cost of production is so high?

THE BALTIMORE CONFLAGRATION.

Recurring to the great fire in Baltimore, as an object lesson of to-day, for business people of to-day, we have been struck with the appearance of the devasted portion of the city shown in a photograph taken on the Tuesday after the fire. Here amid jagged ruins of brick and stone buildings of various heights and kinds stand yet, looming above the smoke, the frames of several of the fifteen or twenty-story steel structures, their floors gone, their roofs gone, their contents burned to ashes: you can look through and through them and see the sky beyond. These were the modern "fire-proof" buildings. How much fire-proof they were in a conflagration has been tested now. One of the editors of the New York Chronicle, Mr. Miles M. Dawson, went to Baltimore on the Monday night and tells what he saw and what he learned. He went inside of the fire lines observing and enquiring diligently. "Firemen tell me," he says, "that their difficulty in dealing with the spread of the fire to these tall buildings was their height. They could not scale them; they could not force water up to the higher stories from the street; and they were soon driven out of the interior. . . . The fact is that, while these buildings were not proof against burning, they were of the greatest assistance in checking the spread of the fire; for they did not fall upon other buildings, scattering fire for blocks. Instead, they simply sent into the air in smoke and flame, all their inflammable contents, and were done with it.

There must have been in the minds of observant men for years the gravest apprehensions as to the fate of such sky-scraping buildings, and their occupants in the event of fire. Happily in this case the occupants had time to escape, for only one life, that of a fireman, is known to have been lost. That these tall structures are dangerous to live in or to work in is shown by what Mr. Dawson has said above. Now he tells us of a fire-proof structure which did *not* burn, namely, the Government Building, six stories high, from the roof of which the best of the fire-fighting was done. This, in his opinion:

"This shows beyond a question that what we should have, are fire-proof buidings, of not more than six or, at the most, eight stories. Such would be very nearly indestructible.

"Investigation as to the relative virtues of steel and iron, of concrete and other fire-proofing material, and the like, must necessarily be deferred and must also be undertaken by persons who are better acquainted with the subject.

"It is too early to prophesy what will be done to prevent such a disaster in future; but one may at least hope that Baltimore will by its building ordinances, require fire-proof construction and limit the height of buildings, thus setting an example to the world."

Some people have had the sense, notwithstanding all the boasted safety of modern steel and brick "fire-proof" buildings, so-called, to see that such buildings, if stored with inflammable merchandise, would burn, and their stocks with them, in case of a conflagration. And here is a frightful proof of the fact. In Baltimore were a number of buildings put up after the most improved fire-proof methods. But, as a New York paper puts it, "that such a thing as this disaster could take place and block after block of this modern city could disappear as readily as the interminable frame rows in Aalesund, Norway, the other day, or the incongruous mass of frame and brick buildings in Jacksonville, Florida, is enough to make us all feel that it is time to consider well what we have done and are now doing. Either insurance engineering must go forward and must become a perfect art; or we must resign ourselves to expect that fire will everywhere now and then fall upon our great cities, and consume them, no matter what precautions have been taken for their protection."

To save a city, or any large district of one, from destruction by conflagration it is not enough to build houses of steel and brick, to festoon them with fire hose inside, even to put iron shutters on their hundreds of windows as long as their tops reach the clouds. In the hurry of a panic even such things are inoperative. The laying-out of a town must be modified so as to evade the likelihood of a fire-sweep; streets must be widened and open spaces left that will arrest the sweep of flame; architects and builders must decide, too, upon what materials can best stand great heat, and property-owners must call halt in the height of Heaven-assaulting structures. Such matters are for *every* citizen to consider, for the risk of conflagration is always with us.

A NOTEWORTHY INDUSTRY.

People have heard from time to time of the Crow's Nest Pass Coal Company, its enterprises and heavy outlays, its difficulties with miners, its occasional regrettable accidents, such as are inseparable from all undertakings of the kind. But very few, probably, who had not visited the mines of the company in British Columbia, had an adequate idea of the extent of its operations, or how great a factor it is in the industrial development of western Canada. Some statements made and illustrations given at the annual meeting on Friday last, by the president and first vice-president, make more clear the large and rapidly growing interests of the concern, and show what a vast sum of money may easily be absorbed in its working. The company has installed three excellent waterworks systems, sufficient electric lighting plants and a telephone system, and owns the branch line of railway running to its mines at Morrissey, which it is now operating. From the new town-site of Morrissey Mines, $35,712 has been realized by sale of lots. Nearly a million dollars was spent during the year on development. It is to be remembered that there is a very large market for coal and coke at the great smelting centres in the state of Montana, just to the south of the Crow's Nest collieries reached by the extension of the Great Northern Railway to their mines, and that a very largely increasing and expanding market for both coal and coke in this district as well as in the province of British Columbia may naturally be looked for by the company.

Said Senator Cox: The coal produced during the year amounted to 661,118 tons, as compared with 442,049 tons in 1902. Of this tonnage 279,334 was sent to the coke ovens where it produced 167,989 tons of coke; while of the balance 381,784 tons was disposed of as merchantable coal, and 22,000 tons burned under the boilers. The new mines opened during the year were:—At Coal Creek, 3; Michel, 2, and at Morrissey, 2, making seven in all. The construction of 492 ovens was commenced during last year; 252 at Michel and 240 at Morrissey. Of these 198 at Michel and 148 at Morrissey were completed, bringing the total number of ovens now constructed up to 982. The remainder of the ovens are to be completed early this spring.

Further interesting statements were made by Col. Pellatt. He gave a graphic illustration of what the daily

output of the mines was by stating that it required 100 ordinary railroad cars, each of 30 tons capacity, to transport 3,000 tons of coal, which is the quantity put out every day, and illustrated how much machinery it took to keep this moving by explaining that not one pound of the coal ever stops moving from the moment it leaves the working face until it finds itself in the tipple and thence in a railroad car. He further pointed out that the company practically owed no liabilities except to its shareholders, and that the item in the assets—mines, real estate, plant and development, amounting to $5,418,435.51—nearly five and a half millions of dollars—really represented actual cash put into plant, development and machinery. This magnificent property of the company, 250,000 acres in extent, wealthy in coal and timber, and full of possibilities as to new town-sites and farms, was therefore not taken into account at all in this item. It is very satisfactory to know that a contract has been made with the company's employees to last for three years, governing wages and hours of labor. This gives promise of large and uninterrupted development. For nearly a year, Mr. G. G. S. Lindsey has performed the duties of managing director of the company. He retains these duties, with the title of third vice-president, and the directors are warm in their appreciation of his valuable work.

A CANADIAN VIEW OF PREFERENTIAL TRADE.

Prof. Adam Shortt, of Queen's University, has written a pamphlet upon "Imperial Preferential Trade from a Canadian Point of View," for a copy of which we are indebted to Messrs. Morang & Co., Limited, Toronto (price 25 cents). At the start we may say that the opinion held and ably propounded by the Professor upon Mr. Chamberlain's scheme is a very adverse one. He first protests against the manner in which the term Imperialism, in its earlier day the expression of a generous policy of mutual sympathy and co-operation in promoting noble ideals of civilization throughout the Empire, has become monopolized by special organizations, which, he avers, have identified it with a narrow, mercenary and unspiritual conception of Imperial destiny. He next enquires into the nature of the problem which Mr. Chamberlain and his friends present for colonial approval or disapproval, and here the Professor finds that a sort of two-faced campaign is being waged. In other words, the preferential scheme in Britain and the preferential scheme in Canada are utterly different. The attempt to give people in Great Britain the impression that Canadians are heartily in sympathy with the proposals is to be deprecated in view of the fact that we, as a whole, have no intention of conceding so much as apparently is asked. "Apparently," because, in the opinion of a good many, Mr. Chamberlain's utterances on the real meaning of his campaign, have so far been studiously vague. But it is when the Professor begins to study precedents and examines the actual attempts which have been made by Britain in the past to realize a unified self-dependent Empire by a system of mutual preferences, doing away with industrial competition between the Mother Country and the colonies, that this literary contribution will prove of most interest. The lesson he draws from these attempts is that instead of drawing closer the bonds between Britain and the colonies, they did much to strain it, to such an extent, indeed, in one case that the strain reached the breaking point in the American Revolution, and that it was not until these abnormal preferences and other forms of coddling were removed that the true tie holding together the Mother Country and her daughters, became visible. To this strained relationship, too, and the looking for assistance outside her own resources to which it gave rise, the Professor attributes much of the slowness of progress made by this country during many years. The booklet is a valuable contribution to one of the most important controversies in the Empire's history, and while it would be too much to say that it settles the question against the new fiscal proposals, it certainly should help to correct the attitude of many people who openly espouse their cause with but a very loose understanding of the real and many-sided question at issue.

BRITISH AND CANADIAN PATENT ACTS.

Commercial Intelligence, one of our valued London contemporaries, complains of the Patent Act of this country as being one of the greatest obstacles to the extension of British trade. It points out that not only is the patent rendered void if importation of the article takes place after one year, but that the penalty for non-compliance with the clause which provides for the manufacture of the invention in Canada within a period of two years is forfeiture of patent rights. True, the courts have decided that a patentee need only supply any such demand as arises, and need not do anything if it does not exist. But with regard to importation, they are more strict. A person may secure a Canadian patent and by advertising his willingness to supply the demand, may keep his rights; but he cannot export the patented article to Canada, that is, after the expiration of twelve months from the granting of the patent. The Patent Act and the British Preferential Tariff Act are entirely incompatible, says our contemporary, for as now interpreted, the Act fails to achieve its purpose—to secure the manufacture of patented articles in the colony—for patentees can retain their patents by spending a few shillings in advertising, and this greatly strengthens the case for the repeal of the objectionable clauses. They were obviously intended, primarily, to secure that a Canadian patent should be worked so that the Dominion should enjoy the benefit of the invention; in effect, they prevent the invention coming into use in the Dominion, which is quite as harmful to Canadians as it is unjust to the British patentees.

"BUSINESS MEN" AND FARM WOMEN.

Here is something worth chronicling to the praise of the woman on the farm and to the dispraise of "business men" who do not attend to their secretarial duties as well as the girls do. At the annual meeting this week of the Canadian Association of Fairs and Exhibitors, Capt. W. F. McMaster read a report on Agricultural Society statistics, but said he was unable to complete it on account of not having received reports from ninety-five societies in the province Mr. G. C. Creelman, superintendent of Agricultural Societies, commenting on this extraordinary short-coming, declared it to be a matter that should be attended to and there was no excuse for the neglect. The Government would be perfectly justified in withholding the annual grant from any societies that failed to make their reports. Capt. McMaster declared that the best reports he received were those that he received from farmers' wives and daughters, and the delinquents were men in business. Mr. J. W. Sheppard moved: "That this Association uphold the department in enforcing the provisions of the act in reference to the sending in by secretaries of the annual report of each society," and this was carried unanimously. So that the lazy or negligent delinquents may expect the sort of discipline that they deserve.

PEOPLE'S BANK OF HALIFAX.

We have seen the last statement of the People's Bank of Halifax for the year ended on 30th January. There had been a new issue of stock, which increased the paid-up capital to $996,392 at the date of the report, and upon this issue there was received by the bank during the year $118,564, which was promptly added to reserve, making that fund, with the $21,435 added from net profits, $440,000. Deposits increased to $2,807,000, and the circulation to $831,449. The year's net profits were $78,977, which, with the balance of $17,476 from last year, gave $96,453 to be dealt with. Dividend absorbed $52,755 of this, and there was

applied $7,000 in the reduction of the bank premises, and $15,261 carried forward. There are evidences of growth in the business of the bank, whose total assets now reach $5,540,000, almost a million of which is in the shape of assets readily available.

DEATH OF MR. MEIKLE.

It is with regret that we record the death of the veteran actuary, Mr. James Meikle, F.I.A., F.F.A., vice-president of the Faculty of Actuaries, Edinburgh, on the 5th of February. It appears that Mr. Meikle was in his usual state of health up to within two days of his death, which is stated to have been caused by apoplexy. In the death of Mr. Meikle there is removed from the life insurance arena one of the best known actuaries of Great Britain. With the exception of those who were admitted as Fellows of the Institute "under the charter," Mr. Meikle had the distinction of being the oldest member in point of time of the Institute of Actuaries. He was admitted a Fellow in 1851. Mr. Meikle, although over eighty years of age, was present in New York at the International Congress of Actuaries, and presented a paper on "The Development of Tables Derived from an Abridged Expression for the Calculated Expectation of Future Life." He took a deep interest in the proceedings of the congress, and in the festivities and pleasures which were associated with them. Those who took the Canadian trip will never forget the almost daring manner in which Mr. Meikle walked down to the very edge of the Niagara Falls and played with the water just as it went over the Falls. He appeared especially to enjoy the scenery of Niagara, also visited Toronto, and entered into all the entertainments provided by the Canadian members of the congress. Mr. Meikle was for many years the chief officer of the Scottish Provident Institution of Edinburgh, established in 1837. He has seen that company grow to be one of the most important and representative offices of Great Britain, the accumulated funds now exceeding $60,000,000. Mr. Meikle's loss will be much regretted by his numerous insurance friends in Great Britain, and in the United States and Canada.

LONDON LIFE INSURANCE COMPANY.

We are accustomed to look for a good report from the London Life, for its foundations were wisely laid, and business prudence as well as professional skill has governed the management. Much the same characteristics as we dwelt upon as being in the report of a year ago, are observable in that for 1903. Handsome increases are shown in new business written, and in the total at risk, also in premium and interest receipts, and the total assets are swelled by $160,000. Policy-holders' surplus, exclusive of uncalled capital, is $124,172; deducting paid-up capital, accumulating profits, and contingent fund, there is a net surplus over all liabilities and capital of $44,535, showing a gain in this important item on the year, which is the goal of every manager. It is satisfactory to find a considerable gain in payments to policy-holders. The company is in a sound position, the earning power of its assets continues good, and the industrial department of its business is now double the size, gauged by the amount of premiums, of the ordinary life business. The vote of thanks passed at the meeting of shareholders and policy-holders to the agents and office staff of the company was well deserved.

EQUITABLE LIFE ASSURANCE SOCIETY.

The Equitable is one of the great life companies of the world. Its career and wonderful success are a tribute to the genius of its founder and of the able men who for so many years have helped to build it up. The figures the company is now able to show are very striking ones; fourteen hundred millions of assurance in force, and more than a million of new assurance written during every working day of 1903. Assets of $381,000,000, and a surplus of $73,354,000. Its income last year was $73,718,000. But most interesting of this group of figures to intending insurants will probably be the sums paid to policyholders during 1903. The aggregate of these reached $34,949,000. A company that can divide in one year so great a proportion of its receipts is surely a liberal one for policyholders.

DOMINION LIFE ASSURANCE CO.

The exhibit made by this company at the close of its fifteenth year is a very good one. The company has always been conducted with economy and care, and its assets show excellent earning power, and its resources are being built up steadily. It has now more than five and a quarter millions in force, and has a gross income of almost two hundred thousand dollars. The surplus over all liabilities is $62,237. One interesting feature, and one which we do not recall as being made prominent before, is the Total Abstainers' Section of the company's business. This section shows very remarkable results in the year just past, and ought to attract the attention and the money of teetotallers. In 1903, the number of deaths in this section was only one-fourth of the number expected, while in the general section the mortality was only one-third that expected. The showing is one policyholders may be congratulated upon.

NORTHERN LIFE ASSURANCE CO. OF CANADA.

Improvement has been shown by this company during 1903. While the amount of new policies was about the same as in the previous year, the aggregate at risk has increased by half a million, and its total assets show an increase of $75,000. Other points worthy of notice are the decrease in death claims, and a very creditable lessening of management expenses. The management is cautious, the agents are hard workers, and the advance the figures show has been well striven for. The report contains an appreciative reference to the late president of the company, Hon. Justice David Mills, who was a true Canadian and a valuable man. Mr .T. H. Purdom, K.C., of London has been chosen to the presidency.

THE HOME LIFE.

A report that shows a very fair result of the year's business is that of the Home Life Association of Canada. The total of its assurances now exceeds three and a half millions, showing a tidy increase in the twelve months; the cash premium income is greater in the same period by the very considerable amount of 28 per cent., and the interest income also shows an increase. The total assets are now $1,319,401, and the reserves exhibit a growth during the year from $271,858 to $312,393, which is equal to about 13 per cent., a very comforting increase. These reserves are calculated at three and a half per cent. interest. It is stated in the report that the death claims show a considerably diminished ratio compared with the preceding year—another comforting fact. The list of the company's directors is interesting, showing as it does that the company is doing business from ocean to ocean; and the risks appear to be chosen with much care. Policyholders have reason to be satisfied that the company is making progress.

QUEEN CITY FIRE INSURANCE COMPANY.

In its thirty-third year of existence this company is able to make the remarkable exhibit of $100,000 capital paid up, $100,000 reserve fund, and a profit and loss balance, including re-insurance reserve, of $46,954. All this is the accumulation of thrifty underwriting, excepting only the ten thousand dollars paid in years ago by the shareholders. Such a re-

sult, after the payment of ten per cent. dividends year by year, is not unwarrantably termed phenomenal. There is proof in the history of this company that a great volume of business is not necessary to produce profit, but that on the contrary, a moderate business conducted with due regard to risk and in accordance with sound principles is a surer road to success. Another marked feature in this company's history is that it has never been in a court of law. It has gone on steadily adding year after year to its reserves and paying its regular dividends until it has reached the goal which its underwriters and managers, Messrs. Scott & Walmsley, long ago set out to accomplish.

HAND-IN-HAND FIRE INSURANCE COMPANY.

It would seem that the managers of this company have take a leaf out of the book of its namesake, the Hand-in-Hand Company of England, which has just passed its 206th year, having been established in 1696; for the aim seems to be in both to show favorable underwriting results rather than a great volume of risks. This old English company, which also does life business, has accumulated assets of £3,165,270 (about $15,827,000), while its fire premiums for 1902 were only £128,000. The Canadian Hand-in-Hand which has just held its thirty-first annual meeting, and is managed by Scott & Walmsley, does both fire and plate glass insurance. It has a premium income of $80,000, and less than four millions at risk, but it pays dividends of ten per cent. on its paid capital and has a contingent account of $68,000, with $80,000 capital liable to call. The presence in the list of shareholders or directors of this company of such names as those of William Davies, Goldwin Smith, Estate of Sir C. S. Gzowski, Mr. Justice McLennan, Lord Strathcona, Estate William Elliot, proves that these capitalists and business men are satisfied with their investment and endorse the methods of the company's administration.

HOME SAVINGS AND LOAN CO.

The twenty-fifth yearly meeting of this company has been held. The report shows earnings enough to pay all expenses, to divide seven per cent., to write $5,000 off the office premises account, and to put $25,000 to contingent account. The reserve stands at $200,000, being equal to the paid capital, and the contingent account is $55,000. The company is well and favorably known, and that its business continues to increase is evidenced by the increase of $171,000 in deposits during the twelve months. Mr. Thomas Flynn, a grain merchant of long experience in Toronto, has been elected to the board of directors in succession to the late lamented W. T. Murray. A branch is to be opened shortly on Queen street west. Some ten or twelve months ago we took occasion to dwell at length on the arrangements then being made to change the Home Savings & Loan Company into the Home Savings Bank. We now learn that a charter has been obtained from the Dominion Parliament for "The Home Bank of Canada" with an authorized capital of one million dollars, and that the agreement authorized a year ago between the company and the shareholders, has been executed by all the shareholders to be carried into effect when the bank shall be ready to start, which will be probably about May next. Shares of the new bank will be issued at a premium of 33 1-3 per cent., and a reserve will thus be secured at once. We are told that the company opened more accounts by fifty per cent. in 1903 than in any year for twelve years back.

—That was a significant vote given in the fiscal plebiscite of the London Chamber of Commerce a week or two ago. It resulted as follows: To tax foodstuffs—Yes, 74; no, 62. To tax raw materials—Yes, 21; no, 117. To tax manufactured articles—Yes, 116; no, 39. Preferential trade between colonies and foreign countries on a reciprocal basis—Yes, 108; no, 40.

BANKING AND FINANCIAL ITEMS.

It is announced from Havana that the $35,000,000 Cuban loan has been contracted for by Speyer & Co., of New York. The price is ½ of 1 per cent. above par. The bonds will run for forty years, and draw interest at the rate of 5 per cent.

Origin of the Decimal Currency.—Thomas Jefferson was advocating the use of decimal currency. "Just think," he exclaimed, "how much easier it will be to borrow ten dollars than 'two pounds, one shilling, one penny!'" With a joyous whoop, Congress surrendered to the argument.—New York Sun.

We are informed that Mr. W. I. Briggs has resigned from the Eastern Townships Bank service on account of ill-health, after occupying the position of manager of the Waterloo branch for the past twenty-eight years. News reached Montreal on Saturday of the sudden death of Mr. Grant Forest, manager of the branch at West Shefford of the Eastern Townships Bank.

The total of new loans offered for subscription in 1903, as reported by The London Economist, are the smallest for any year since 1894, notwithstanding the aggregate for 1903 includes the Transvaal loan. The total new capital applications for the years named were as follows: 1899, £133,169,000; 1900, £165,490,000; 1901, £159,358,000; 1902, £153,812,000; 1903, £108,362,000.

"Bank Man" Winnipeg, asks where he can get the best account of the proceedings of the American Bankers' Association meeting of 1903. We reply that the fullest we have seen was that of the Bankers' Magazine, New York. But we are told that the proceedings of that San Francisco October meeting—it was the twenty-ninth annual—have been published in an elaborate volume. Possibly you may obtain one of these by writing Mr. James R. Branch, the secretary of the association.

A review of the progress of banking in the United Kingdom during 1903 has been contributed to the Bankers' Magazine of London. It shows that the increase in banking capital (including surplus or reserve) was £1,726,769, compared with £1,638,714 in 1902, £2,180,763 in 1901, £1,263,390 in 1900, £2,820,612 in 1899, and £2,076,432 in 1898. For the twenty eight years, 1876-1903, the net increase has been £52,034,446, and in the same time deposits have increased something like £340,000,000 or £350,000,000.

The result of a letter addressed by the December committee to bank officers explaining the functions of the proposed Bank Clerks' Institute, of Montreal, was that 300 subscribers were obtained. These it is proposed to charge $3 a year. But this would not furnish revenue enough for the purposes in view. The banks, however, may probably be relied upon to supplement this revenue, especially as we understand that the Canadian Bankers' Association quite approves of the idea of a Bank Clerks' Institute. The estimated cost of suitable rooms up town is $1,200 a year. These will give accommodation for a billiard table, a banking library, reading-room, etc. It is not to be a recreation club entirely. There will be lectures and discussions on subjects of value to the student of banking. Some of the banks have offered sums to help keep it up for the first few years, and they would hardly have done so if it were to be a club for smoking and for billiards only—though there need be no prohibition of smoking or billiards at an appropriate time and place. The aim we understand to be at something higher than a social club.

INSURANCE NOTES.

The London Review is informed that Mr. Charles Darrell has retired from the secretaryship of the Union Assurance Society after forty-seven years' continuous service, with the best wishes of the directors. The board of the Union has appointed Mr. Joseph Powell, general manager, to be general manager and secretary; Mr. Herbert Lewis becomes submanager of their fire department, and Mr. Alfred Makins assistant secretary of the society.

Referring to the recent resignation of the managership in Canada of the Guardian by Mr. E. P. Heaton, we now learn that his successor has been chosen in the person of Mr. H. M. Lambert, formerly manager in Canada of the National Assurance Company, of Ireland.

The Property Committee of the Toronto Board of Education recommend that the insurance on school-houses be increased 50 per cent. The total insurance now in force on schools amounts to $332,300, whereas the properties are valued at $1,280,000. The recent fires, both happening within such a limited period of time, acted as a lesson.

The effect of the Baltimore conflagration upon the weaker fire insurance companies is making itself known. On Monday last a receiver was appointed for the Peabody Fire Insurance Co., of Baltimore, which lost $700,000 by the fire and had assets of only $300,000. Application for a receiver has been made by the Firemen's Insurance Company, also of Baltimore.

An interesting link with the past is described by the Review. It is a copy of the policy No. 809 of the Dundee, Scotland, Assurance Company, dated 20th May, 1783—one hundred and twenty-one years ago. It insures the "dwelling-house, stone and slated," of the Rev. George Hill, professor of Greek in the University of St. Andrews, against loss or damage by fire up to £120, and household goods therein up to £80 stg. That worthy gentleman, it is stated, "hath paid the sum of 4s. 5d., and doth promise to pay the like sum at each succeeding Candlemas." This means that for, say, $1,000 insurance he was paying a little more than a dollar yearly. The policy contains a picture of the Dundee Town House, and an old-fashioned hand fire engine squirting water over it.

At least one thing seems to us to be thoroughly established as the result of this great fire, viz., that all premium rates for fire insurance, where the conflagration hazard exists, should contain a provision to cover that hazard, and that reserves, which are not released from year to year, should be maintained to cover this conflagration risk. The losses in Baltimore are likely to foot up more than $75,000,000. No doubt, a number of fire insurance companies will be carried down. Some of those which will not succumb, will be seriously crippled. The wisdom and even the necessity for charging more nearly adequate rates in these congested centres in order to provide for the conflagration hazard and of husbanding a part of these premiums and accumulating the same as conflagration reserves, must be evident to everybody.—The Chronicle, N.Y.

A tabulation has been made by the Hartford Steam Boiler Co. of the number of boiler explosions in the United States during 1902, and the number of persons killed and injured thereby. According to this table the total number of boiler explosions in 1902 was 391; it was 423 in 1901; 373 in 1900; 383 in 1899; and 383 in 1898. In two instances during that year two boilers exploded simultaneously. The number of persons killed in 1902 was 304, against 312 in 1901, 268 in 1900, 298 in 1899, and 324 in 1898. The number of persons injured was 529, as contrasted with 646 in 1901, 520 in 1900, 456 in 1899, and 577 in 1898. The most disastrous explosion of the year so far as loss of life and personal injuries are concerned, were as follows: On November 13th a boiler exploded over a puddling furnace at Lebanon, Pa., killing ten persons and injuring thirty; on August 20th two huge pulp digesters exploded at Wilmington, Del., killing sixteen persons and injuring two. In addition a property loss estimated at $35,000 was sustained in each case.

The British companies are responding promptly, as usual, to their obligations in the matter of the Baltimore blaze. The Liverpool & London & Globe loses about a million, and has instructed its United States agents to draw therefor; the North British & Mercantile expects to lose a like sum, and is equally ready to pay it. The Royal is reported to have more than either, and there will be no delay about its paying up. The Northern cabled on Monday to urge upon its American agents a prompt settlement of its $700,000 loss, and on Tuesday the Toronto agents of the Union Assurance Society informed us that the following telegram came from their Montreal head office: "Baltimore conflagration, Union cables to United States managers, "Have credited your bank account by cable with two hundred and fifty thousand dollars, will cable any further sum you may ask for." A London cable of Saturday last gives the following losses as "officially verified:" Commercial Union, London & Lancashire, Sun, $500,000 each; Norwich Union, $700,000; Phoenix, $600,000; Manchester, $300,000; London Assurance and Atlas, $200,000 each; Caledonian, $225,000; Alliance, $40,000; National of Ireland, $100,000. The aggregate insurance in twenty companies named is nine millions of dollars. The above are net amounts, re-insurance deducted.

FOR GROCERS AND PROVISION DEALERS.

Prices for coffee have fluctuated almost wildly during the past two or three weeks. Last week there was a sudden drop of about 2½c. per pound. It is believed that another attempt has been made to corner the market in spite of the oft-repeated failure of such in past times.

Exports of black tea from Ceylon last year decreased by 8,256,832 pounds. There were increases to several countries, but they were more than offset by a diminution of nine and a half million pounds to Great Britain. Against this, the export of green tea increased from 2,796,844 pounds in 1902 to 8,443,012 pounds in 1903.

The scarcity of good milling wheat should be attributed, not only to the fact that the yield in the Canadian North-West proved to be considerably shorter than in the previous crop, but to the inferior quality of much of it. This is indicated by the result of the inspections made at Winnipeg last month. Out of 1,939 cars of wheat inspected it was found that 938 were unfit for milling. Further advances in price are by no means improbable.

Latest advices to hand from London say that the demand both for Canadian and New Zealand cheese continues quiet at unchanged prices. The imports into Britain of all kinds of cheese during the last three months were over 3,000 tons less than for the same months of 1903, and as stocks are on the light side, the attention of the trade has been seriously called to the matter.

Mr. Christopher Eaton, of Owen Sound, is circulating information in England in contradiction to the statement made some time ago by Mr. Chaplin, M.P., to the effect that the soil of the colonies is unsuited to the growth of barley. Mr. Eaton brings evidence to show that Ontario can raise the finest barley in the world, and believes that that Province alone could supply Britain with all it needs. Mr. Chaplin should get hold of some Oswego or Rochester men (if he knows where those places are) and ask their opinion of Ontario barley.

Mr. Bryson, agent for the Canada Department of Trade and Commerce in Antigua, says that the merchants of that and some other of the British West Indian Islands prefer butter from France and Denmark rather than that from Canada and the United States, because the former is generally more uniform and of more reliable quality. Cheese is imported chiefly from Canada and the United States, though that from England and Denmark, being better cured and packed, usually brings a higher price.

Only a little while ago Lord Roberts, mindful of the Queen's chocolate on Christmas day for soldiers in South Africa, gave the timely hint that tobacco was more profitable for a soldier's use than sweetmeats. And now the Lancet pronounces tobacco as a thing which would do the men good and not evil during the days in the field. The Iron Duke's officers were "directed to advise their men strongly against it," but "the soldiers and volunteers of to-day grumble only when their 'smokes' fail them. Says that medical authority: "The pipe eases the way to sleep when bodily fatigue and mental restlessness prevent." In conclusion the Lancet says: "We are inclined to believe that, used with moderation, tobacco is of value second only to food itself when long privations and exertions have to be endured." Thus is the noxious weed vindicated.

DRY GOODS NOTES.

The Auburn Woolen Mills, at Peterboro, Ont., have been temporarily shut down owing to lack of water.

D. A. 4 is a 36 inch taffetin lining in great demand by the fashionable dressmakers. It is a very light fabric with a bright mercerized finish and a silk twist, and comes in staple and high colors. The W. R. Brock Company, Toronto, sell this article at such a price that it can be retailed for 25 cents.

John Macdonald & Company, Toronto, have a big job line of men's black cashmere half hose. A variety of qualities are included, but they will all be sold at the one price, namely, $1.50 per dozen. This house has also received a large shipment of Valenciennes and Torchon laces and insertions of all widths; also a shipment of Crum's prints, in navy grounds and greys. This will probably be the last shipment at old prices.

The Merchants' Cotton Company held its annual meeting in Montreal last week and elected a board of directors, as follows: R. B. Angus, A. A. Ayer, John Beattie, J. P. Cleghorn, James Crathern, Jonathan Hodgson, Hon. Robt. Mackay. At a subsequent meeting, James Crathern was elected president, the Hon. Robert Mackay, vice-president, and Mr. W. S. Barker, secretary-treasurer. No dividend was declared, the earnings for the past year not being deemed sufficient to warrant it.

THE LUMBER TRADE IN GREAT BRITAIN.

According to a recent issue of the Timber Trades Journal, the present tone of the market is far from satisfactory to the trade, and they are led to believe that the imports of timber, figuring so largely in the Board of Trade returns, have not been of that legitimate kind that betokens an active trade, but appear to be the result of very large anticipations of increasing business on the part of somebody. To begin with, it is evident from the excessive stocks held in London that there has been more speculation in the purchase of wood than was believed, and in consequence much more has been brought to this market than the natural requirements of the trade warranted. At the commencement of the past year the market was amply supplied with almost every kind of wood, and as the year, commercially, was one of great dullness, the imports that, under the circumstances, would have been classed as moderate, turned out to be excessive, sufficient allowance not having been made in the calculations of buyers for the large quantity of wood coming forward that had been lying abroad during the previous winter. Sellers on the other side made great professions in respect to a curtailment of the log-get, and consequently the production, but they kept up a stream of consignments during the latter part of the season that bore down everything. Almost all the large importers are fully stocked, and a completion for customers under such circumstances is apt to induce sacrifices, and then prices assume a lower range.

A circular dated February 1st, from Farnworth & Jardin, of Liverpool, says that the aggregate tonnage from all places to that port during the years 1902, 1903, and 1904, has been 23,969, 21,006, and 23,401 tons respectively. In the business of the past month they report little change, and the quiet tone prevailing during the past month still continues. The arrivals, with the exception of spruce deals, have not been too large, the deliveries have fairly kept pace, and values are generally well maintained; stocks as a rule are ample. Referring especially to Canadian woods, the import of pine consists of a shipment by steamer via Portland, Me.; the deliveries have been small, but values are steady; stocks are sufficient. Square.—The demand has been very quiet; stocks are heavy. Red Pine.—There has been no movement, and stocks are unchanged. Oak has been inactive, the deliveries light, and stocks large, but there is no change in value to report. Elm.—There has been more enquiry; the stock of prime wood is low, and prices are further advanced. Ash.—There is little demand. Pine Deals.—The arrivals have been more than usual for the time of year, there has been a little more enquiry, and values are steady, but stocks are sufficient. Red Pine Deals.—There is no change to report, and the demand is quiet. Of New Brunswick and Nova Scotia spruce and pine deals the arrivals during the past month, chiefly by the liners, have been large, also much in excess of corresponding period last year, viz., 6,030 standards, against 3,230 standards in 1903; the deliveries have been disappointing, and stocks, both in Liverpool and Manchester, although lighter the same month last season, are adequate. Freights have ruled exceptionally low, and buyers of consignment parcels to some extent have reaped the benefit. The demand for pine deals continues quiet. Birch logs from St. John, N.B., have arrived more freely, but a fair proportion has found its way into consumption, and stocks are not too large; values are steady. Planks have arrived moderately; there has been more enquiry, and although stocks are moderate, there is little improvement in value to report.

—The project for forming a technical school in Montreal seems to be making great and satisfactory progress. A course of studies has been drawn up, a suitable site procured, and a considerable measure of financial support promised, though more is needed. The proposal is to accommodate between 2,000 and 3,000 men, women, boys and girls who wish to extend in a systematic way their knowledge and training for the arts and trades, but who are unable to take a university course, and it is estimated that for this purpose fully $250,000 will be required, of which something under $150,000 will be used for buildings and equipment.

—It is announced that the Consolidated Lake Superior Company will be reorganized under the name of the Canadian Improvement Company. John R. Dos Passos, counsel for reorganization, says that the company will start business with about $40,000,000, and that an issue of about $13,000,000 bonds will be created. It is believed in New York at least so the despatch says, that the efforts to rehabilitate the company will be successful, as many prominent men are identified with the movement, who are amply able to supply all the cash necessary. It is stated that the new interests have adopted a financial plan almost identical in its nature with the one proposed last October, in which the problem was to raise $8,000,000, but it is added that in the present circumstances the sources of this large amount are assured.

—A letter comes to the Monetary Times from the commercial agent for Canada in Birmingham, which we print below. Its date is 1st February: "In connection with the cable despatch sent through the Associated Press about the 6th January, with regard to a carpet factory firm wishing to establish in Canada with a capital of at least £10,000, and who would employ at least 100 hands. The firm would like any replies from Canadian municipalities sent direct through me. I will see that no town gets a preference over another, but answers will be given to the firm in question. These are most reliable and very wealthy people. It is rather likely that preference might be given by the firm to lake or river ports, as large quantities of goods would have to be imported, and they would prefer to have both railway and water haul if possible." P. B. Ball.

—It is agreeable to discover from the reports of the two largest Canadian fire insurance companies, the Western and the British America, that they have had a favorable year in 1903, and both have added to their reserve funds. In the case of the Western the underwriting profit and interest earnings were $305,912, which enabled the addition of $158,000 to reserve. The British America earned $204,672 during the year, and put $128,052 to reserve. We have not

the full proceedings of the meetings of the companies, as we go to press before they begin, but the results can hardly fail to please shareholders, for both companies have earned more than in either 1902 or 1901. There is, of course, the conflagration in Baltimore to interfere with the present year's earnings—the losses of the two companies being $340,000, and $210,000, respectively. This loss is less than ten per cent. of the entire year's income—an adverse result which might, however, be readily overcome by the profits of a good year. It is to be remembered also that a loss of such a magnitude as that at Baltimore must have the effect of stiffening premium rates; and those companies which are able to meet their claims promptly will thus be in a position to reimburse themselves for this disaster, which the reports that have been published indicate will cost the insurance companies in the aggregate some eighty millions of dollars.

—The Berlin Felt Boot Company's factory at Berlin, Ont., was on the 16th inst. destroyed by fire at a loss estimated at over $150,000, insurance not quite $50,000. Surrounding large factory buildings were saved with some difficulty.

—A scheme is on foot, in which the holders of hydraulic lots are mainly interested, to obviate the annually recurring difficulty with anchor ice at the Chaudiere, which frequently partially paralyzes industrial concerns. Sometimes, too, the waterworks are also seriously interfered with, though some improvement was made at the pump house last fall, so that very possibly the Ottawa city council will join hands with the movement. The present scheme looks not only to doing away permanently with the anchor ice trouble, but contemplates also the development of latent power and the conservation of energy now going to waste. Incidentally, too, the water pressure for fire protection would be improved, so the project is altogether of considerable importance.

—The annual report of the Richelieu and Ontario Navigation Company has been issued, and shows an increase of $68,135 in the gross earnings, compared with the previous year. They were last year $1,104,801, while the operating expenses were $894,745, not quite $55,000 greater than in 1902. Net profits were $189,632, in 1903, against $174,584 in 1902. Of the original issue of $571,833 in bonds, $404,420 now remain outstanding. It is announced that the steamer "Montreal," now under reconstruction at Sorel, will be ready for the opening of navigation next year, and that the "Carolina," which was bleached in the Saguenay river, will be in operation this coming winter. The company are considering the construction of a marine railway dry dock at Sorel.

—We are informed that for the greater convenience of their trade in Western Canada, the Alaska Feather & Down Company, Limited, of Montreal, have undertaken to establish a factory and warehouse in Winnipeg, and have purchased the bedding business of Messrs. Bromley & Company, of that city, who are said to be the largest bedding manufacturers in the West. The western branch will be equipped with the latest improvements in bedding machinery, including machinery upon which the Alaska Feather & Down Company have Canadian patents, and thus will be in a position to turn out large quantities of goods and give satisfactory deliveries, something for which the trade in that territory has long looked. The enterprise of the company is commendable. Mr. A. W. Johnson, the popular representative of The Alaska Feather & Down Company, and a practical bedding manufacturer, will be placed in charge of the Winnipeg office, and will represent the firm in Manitoba only, while the interests of the trade in Assiniboia, North-West Territories and British Columbia will be cared for by Mr. J. A. Loudon, who is well and favorably known to the furniture trade in these provinces.

An Irishman was called upon to give evidence in a shooting affray. "Did you see the shot fired?" asked the magistrate. "No, sir, but I heard it," replied the witness. "That is not satisfactory. Step down." As the Irishman turned to go, he laughed and was rebuked by the magistrate, who told him it was in contempt of court. "Did yez see me laugh?" "No, but I heard you." "That is not satisfactory." And then the court laughed.—The Green Bag.

—From Winnipeg, from Quebec, from all over Ontario, especially from the north, the same story comes of continued intense cold weather. A Montreal letter of Tuesday last bursts forth in this impetuous, but justifiable fashion. The writer addresses us as if we were the Weather Bureau: "When is this infernal, or boreal, or otherwise accursed, cold weather going to let up? Another North-West blizzard is blowing to-day. It is impossible to keep warm. I have just come in so numbed through that I can hardly hold a pen."

—"A Property Owner" writes to the press of Montreal on the lack of equity in the apportionment of taxation. He contends that if a fair valuation of all properties in Montreal was made, one-third would be found to be exempt from taxation. He goes on to say: "I know one piece of land exempt from taxes, valued at $10,000, that any real estate man would gladly give $90,000 for. Again, why should any clergyman's mance be free from taxes? Right in my own neighborhood there are three clergymen whose salary range from $1,800 to 2,300 a year. The average man in the same district receives about $600 a year, and has to pay taxes on his little home. Will some clergyman kindly answer this. There is nothing harder to sell in this city than property. As an example: My neighbor went down to the assessors and asked them to reduce his valuation. They would not. He then offered them his property at assessed valuation. All in first-class order. He took an oath to the effect that he would accept assessed valuation. They then told him to call again, which he did, only to be told they could do nothing in his case, that they could not reduce his property valuation nor would they buy it."

Meetings.

THE HURON AND ERIE LOAN AND SAVINGS COMPANY.

The fortieth general annual meeting of shareholders was held at the company's office in London, Ont., on Wednesday, February 10th, 1904.

Present: Messrs. F. P. Betts, A. A. Booker, C. P. Butler, Major Hume Cronyn, F. R. Eccles, M.D., Alex. Fraser, Robt. Fox, Geo. F. Jewell, John Labatt, F. E. Leonard, J. W. Little, W. J. Reid, G. A. Somerville, and others.

The president, Mr. J. W. Little, took the chair, and the manager, Mr. G. A. Somerville, acted as secretary.

The notice calling the meeting having been read, the minutes of the last general annual meeting were read and approved, and the annual report and financial statement were submitted.

Report.

The directors of the Huron and Erie Loan and Savings Company have pleasure in submitting herewith their fortieth annual report, showing the result of the company's operations for the past year, accompanied by the balance sheet to December 31st, 1903, duly audited.

After defraying the expenses of management and all other charges, and writing off anticipated as well as actual losses, the balance available for distribution is $181,208.92, as follows:

Brought forward from the previous year's accounts	$ 24,443 31
Net profits upon the past year's business	156,765 61
	$181,208 92

of which the following disposition has been made:

Two half-yearly dividends at the rate of 9 per cent. per annum, and income tax	$128,396 24
Provision for possible depreciation in securities	13,000 00

Transferred to reserve fund	20,000 00
Balance carried forward	19,812 68
	$181,208 92

The reserve fund now amounts to $975,000, or almost seventy per cent. of the paid-up capital.

During the year there has been an increase in deposits and Canadian debentures of $230,798.37, and in Sterling debentures of $113,003.94. The cash value of first mortgages on real estate is $7,238,258.69, and the increase in total assets for the year is $364,248.95.

The company have no real estate on hand other than office premises, all the properties which have come into possession of the company by foreclosure, failure to obtain purchasers under power of sale, or otherwise having been sold.

The directors desire to bear testimony to the very efficient manner in which the manager and other officers of the company have discharged their respective duties.

All of which is respectfully submitted.

J. W. LITTLE,
President.

London, Ont., January 26th, 1904.

STATEMENT FOR THE YEAR ENDING DECEMBER 31ST, 1903.

PROFIT AND LOSS.

		$8,087,750 09

G. A. SOMERVILLE,
Manager.

We hereby certify that we have carefully audited the books and accounts of the Huron and Erie Loan and Savings Company for the year ending December 31st, 1903. The cash and bank accounts have been audited monthly; the postings and balances of all the company's leegers examined quarterly; and we find the whole correct and in accordance with the above statements. We have also examined the company's securities and find them in order.

GEO. F. JEWELL, F.C.A.,
ALFRED A. BOOKER,
Auditors.

London, January 25th, 1904.

The president, in moving the adoption of the report, said:

"You will have noticed that the report which has just been read is the fortieth annual report of the company; it is also the sixteenth which it has been my duty to present to the shareholders. In this connection it is pleasant to recall the fact that amid the ups and downs of all these years, in good times and in bad times, in lean seasons and in fat seasons, the company has gone steadily forward, constantly increasing the volume of its business, paying its dividends regularly, and each year putting aside a substantial sum.

"Since the first $280 was placed to the credit of the reserve as a result of the operations of 1864, only two years have passed without an addition to that fund, and even on these two occasions surplus earnings were available, but were carried forward in other accounts to be transferred to the reserve later on. This fund has now nearly reached the handsome sum of one million dollars, and, of course, greatly assists in maintaining our dividends.

"It is interesting to note that there has been no change in the dividend paid during the last eighteen years. As a result our shares have been comparatively free from fluctuations in their market value, and in the many slumps on the Stock Exchange Huron and Erie never varies more than a few points.

"As regards the present assets of the company, I do not think they have ever been in a more satisfactory condition. Mortgage securities, office premises and cash on hand amount roughly to about 93 per cent. of the total assets, provincial and municipal debentures to about 3⅛ per cent., and other bonds and securities (including Canada Trust stock) to about 3⅛ per cent. The properties held under mortgage have been selected with the greatest care. The company has an efficient and competent staff of inspectors, and in addition to the examinations made before the loans are passed, a regular system of re-inspection is rigidly carried out, outside experts being temporarily employed for this purpose whenever our own staff are unable to keep up with the work. During the past year nearly all our loans in 140 municipalities were re-valued by inspectors not originally responsible for the loans, and it has been our practice in valuing securities not to take credit for accrued interest when there appeared to be the least probability of loss. Much of this interest has been recovered, and in this way quite a respectable sum has accumulated which does not appear in our statements, and is available if required to meet unforeseen contingencies.

"It is hardly necessary to refer to the provincial and municipal debentures. The directors have always deemed it wise to keep a considerable sum invested in readily convertible securities of this kind, although they yield a lower rate of interest than mortgages.

"The remaining item in the statement of assets, "Other bonds and securities, including Canada Trust Co. stock," consists of about $50,000 in bonds and debentures (other than provincial and municipal) of the very highest character, stock in the Canada Trust Company and loans on life insurance policies.

"During the past few months a great deal has been said about the powers of loan companies, and whilst it is very doubtful whether any legal restrictions would have prevented the troubles in the St. Thomas companies, yet it may be well to explain the position of the Huron and Erie in this respect. The company is governed by Dominion and Provincial Acts respecting loan companies, and the private Acts relating specially to the Huron and Erie. The powers conferred by Dominion and Provincial legislation are not exactly alike, but it has always been our practice to keep our operations clearly within the limitations fixed by both Parliaments, and our private Acts, unusual as it may seem, still further restrict the powers of the company. For instance, the Huron and Erie cannot lend upon its own shares, nor to a director or officer of the company upon any security whatever, though the general Acts passed at Ottawa as well as Toronto do not prohibit investments of this kind. Further, a clause in our private Act passed in 1899 provided that the company should not use the extended powers recently granted by general Acts of both

Parliaments until the consent of the shareholders had been obtained at a meeting called for that special purpose; so that without a special vote of the shareholders we were restricted to mortgages, Government and municipal debentures, and other trustee investments.

"In the year 1900 a resolution was passed by the shareholders authorizing the following additional investments, which at that time were legal under both Dominion and Provincial legislation: Life insurance policies, debentures of companies incorporated for supplying gas, water, heat, light, power or electricity to municipalities, debentures of steam or electric railways, telegraph or telephone companies, fully paid-up stock of any chartered bank, trust company or insurance corporation standing registered under the law of Ontario, but, so that the aggregate of all the said stocks held by us at any time shall not exceed one-fifth of our paid-up capital, and so that the loans upon or investment in debentures of any of the companies mentioned shall not exceed one-fifth of the paid-up capital of the company. Under this resolution we can invest one-fifth of our paid-up capital, or $280,000, in certain stocks, and the same amount in certain debentures. The only stock the company now owns, or ever did own under the powers granted by the shareholders, is that of the Canada Trust Company, which has proved a most profitable investment. No other stock will be purchased, and it is not the intention of the directors to ask the shareholders for increased powers.

"There is, perhaps, one item in the report which requires some explanation. The company recently had three transactions with the Atlas Loan Company, of St. Thomas, either direct or indirect. On two real estate loans where the margin of security was less than required by the Huron and Erie, we received Atlas Loan debentures as collateral. I am happy to be able to state that on both these mortgages sufficient payments have been made to make the security undoubted, so that we do not look to the debentures for any part of our money.

"The other transaction, although based on legal trustee security, did not turn out so well. We made an advance of $25,000 on a debenture of the Atlas Loan Company for a much larger sum, and in view of the loss to be provided for we have added $13,000 to our fund for possible depreciation in securities, to which I have already referred, and in estimating the cash value of our assets this debenture has not been taken into account, so that anything received from this source will go to increase our future profits.

"As I have detained you a little longer than usual, I will not attempt to go into details of the year's business further than to say that on the whole it has been most satisfactory, rather better rates of interest have prevailed, and as usual there is an increase all long the line, the only item not showing a substantial increase being expense account."

In seconding the adoption of the report, Mr. Leonard said: "The president has given such a full and interesting report that I intend to call your attention to only one or two other points which are worthy of consideration. Some years ago we borrowed a very much larger proportion of our funds abroad than we do now, mainly on account of the lower rates of interest then prevailing in Great Britain. At the end of 1893 the Canadian debentures issued by the company amounted to less than a million dollars, and the sterling debentures to over a million and a half. While the latter have since remained practically stationary, the Canadian debentures have increased by almost 250 per cent., and now amount to about $2,500,000—a very gratifying evidence of the confidence of our own Canadian people in the stability of the Huron and Erie. In the past year alone the increase in deposits and Canadian debentures has been over $230,000.

"Our earnings show an increase over previous years, and as we have secured somewhat better rates on loans during the past six months the increase will, no doubt, be maintained. Payments of both principal and interest during the year have been most satisfactory, and, as a result, we have always on hand ample funds to meet the many applications for loans sent in by our numerous correspondents throughout the Province. The business is managed now, as it has been for so many years, with the utmost care, economy and efficiency."

Mr. Betts congratulated the president and directors on the very full report presented, no information being withheld from the public, and referred to the conservative policy of the company regarding investments.

The report was unanimously adopted.

A vote of thanks was tendered the president, directors, manager and other officers of the company on motion of Mr. Alex. Fraser, seconded by Mr. W. J. Reid, both of whom expressed their satisfaction with the management and with the position and prospects of the company.

Messrs. Jewell and Booker were re-elected auditors.

Scrutineers having been appointed and a ballot taken, the following gentlemen were reported duly elected to serve as directors for the ensuing year: Messrs. J. W. Little, Philip Mackenzie, Prof. Wm. Saunders, John Labatt, F. E. Leonard and V. Cronyn.

At a subsequent meeting of the board, Mr. J. W. Little was re-elected president, and Mr. Philip Mackenzie vice-president.

THE TORONTO MORTGAGE COMPANY.

The annual general meeting of the Toronto Mortgage Company was held at its offices, No. 13 Toronto Street, at 12 o'clock (noon), on Wednesday, the 10th day of February, A.D. 1904.

There were present: Hon. Wm. Mortimer Clark, Edward R. Greig, Dr. J. C. Patton, Thomas Gilmour, K. Cerberry, William Cook, William Spry, Dr. H. B. Yates, Bernard Saunders, William Thomson, Dr. R. C. Moffat, C. S. Gzowski, Thos. Langton, Robert Thompson, George F. Burns, Wellington Francis, Alexander Smith, C. C. Baines, Ira Standish, Thomas R. Wood, George R. R. Cockburn, M.A., Dr. Andrew Smith, David Carlyle, William N. Eastwood, T. E. Moberly, William Martin and others.

On the motion of Dr. Yates, seconded by Mr. Wellington Francis, the president, Hon. Wm. Mortimer Clark, took the chair, and the manager acted as secretary.

The secretary read the notice calling the meeting.

The minutes of the last annual meeting were taken as read, and confirmed.

The secretary read the financial statement, and profit and loss account, for 1903, and the annual report.

REPORT.

The directors of the Toronto Mortgage Company beg to submit the usual financial statement of the company's affairs for the year ending 31st December, 1903.

The gross earnings, including the balance of $24,295.96 brought forward from 1902, amount to	$140,282 93
After deducting cost of management, interest on debentures and deposits, and all other charges, amounting in all to	68,001 75
There remains a net profit of	$ 72,281 18
Out of which dividends at the rate of 5 per cent. on the paid-up capital have been paid, amounting to	36,227 00
Leaving a balance to be carried forward to 1904 of	$ 36,054 18

Debentures matured during the past year amounting to $352,490, to renew which, and for new moneys, new debentures of the company have been issued to the extent of $235,210.

Loans were made amounting to $560,850, and mortgages aggregating $65,750 were renewed for further terms, after re-valuations of the properties in question by the company's inspector.

The revenue taken credit for has been actually exceeded by the cash receipts for interest and net rentals.

Sales of properties were made during the year at satisfactory prices to the large extent of $281,307, the balances of purchase money being secured by active interest-bearing mortgages, repayable by instalments.

The office staff have performed their duties to the satisfaction of the directors, and the books and accounts and all securities held by the company have been regularly audited.

All of which is respectfully submitted.

WM. MORTIMER CLARK,
President.

WALTER GILLESPIE,
Manager.

We have audited the books and accounts of the Toronto Mortgage Company for the year ending 31st December, 1903, We have examined the vouchers and securities relating thereto. We find the books carefully kept, and hereby certify that the foregoing statements are correct.

E. R. C. CLARKSON, F.C.A.,
HENRY WM. EDDIS, F.C.A.,
Auditors.

Toronto, 14th January, 1904.

Before moving the adoption of the report, the president congratulated the shareholders on the result of the last year's business, and called attention to the fact that, after payment of all charges, and of the usual dividend of 5%, the board had been able to add to the balance of profits carried forward the sum of $11,758.

The president also made the following remarks:

"During the latter part of 1903 the demand for money was greater than in the previous year, with the result that we were able to satisfactorily invest all the available funds of the company.

The directors have invested a portion of the reserve in securities apart from the ordinary funds of the company, and are able to show tangible assets, which will be readily convertible into money, should the necessity for so doing ever arise."

"The shareholders will be gratified to learn that again last year, as in previous years, the prices realized on sales of real estate in the company's hands have fully confirmed the accuracy of the valuations made at the time of the amalgamation in 1899. Should we be equally successful this year in making sales, by the end of 1904 we shall be in the pleasant position of having disposed of all the properties in the company's hands, except the two office buildings on Toronto Street. In this connection it will be interesting to the shareholders to know that the amount of vacant land held for sale, which, at the commencement of last year stood at $29,000, by the end of 1903 had been reduced to less than $15,000.

"The sterling debentures show a decrease, and the currency debentures an increase, as compared with the previous year. So far as the British debentures are concerned this decrease was owing to our unwillingness to pay 4%, either for renewals or new money. You will no doubt be pleased to see that the currency debentures have increased, and it is desirable that this should be the case."

The president again congratulated the meeting "on the thoroughly sound and prosperous condition of the company," and then moved, seconded by the vice-president, "That the annual statement and report as read be adopted." Carried.

Mr. Cockburn took this opportunity of congratulating the shareholders on the honor which had been conferred upon them by the appointment of the president of the company as the Lieutenant-Governor of Ontario, and also congratulated the Government on the wisdom they had displayed in making such an admirable selection.

It was then moved by Mr. George R. R. Cockburn, and seconded by Dr. R. C. Moffat, "That the thanks of the shareholders are due, and are hereby tendered, to Messrs. Allan, Buckley, Allan & Milne, advocates, Aberdeen; Messrs. J. & A. F. Adam, W.S., Edinburgh, and Messrs. Fraser, Stodart & Ballingall, W.S., Edinburgh, the British financial agents of the company in Scotland, for the valuable services they have rendered this company during the past year." Carried.

It was moved by Mr. Robert Thompson, and seconded by Dr. Andrew Smith, "That Messrs. E. R. C. Clarkson, F.C.A., and H. W. Eddis, F.C.A., be appointed auditors for the current year at a salary of $300 each." Carried.

It was moved by the president, and seconded by Mr. Wm. Spry, "That a poll be opened for the balloting of votes for the election of directors, to be closed if, at any time, three minutes should elapse without any votes being polled. Also that Messrs. C. C. Baines and T. E. Moberly be appointed scrutineers for the occasion." Carried.

The scrutineers reported as follows: "We hereby certify that the following gentlemen have been unanimously elected directors of the Toronto Mortgage Company at the fifth annual meeting held at the offices of the said company this day, at 12 o'clock (noon): Messrs. Larratt W. Smith, Wm. Mortimer Clark, Wellington Francis, A. J. Somerville, C. S. Gzowski, Thomas Gilmour, George Martin Rae, Henry B. Yates and Thomas R. Wood."

(Signed), C. C. BAINES,
T. E. MOBERLY,
Scrutineers.

At a subsequent meeting held by the board, Hon. Wm. Mortimer Clark, LL.D., W.S., K.C., was elected president, and Mr. Thomas R. Wood, vice-president.

THE HOME SAVINGS AND LOAN COMPANY, LIMITED.

The twenty-fifth annual general meeting of the shareholders was held in the company's office, No. 78 Church Street, Toronto, on Thursday, February 18th, 1904, at 12 o'clock (noon).

The president, Mr. Eugene O'Keefe, occupied the chair; and the managing director, Mr. James Mason, acted as secretary.

The minutes of the last annual general meeting, held 19th February, 1903, were upon motion to that effect, taken as read, and were confirmed.

The annual report and statement was then presented, and upon motion of the president, seconded by the vice-president, Mr. John Foy, was adopted.

REPORT.

The directors beg to submit the twenty-fifth annual report with accompanying financial statement duly audited, showing the result of the company's business for the year ended 31st December, 1903, and its position on that day.

The business of the year was very satisfactory.

After paying and providing for two half-yearly dividends at the rate of seven per cent. per annum, and paying all expenses, including salaries, printing, advertising, auditors' fees, Government tax and commissions on loans, and providing for directors' compensation, there remained a balance of $29,917.54, which, added to $1,784.32, balance profit and loss account last year, makes $31,701.86. Of this sum $25,000 is placed at the credit of contingent account, $5,000 written off office premises, and the remainder, $1,701.86, is at credit of profit and loss account.

The reserve fund stands at $200,000, being equal to the paid-up capital, and the contingent account at $55,000.

Deposits increased $171,687.05. Loans on collaterals increased $293,888.68, and mortgage loans decreased $177,720.12.

The directors beg also to report, with reference to the resolutions passed at the last annual general meeting of shareholders that a charter has been obtained from the Dominion Parliament for a bank, called "The Home Bank of Canada," with an authorized capital of one million dollars, the shares being of the par value of one hundred dollars each, and that the agreement authorized by the shareholders at said meeting to be entered into between the company and the shareholders has been executed by all the shareholders of the company, to be carried into effect when the bank is in a position to do its part. This will be in the course of two or three months from now.

The directors have to deplore the loss during the year of one of their number—Mr. W. T. Murray—who died in March last. During Mr. Murray's service on the board he took a deep interest in the affairs of the company. Mr. Thomas Flynn, grain merchant, was elected a director to fill the vacancy caused by Mr. Murray's death.

All of which is respectfully submitted.

EUGENE O'KEEFE,
President.

Toronto, February 1st, 1904.

JAMES MASON,
Managing Director.

We hereby certify that we carefully examined the books, receipts and vouchers of the Home Savings and Loan Company, Limited, for the year ending 31st December, 1903, also the securities and cash on hand, and found the same correct and in accordance with the above statement.

J. M. SULLIVAN,
J. G. HALL,
Auditors.

Toronto, February 1st, 1904.

Moved by Mr. Thomas R. Wood, seconded by Mr. B. E. Bull, "That the thanks of the shareholders be and are hereby tendered to the president and directors for their careful attention to the affairs of the company during the past year." Carried.

Moved by Mr. M. O'Connor, seconded by Mr. H. T. Kelly, "That the thanks of the shareholders are due and are hereby given to the managing director and other officers of the company for the efficient manner in which they performed their respective duties during the past year." Carried.

Moved by Mr. Thomas Long, seconded by Mr. Thomas Flynn, "That Messrs. John Sullivan and John G. Hall be the auditors of the company for the ensuing year; and that each be paid the sum of $450 for their services." Carried.

Moved by Lieut.-Col. H. M. Pellatt, seconded by Mr. Thomas Long, "That the poll be now open for the election of directors, and that the same be closed whenever five minutes shall have elapsed without a vote tendered; and that Messrs. B. E. Bull and R. B. Street be the scrutineers to take the vote; and that they report the result to this meeting." Carried.

The election was then proceeded with, the result of the ballot being the election of the following: Messrs. Eugene O'Keefe, John Foy, Edward Stock, Thomas Flynn and James Mason.

On motion the chair was taken by Mr. Thos. R. Wood, and a vote of thanks was tendered the president for his conduct in the chair.

The meeting then adjourned.

At a meeting of the new board, held immediately after the close of the above, Mr. Eugene O'Keefe was re-elected president, and Mr. John Foy re-elected vice-president of the company.

THE CROW'S NEST PASS COAL COMPANY, LIMITED.

The seventh annual general meeting of shareholders of the Crow's Nest Pass Coal Company, Limited, was held in the city of Toronto on Friday, the 12th day of February, 1904, at 2.30 p.m. The president, Hon. Geo. A. Cox, having taken the chair, Mr. G. G. S. Lindsey was requested to act as secretary to the meeting. Amongst those present in person were: J. M. Bond, Guelph; C. C. Dalton, N. Ainley, P. D. Ball, Thomas Walmsley, Wm. Crocker, Col. James Mason, Dr. Green, Sydney Jones, J. D. Chipman, Samuel Trees, Col. G. A. Stimson, G. A. Case, G. G. S. Lindsey, K.C., W. D. Beardmore, N. Macrae, Col. H. M. Pellatt, F. C. Vanstone, Christopher Cook, E R. Wood, E. St. G. Baldwin, Hon. Geo. A. Cox, H. Sutherland Stayner, Charles Perry, S. C. Smoke, K.C., J. F. Edgar, Thos. Patterson, S. H. Thomson, W. J. Morrice, J. K. Osborne, Beverley Jones and Henry Swan.

After reading the notice calling the meeting, the secretary read the seventh annual report, including statement of assets and liabilities as follows:

REPORT.

The directors beg to submit to the shareholders of the company their seventh annual report, including statement of assets and liabilities as of the 31st December, 1903.

The balance at the credit of profit and loss account brought forward from 1902 amounted to $950,511.96. To this has been added the sum of $310,492.28, being the company's net profits from the operations of the year, also the sum of $913,526.25, representing the premium received on calls paid on new stock, the whole making an aggregate to the credit of the profit and loss account of $2,174,530.49. From this amount the directors have paid four dividends of 2½ per cent. each, making 10 per cent. for the year, and amounting in all to $303,717.36. This amount deducted from the above balance at the credit of profit and loss leaves at the credit of that account, carried forward to 1904, the sum of $1,870,813.13.

The balance of the new issue of stock referred to in the last annual statement as to be paid during the year 1903 amounted to, including the premium, $1,646,318.75. On the 31st December last this had all been paid with the exception of $123,775 (of which $74,265 is premium).

Substantial progress was made during the year in the permanent development of the company's properties at Coal Creek, Michel and Morrissey. It was not until the first of Februar,y 1904, that the mines at Coal Creek, which had been damaged by the explosion of the 22nd May, 1902, were fully restored.

During the year nearly a million dollars have been spent on plant, development and machinery, adding largely to the efficiency and capacity of the mines and of the operating and coking plants.

The steady increase in the production of coal is best illustrated by pointing out that the output for the year just closed exceeded that of 1902 by 49.83 per cent., while the output for December, 1903, is larger than that of January of the same year by 58.72 per cent. This satisfactory progress has been made notwithstanding that production was materially retarded by a strike of all the company's miners, lasting from the 11th February to April 1st, and to a less degree by the strikes of the coke oven men in May, and of the miners at Morrissey in September. A contract has been executed with the men, providing for wages, hours of labor and other usual matters, effective for three years, but determinable by either party at the end of the second year, and it is expected that there will be no more labor troubles during the life of this agreement.

Th mountain slide at Frank, which covered up the Canadian Pacific Company's main line in the Crow's Nest Pass, gave rise to a car shortage of considerable duration, as did the handling of the western harvest in the months of October and November, both of which shortages interfered to a considerable extent with the transportation, and, therefore, with the production of coal and coke.

The accounting work has been separated from that of the operating, and a new department created to take care of this and the purchasing, and Mr. Daniel Davies has been appointed comptroller in charge of this department.

Mr. T. R. Stockett, Jr., is now acting general manager, and it is hoped that the confidence that his record as general superintendent for several years has earned for him will be confirmed by his work as acting general manager.

The duties formerly performed by the managing director have been assigned to the office of the third vice-president, and are now being very satisfactorily performed by Mr. G. G. S. Lindsey, who has been elected to that position.

The directors regret that Mr. R. W. Macpherson, the general auditor of the company, will after the annual meeting sever his connection with the company, a loss which will be much felt.

All of which is respectfully submitted.

G. G. S. LINDSEY, Third Vice-President. GEO. A COX, President.

PROFIT AND LOSS ACCOUNT.

For year ending 31st December, 1903.

Balance at credit December 31, 1902	$950,511 96

		$5,798,647 61

I have examined these statements of profit and loss, and of assets and liabilities, also the books and vouchers of the Crow's Nest Pass Coal Company, Limited, and find the same correct.

A running audit has been maintained, and I certify that the books are well and truly kept.

R. W. MACPHERSON,
General Auditor.

Toronto, February 12th, 1904.

Senator Cox, in moving the adoption of the report, referred, amongst others, to the following items of interest:

The coal produced during the year 1903 amounted to 661,118 tons, as compared with 442,049 tons in 1902. Of this tonnage 279,334 were sent to the coke ovens, and produced 167,989 tons of coke, as against 121,000 tons made in 1902, while the balance, 381,784 tons (with the exception of 22,823 tons consumed under the boilers) were disposed of as merchantable coal.

The new mines opened during the year were: At Coal Creek, 3; Michel, 2, and at Morrissey, 2.

The construction of 492 ovens was commenced during 1903: 252 at Michel and 240 at Morrissey. Of these, 198 at Michel and 148 at Morrissey were completed, adding a total of 346 ovens to the company's coking plant, and bringing the total number of ovens now constructed up to 982. The remainder of the ovens will be completed early this spring.

The net profits as a result of the year's operations amount to $310,492.28, of which $303,717.36 was paid out in dividends, and there was received for premium on calls paid on new stock during the year $913,526.25. This enables a carrying forward to the credit of profit and loss of $1,870,813.13, of which $145,078.13 is undistributed profits and $1,725,735 premium received on stock.

On the 1st of May the new town site of Morrissey Mines was put on the market, and sales made amounting to $30,000, which have since been increased to $35,712.

It has been found desirable to acquire the branch railroad between the main line of the Crow's Nest Southern at Morrissey Junction and the company's mines, a length of about five miles, for which a charter was obtained from the British Columbia Legislature last year.

Mr. Rogers, having been obliged to resign the position of managing director, the board have transferred the duties of that office to the office of third vice-president, and Mr. Lindsey has fulfilled the duties; and I desire to express the high appreciation of the directors for the excellent work he has accomplished.

Col. Pellatt, in seconding the adoption of the report, spoke at some length. He pointed out that the company practically owed no liabilities except to its shareholders, and that the item in the assets—mines, real estate, plant and development, amounting to $5,418,435.51—really represented actual cash put into plant, development and machinery. This magnificent property of the company, 250,000 acres in extent, wealthy in coal and timber, and full of possibilities as to new town sites and farms, was, therefore, not taken into account at all in this item. He gave a good illustration of what a 3,000 daily tonnage meant by pointing out that it took ten ordinary railroad cars, each of thirty tons capacity, to transport this much coal, and illustrated how much machinery it took to keep this moving by explaining that not one pound of coal ever stops moving from the moment it leaves the working face until it finds itself in a railroad car.

The company has installed three excellent waterworks systems, sufficient electric lighting plants and a telephone system, and has found it prudent to own the branch line of railway running to its mines at Morrissey, which it is now operating.

There has never been a time in the history of the company when the directors can look forward with so much confidence to a steadily increasing tonnage as now, and they can fairly expect from the large amount of development work carried on during the last two years a very telling effect on the quantity of coal mined and the cost of production.

The report was unanimously adopted.

The following gentlemen were elected directors for the ensuing year: Hon. George A. Cox, Robert Jaffray, Lieut.-Col. H. M. Pellatt, William Fernie, J. A. Gemmill, J. D. Chipman, David Morrice, E. R. Wood, Thomas Walmsley, Lieut.-Col. James Mason, Frederic Nicholls, G. G. S. Lindsey, K.C., and C. C. Dalton.

The meeting then adjourned.

At a subsequent meeting of the directors, held immediately after the meeting of the shareholders, Hon. George A. Cox was elected president for the ensuing year and Mr. Robert Jaffray first vice-president, Col. H. M. Pellatt second vice-president, G. G. S. Lindsey, K.C., third vice-president, and E. R. Wood treasurer.

THE QUEEN CITY FIRE INSURANCE COMPANY.

Established 1871.

Report of the directors to the thirty-third ordinary general meeting, held at the offices of the Company, Queen City Chambers, Church Street, Toronto, on Saturday, 13th day of February, 1904.

REPORT.

The directors have much pleasure in submitting to the shareholders the revenue account and profit and loss account for the past year, and the balance sheet, showing liabilities and assets on 31st December, 1903.

The number of policies in force at the end of the year was 5,057, covering at risk, after deducting the re-insurance, the sum of $4,936,844.

By referring to the profit and loss account it will be seen that the total sum at the debit of this account on 31st December, 1903, was $126,954.65, out of which has been appropriated a special dividend of $50,000, accompanied by a call for the same amount, thus increasing our paid-up capital to $100,000; and carried to rest or reserve fund $25,000, bringing this account also up to $100,000. When it is taken into consideration that the total cash our shareholders have ever been called on to pay has been only $10,000, such results as you now have before you must be considered phenomenal.

In accordance with the Act of Incorporation, all the directors retire and are eligible for re-election.

THOS. WALMSLEY, Vice-President and Sec. HUGH SCOTT, President.

The report was adopted, and the following board, viz.: Hon. Justice Maclennan, J. D. Chipman, J. G. Scott, Thos. Walmsley and Hugh Scott, were unanimously elected, and at a subsequent meeting thereof Hugh Scott was re-elected president and Thos. Walmsley vice-president.

Auditors.

Toronto, February 8th, 1904.

HAND-IN-HAND INSURANCE COMPANY.

(Mutual and Stock. Founded 1873.)

The thirty-first general ordinary meeting of the members and shareholders was held at the offices of the Company, Queen City Chambers, Church Street, Toronto, on Saturday, 13th day of February, 1904, when the following report was submitted:

REPORT.

The directors beg to submit to the members and shareholders the revenue account for the past year and the balance sheet showing liabilities and assets on 31st December, 1903.

The number of policies in force at the end of the year was 2,281, covering at risk after deducting re-insurance the sum of $3,542,975.

The total revenue from the Fire Branch was $80,444.46, and after deducting all expenses and claims for fire losses the balance to carry forward was $14,194.27.

The balance now standing at the credit of contingent account of the Plate Glass Branch is $20,966.26.

The usual two per cent. dividend on the capital of the Company, being equal to ten per cent. on the paid-up portion thereof, was declared.

The retiring directors this year are Hon. Justice Maclennan and Mr. J. D. Chipman.

All of which is respectfully submitted.

HUGH SCOTT, Vice-President and Sec. LARRATT W. SMITH, President.

The report was adopted, and the retiring directors unanimously re-elected.

The board of directors as now constituted is: Larratt W. Smith, K.C., D.C.L., president; Hugh Scott, vice-president and secretary; Hon. Justice Maclennan, John D. Chipman, Thos. Walmsley and Thomas Flynn.

Toronto, February 8th, 1904.

LONDON LIFE INSURANCE COMPANY.

The twenty-ninth annual meeting of the shareholders and policyholders of the London Life Insurance Company was held at the company's offices, London, Canada, February 8th, 1904.

The president, Mr. John McClary, occupied the chair, and there were present a number of shareholders and policyholders of the company.

The notice calling the meeting was read by the manager and secretary, Mr. J. G. Richter, after which the following report and financial statement were submitted:

REPORT.

The directors of the company beg to submit annual report and duly audited financial statement for the year ending December 31st, 1903.

During the year 14,102 applications for insurance, amounting to $1,874,729, were accepted and policies issued therefor.

The net premium and interest receipts of the year were respectively $323,568.95 and $74,442.33, totalling $398,011.28, an increase of $42,908.17 over the previous year.

The sum of $80,764.29 was paid for death claims, $4,990 for matured endowments, and $9,483.96 for surrendered policies and cash profits, a total of $95,238.25 paid policyholders or their heirs during the year.

The insurance in force on the company's books at the close of the year, after deducting all re-insurances, amounted to $7,466,627.67, under 3,751 "Ordinary," and 49,951 "Industrial," or a total of 53,702 policies—an increase of 4,644 policies for insurance of $638,793.30 for the year.

The assets of the company, exclusive of uncalled but subscribed capital amount to $1,462,965.88, an increase of $160,902.02 for the year. The interest and other payments falling due during the year were in the main satisfactorily met. No losses in respect of investments were incurred during the year.

The liabilities of the company under existing policies, and in all other respects, have been provided for in the most ample manner, the whole amounting to $1,338,793.55. The surplus on policyholders' account, exclusive of uncalled but subscribed capital, is $124,172.33, and after deducting paid up capital, accumulating profits and contingent fund, there remains a net surplus over all liabilities and capital, of $44,535.33.

JOHN G. RICHTER, Manager and Secretary. JOHN MCCLARY, President.

To the shareholders of the London Life Insurance Company:

As auditor I have checked and examined the company's books for the year ending 31st December, 1903, and find them carefully and correctly kept. The annexed cash statement and balance sheet are true abstracts from the books, and properly exhibit the company's affairs. I find the securities covering loans in place.

JAMES McMILLAN, Auditor.

London, 3rd February, 1904.

The actuary of the company, Mr. Edward E. Reid, B.A., A.I.A., submitted his report on the valuation of the company's outstanding policies and other obligations, as follows:

The valuation of the reserves on the policies in force has been made on the same high standard as in previous years. The interest basis is 4 per cent. on business issued previous to January 1st, 1900, and for policies issued since that date 3½ per cent. for "Ordinary" business, and 3 per cent. for "Industrial" business. The Government requirements in this respect have therefore been considerably exceeded.

Provision has been made for surrender values on policies now lapsed, but for which no surrender value has as yet been applied for; and the practice, hitherto followed, of providing in the liabilities for accruing as well as accrued profits has been continued.

The claims of the year have been somewhat higher than in any previous years. In the ordinary branch the average amount of the claims exceeded very considerably the average amount of the policies in force. Had the claims not averaged more than the policies in force the total amount would have been reduced by nearly $3,500. The industrial claims continue to show a very favorable percentage (20.9 per cent.) of the premium income, although the total amount is in excess of any previous year.

The adoption of the report was moved by the president, Mr. John McClary, who said:

Gentlemen,—The report of the directors and accompanying financial statement are, as usual, sufficiently clear, and present the affairs of the company in such detail as not to require any extended remarks for their elucidation.

The results of the past year are, on the whole, quite satisfactory, steady and solid progress having been made in all essential respects.

The interest and premium receipts of the year exceeded the like receipts of the previous year by over 12 per cent. The assets also increased by over 12 per cent., and the surplus over all liabilities ascertained on the company's exceptionally stringent basis, increased over 11 per cent.

The funds of the company are being invested mainly in first mortgages on good class real estate, the new mortgage loans of the year aggregated over $323,000, and over 80 per cent of the whole funds of the company are thus invested. Over 95 per cent of the total assets are invested in interest-bearing securities of undoubted character, leaving less than 5 per cent of non-interest-bearing assets, consisting of outstanding and deferred premiums and interest accrued on current investments.

The company's exceptionally strong financial position, as evidenced by the foregoing, will, no doubt, be equally as gratifying to the shareholders and policyholders of the company, as it is to the directors.

With these remarks I beg to move the adoption of the report.

The vice-president, Mr. A. O. Jeffery, K.C., LL.D., D.C.L., in seconding the adoption of the report, said:

The company, transacting "Industrial" as well as "Ordinary" insurance, the ratio of expense to income will naturally be somewhat greater than would be the case if "Ordinary" insurance only were transacted. As, however, the income from the respective branches is such as to cover the respective expenditures, each branch takes care of the outlays pertaining thereto without detriment to the other. For example, the gross expenditures of the past year in proportion to net income after deducting dividend paid shareholders from interest earned, was 34.7 per cent.; the apportionment of this ratio to the respective branches is, 25.6 per cent. to the "Ordinary," and 39.4 per cent. to the "Industrial," which, taking into account the volume of new business transacted in proportion to total insurance in force, and the nature of same, is, I am confident, as favorable a showing as is made by any other company.

The president has already called attention to the character of the company's investments. I would add that not only are they exceptionally good as regards security, but they are also highly remunerative. It naturally costs more to invest the company's funds in high-class mortgage securities than it would to invest same funds in debentures or other such securities, but the extra income realized from mortgage investments much more than makes up for the difference in the first cost in this connection.

The average rate of interest earned by the company the past year on its mean invested assets was 5 2-3 per cent., which must be admitted to be a very good showing.

I have much pleasure in seconding the adoption of the report.

The adoption of the report was carried unanimously.

A hearty vote of thanks was tendered the agents and other employees of the company for the satisfactory manner in which they discharged their several duties during the past year.

The election of directors resulted in the following gentlemen being elected for the current year, viz.: Messrs. John McClary, president; A. O. Jeffery, vice-president; William Bowman, George C. Gibbons, W. F. Bullen, A. S. Emery, Judge A. Bell, T. H. Smallman and Thomas W. Baker.

THE DOMINION LIFE ASSURANCE COMPANY

FIFTEENTH ANNUAL MEETING.

The fifteenth annual meeting of the Dominion Life Assurance Company was held at the head office, Waterloo, Ont., on the 5th of February, 1904.

The president, C. Kumpf, Esq., took the chair, and the managing director read the directors' report and financial statements, of which the following is a synopsis:

New Business.—Five hundred and fifty-two applications for insurance, amounting to $919,190, were received in 1903 and 504 policies were issued covering insurance to the amount of $816,648, raising the total in force, after deducting terminated policies, to $5,231,297.

The gross income of the year, less re-insurance premiums, was $198,034.81, and the gross expenditure $78,877.16, of which $26,475.40 was paid to policyholders, and over 60 per cent. of the income was added to assets.

Increase in Surplus.—The gross assets amount to $847,546.50, and the liabilities to $685,309.34, leaving a surplus on policyholders' account of $162,237.16, exclusive of uncalled capital. The surplus over all liabilities, including paid-up capital, is $62,237.16, an increase of $24,267.86, or 64 per cent.

Rate of Interest.—The rate of interest earned on mean invested assets for the year has materially improved, rising from 5.14 per cent. in 1902 to 5.40 per cent. in 1903.

Low Mortality.—The death losses have been remarkably low, being only $16,691 assurance on eleven lives, or only 3.32 per 1,000 lives at risk, a phenomenally low rate for a company in its fifteenth year.

Abstainers' Section.—The death ratio in the Dominion Life has always been low, but particularly so in the abstainers' section. This year the rate in the general section has been only 33.3 per cent. of the expectancy, and in the abstainers' section only 25 per cent. of the expectancy. The resultant saving of 66 2-3 per cent. of expected mortality in the general section has seldom been equalled by any company of similar age, but the saving of 75 per cent. in the abstainers' section is most extraordinary, and clearly marks out the Dominion Life as the company par excellence for abstainers.

The eleventh dividend was declared at the rate of eight per cent. on the paid-up capital, and the usual profit distribution continues to participating policyholders.

LONDON AND CANADIAN LOAN AND AGENCY COMPANY, LIMITED.

The thirtieth annual meeting of the company was held at the head office, Bay Street, Toronto, on Wednesday, February 17th, 1904, at 12 o'clock (noon). Among those present were: Mr. G. R. R. Cockburn, Mr. Thomas Long, Mr. T. R. Wood, Mr. C. S. Gzowski, Rev. Dr. Moffat, Mr. H. H. Ardagh, Mr. Walter L. Hime, Mr. George Ridout and Mr. John Aitken.

The president, Mr. G. R. R. Cockburn, occupied the chair, and the secretary of the company, Mr. W. Wedd, Jr., acted as secretary of the meeting. The following report was adopted:

The directors have pleasure in submitting the 30th annual report of the company and the accounts for the year ending 31st December, 1903, the result of the company's business being as follows:

The gross earnings, including the balance ($16,571.76) brought forward from last year, amounted to.....		$197,278 67
And after deducting the cost of management, interest on debentures, and all other charges, amounting in all to		114,848 08
There remains a net profit of		$ 82,430 59
Out of which two half-yearly dividends at the rate of 6 per cent. per annum and the usual tax on capital and income have been paid, amounting in all to.....		$ 60,895 15
Leaving a balance to be carried forward to 1904 of....		$ 21,535 44

The company's funds have been fully employed during the year, and applications for loans on mortgages were ac-

(Continued on page 1113).

The deaths of our late president, Mr. Innes, and our late director, Henry Cargill, M.P., were referred to with much regret, and the election of President Kumpf and Vice-President Sims were also mentioned.

Congratulatory speeches were made by several shareholders in discussing the report, special reference being made to the exceptionally strong position of the company as shown in its large and rapidly increasing surplus, its unsurpassed profits to policyholders, its very low mortality experience, its high interest earnings, and its very exceptional economy of management and low expense ratio, which is lower than ever this year.

The reports were unanimously adopted, and the old board of directors re-elected, viz.: Messrs. C. Kumpf, P. H. Sims, Thos. Hilliard, Hon. James McMullen, W. Vandusen, Walter Wells, L.D.S., S. B. Bricker, F. Colquhoun, Thos. Gowdy, Hon. S. Merner, Geo. D. Forbes, Dr. Parke, David Bean, Thos. Trow.

The board on re-organizing after the shareholders' meeting had closed re-elected Mr. C. Kumpf, president; Mr. P. H. Sims, vice-president, who with the directors resident in Waterloo constitute the Executive Committee.

NORTHERN LIFE ASSURANCE CO. OF CANADA.

The annual meeting of the shareholders of the company was held at the head office, in London, on Monday, February 1, 1904.

The president, T. H. Purdom, Esq., K.C., took the chair. The managing director, Mr. John Milne, read the seventh annual report, as follows:

Report.

The year 1903 has been the year of most satisfactory progress in the history of the company. Its income exceeds by the sum of $8,826.84 the amount required to pay all expenses, death claims, and the additional sum required as reserve by the Government. This result is a source of satisfaction to the directors, and will be to the shareholders and policyholders alike.

The amount of insurance written during the year was the sum of $1,092,750.

The total amount of insurance in force on the 31st day of December, 1903, was $3,607,246.

The total assets have increased during the year by the sum of $75,174.56, and now amount to $407,219.27, being nearly double the paid-up capital, which is $213,850.

The cash income of the company derived from premiums is $118,182.86; from interest, $13,344.04, together amounting to the sum of $131,526.90, being an increase over the preceding year of $21,504.35.

The result of the business of the year 1903 confirms the directors in their belief that from its incorporation the right course has been pursued in the management of the company. Its management has been cautions, energetic and conservative. It has aimed to build up a strong company on lines proven by experience to be sound.

The late Honorable David Mills, Justice of the Supreme court of Canada, was one of the founders of the company, and its president till his death, which occurred on the 8th day of May last. He was one of Canada's best and greatest men. His life was a distinguished one—pure, upright, noble—and will have a beneficial influence for all time. He always gave the company the benefit of his great ability and knowledge, and guided its affairs with conscientious care. The directors recorded his death with the deepest regret. Mr. Charles Jenkins, of Petrolea, was appointed by the directors to fill the vacancy on the board caused by the death of the Hon. Justice Mills.

The managing director and his assistants at the head office have performed their duties with zeal and fidelity. The inspectors and the staff in the field have ever been loyal, and the good-will existing between the management and the field staff has contributed much to the year's success.

The books of the company have been regularly audited, with the result which appears below. The attention of the shareholders is especially invited to the statistics given, which show the comparative progress being made.

All of which is respectfully submitted.

T. H. Purdom,
President.

The following is the synopsis of the income and expenditure, as compared with 1902:

Balance Sheet.

RECEIPTS.

	1902.	1903.

	$407,219 27
Total amount of assets	$407,219 27
Amount of capital stock paid up	213,850 00
Excess of assets accumulated	$193,369 27

John Milne,
Managing Director.

The president in moving the adoption of the report, referred to its satisfactory nature. The aim of the directors had been to secure first-class men in every department. The result had been that the company, having started out on correct lines and continued carefully from the commencement in the same course, had succeeded. He spoke sympathetically of the death of the former president, the Hon. David Mills. The Northern was well established in public confidence, and he believed was destined to become a very large company.

The second vice-president, W. S. Calvert, Esq., M.P., in seconding the adoption of the report, concurred with what the president had stated. The surplus shown was the best proof that the management of the company had been successful. The assets and income were increasing as rapidly as was necessary to maintain the company in its place among the sound and progressive life insurance companies of Canada. He was satisfied with the past, and looked for a bright future for the company.

Brief addresses expressing satisfaction at the progress made by the company during the past year were made by N. H. Stevens, Esq., and Matthew Wilson, Esq., K.C., of Chatham, and others.

The report was unanimously adopted.

The following gentlemen were re-elected directors for the ensuing year:

T. H. Purdom, Esq., K.C., London; Thos. Long, Esq., Toronto; W. S. Calvert, Esq., M.P., Strathroy; Lord Strathcona, London, England; Matthew Wilson, Esq., K.C., Chatham; John Ferguson, Esq., London; J. D. Balfour, Esq., M.D., London; N. H. Stevens, Esq., Chatham; John Davis, Esq., Windsor; Francis Love, Esq., London; John Purdom, Esq., London; M. McGugan, Esq., M.P., Mount Brydges; Charles Jenkins, Esq., Petrolea; John Milne, Esq., London.

At a subsequent meeting of the board of directors, Mr. T. H. Purdom, K.C., was re-elected president; Messrs. Thomas Long, Toronto, first vice-president, and W. S. Calvert, M.P., Strathroy, second vice-president.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, February 18th, 1904, compared with those of the previous week:

cepted to the amount of $394,118 on property valued at $866.000.

Interest rates in Ontario have somewhat advanced during the year, but there has been little change in Manitoba and the Territories. The payments on mortgages and other securities have been very promptly met by borrowers.

Your directors, considering the time opportune, extended the business of the company in September last into the eastern portion of the Territory of Assiniboia, the company's inspector having previously made a thorough examination of the districts to be operated in. Messrs. Mackenzie & Brown, barristers, of Regina, have been appointed chief agents of the company for that district.

The various officers of the company have performed their duties to the satisfaction of the directors, and the books, vouchers and securities of the company have been duly audited, as per certificate appended.

GEORGE R. R. COCKBURN,
President.

Toronto, 5th February, 1904.

		$ 197,278 67

1903.
December 31st—By balance carried to next year $ 21,535 44

V. B. WADSWORTH,
Manager.

The scrutineers reported the following gentlemen duly appointed directors: G. R. R. Cockburn, Sir W. P. Howland, Donald Mackay, Lord Strathcona and Mount Royal, Dr. Larratt W. Smith, Thomas Long, T. R. Wood and C. S. Gzowski.

At a subsequent meeting of the newly-elected board, Mr. George R. R. Cockburn was appointed president, and Mr. Thomas Long, vice-president.

SUGGESTIONS

whereby you can save fuel, heat, steam, power, labor time, etc., mean suggestions if acted upon by you, will unquestionably save you money.

The Canadian Casualty & Boiler Insurance Co.

give free of charge to all those who insure their Boilers with them, Consulting Engineers' advice free.

It Will Pay You

to write us about insuring and inspecting your Boilers.
Free insurance on Firemen and Engineers in charge of your Steam Plant.

WRITE FOR INFORMATION.

A. G. C. DINNICK, Managing Director

TELEPHONE MAIN 4091.

—Patient—What are the things I must avoid, doctor? Physician—Pork, mackerel, tea, coffee, oatmeal, rye— Patient (with a gasp)—Rye? Physician—In the form of bread. Patient—All right, doctor. Go on.—Chicago Tribune.

MONTREAL MARKETS.

Montreal, February 17th, 1904.

Ashes.—Little trading is reported, but receipts continue to be insignificant, and prices are well maintained, from $6.05 to $6.10 being quoted for first quality of pots; seconds, $5.60 to $5.65, and pearls about $7.

Cements and Firebricks.—In cements there is very little doing, the severe weather being very unfavorable to trade in this. Some occasional moderate sales of firebricks are reported. We quote: Belgian cement, $1.80 to $2.05; English, $2.15 to $2.25; German, $2.15 to $2.35; firebricks, $18 to $24 per M.

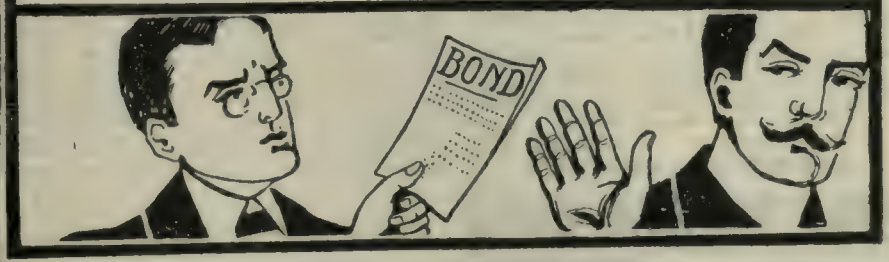
Dry Goods.—Travellers' letters all tell the same tale of delayed trips and uncertain connections, and it is feared the terrible storm of yesterday, if wide spread, will make matters worse. Even suburban traffic was completely blocked yesterday afternoon and evening, parties residing in Lachine and Ste. Anne being obliged to remain in town all night, and trade is naturally materially affected, both wholesale and retail. On the 13th inst., the Dominion Cotton Co. issued a circular advancing strongly the products of their Magog mills, some lines of prints, cretonnes, etc., being put up from 2 to 3c. a yard. All Belfast, Glasgow and Manchester letters advise a very strong market for all kinds of linens and unions, and some towel manufacturers have advised an advance of 5 per cent.

Dairy Products.—The cheese market is a very dull one at the moment, English buyers and local holders being apparently pretty far apart in their ideas as to prices, and it is a difficult matter to establish any very definite quotations, but it may be safely said that values are decidedly easier. A little better demand is reported for butter, and very little fresh-made creamery is coming forward. It is said a little export is being done in dairy makes. Winter creamery is reported at 19½ to 20½c.; fine fall grass creamery, 21 to 21½c.; dairy, 16½ to 17c.

Furs.—The week has developed nothing specially new, and business is comparatively quiet in raw skins, owing to the light offerings. We repeat quotations for prime pelts as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No 1. choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; Wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1, dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—Last week's report as regards general trade will still apply, and owing to the difficulties attending transport in the interior, the volume of business is still quite moderate. Japan teas are now up from 1 to 1½c., which has created an increased demand for Ceylon greens, which are naturally firmer; blacks do not appear to be as yet affected. Raw sugars, both beet and cane, are up 1½d, but prices of refined are unchanged at $4 for standard granulated in bbls., and from $3.35 up for yellows. A fairly good demand is reported from jobbers. A cable received from Barbadoes to-day makes a firm quotation of 19½c., cost and freight, but no business resulted, as there appears to be a feeling that lower prices will prevail. It is said there is a much larger quantity of so-called Barbadoes molasses in the East than was supposed, some estimates being put at 15,000 puncheons, largely sent in by the Boston Molasses Co., on which it is figured

An Unreasonable Request



SMITH—You will oblige me if you will go on my bond, merely a matter of form you know.
JONES—Oh no thanks! cost me three hundred last time.
SMITH—Well, what will I do?
JONES—Write to THE UNITED STATES FIDELITY & GUARANTY COMPANY,

Kirkpatrick & Kennard, Managers for Canada, 6 Colborne St., Toronto.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name **THE GREAT-WEST LIFE**; but the above statement exactly describes the happy position of its policy-holders.

Managers and Underwriters.

there will have to be a considerable loss. Canned corn and tomatoes have again advanced, and the packers' combination now quote tomatoes at $1.12½, and corn at $1.15.

Hides.—The situation is little changed. Receipts of country hides are very light just now, owing to the blocked state of the roads, and stocks in warehouse, are comparatively low. Dealers still pay 8c. for No. 1 beef hides, 11 and 9c. for calfskins, and 75c. each for lambskins.

Metals and Hardware.—The volume of business has not increased since a week ago, and some large foundries and other large manufacturing establishments are said to be badly tied up owing to supplies of iron and heavy metals being undelivered for several weeks. Lead shows further advance, and is quoted at $3.25; antimony also firmer at 7¾c. Tin and copper are steady at last quotations. Bar iron easy at $1.75 to $1.80 as to lot. The iron pipe men are said to have got together, and it is not likely prices will now go below $4.35 for inch. Sheets, as lately noted are showing some weakness, and Canada plates are generally quoted at $2.30, and black sheets at $2.25; galvanized ditto, $4.25; culls, $4. Boiler plate is fairly steady at $2.10.

Oils, Paints and Glass.—The volume of orders, usual at this season, is being affected by the difficulties travellers are meeting with in covering their routes, and collections are also said to be showing some falling off; but with seasonable and settled weather, business would become good. Linseed oil is showing some signs of recovery, London cable quotations being advanced about £1, and local quotations are rather firmer. Turpentine is again advanced to 93¾c. In leads and glass there is much competition as regards prices, quotations being strongly shaded for fair lots. We quote: single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 93¾c., single barrels; olive oil. machinery, 90c. to $1; cod oil, 35 to 40c. per gallon.; straw seal, 45 to 50 to 55c. per gallon; tinged and brown ditto,

of good Canadian Business; and that in all other respects the Company has had a most successful year.

down to 35c.; castor oil, 7½ to 8c. for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.50; No. 1, $4.25; No. 2, $4; No. 3, $3.80 to $3.90; No. 4, $3.60; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4½c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in bbls., $1.90; ditto, in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75c.; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3 to $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, Feb. 18th, 1904.

Chemicals, Drugs, Etc.—A normal trade is going on locally in drugs, with prices continuing steady. In New York a brisk trade is reported. Considerably more interest is being taken in quinine; opium, however, is a fraction lower. The refiners of camphor have again raised their prices by 3c. Menthol is somewhat firmer.

Flour and Grain.—A firm market prevails for flour. Ninety per cent. patents are now held at $3.40 in buyers' bags, east or middle freights, though buyers do not appear to go as far as that by 10c. or so. Manitoba is quite steady. Rolled oats are firm. Bran is quoted at $15, and shorts at $17 to $17.50. Wheat has again gone up about 2c., and is very firm at the advance. Rye is up 1c. Buckwheat has also risen 2c. Very little business is passing. Great difficulty is experienced in shipping stuff even when it is sold, cars being almost impossible to obtain.

Fruits and Vegetables.—Some improvement has been visible in the movement of trade this week, though the weather conditions for large sales continue bad. The following represents about the average price list: Apples, 75c. to $2.50 per barrel, according to quality; cocoanuts, $3.50 to $4 per sack; oranges, Florida, $2.75 to $3 per case; California navels, $2.50 to $3.25; Mexican, $2.25 to $2.50; Valencias, ordinary, $4; large 714's, $5, and large $5.50; bananas, 8's, $1.25 to $1.50 per bunch; 1st ,$2 to $2.50; celery, $5.50 per case and 75c. to 90c. per doz.; cranberries, $8 to $9 per barrel; $1.10 to $1.25 per basket; Spanish onions, $3.25 to $3.50 per large case, or $1.25 for small; Malaga grapes, $6.50 to $7.50 per barrel.

Groceries.—Much annoyance has been felt and difficulty experienced both by travellers in getting from one point to another, and by consignees in getting deliveries in time, both the roads and railways throughout Ontario being in a terrible condition. Some of the wholesalers, however, report that they have been able to transact a fairly large business, in spite of these troubles. The canners of vegetables have raised prices in many lines, and corn is now selling at $1.15 to $1.25; peas, $1.05 to $1.50; tomatoes, at $1.12½. Molasses (New Orleans), has gone up in price, owing to a new calculation in the duty, which puts it on the same basis as syrup. Sugars remain quite firm in sympathy with the New York market. Teas are strongly held and there is an upward tendency in some grades, but the volume of business actually transacted is by no means large. Dried fruits are steady, but they present no special feature.

Hides, Skins and Leather.—No further change has taken place in the market. Hides and skins are coming in in moderate quantities, but the price keeps steady. Sheepskins still sell around 90c. to $1.00. Calfskins are firm. Tallow continues unchanged. A somewhat better enquiry is manifested for leather, and when country roads improve it is expected that trade will increase considerably.

Live Stock.—Receipts at the market this week were very light, as was to be expected from the transportation difficulties in vogue. Not many export cattle were on view and values kept nominal. The butchers' cattle offered sold early at unchanged prices. No stockers or feeders were on the market. Milch cows sold readily at $30 to $55 each. The market for calves showed up firm. Sheep and lambs were in request, but few offered.

Seeds—A dull market is experienced in the seed trade. Red clover is quoted at about $5.50 or $6 for extra choice; alsike, at $4.50 to $5.75; timothy, $1.15 to $1.50.

Wool—Some fleece wool has been sold this week for export to the United States, and this, together with the improving prices at the London wool sales, has caused the market to become firmer. Pulled wools are meeting with a good enquiry from the domestic mills, and prices are firm.

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer. An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan.

Mercantile Summary

D. POLLOCK'S hotel, at West Prince Albert, Sask., was on Friday last burned to the ground, and one or two other buildings damaged. Total loss over $22,000; insurance on hotel, $9,000.

THE James Cooper Manufacturing Company's factory plant and other properties, at Rockfield, Que., have been sold to a syndicate which will be known as the Canadian Engineering Co. Mr. R. W. Chapin, of New York, has been appointed manager. The purchase price is understood to have been about $200,000. The new company will engage in the manufacture of machinery for the Canadian Bullock Electric Manufacturing Co., and the Lidgewood Hoist and Cable Co.

ON Friday last, a fire at the smelting works of the Canadian Copper Company, Copper Cliff, Ont., did damage to the amount to about $150,000. The building and plant were insured for $100,000. About 1,100 men are thrown out of employment. Arrangements are being made, however, to use temporarily the Mond smelter at Victoria Mines. It is the stated intention also to build new works on a greatly enlarged and improved scale.

THE Terrebonne Electric Railway Company is applying to the Quebec Legislature for authority to construct and operate a system of electric railways within the counties of Hochelaga, Jacques Cartier, Laval, Two Mountains, Argenteuil, Wright, Labelle, Terrebonne, Montcalm, and L'Assomption, and connecting the same with the city of Montreal, also for authority to develop one or more water-powers to develop power for the same, and electric lighting for various municipalities.

THE Canadian Pacific Railway has awarded to J. J. Nickson & Co., of Vancouver, the contract for constructing a $3,000,000 irrigation canal near Calgary. It will be twenty miles long and will take two years to make. The railway company proposes to build four hundred miles of canal for irrigation purposes along the Bow river to carry water to the great wheat lands adjacent to their railway. The principal part of the twenty miles of canal now proposed is within four miles of the railway and parallel to it. The canal is to be forty feet in width. It will run across prairie land that is practically level.

THE town of Collingwood, Ont., made an agreement with the Cramp Steel Company, whereby the former was to give a bonus of $115,000 on condition that the company should erect smelting works and a steel furnace by July 1st next. The steel plant is now ready for operation, having been erected at a cost of $400,000, but the company now want to be relieved of the obligation to erect a smelting plant by the above-named date. They wish the steel plant to be well established first. The town has agreed to this on condition of the bonus being reduced to $60,000, and it is now petitioning the Ontario Legislature for authority to make the alteration.

PARKER & CO., 61 Victoria Street, TORONTO

Mercantile Summary.

As the result of several law-suits lately instituted by Montreal houses for past due accounts, an assignment has been made by F. X. Laframbaise & Co., dealing in groceries, etc., at South Indian, Russell County, Ont.

A MONTREAL tobacconist, named Napoleon Bedard, makes an offer to his creditors of 40 cents in the dollar, cash. He is said to owe nearly $2,000.——N. Degrosselliers, of the same city, in the grocery trade for about five years, has assigned. So also has C. S. Milburne, an Ottawa tobacconist, who owes about $1,000.

THE sheriff is reported to be in possession of the assets of J. I. Smyth, a general dealer of some importance at Port Hood, N.S. Mr. Smyth has been long in business, first as one of the firm of Fynn & Smyth, who began business in 1886 on a capital of $15,000, principally contributed by Smyth, it is said. Owing to poor buying and over-liberal crediting, so it is said, they had to ask an extension in 1897, and then dissolved. Smyth has since continued alone, but has shown signs of financial strain all along, and during the past year frequent suits have appeared against him.

IMPORTANT WORK.

"Investments" is admitted by the Press to be a work of great value as a guide to Investors. Among the specially contributed articles are :—
"GENERAL PRINCIPLES FOR INVESTORS."
"STOCK MARKETS AND HOW TO PROFIT BY THEM."
"THE THEORY OF OPTION DEALING."
"HOW TO INVEST IN MINES."
"INSURANCE AS AN INVESTMENT."
"COLONIAL LAND: ITS COMING IMPORTANCE."
An entirely new feature is a collated list of "AVERAGE VALUES," enabling an Investor to gauge the value of any particular security. "Investments" (148 pages). Post Free on mentioning THE MONETARY TIMES.

Mercantile Summary.

THE Canadian Pacific Railway have awarded to Messrs. Ironsides, Rannie & Campbell, of Vancouver, the contract for constructing a wharf for the New England Fish Company in that city, the price being about $20,000.

THE White Pass and Yukon Navigation Company will, during the coming season, commission and operate a steam ship service between White Horse and Mendenhall Landing, on the Takhena river, which is on the usual route to the placer diggings in Alaska district.

ON the 22nd inst., the warehouse of the Essex Flax Mill, containing flax, fibre, tow, and seed, was destroyed by fire at a loss of $10,000, insured for $6,000. On the same day, Porter's jewellery store and two or three other buildings, in Gilbert Plains, Man., were burned. Loss abont $15,000; insured.

MR. RAYMOND ALLEN, a pioneer in the Big Bend district, of British Columbia, and the manager of the Camp Creek Hydraulic and Placer Mining Company, is said to have discovered two ancient river-beds, which promise to be among the best paying hydraulic properties in that section.

THE Montreal Rolling Mills Company held their annual meeting last week and elected the following board of directors: E. S. Clouston, Senator George T. Drummond, Mr. William McMaster, Senator Robert Mackay, Mr. James Ross, Mr. J. S. McLennan, Mr. H. Montagu Allan, and Mr. James L. Waldie, secretary. Mr. E. S. Clouston is president and Mr. William McMaster, vice-president and general manager.

A COMPANY is being organized in Victoria, B.C., under the name of the Cowichan, Alberni and Fort Rupert Railway Company. The proposed route is from a point on the east coast of Vancouver Island, thence by way of Cowichan river to the lake of that name, thence to Barclay Sound, with a branch by way of Coleman creek to Alberni and Fort Rupert, and possibly another branch to some point on Quatsino Sound. John Thompson, of Victoria, and some United States capitalists, are those chiefly interested. The capital stock of the company will be $2,000,000.

NAPOLEON TREMBLAY, of St. Irenee, in the Saguenay district, near Murray Bay, has assigned. He succeeded to the general store business of his late father quite a few years ago, inheriting some moderate property. He shows liabilities of $4,380, with nominal assets of $3,800.——J. R. Dube, general dealer, Becancour, Que., lately insolvent, has arranged to pay 40 cents, cash, on liabilities of $4,750.——An offer of 25 cents on the dollar is made by A. Bellefeuille, stationer, Three Rivers, Que. Liabilities are stated at $2,450.——C. Descoteaux, tailor, St. Leonard, Que., is offering 50 cents on liabilities of $1,650.——F. X. Juneau, dealing in implements, etc., at St. Felicien, down in Chicoutimi County, Quebec, has effected a compromise on liabilities amounting to $2,440.

Mercantile Summary.

THE Cunard Steamship Line has given an order for the construction of a turbine steamer for Atlantic service. She will be of a capacity of 12,000 tons.

LA Compagnie Electrique St. Claire, headquarters at St. Anselme, Que., capital stock $50,000, will build an electric line in the counties of Dorchester, Bellechasse and Levis.

SOME ingenious man or men in Truro, Nova Scotia, making unshrinkable underwear, have adopted the plan of sending out through mail sample boxes, as big as a lady's hand, each containing a sample of a pair of doll's drawers.

AT the opening of the Legislature of British Guiana, on the 18th inst., Governor Sir James Swettinham announced that a preference of 10 per cent. in duties would be given to imports from the United Kingdom and Canada.

THE city council, of Sherbrooke, Que., at a meeting last week, decided to give the Sherbrooke Light, Heat and Power Co. $233,000 for the electric light and gas plants. A by-law is to be submitted to the ratepayers at an early date.

THE Great Lakes and St. Lawrence Navigation Company, or Wolvin syndicate, the name by which it is better known, has surprised the shipping and commercial community of Quebec by the announcement of their intention to remove their head office from that city to Montreal.

THE Laprairie Brick Company, Limited, capital, $300,000, recently in receipt of a Dominion charter, will take over the business now carried on in Montreal by the Laprairie Co., and will manufacture bricks, tiles, and other products of clay, shale, and similar materials. A prominent member of the company is Mr. Peter Lyall, of Montreal.

WE are told that Mr. H. H. Gildersleeve, son of the general manager of the Richelieu and Ontario Navigation Co., has been appointed to the management of the Northern Navigation Company, with headquarters at Collingwood. Mr. Gildersleeve was formerly general manager of the Lake Ontario and Bay of Quinte Navigation Company.

THE C.P.R. steamer, "Lake Michigan," collided with a barque off Dungeness, England, last week, and at last reports fears were expressed lest she should become a total wreck. The cargo was made up of 4,314 barrels of apples, chiefly from the Annapolis Valley, 447 head of cattle, 24,307 bags of flour, 8,895 boxes of cheese, besides quantities of hay, wheat, glucose, etc.

A NEWS-ITEM from Rat Portage Ont., says that work is progressing steadily and favorably at the Sultana mine. Machine drilling is being vigorously carried on and the ore chute located last October at the bottom of the mine has now been followed to a further depth of over 75 feet. In addition to this, ore body has been found in five or six different places. One of the cuts shows ore which has every appearance of being valuable.

Mercantile Summary.

THE Toronto and Mimico Electric Railway is to be extended without delay from Long Branch to Lorne Park, a distance of six miles.

FROM Sydney, N.S., we continue to hear of failures from time to time. W. B. K. McRury, a young man who started in hardware and paint selling in 1901, with the assistance of his father-in-law, is already offering 20 cents on the dollar. His merchandise liabilities are $5,621, besides which his father-in-law ranks for $1,500, and there is also a claim for rent. ——J. E. Ripley, doing a small general business in the outskirts of the same town, has assigned.

WE understand that at length an agreement has been reached between the Ontario Government and Mr. E. W. Backus, of Minneapolis, regarding the sale to the syndicate represented by the latter of the water-power on Rainy River at Fort Frances. It provides that the company, who are owners of the water-power on the United States side at the same point, shall develop the water-power to its full capacity by the construction of a dam, and shall render permanently available on the Canadian side one-half of the whole capacity of the stream. The purchasers agree to supply power to Canadian users at a price to be fixed by the Government in case of disagreement, and not to charge more for power on the Canadian side than on the American side. Special provision is made for supplying power to the town of Fort Frances on favorable terms. The sum of $15,000 is to be expended within nine months from date of agreement, and the syndicate is to erect at Fort Frances a flour mill with a capacity of 1,000 barrels per day, or some other industry equally extensive. The total capacity of the falls is given as 16,000 horse-power.

THE creditors of the subsidiary companies of the Consolidated Lake Superior Co. held an informal meeting in Toronto on Tuesday last and seemed disposed to approve of the plans being formed to reorganize the concern. The proposals for reorganization are embodied in the following document, which creditors are asked to sign, striking out the clause which is not acceptable: "To the Canadian Improvement Company—The undersigned hereby agrees (a) To sell to you my claims against the Consolidated Lake Superior Company and all its subsidiary companies at their face value, with accrued interest, accepting in payment therefor your notes on one or two years with interest at six per cent. per annum, and carrying as collateral first mortgage bonds of the reorganized company at seventy per cent. of their face value. (b) To accept payment of my claims against the Consolidated Lake Superior Company and all its subsidiary companies, by delivering to me of underwriting securities of the reorganized companies, by delivery to me of underclaims would buy as underwriter, under the plan and reorganization agreement of October 20th, 1903, estimating my claims at their face value with interest added."

IN HER PUBLIC LANDS
many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.
Many valuable deposits of iron, nickel, copper, gold, silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in the mineral-bearing rocks of northern, eastern and northwestern Ontario, and many more are doubtless yet undiscovered.
Canoeable waters and railway and steamboat communications lighten the labors of the explorer. Prices of land low and mining laws liberal.
For maps, reports, Mines Act, etc., apply to Hon. E. J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

NEW WESTMINSTER, B.C., council is making an arrangement with the British Columbia Electric Railway Company to purchase all the electric current necessary for lighting the city by electricity, at a cost materially less than that paid at present. The city will retain intact its present plant for use in case of emergency, and the Railway Company will erect near the present light station a transforming station. The power will be brought from the Lake Beautiful plant, which is now supplying the City of Vancouver.

THE BALTIMORE FIRE.

Mr. J. W. Mackenzie, chief agent for Canada of the Maryland Casualty Company, has quite recently returned from Baltimore, full of interesting reminiscences of the scene of the great fire. He informs us that while the building in which the company's home office was situated was destroyed, by timely removal all its important records were saved; the only property of the company destroyed by the fire was office fixtures which were amply insured. The company's divisions and departments have rearranged their records, and business is being transacted as usual at the new office secured by the company in Baltimore. All the securities owned by the company were deposited in the vaults of the Mercantile Trust and Deposit Company, and on their vaults being opened after the fire, the securities were found intact, absolutely uninjured.

As a direct result of the Baltimore fire, the Millers and Manufacturers Fire Insurance Co., Minnesota, has been forced to suspend. The general creditors will receive 100 cents on the dollar, the loss being borne by the stockholders. The company lost heavily in the Baltimore fire through writing surplus lines. Commissioner Dearth, of Minnesota, upon learning of its loss, concluded that the company had sustained too great a loss to afford its policy-holders proper indemnity. The Greenwich Fire Insurance Company, of New York, has reinsured its policies unaffected by the Baltimore fire in the Commercial Union of New York. The Greenwich had a paid-up capital of $200,000, and a net surplus of $158,164. Its losses from the Baltimore fire were $200,000. Its capital stock was therefore impaired to the extent of $41,836.

Another company to succumb, as the result of the Baltimore great fire, is the Old Town Fire Insurance Company of Baltimore. The bill of complaint alleges that the company is insolvent and unable to pay the claims against it, by reason of the fire. The company is said to have assets of $124,970, and liabilities of $254,970. The receiver of the Peabody Fire Insurance Company, of Baltimore, Mr. Richard B. Post, has stated that the company will pay policy-holders in the burned district 40 cents on the dollar.

UNITED STATES FINANCES.

Henry Clews & Co., New York, say, under date February 20th: The stock market acts as if confused by the multiplicity of influences. Chief of these, of course, is the war and its potentialities. If the struggle is confined to Japan and Russia, as it probably will be, its effect upon the world's financial markets will not be serious. But those who control the purse strings in Europe are much more sensitive about the effect of the war than financial leaders in the United

THE PURITY AND EXCELLENCE OF
COWAN'S
PERFECTION
COCOA
IS ACKNOWLEDGED BY THE WONDERFUL SALE IT IS HAVING

States. While Japanese success appears to be regarded with satisfaction throughout the civilized world, there are those who are apprehensive of the effect of defeat upon the Russian Empire, which is weak financially, industrially, and politically.

These contingencies, however, can only affect this market indirectly through the foreign houses. The local market for the time being is chiefly under the control of home conditions. These, it must be admitted, are not entirely satisfactory. The apparent friction between the Gould and Pennsylvania interests; the heavy new capital commitments of the big railroad systems and the certainty of more to follow, the commencement of cutting on grain rates; the reports of decreased earnings on some roads; the disturbing consequences of the collapse in cotton; the effect of the Panama Canal payment upon the money market and the uncertainty concerning the approaching Northern Securities decision have contributed to encourage profit-taking and to discourage purchases on the long side. Were it not for the confident undertone reflected in a good demand for bonds and supported by the evidence of complete liquidation there would undoubtedly be more aggressiveness among the bears, who evidently fear incurring any extended risks on the short side. Professionals have sold the market to only a limited extent; for the resistance shown to unfavorable conditions is surprising and exceedingly satisfactory. At present the market is in a waiting attitude, and greater activity is not likely to develop until some of the above uncertainties are cleared away. The money market, however, shows little uneasiness over the situation, both time and call money being plentiful.

THE Apple and Produce Cold Storage and Forwarding Company's warehouse, at Trenton, Ont., was on Saturday destroyed by fire, including some new and valuable machinery, and about 30,000 barrels of apples. The loss is estimated at $60,000, partially covered by insurance.

WE are told that it is the intention of the city of Moncton to make application to the Legislature of New Brunswick at its next session for power to issue bonds to the amount of $25,000, to retire those coming due this year. As the old bonds bear 6 per cent interest, and the new issue will be at 4 per cent., there will be a saving of $500 a year in interest. The city, we are told, has $35,000 of 5 per cent. bonds coming due in the next five years.

—A very appreciable tightness in the money market has developed during the past few days all over the world. It is to be presumed that the war in the Far East is mainly responsible. Several financial houses of the smaller sort on the continent of Europe have already fallen as a result, and this in turn has brought about further conservatism. In London on Wednesday, money on call was quoted at 3½ to 4 per cent., and the rate of discount in open market for short bills, 3⅜ to 3 3-16 per cent. The Bank of England rate was 4 per cent. In Toronto yesterday, call money ruled at 4½ to 5 per cent.

NATIONAL LIFE
ASSURANCE CO. OF CANADA
Good men wanted for Manitoba and the Northwest.
HEAD OFFICE, Temple Building, TORONTO.

THROUGH recent heavy losses, P. P. Giguere, of Quebec, carrving on an old established plumbing business, has become embarrassed, and has had to assign. He is said to be involved in the late failure of S. Peters, contractor, to the amount of $12,000 or $13,000, and also to be a creditor in the case of insolvency for some $1,400.

—Whether it be due to a sympathetic reaction in insurance circles owing to recent heavy losses by some of them, or to the general tightness of the money market, we do not know; but, as our stock and bond report in this issue shows, there was during the week ending February 12th, a remarkable downward tendency in the value of practically all the British insurance stocks. In themselves, the declines were not notably large, the feature chief to be remarked being their uniform wide-spread character.

A CABLE dispatch from Liverpool states that first prizes at the Colonial Products Exposition in that city have been captured by three well-known Canadian houses: the Canada Cabinet Company, of Gananoque; the Canadian Office and School Furniture Company, of Preston; and P. McIntosh & Son, Toronto. The exhibits were shown by the Brown & Wells, Limited, Toronto, who handle the export business of these concerns, and whose efforts to give Britishers an idea of the furniture made in this country, are receiving highly eulogistic mention in the columns of the Liverpool press.

—Messrs. A. E. Ames & Co., stock brokers, Toronto, having received acceptances from a large majority, though by no means from all, of their unsecured creditors, they now announce that they will proceed to carry out their proposal to form a joint-stock company. The assets, partnership and individual, have therefore been transferred to the Securities Holding Company, Limited, with which proposed company the firm enters into an agreement to pay to it the net earnings of the latter for the next five years, if necessary. The company has issued the $600,000 preferred and $45,000 common stock as fully paid up, as suggested in Messrs. Ames' January proposition, and preference stock certificates are now being sent the unsecured creditors in settlement of their claims against the firm. Stock returned to the firm by any creditor who does not accept the proposal will, the firm states, be retained, or, if necessary, assigned to a trustee for the benefit of the remaining creditors ratably

D. McLachlan & Co.
Canada Business College
Chatham, Ont.

360 Bookkeepers and Stenographers supplied to some of the Best Business Houses in Canada and the United States during the past year. **None but the Competent recommended.** Do YOU need such help? If so, write us. Perhaps you may have a son or daughter needing our training. If so, write for Catalogue B. Address, **D. McLACHLAN & CO., CHATHAM, Ont.**

Economy in Lumber Cutting.

A prominent lumberman stated recently that, in his opinion: **Every gauge saved** on your saw meant **twenty cents per thousand** added to the value of your entire cut.

The ordinary **circular** cutting forty thousand per day is **6 gauge**. The **Band** never over **14 gauge**.

Its use therefore adds $1.60 per thousand to value of lumber produced.

Double Cutting-steam Feed Steam Niggers, Loaders, Kickers and Steam Setters — add larger percentage to daily cut reducing cost per thousand.

This Pony Band—Single or Double Cutting—using **15** or **16 gauge short saws** is within the reach of all. You should get into line—get posted —make the change—it's simple. Many hundred Bands running in Canada.

THE BREADSTUFF SITUATION.

The past week has seen continued excitement in wheat which, with the exception of a few temporary fluctuations downwards, has steadily risen in price. In Chicago, on Friday last, there was a sensational advance for May delivery of 4¼ cents per bushel within the space of half an hour, and the phenomenal price of $1.07 was scored. This, we are told in the reports, was co-incident with a buying wave which "swept the brokers off their feet," and reminded on-lookers of the historical time of Leiter's so-called corner in 1898. In July of that year, wheat was quoted the extraordinary price of $1.85 per bushel, from which figure, it may be remembered, it broke sharply, going down to something like 70c. in less time than it had taken to make the previous advance. In that instance, it may be said that there was no intrinsic reason for the enhancement, while at present a war is in progress in which one great European power is already engaged, and others may become so. This is true, and it may also be conceded that there is a certain degree of shortage in the world's supplies of wheat. At the same time the question may be asked whether this is any sufficient reason, so far as things have gone yet, for the present boom in prices. It is stated that Russia is about to prohibit exportation of grain from her borders, and that both that country and Japan are likely to be in the market for it in large quantities. But for this, so far as we can learn, there is little authority. The present situation, therefore, has been brought about largely by speculative influences, which gain their power mainly from the fact that other nations may possibly be involved later on in the conflict in the Far East.

The farmers are taking advantage of the bullish feeling. They have been holding their wheat until the dollar mark should be reached, and their demand certainly just now looks as though it will be acceded to. Their holding back of deliveries, however, which has been one of the most strongly marked features of the trade this winter, cannot altogether be attributed to this idea. In many sections of Ontario so badly blocked are both roads and railways, that it is absolutely impossible for farmers to ship produce however willing they might be to do so. Should the roads improve quickly, there can be little doubt that receipts would increase largely, though whether this would have any marked effect on values is matter for conjecture. It might have, because a large proportion of the present bullish feeling is due to the fact that domestic millers are in the midst of scarcity of wheat to meet their own wants, and are willing to pay what may be called almost a fictitious price in order to fill their immediate requirements. The British market, which is indisputably the main factor in price-marking, is only just beginning to move up in unison with Canadian and United States prices, and even now the views of buyers are still considerably divergent from those of holders.

Naturally enough, flour has moved upwards also. Bakers says that though they raised the price per loaf some few months ago, the present cost of flour again renders it impossible for them to make bread at a living profit in view of the further increases in their raw material. And accordingly in several cities the price of the loaf has been raised. It is by no means unlikely that consumers will in the near future have to put up with still further increased prices for the staff of life.

BANKING REVIEW.

We present below a condensation of the monthly statement of Canadian banks for January, 1904. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities; average holdings of specie, and Dominion notes, etc.:

CANADIAN BANK STATEMENT.

LIABILITIES

	Jan. 1904	Dec. 1903.
Capital authorized	$97,046,666	$97,046,666
Capital paid up	78,625 589	78,563,236
Reserve Funds	50,6-3,096	50,598,511
Notes in circulation	$56,973,273	$62,539 407
Dominion and Provincial Government deposits	7,987 954	7,836,641
Public deposits on demand in Canada	107,323,255	120 529.032
Public deposits at notice	287,248,914	279,327 788
Deposits outside of Canada	37,300,337	34.479.937
Bank loans or deposits from other banks secured	692,111	865,949
Due to other banks in Canada	3,983,608	4,155,565
Due to other banks in Great Britain	3,085,734	2,884.279
Due to other banks in foreign countries	1,490,014	1,830.528
Other liabilities	10,043,262	11,475,029
Total liabilities	$516,134,538	$525,924,229

ASSETS.		
Specie	$15,821,603	$16,101,019
Dominion notes	31,277,656	30,941,367
Deposits to secure note circulation	3,130,844	3,130,844
Notes and cheques on other banks	14,280,708	21,686,472
Loans to other banks, secured	668,091	886,531
Deposits with other banks in Canada	5,412,080	6,392,486
Due from banks in Great Britain	8,861,544	9,258,198
Due from other banks in foreign countries	13,457,473	12,703,927
Dominion or provincial Govt. debentures or stock	10,697,910	10,722,900
Other securities	52,340,614	52,868,771
Call loans on bonds and stocks in Canada	38,149,737	39,029,667
Call loans elsewhere	36,043,662	34,991,423
	$230,141,982	$238,713,605
Current Loans in Canada	384,754,452	384,419,677
Current Loans elsewhere	18,048,983	18,616,518
Loans to Dominion and Provincial Governments	2,174,400	2,708,299
Overdue debts	2,071,724	2,229,568
Real estate	832,000	779,993
Mortgages on real estate sold	758,772	724,446
Bank premises	8,972,713	8,969,272
Other assets	6,400,777	5,983,964
Total assets	$654,545,980	$663,145,534
Average amount of specie held during the month	15,898,139	15,140,495
Average Dominion notes held during the month	30,861,173	29,647,360
Greatest amount notes in circulation during month	62,713,352	67,827,377
Loans to directors or their firms	10,909,406	10,878,573

Though we are commencing the year with, on the whole, good prospects, and while the banks seem to be in a strong position, able and willing to do business, there is yet a feeling of what may be described as incipient uneasiness developing in consequence of the outbreak of the war in the Far East. And it is a significant token of the way in which civilized nations are bound together in these times, that this outbreak, at such an enormous distance, is instantly felt to be a determining factor in the financial and political position of all European countries and also of the United States and Canada. This feeling of uneasiness and uncertainty will not be an unmixed evil by any means, but will rather tend to the benefit of legitimate business, if its effect is to moderate rash speculation, and prevent those violent upheavals and depressions which generally come of abounding prosperity. We have only just got through the effects of the great cotton speculation—if we have got through them—by which the raw material of a vast manufacturing interest was forced up to such a price as to make the business one of losing, instead of profit making; and now another of those speculative movements has developed itself, for which Chicago has had so notorious a name. Wheat has been forced up to a price far beyond the possibility of exporting it; a state of things which is invariably followed, sooner or later, by a collapse, which collapse generally means to hundreds of unwary people, simple ruin.

It is not without reason that we in Canada have had to take notice, and are taking notice still, of both of these developments. Our cotton manufacturers have had to pay excessive prices for such quantities as they were forced to buy, and hold on as they would, they were compelled in many instances to pay these prices. And as to grain, our intercourse with Chicago is almost as close as if it were one of our own Canadian cities. Many of our people in Canada have been caught in a whirlpool of speculation in Chicago, and left stranded and ruined. But there are very rare instances of anyone in Canada making money (and keeping it), by Chicago speculation. Grain speculations on margin by people who were absolutely ignorant of the trade is perhaps not so common in Canada as it once was. But there are always a certain number of people that are attracted to this feverish centre, and flutter around it as moths go round the flame, retiring by and by with their wings singed, or their power of movement entirely destroyed.

The Bank Statement for January does not display any extraordinary features. The changes are such as almost invariably take place at this time of the year, especially in the reduction of circulation, which has now come down from $71,000,000, in October, to $57,000,000 in January. Thus, it appears that $14,000,000 of the notes that were out last fall have come in and been paid for. This is a movement of sufficient magnitude to have been embarrassing at one time, but it has been carried out without the slightest disturbance, or sign of disturbance. Along with redemption of circulation there has been a withdrawal of deposits to the extent of $2,700,000, making an outgo of money to the extent of $7,800,000 during the month. But it has been easily met by a reduction in the immediate resources of the banks, which are diminished by exactly the same sum leaving the discounts and loans of the banks almost unaffected. The reduction in this has amounted to only $1,700,000, a mere trifle out of a total of $470,000,000. The available resources of the banks are over $160,000,000, which is 32 per cent. of the liabilities in circulation and deposits; a most ample protection. The gist of the whole business lies, of course, in the quality of the loans and discounts comprised in the $470,000,000. But as the banks are now almost invariably in charge of men of long experience in the business, it is not likely that any considerable amount of an undesirable element has crept in there. Even the new banks that are pushing strongly for business are in the hands of men, who, though young, have been trained in the larger establishments of the country. There is always danger, however, in a new institution, for business to be pushed somewhat too far, and it is not uncommon in such cases that new experience has to be purchased rather dearly. We speak, of course, only on broad and general principles. Exceptional vigilance may fully counteract the dangers that beset the path of explorers in this field, and if a little experience is bought at a certain cost, it sinks the more deeply into the mind and is valued all the more.

That fine old institution the Canada Permanent Mortgage Corporation is pursuing its new course with its wonted success. The report just presented is an admirable one, and the remarks made at the meeting are very much to the point. Those of the vice-president's cannot fail to commend themselves to all who have the welfare of this most useful company at heart. The Canada Permanent has rendered as much service in the farming and agricultural sphere, as any of the banks have in the commercial. Not that its operations are confined to loans to agriculturists. By no means. But this business was the original foundation of the company, and it has done Ontario immense

service in that capacity. It has, like many of the banks, had its trials and difficulties, and has learned by experience, a costly experience too, what not to do; as well as what to do. It is satisfactory to find that its business in loans resting on stocks and bonds has been kept within legitimate bounds. There cannot be a doubt that that is a development which might be undesirable under some circumstances. Still with the company's large amount of deposits and debentures, it is desirable to have a considerable fund that can be drawn upon at pleasure and without disturbance.

ABSTRACT OF BANK RETURNS.

Description.	Jan. 31st, 1903.	Jan. 31st, 1904.	In Month 1904.

MORTGAGE LENDING COMPANIES.

Experience, expert knowledge, and trained staffs are in these days essential to the mastering of the business of lending money on mortgage so as to make a continuous profit. Not a few individuals and associated companies have had to learn that there are good farms and poor farms; thrifty farmers and unthrifty farmers; honest owners of real estate in town and country as well as dishonest ones. And the lender of money on mortgage has to encounter all these, study them and make the most of them, if he would not become "loaded up," as persons and companies have become loaded up with properties in town or country upon which too much has been advanced and upon which it was difficult, if not impossible to avoid loss.

A group of companies in London, Ontario, have for many years shown successful results in doing this kind of lending. This was largely because they confined their operations to lending upon farm lands in the best part of South-western Ontario and did not suffer, as some other companies have suffered, from land-booms in city and town lands. The Ontario Loan & Debenture Company has for 33 years pursued a steady policy in farm mortgages and has built up a total of $3,700,000 in loans, mainly of this kind. It borrows on both sterling and currency debentures and has also $577,000 of deposits, but these last are less this year by $30,000. The company's paid capital is now $1,200,000 and its reserve fund $600,000. It was organized for the purpose of lending on mortgages, on real estate and municipal and other debentures. The Legislatures, both Dominion and Ontario, having lately largely increased the investing powers of such companies, the directors thinking some of such powers dangerous, because too wide, called a meeting of the shareholders in 1903 for the purpose of restricting them. At this meeting a by-law was passed whereby the company was prohibited from buying bank, insurance and trust companies stock, or the stock of any other incorporated company whatever; in other words, proposing to carry out the original intention of the shareholders, viz., confining the business almost wholly to loans on real estate mortgages. In its latest year the gross earnings were sufficient after paying all interest and cost of management, to pay six per cent. dividend, and to add $15,000 to reserve, and to carry forward a balance of $25,909. The company may, in view of all these circumstances, take credit for being in a very strong position.

An encouraging state of affairs is exhibited by the report of the Landed Banking & Loan Company, of Hamilton. The company has had rather more funds at its disposal during 1903, having increased its sterling borrowings, and it shows an increase of some $20,000 in the aggregate of securities. The net earnings amount to a very comforting advance on those of 1902, enabling the payment of the usual dividend, the addition of $20,000 to reserve fund and the carrying forward of a small sum to next year. The reserve fund has now reached $215,000, which is more than 30 per cent. of the paid capital. The company's experience has been the same as that of most companies of the kind, namely that money has been in active demand, and the funds have been kept employed. That interest and principal payments were well made is evidenced by the amount in arrear being lessened.

PROPOSED LEGISLATION ABOUT BOILERS.

A bill, entitled an Act respecting the Inspection of Steam Boilers and Steam Threshing Engines, has been introduced at the present session of the Ontario Government by Mr. A. G. MacKay, the member for North Grey, and has passed its first reading. The real object of this bill can be easily surmised, and its absolute inutility to accomplish that object seen at the same time. Its wording shows ignorance both technically and practically on the part of whoever drew it, and it has only to be read by practical men to have its absurdities seen.

Though it apparently applies to all steam boilers that are not railway locomotives or boilers on steam vessels, it is extremely indefinite as to what it actually is to apply to. There would be too much space occupied were we to point out in detail the faults in this wonderful piece of proposed legislation, but a few instances will suffice.

Section 5 defines (?) the qualification for an inspector of boilers. "He must have had such experience in the manufacture of boilers as to enable him to properly perform the duties of the office." One cannot but wonder from what sort of a brain this appropriate and explicit definition emanated.

Section 7 describes the duties of inspectors. Not one of these duties is clearly defined, and the want of

clear definition leaves too much to the discretion of the inspectors. And not only are the duties indefinite but some are absurd.

For instance, one of the inspector's duties is stated to be to see that the arrangements for delivering the feed water are such that the boilers cannot be injured thereby. Can Mr. MacKay explain what this means? Another of his duties is to see that a fusible plug is inserted in the flue or crown sheet so as to fuse by the heat of the furnace whenever the water in the boiler falls below the prescribed limits. When the fact is known that by far the larger number of boilers in use in this province are horizontal tubular boilers, that in these boilers the crown sheet is directly over the fire, and that the plug cannot fuse until there is no water in the boiler, the absurdity of this clause and the ignorance of its framer can be clearly seen.

Another striking evidence of ignorance is seen in the clause that provides for the inspector satisfying himself that there are provisions for an ample supply of water to feed the boilers at all times, so that in high pressure boilers the water shall not be less than four inches above crown or flue sheet in upright boilers. This is definite so far as upright boilers are concerned, no matter what the effect would be. But what rule is to be applied to other than vertical boilers is not stated.

Section 8 which gives directions for fixing the standard of pressure for high pressure boilers is indefinite, for it practically makes one rule apply whether the boilers are made of steel or cast iron.

Section 10, can we think only have a meaning in the minds of the framer and introducer of the bill, at any rate it is grammatically incorrect. It reads: "In all cases the test applied shall exceed the working power allowed in the ratio of one hundred and ten in subjecting to the hydrostatic test boilers usually designated as low pressure."

The fixing of penalties to be imposed also shows lack of knowledge on the part of the framer of the bill under notice, as well as a fine disregard of the gravity of the "offence," in fact the penalties seem to be of more importance than the offence. Thus, under Section 14 every person who in the construction of a steam boiler drifts a rivet hole to make it come fair is subject to a fine of $200; but any person who continues to use a boiler after the Government Inspector has pronounced it unsafe, is to be liable only to a fine of $100. (Section 15.) The framer of the bill evidently thought that the drifting of a rivet hole, which is a very common occurrence, was twice as serious an offence as the using of a boiler after it had been pronounced unsafe by the inspector.

Section 18 imposes a penalty of not less than $20, and not more than $300 on any owner or user of a steam boiler who fails to tell the inspector of any defect that he may know or believe to exist in the boiler or machinery. This raises the question whether the inspector is appointed to find out all defects or whether this section is framed to oblige the boiler owner or user to point out to the inspector what he probably does not know enough to find out himself.

Another inconsistency can be seen from a comparison of sections 15 and 24. Section 15, as stated above, refers to the using of a boiler after it has been pronounced unsafe. Section 24 refers to the operation of a boiler or engine concerning which an inspector has refused to grant a certificate, and fixes a penalty of $5 a day for each day that the boiler shall be so operated. As an inspector apparently only has the right to withhold a certificate because a boiler is unsafe, these two sections conflict. If they do not, then the inspector has power to withhold a certificate for reasons that are not stated in the bill.

It is, perhaps, pertinent to ask in whose interests Mr. MacKay has introduced this bill? Certainly not in the interests of manufacturers of boilers and engines, for a perusal of Section 24 shows that they would be extremely hampered by having their boilers subjected to the test of inspectors whose only needed qualification is "an experience in the manufacture of steam boilers," for a knowledge of steam engines is not called for as a qualification. And certainly not in the interests of the public, for no Act could be of wording of the Act and the duties of the inspectors are so poorly defined that they would be left entirely at the caprice of the inspectors. Certainly not, either, in the interests of the public, for no Act could be of less value to protect life and property than this proposed bill respecting the inspection of steam boilers.

It has been urged in a series of recent articles in this journal that legislation is needed in this country which shall safeguard the interests of factory-workers and the public in respect of the use and care of steam boilers. Immunity from explosion can best be attained by insisting upon boilers being properly examined by competent persons and by insisting upon the employment of competent engineers for them. Such an Act as is foreshadowed in this bill, however, would entirely fail to provide such immunity. The bill in its present shape should not be allowed to pass.

FIRE ASSURANCE COMPANIES.

A brief summary of the results of the year to the British America Assurance Company, which also does a large business in the United States, shows an improvement over previous recent years. The balance of income over expenditure for 1903 was $204,672. Deducting $16,621 from value of securities to bring them to market value, and paying six per cent. dividend, there remains $128,051 to be added to the reserve fund, which makes the additions to this fund in three years $249,416. The fire and marine premiums were $2,373,336, and the receipts from interest and rents $48,047, making together $2,421,383; while the fire and marine losses were $1,389,502 and the expenses and commissions $827,208. Comfort is taken in the fact that where the British America's fire loss ratio in the year 1900 was 67 per cent. of income; in 1901 it was 61; in 1902 only 54, while last year it was brought down to 52 per cent., showing a steady reduction. This improvement is attributed mainly to the increase of rates begun in 1901. It certainly does not seem to be brought about by any decrease in the fire waste on this continent. As the same gentleman, Senator Cox, is president of both this company and the Western, we shall quote some sentences from his ad-

dresses to both. We stated last week the amounts each company stands to lose by the Baltimore fire.

The report of the Western, submitted to the annual meeting on Friday last, shows large earnings for the year. Premium income was $131,670 greater than in 1902, and interest income $10,681 greater, while losses were slightly less. The underwriting profit, with interest earnings added, amounted to $305,912, off which there comes $18,264 written off investments to bring them to market value, and $10,000 written off office furniture account. Deduct further $119,174 for the payment of six per cent. dividend, and there remains to be added to reserve fund $158,501. The total profit on the year's underwriting is $210,150, being fifty thousand more than that realized in 1902, and a hundred thousand more than that for 1901. A profit is shown in the fire branch of $222,978, and a loss in the marine branch of $12,828. This last is due largely to the exceptionally heavy losses on the Great Lakes.

The president takes comfort from the great volume of premiums that the company has rolled up in the United States, two millions of dollars and more, and doubtless wishes that the profit from them could be got to bear some decent relation to their magnitude over a series of years. Consolation, not exactly adequate, however, is to be found in a review of the business of the Western in Canada, as shown by the Government reports for 34 years. Its loss ratio has been ten per cent. lower than the combined experience of all companies. He also looks forward to a big business abroad some day, as the result of the establishment of the London branch.

Naturally, the Baltimore fire was referred to, in which city the company had had an agency for thirty years. The losses, probably $340,000 in amount, are serious enough, but there is some hope that an increase of premium rates will presently recoup these. Leaving the immediate profit and loss aspect of the question, Mr. Cox takes a broader view of the effect of this great fire. He thinks it must impress upon the authorities of municipalities the importance of looking closely to fire protection. "The ordinary water supply of cities frequently proves inadequate to meet the demands of a fire of any considerable magnitude. What would seem to be required is an independent system of water mains through some of the principal streets in the business centres of large cities, connected with a high pressure pumping station. This latter could be established without a very great cost at a convenient point in all cities having a water front, and the expense of laying a few miles of water mains would be counterbalanced by the relief of the business community from the burdens of increased insurance rates which will inevitably be applied in all cities whose water supply cannot be shown to be ample to fully meet the requirements of fire protection. Such a system has, I believe, been established in Philadelphia, and a similar one is being discussed in New York."

The speaker then reminded the general public of the fact, apparently so little understood or cared about, yet so vital if people are ever to be aroused to the enormity and wickedness of the vast fire waste: that "the burden of such disasters as that at Baltimore falls upon the whole insuring public—insurance companies being merely the agencies through which the necessary funds are collected to meet losses by fire and expenses of conducting the business." His conclusion is sane, that the rates they charge must over a period of years yield a sufficient income to provide for this outlay and leave a fair margin of profit as a return on the capital invested in the business.

CANADA LIFE ASSURANCE COMPANY.

A conspicuous growth in the business of this company is observable by a comparison of the figures of last year with those of the year preceding. 6,597 policies for $12,635,032 having been issued, an increase of almost three millions over last year. The total in force grew from $89,170,575 to $95,531,110 in the twelve months. The interest income was $1,176,374 and the gross premium and annuity income was $2,847,559, making together $4,023,934 received during the year. Payments to policyholders amounted to a handsome sum, for besides $1,528,420 paid in matured endowments and death claims, including bonus additions and annuities, there was paid in cash dividends and surrender values $145,273: thus the total paid to policyholders was $1,673,693.

Assets are swelled to $27,180,007, being an increase of nearly a million and a quarter. Deducting the reassurance reserve, which amounts to $25,093,374, and all other liabilities, capital included, there is a net surplus of $861,367, the surplus on policyholders' account being $1,861,367. The popularity of the company and its standing, both at home and abroad, are attested by such indications of growth, while the result of the business bears testimony to the care with which it is watched by both the actuarial and the investing departments.

Some striking features were mentioned in the addresses of the president and vice-president at the annual meeting on Wednesday. For example, the payments to policyholders and their heirs since the foundation of the company have amounted to $26,992,239, while the company still possesses assets of $27,180,007. Thus in fifty-seven years there has been paid or credited to policyholders between six and seven millions of dollars *more than they actually paid in.* This means, as the vice-president put it, that for every $100 premiums received, the company returned or credited to policyholders or beneficiaries a sum of $114.

Repeatedly during the past years the actuarial staff of the Canada Life has made tests of the quality of its lives with reassuring results. The most recent of these has been quite recently completed; it consisted of the valuation of a large number of the company's risks on the new table, compiled by the British actuaries, and known as the OM table. This is the first use of these new tables, we believe, on this side of the Atlantic, and it has proved that no material change in reserves is needed by the Canada Life for the difference between results by this new table and that already in use by the company is less than one-third of one per cent. The United States branches of the company's business continue to show good returns, and a remarkably large volume of risks has

been written during the first year it had operated in Great Britain. Still, it is in Canada that the bulk of the business is done, and in Canada the company has an admirable force of agents, as the results of their work show. It is creditable to the Dominion that her premier life company exhibits such strength, success, and enterprise as the Canada Life.

TORONTO GENERAL TRUSTS CORPORATION

It is a striking fact that almost every one of the eleven departments into which this company separates its business shows an increase in 1903 over 1902, in volume of new transactions undertaken. The total amount of new estates and business put in charge of this corporation in the twelve months exceeded three millions of dollars, a gain of almost a million on the previous year. It now does business in Quebec as well as in Ontario, Manitoba, and the Territories, and the variety of its functions as trustee, executor, administrator, guardian is very great.

The commission earned during the year for managing estates and other services amounted to $98,423, but the interest earnings nearly equalled this sum, while other sources of revenue brought the gross income up to $212,875. One would naturally expect a concern handling estates and securities to the extent of more than twenty-five millions of dollars to earn more than this limited sum; and the fact that it is so limited obliges the belief that the charges for service must be low. The net profits were $96,800, which, after paying dividend, enabled the addition of $10,000 to reserve fund, making that fund $300,000, and carrying forward to next year a larger sum than in the preceding twelve months.

Any reader of the president's address will discover that this important concern has about two thousand estates to look after. And it is a feature of the management of such companies that certain of the smaller estates, say with assets of $10,000 or $20,000 each, are sometimes more trouble to administer than those of twenty times the size. Dwelling on the functions of the corporation, and the wisdom of their restriction, Dr. Hoskin said: "We scrupulously avoid speculation of every kind, no matter how tempting; we neither underwrite bond nor stock issues, nor guarantee the interest on such issues. We do not even take deposits, which we are constantly asked to accept, as the investment of moneys received in this way would lay upon the corporation the burden of looking after such investments to the detriment of our trust funds, which it is our first duty to look after. In short, the corporation strictly confines itself to the performance of the duties of a corporate executor, administrator, trustee, etc." And an observer of experience in business life will probably agree in the conviction that a testator will be consulting the best interests of the beneficiaries and heirs of his estate in appointing such a corporation instead of an individual executor, trustee, etc.

—A rather significant state of affairs at present exists in regard to rates of interest. Financial institutions in the United States and Canada seem willing to lend at abnormally low rates for short dates, where "there is a string" to draw back the money with when wanted, while for time or mortgage loans, rates are unusually high. Four and one-half per cent. mortgages are being renewed at five per cent., five per cents at six, at the same time when call loans on high-class securities can be negotiated in New York at three and one-half to four per cent.. Does not this indicate that good bankers and financial managers are not willing to be caught, like Russia, in a state of unpreparedness, sure to bring on certain disaster in the event of further Eastern involvement.

CALGARY.

We have an interesting letter from a Calgary manufacturer, Mr. R. J. Hutchings, who gives a lot of up-to-date information about that stirring place, and incidentally reproaches us for not referring oftener to the business activities of the city:

"We see reports of the meetings of the Boards of Trade of the various places in the East and West--places of nothing like the importance of our city—and naturally we ask ourselves: 'Why is Calgary not mentioned?'" His letter goes on to say, the writer being one who has a general grasp of conditions and business interests, financially, in almost every town and city from Winnipeg to Vancouver: ("I can thus speak without a feeling of localism), that no city or town in the West to-day has, in proportion to its size, such excellent prospects as Calgary. I will give you some of the facts:

"Our expenditure in business blocks, schools and churches for this spring and summer—that is, work if not already under way, that is tendered for—runs up to five hundred thousand dollars. This, with the residences that will be built, and work that has not yet been decided upon, will perhaps run up to the million dollar mark, such great sum being expended in buildings this year in this city. We have the following wholesale grocery houses here: The James Turner branch of the Canadian Grocers, Campbell Bros. & Wilson, Codville & Co., C. F. & J. Galt; and in hardware, wholesale, we have: The J. Ashdown Co., Limited, A. McBride & Co., the Gurney Standard Metal Works (branch of Hamilton). Merrick, Anderson & Co., of Winnipeg, are establishing a branch here also the McClary Mfg. Co., of London, Ont. Frost & Wood, the Cockshutt Plow Co., the International Harvesters Co., and the Massey-Harris Co. have all established large warehouses for the distribution of goods in the Territories and have made Calgary their headquarters for Alberta.

The Canadian Pacific Railway Co. is spending one million dollars this year as a first expenditure in the big Irrigation Canal, whose head-gates are almost within the city limits, and it is intended to irrigate about four million acres of land. The tenders are now in for this work and the contract will be let immediately.

I forgot to mention that we have eight banks here, viz., Bank of Montreal, Imperial Bank, Molsons Bank, Union Bank, Canadian Bank of Commerce, the Bank of British North America, the Bank of Nova Scotia, and the Merchants Bank."

Another letter, from a different source, dated Calgary, 20th February, calls attention to the fact that: "A wholesale distributing centre has developed in this city within the last year, and large permanent warehouses are being erected by eastern Canadian wholesale houses. The business handled by three branch banks in Central and Southern Alberta five years ago is now being catered to by at least thirty branches of the various banks. New financial and commercial institutions are opening up in Alberta almost daily, and yet seldom or never can reference be found to such important facts in the average Eastern daily."

Calgary, Alta., February 19th, 1904.

—The order-in-council passed in 1898 for the disposal of mining locations in the Yukon, worked by hydraulic processes, has been rescinded and mining will in future be carried on under placer regulations. Leases already granted under the old regulations will not be interfered with, but the duties imposed upon holders of such will have to be carried out under penalty of cancellation.

OUR HALIFAX LETTER.

During the past week, Halifax, perhaps more than any other Canadian city, has felt the influence of the Russia-Japanese War. Flour has advanced fifty cents a barrel, provisions a dollar and a half a barrel, and foodstuffs, generally, are firmer. But it is not to this particularly that reference is made. The Commander of the Imperial forces at this garrison decided to man all the forts and harbor defences, and for some days recently mid-winter manœuvres have been carried on. The flashing of search-lights, the screaming of torpedo boats, and the occasional booming of cannon gave a touch of vivid reality to the war news from the East. In fact, activity in army circles could not have been greater in this harbor had notice been received of the approach of an enemy's fleet. The object of the manœuvres, however, was only to test the defences under zero conditions, to see if everything was working smoothly and to repair any weakness in the defensive machinery which might be found to exist.

It has been decided to remove a number of the big guns at York Redoubt, and substitute high angle guns. At York Redoubt the channel runs close to the shore and if a vessel escaped the fire of the other forts, she might be able to get past York Redoubt, as the old guns could not then be trained upon her. The new guns will be worked on an angle and therefore able to rake the decks of any vessel no matter how close she may come to the fortress.

It has been rumored that four or five additional regiments of Imperial troops are to be stationed in Canada shortly, so as to have them in readiness to transport to the East, via the Canadian Pacific steamships from Vancouver, should such a course be necessary. On the strength of this, the city of Sydney has made application to be made a garrison town, and to have a regiment of soldiers of the line stationed there. It has been pointed out to the War Office that the Cape Breton coal fields are of immense importance to the possessor from a strategical standpoint, and should be amply guarded in the event of war.

A statement of the quantities of produce carried to Great Britain by the Furness steamers from Halifax shows that the English trade from this port is quite extensive. During 1903 the Furness steamers carried from Halifax 320,701 barrels of apples, 126,380 cases of lobsters, 28,081 boxes of cheese, 12,063 cases of canned meats, 8,988 standards of deal, 596 carloads of timber, 4,854 tons of pulp, 1,684 head of cattle, and 07,777 tons of general cargo. The Furness Agency here paid to stevedores for handling the above cargo $55,000, and altogether last year's Furness line traffic must have been worth close to $100,000 to Halifax workingmen.

Submarine coal mining on an extensive scale is shortly to be undertaken in this Province by a company of American and Canadian capitalists. If present plans are carried through operations will be on a mammoth scale, and will constitute, indeed, a new era in coal mining in Canada. The company has secured an area of twenty-seven square miles underneath Cow Bay and the Atlantic ocean and with the peninsula of South Head, Cape Breton, as a base will commence mining on coal seams having an aggregate thickness of over thirty-one feet, and which are considered to be inexhaustible. Mr. C. Archibald McDonald has spent some months in Great Britain, where submarine coal mining is carried on successfully, and it is not impossible that Cape Breton will shortly have collieries whose output will rival that of the Dominion Coal Co. It is understood the latter company has decided to open an additional mine at Big Glace Bay, three miles distant from the town of Glace Bay.

At a meeting of the Canadian Forestry Association, held in this city recently, a couple of the speakers made a prediction which has somewhat startled the apple growers of the Annapolis Valley, who this year forwarded 600,000 barrels to the English market. Mr. George Johnson, the Dominion statistician, who is a native of "the Valley," said it was imperative that the forests of the North Mountain should be preserved as a wind-break for the orchards. Prof. Macoun in following Mr. Johnson said: "When Mr. Johnson speaks of western Nova Scotia, I can tell him publicly what I have told him privately, that when the people take the wood off that northern mountain range and let the Bay of Fundy air into the Annapolis Valley, good-bye to their grand orchards."

Halifax, Feb. 22, 1904.

BOLD AND "SMART" FINANCIAL OPERATORS.

We have received from St. Thomas a letter of which we reproduce the main portion. It comments with great bitterness on the Atlas Loan Company affairs. "Sir,—There appeared in your journal some time last year a little article showing how that scoundrel, Frank Andrews, of Detroit, wrecked the City Savings Bank and bankrupted its directors. You called him a smart financial dancer, or something like that, I remember. We have had some financial dancing done in this town, and we are paying the piper. I should like to see you print that little article over again as a terrible warning against speculators. Blast them!"

The item, which appeared in the Monetary Times of 6th March, was as follows:

"A year ago, the City Savings Bank, of Detroit, Michigan, was wrecked through being plundered by a man named Frank Andrews, whose success as a real estate speculator and supposed wealth led to his being chosen a director, and later vice-president of the bank. But his speculations grew wilder and more disastrous. He robbed the bank of a million dollars by adroit means, corrupting its officers, and as a punishment is now, we rejoice to say, behind prison bars. But "the evil that men do lives after them," for besides the loss to widows and other depositors, caused by his stealing, comes the ruin of several of his co-directors. Mr. Cullen Brown, once a prosperous man, loses all his estate; Frank C. Pingree, a prominent manufacturer, loses the accumulation of a lifetime; Ward L. Andrews parts with all he had; Joseph Schrage will be left penniless. And yet, after exhausting all these estates, there will be some creditors of the bank's estate that will only realize 15 to 30 cents in the dollar. Such is a result of the financial capers of a 'bold' and 'smart' young man, whose so-called cleverness was, about the year 1901, in everybody's mouth in Detroit."

Since the above was written we have received the Detroit Evening News of 18th February, stating that Frederick S. Osborne, a former director of the City Savings Bank, had been adjudicated a bankrupt on the previous day, owing $1,071,180. "The majority of these liabilities are contingent ones, or claims that are an equal liability upon the other directors, who became sureties on the bonds of Henry R. Andrews, as treasurer of the Board of Education and Library Commission, and on the bonds of the State and County of Wayne." Poor Mr. Osborne and all his house have reason to execrate the day that Andrews, a modern and local and slick "Napoleon of Finance," ever saw the light.

BANK MATTERS IN THE EAST.

The Bank of Nova Scotia will shortly open branches in Windsor and Antigonish in that Province. At the annual meeting held on Wednesday of last week Mr. H. C. McLeod, general manager of the bank, was appointed to the directorate. Such an appointment is extremely rare in Canada, and emphasizes the appreciation of Mr. McLeod's services by the shareholders. We note also that a third inspector has been added to the staff in the person of Mr. C. D. Schurman. The work of remodelling the premises of the bank in Halifax is now about completed. The handsome oak finishing of the interior is very impressive, and all the fittings are of a luxurious character, quite in keeping with the quarters of a prosperous financial institution. An interesting feature of the new board room is the oil painting of the first president of the bank, Mr. Wm. Lawson, which became the property of the bank through the will of his daughter, the late Miss Ann Lawson.

Among the changes in the staff of the Royal Bank of Canada may be mentioned the appointment of Mr. C. E. Neill as inspector and Mr. O. A. Hornsby as assistant inspector. The Royal has recently opened branches in Amherst; Victoria Avenue, Westmount; Ladner, B.C., and Santiago, Cuba. This

bank has now two branches in Westmount, the swell suburb of Montreal.

The profit and loss account of the Union Bank of Halifax for the year ending January 30th, 1904, shows a net profit of $150,744.79, which, along with the balance carried forward last year, makes the credit side of the account $152,911.90. On the debit side appear the dividends, aggregating $89,164.32; cost of building at Parrsboro' and other branch fittings written off, $105,500; writing down consols and bonds to market value, $25,000. The reserve fund is increased by $21,743.35, and a balance is carried forward to new account of $65,504.33. The reserve fund is now $925,000, having been increased to this amount during the year by the premium on new stock amounting to $78,256.75 and the addition above noted. The capital paid up is now $1,326,295.90.

The annual statement of the Acadia Loan Corporation shows earnings of 8 per cent. on the called-in capital. Two half-yearly dividends at the rate of five per cent. per annum have been paid, and $3,500 carried to reserve.

FORT WILLIAM BOARD OF TRADE.

The annual meeting of the Board of Trade for Fort William, Ont., was held on the 3rd inst., with a large and representative attendance. Mr. J. J. Wells, the retiring president, in his address spoke of the rapid progress which had been made by the town during the past year. Valuable business blocks and residences had been erected; population and assessment had gone up 25 per cent.; the C.P.R. had completed one of the best coal handling plants on the continent, and were engaged in erecting other industrial plants. The Government had already done much to enhance the importance of Fort William as a port, but something more was needed in the way of making longer the season for navigation, such as by providing an ice-breaker for the harbor. The quantity of grain shipped through the port in 1903 was 25,129,000 bushels, of which 80 per cent. was handled in Canadian vessels. Number of vessels reporting last year was 494 Canadian, with a registered tonnage of 731,817, and 189 American, with a tonnage of 665,066. Total amount of freight handled was 1,845,048 tons, of which 753,888 tons consisted of grain and 753,000 coal, the total being an increase of about 12½ per cent. compared with the previous year. The customs collections aggregated $382,417, or an increase for the year of 33 1-3 per cent. The president also made reference to the town's ownership of public franchises, in which it has invested nearly $200,000; and it is of moment to note, in contradiction of a recently sent-out report to the contrary, that municipal ownership showed another successful year. The election of officers resulted as follows: E. S. Rutledge, president; S. C. Young, vice-president; E. R. Wayland, secretary-treasurer. Council—C. W. Jarvis, John J. Wells, F. W. Hogarth, Jas. Murphy, W. Stevenson, A. McDougall, Jas. H. Perry, J. T. Horne, G. W. Brown, C. H. Jackson, H. M. Piper and J. R. Lumby.

LONDON MUTUAL FIRE INSURANCE CO.

The year just past has been noteworthy for many conflagrations, caused largely by seasons of dry weather. The London Mutual has suffered, with others, from these, but not heavily in proportion to the widespread character of its business. Net losses amounted to $223,732. Of the 780 fires reported, 101 proceeded from conflagrations or took fire from other buildings, 142 were caused by lightning, 180 from chimneys, stovepipes and sparks, 106 from lightning striking animals in fields, 15 from incendiarism, 12 from electric wires, 10 from spontaneous combustion, and so on. Matches, pipe-smoking and gas jets are among the thirty other known causes of fires, but the causes of no fewer than 152 are unknown. It will be observed that the average loss from each fire is small, being about $288.

The company's net premium income for the year was $429,839, and the income from interest was $7,594. Loss ratio was 52.04 per cent. and expenses 27.91 per cent., making together less than 80 per cent. of the premiums, and leaving room for a very satisfactory profit. Assets are $736,000, a great growth in five years. Deducting re-insurance reserve and other liabilities, there remains a surplus of $376,000. Of the assets, $358,000 consists of premium notes, $135,000 of cash and accrued interest, $32,500 of mortgage loans, and $110,000 of bonds and debentures. The steps taken, which we commended in 1900, to widen the business of this company and to strengthen its position appear to have been effectual. It has shown a marked growth in assets, and its total at risk has gone up to nearly $75,000,000. The company is widely popular, and it serves a good purpose not only in insuring farm risks, through which it early attained repute, but in the field of mercantile risks, in which it has effected a very considerable extension of business.

SOVEREIGN LIFE ASSURANCE COMPANY.

The first annual meeting of this company has been held, and its first year's report submitted. It has done well to get so large a sum as $800,000 of new assurance in its first year, or rather in ten months, for it did not begin to write risks until March; and it has the further distinction of a larger average amount of policy than most young companies. The year's income was $41,702 from premiums and interest, $81,338 from calls on capital stock, and $30,617 premium on the same: in all, $153,747. The $39,478 put down as premium income could not have been all cash, we should think, for among the assets is $10,091 "due from policyholders." The organization expenses and all other payments taken out leave the company with assets of $110,400, and deducting re-insurance a balance of assets over liabilities of $78,778. The showing is an encouraging one. It is to the credit of the Sovereign Life that its shareholders had the pluck to put up $30,000 as a premium on their shares with the view of overcoming impairment, and it also speaks well for the future conduct of the company to find its management valuing upon so high a basis as 3½ and 3 per cent., and using the Om Table. The company has begun well. Its consulting actuary, Mr. Walter C. Wright, of Boston, a respectable and capable gentleman, while he does not use such strong language as the report or the president's speech, comes to the reasonable conclusion that the results of the first year's business may be considered very satisfactory. And in this conclusion we agree.

RICHELIEU AND ONTARIO NAVIGATION CO.

This company held its annual meeting in Montreal last week. Mr. Rudolphe Forget in the chair. It was announced that Hon. Senator Forget, who is absent in Egypt, would not consent again to accept the presidency. The annual report was submitted and approved, showing an increase of $15,047 over last year's profits. It has been the best year in the company's history except 1901, when, with the Pan-American Exhibition, the gross receipts amounted to $1,109,458, as against $1,104,810 last year. Six per cent. dividend was paid, amounting to $189,920. The steamer "Carolina," which was wrecked in the Saguenay river August 19th last, is in Sorel, being repaired at the company's shops, and will probably be ready for the coming summer season. The hull of the "Montreal," which was burned last winter, has been acquired by the company, and is undergoing reconstruction at the company's docks at Sorel.

The old board of directors, composed of Messrs. L. J. Forget, William Wainwright, R. Forget, F. C. Henshaw, Geo. Caverhill, C. P. Paradis, H. Markland Molson, E. B. Garneau, J. Kerr Osborne, Col. H. M. Pellatt and William Hanson.

INSURANCE MATTERS.

The Ocean Accident and Guarantee Corporation recently found it necessary to resist a claim. Messrs. Forster & Co. were insured with them against liability for accidents to workmen, under the W.C.A. and E.L.L., and at common law. There was a clause in the policy that the assured should take all reasonable precautions to prevent accidents. An employee was injured, and a claim being made, a payment was made by the firm under the Workmen's Compensation Act. In an arbitration between Forster & Co., and the Ocean Accident, the arbitrator found that the plaintiffs had not taken all reasonable precautions to prevent the accident. In the King's Bench Division, on Monday, 5th January, the

plaintiff's counsel contended that the clause was ambiguous, and also repugnant to the object of the whole document. In the King's Bench Division on November 5th, Mr. Justice Wright upheld the decision of the arbitrator.—London Review.

The Chief of the Montreal Fire Brigade, Mr. Benoit, forwarded to the Canadian Fire Underwriters' Association a detailed report of the improvements that have been made in the Fire Brigade, with the expressed hope that the high insurance rates will be lowered. The underwriters say they will report on the efficiency of the improvements, as compared with what was recommended by them two years ago. Upon the character of this report will largely depend whether the rates can be lowered or not.

The first annual meeting of the shareholders of the Royal Marine Insurance Company was held in Montreal last week. Mr. Andrew A. Allan in the chair. A dividend at the rate of fifteen per cent. per annum was declared, and a considerable sum placed to the reserve. The following were elected directors: Messrs. Andrew A. Allan, James Carruthers, D. W. Campbell, J. B. Tresidder, Samuel Carsley, H. A. Allan and John S. Bennett.

The Canada Accident Assurance Company has held its annul meeting, and reports a satisfactory year. It shows assets of $118,163; liabilities, including reserve for unearned premiums, $36,903; surplus on policyholders' account, $81,259; surplus on shareholders' account, $37,939. It has deposited with the Dominion Government the sum of $38,409. The company does accident, sickness and plate glass insurance, and its directors are: President, R. Wilson-Smith, of Montreal; vice-president, Hon. Alph. Desjardins, of Montreal; J. P. Cleghorn, S. H. Ewing, T. H. Hudson, of Montreal; J. J. Kenny and Hon. S. H. Wood, of Toronto.

BANKING AND FINANCIAL MATTERS.

The lot and building on St. James street, in Montreal, occupied by the Walker Hardware Co., Limited, has been bought, we are told, by the Sovereign Bank, which will erect a banking building thereon. The lot is 45 feet by 110. The Walker Company does not vacate the premises till 1st May.

The building on King St. West, Toronto, next to John Kay's carpet store, has been secured by the Crown Bank of Canada. The head office and the office of the Toronto branch will both be in the building, which is to be remodelled for the bank's purposes. We see by the papers that this bank will have a branch in the G.N.W. building, on the corner of Sparks and Metcalfe streets, Ottawa.

The Merchants Bank of Prince Edward Island has issued its statement for 1903. It shows profits of $55,598. After paying a dividend of 8 per cent., $30,363 was transferred to the "rest," making that account now stand at $266,000. The paid-up capital of the bank is $343,781; its circulation (at end of year) was $304,756; deposits, $310,182; current loans, $637,604; total assets, $757,319.

—The Board of Trade for Portage la Prairie, Man., has held its annual meeting, and elected officers as follow: A. H. Dickins, president; E. Brown, vice-president, and F. G. Taylor, secretary-treasurer. Council—G. A. J. A. Marshall, W. J. May, C. S. B. Burley, Wm. Forsyth, F. L. Newman, J. O. Cadham, Ed. Anderson, R. S. McKenzie.

—The Moosomin, Assa., Board of Trade has elected officers as follows for the ensuing year: M. Millar, president; G. B. Murphy, vice-president; A. Whyte, secretary-treasurer. Executive—G. Campbell, T. M. Marshall, J. McCurdy, Dr. Stevenson, E. L. Elwood, E. A. C. McLorg, A. E. Christie, E. M. Saunders, F. G. Lewin, O. Neff, P. F. Cooper and A. H. Smith.

—At Amherst, N.S., a pier is being built, in order to give the town water communication with St. John and all points in the Bay of Fundy. Mr. Reid, of Parrsboro, already has in hand a project for buying a steamer and putting it on the route between Amherst, Joggins and Minas Basin points, and the foundation of a large shipping trade for Amherst is confidently expected by the citizens of that enterprising town.

—The Canadian Manufacturers' Association have resolved to make more use in the future of "correspondent members," who will furnish information regarding foreign trade conditions. It will endeavor to secure a representative in each country in which there is a prospect of trade, one who can give the members at all times data such as furnished by the United States consular agents.

—The tariff of New Zealand, so far as Canadian products are concerned, now being on the whole as favorable as the Canadian policy towards itself, the Dominion Government has passed an order-in-council granting to the island colony a preference of 33 1-3 per cent. The Government of British Guiana announces that a preference of 10 per cent. will be given to imports from the United Kingdom and Canada.

—Mr. Robert Jaffray has been elected chairman of the Temiskaming and Northern Ontario Railway Commission, succeeding Mr. A. E. Ames, resigned. Mr. Jaffray has had considerable experience in railway affairs, having at one time filled the position of Government director of the Northern Railway, besides several others.

—Mr. A. J. Beaudette, Government engineer for the Yukon district, is on a visit to San Francisco and other Californian centres, in order to make a study of the latest methods of hydraulic mining. He will also enquire into the best modern practice of installation and crushing free-milling ore, and recovering gold by amalgamation and concentration. The information he is likely to obtain is expected to prove of great interest and value both to the Territorial Government and to mining men and claim owners.

—The newspaper famine in the United States has brought to a head the agitation for abrogating or greatly reducing the duties existing in that country against pulp and paper. Fully 50 per cent. of the pulp imported into the United States comes from Canada. The American Newspaper Publishers' Association is raising a fund of $100,000 wherewith to fight the combine. "With the tariff out of the way," says Mr. Seitz, business manager of the New York World, "capital could safely be invested in Canada, and give us paper at living prices."

Meetings.

THE TORONTO GENERAL TRUSTS CORPORATION.

PROCEEDINGS AT THE ANNUAL GENERAL MEETING.

The fifth annual meeting of the shareholders of the Toronto General Trusts Corporation (being the twenty-second of the Toronto General Trusts Company) was held in the board room of the corporation on the corner of Yonge and Colborne Streets, Toronto, on Wednesday, the 24th February, 1904. There were present:

Messrs. Thomas Long, W. D. Matthews, Britton Osler, J. G. Scott, K.C., John Paton, George Porter, A. B. Lee, E. T. Malone, K.C., E. H. Bickford, E. B. Osler, M.P., F. C. Jarvis, J. W. Digby, M.D., J. J. Kenny, Alex. Smith, James Henderson, Edward Galley, B. E. Bull, A. L. Crossin, Samuel Nordheimer, John Foy, A. L. Malone, T. Sutherland Stayner, J. J. Foy, K.C., E. R. Greig, George E. Dunbar, H. B. Hodgins, A. H. S. Marks, J. A. McEvoy, Thomas Paterson, R. S. Schell, John L. Blaikie, Aemilius Irving, K.C., Hon. S. C. Wood, W. H. Beatty, John Hoskin, K.C., LL.D., J. W. Langmuir, A. D. Langmuir, and others.

The president, Dr. Hoskin, took the chair, and Mr. A. D. Langmuir, the assistant manager, was appointed to act as secretary.

The various financial statements showing the operations of the corporation for the year ended 31st December, 1903, were submitted by the managing director, Mr. J. W. Langmuir, and were respectively commented upon by him.

The report of the directors for the year was then read, as follows:

FIFTH ANNUAL REPORT OF THE DIRECTORS OF THE TORONTO GENERAL TRUSTS CORPORATION FOR YEAR ENDED 31ST DEC., 1903.

To the Shareholders:

Your directors have pleasure in submitting the fifth annual report of the Toronto General Trusts Corporation (being the twenty-second of the Toronto General Trusts Company), accompanied by the profit and loss account and the various financial statements, showing the results of the operations of the corporation for the year ended 31st December, 1903.

During the year new estates and business have been placed under the care of the corporation to the extent of $3,001,088.11, as follows:

Executorships	$ 405,958 44
Administrations	414,428 24
Trusteeships	1,137,428 12
Investment agencies	400,000 00
Estate agencies	201,075 81
Guaranteed mortgage investment agencies	172,512 47
Committeeships	15,289 61
Guardianships	136,283 96
Receiverships	64,177 93
Lunatic estate agencies	29,096 13
Liquidatorships	24,837 39
Total	$3,001,088 11

In addition to the foregoing the corporation has been appointed trustee for the issue and certification of debentures, registrar of stocks and bonds and transfer agent, aggregating transactions of a large amount, but in respect of which class of work the only responsibility which rests on the corporation is the exercise of great care and systematic attention.

Your directors had under consideration in the early part of the year the opening of a branch of the corporation's business in the city of Ottawa. To that end steps were about to be taken to secure suitable premises, when information was received that the assets and business of the Ottawa Trust and Deposit Company, which had been in existence in that city for about five years, might be acquired on fair terms. Negotiations were opened, resulting in the acquirement of that company with all its assets and good-will. As the Ottawa company had power to transact business in the Province of Quebec, and had several unadministered estates in that Province, application has been made to the Legislature for a charter to issue to the corporation. Your directors also considered it advisable, both for loaning and estate purposes, to obtain a charter to transact business in the North-West Territories, which has been granted during the year. It will thus be seen that as soon as the Quebec charter is obtained the corporation will have the necessary statutory authority to transact business in Ontario, Quebec, Manitoba and the North-West Territories. These branches will at the outset considerably increase the general expenses of management, but it is expected that they will soon prove largely remunerative.

An examination of the profit and loss sheet herewith submitted shows that the gross revenues from the various departments of the corporation's work and investments amount to $212,875.24, and, after deducting the cost of management, including salaries, rent, taxes, directors' and auditors' fees, commissions for obtaining loans and all other expenses at the head office in Toronto and the branches at Winnipeg and Ottawa, and also all preliminary expenses connected with the taking over of the Ottawa branch, the net profits for the year amount to $96,800.69. Out of these profits your directors declared and have paid two semi-annual dividends at the rate of 7½ per cent. per annum, amounting to $75,000; have written off the building and vaults account the sum of $3,632.60, and have added $10,000 to the reserve (thus increasing that fund to $300,000), carrying forward the sum of $8,168.09 to the credit of profit and loss account.

All which is respectfully submitted.

(Signed) J. W. LANGMUIR, Managing Director. (Signed) JOHN HOSKIN, President.

Toronto, February 24th, 1904.

PROFIT AND LOSS STATEMENT FOR THE YEAR ENDED DECEMBER 31ST, 1903.

To salaries, rents, Provincial tax and office expenses at Toronto, Ottawa and Winnipeg, including preliminary expenses of organization at Ottawa	$ 88,097 50
To fees paid president, vice-presidents, directors, advisory boards and Inspection Committees	11,046 00
To commission on capital loans, inspection of loans, and expenses for superintendence of properties and collection of rents	14,131 05
To interest on mortgage on corporation's buildings at Ottawa	2,800 00
To balance carried down	96,800 69
	$212,875 24
To dividends Nos. 9 and 10	$ 75,000 00
To written off the corporation's safe deposit vaults	3,632 60
To carried to reserve fund	10,000 00
To balance carried forward	8,168 09
	$ 96,800 69
By balance brought forward from December 31st, 1902	$ 4,025 43
Less vote of shareholders to auditors for services for year ended December 31st, 1902	2,600 00
	$ 1,425 45
By commission earned for management of estates, collection of revenue, etc.	98,423 22
By interest earned	94,261 30
By net rents from corporation's buildings	9,037 99
By net rents from safe deposit vaults	4,727 28
By profit on purchase and sale of municipal debentures under guarantee of the corporation	5,000 00
	$212,875 24
By balance brought down	$ 96,800 69
	$ 96,800 69

We, the undersigned, beg to report that we have made a full examination of the books, accounts and vouchers of the Toronto General Trusts Corporation to the 31st December, 1903, and find same to be correct and properly set forth in the above statement of profit and loss. We have examined and find in order all the mortgages, debentures, bonds and scrip of the corporation, as well as those negotiated for the Supreme Court of Judicature for Ontario and trusts and agencies in the corporation's hands, and have checked same with the mortgage and debenture ledgers and registers.

The bankers' balances, after deducting outstanding cheques, agree with the books of the corporation. We have also examined the reports of the auditors of the Winnipeg and Ottawa branches, and find that they agree with the head office books.

(Signed) R. F. SPENCE, F.C.A. (Can.),
JOHN M. MARTIN, F.C.A.,
Auditors.

The president, Dr. Hoskin, in moving the adoption of the report, said:

In moving the adoption of the report I think it will only be necessary to call attention to one or two points. The profit and loss sheet accompanying the report is so plain and so detailed that extended remarks are unnecessary.

The year's work has been normal in volume and character. We have had no unusually large items of revenue as in some previous years. The commissions for the management of estates were in round figures $100,000, but the simple statement of this fact gives an exceedingly meagre idea of the very great "care, pains and trouble" involved in the getting in of that sum in items of from one dollar upwards. Perhaps you may form an idea of this work (although I am sure it will be a very inadequate one) when I tell you that we have about 2,000 estates, large and small, to look after, and some of the small ones, with assets under $10,000, give as much, and frequently more, trouble than an estate of a quarter of a million. In Britain or the United States, with their great accumulations of wealth, the commissions we have earned for the year might have been obtained out of half a dozen estates, but we cannot look for that yet in Canada. In the meantime the expenses of management are necessarily large, and, perhaps, out of proportion to the revenue derived from commissions.

This corporation has in its control mortgages, debentures, real estate and other securities aggregating $25,000,000, thus exceeding in value the assets of any loan company in Canada, and the bookkeeping, care and management connected with the administration of this large volume of business is no less, but probably greater, than that connected with the management of a company lending money similar in amount simply on real estate and debenture securities.

I may here repeat what I have so often stated, that every succeeding year adds to the confidence I have in the future of this corporation. This year there has come under our care $3,000,000 of new estates, and there is no doubt that in the course of a few years we shall double the volume of assets committed to our care, and with a few additional clerks it will be just as easy, so far as clerical work is concerned, to manage an additional $10,000,000.

You must always bear in mind that the revenue of a Trusts Corporation, managed on the lines that your directors have adopted and religiously adhered to, must be limited. We depend entirely on commissions earned and the investment of our capital and surplus. We scrupulously avoid speculation of every kind, no matter how tempting; we underwrite neither bond nor stock issues, nor guarantee the interest on such issues. We do not take deposits, which we are constantly asked to accept, as the investment of monies received in this way would cast upon the corporation the burden of looking after such investments to the detriment of our trust funds, to care for which is our first duty. In short, the corporation strictly confines itself to the performance of the duties of a corporate executor, administrator, trustee, etc., and we, your directors, are fully convinced that a testator will be consulting the best interests of the beneficiaries of his estate in appointing such a corporation as ours instead of an individual executor, trustee, etc., and the superiority of a corporate over an individual executor, trustee, etc., must be apparent to all in the creation of trusts for the benefit, more particularly of widows, minor children and female members of families.

I have so often referred to the many obvious advantages

existing in favor of creators of trusts, and of those who are the objects of the trusts, by the appointment of the corporation, that I need not refer to them anew. Two, however, emphasize themselves so pronouncedly that I may be pardoned for adverting to them again, namely, (1) the benefits that accrue to all concerned when they appoint a Trusts Company, in that they are thereby free from the annoying anxiety and disagreeable results which arise from the conduct of defaulting executors and trustees. Those who have read the newspapers during the past year will not have failed to note what has transpired in this respect, and cannot but see the force of what I say. Second, the costs of administration of estates by the corporation are much less in the aggregate than the charges made by private individuals, and the papers on the files of the courts will substantiate what I say. Now and again we hear statements to the contrary—unsupported, however, by facts—emanating from those who desire to secure the control themselves. You can readily understand how persons, such as those to whom I have referred, will leave no stone unturned, however false and unjust it may be, to accomplish their end. I could tell you of many instances where those interested would be delighted to-day to pay the corporation ten times their charges if their estates had originally been placed in our hands.

The profit and loss sheet accompanying the report is so plain and so detailed that remarks are scarcely necessary. Our net profits are not so great this year, because out of them we have paid all the preliminary expenses of opening our branch in Ottawa, and we have also paid all commissions connected with the large loaning business that we are now carrying on in Manitoba. In this connection I may also state that the cost of re-constructing our head office building has been nearly all paid off out of profits during the past five years. Notwithstanding these abnormal drafts upon our profits during the past year, we have paid our shareholders a dividend of 7½ per cent., amounting to $75,000, we have written off our vaults $3,632.60, we have placed $10,000 to our reserve account, which now stands at $300,000, and we have carried forward to the credit of profit and loss $8,168.09. Upon the whole, therefore, I think we should be fairly satisfied with the operations of the year.

It is with pleasure I convey to you the appreciation of your directors of the zeal, diligence and faithfulness of the staff in the discharge of their varied duties. Formerly this reference was confined to the staff of what is now known at the head office; but we have extended our borders, and have branches at Winnipeg and Ottawa, under the care and supervision of advisory boards and branch managers. These advisory boards, comprising gentlemen of high standing in the community, are entitled to the hearty thanks of the shareholders for the interest they take in the affairs of the corporation, and for the ability displayed in the management of matters coming under their direction. And these observations apply equally to the respective branch managers, namely, Mr. Davey, at Winnipeg, and Mr. Chamberlain, at Ottawa. In this connection now, as in the past, prominently stands forth our managing director, Mr. Langmuir, who, I know, dislikes to have any remarks made about him, and who is ignorant of my intention to make this reference. Only those who come in contact with him from day to day can understand how much he does (I wish he would do less), and what he endures, and how much at heart he has the interests of the corporation. I beg to move the adoption of the report.

Hon. S. C. Wood, vice-president, in seconding the adoption of the report, said:

In seconding the adoption of the report I have very little to add to what has been so fully and so well said by the president. Now, that the corporation is so well established, its objects so thoroughly well known, and its appreciation by the public becoming so general, it is, perhaps, unnecessary to reiterate these facts at every annual meeting. There is just, however, one point, and a most important one, that I would like very briefly to refer to, that is the great superiority in every respect of the corporation over an individual executor and trustee. Dr. Hoskin has stated this to you from the standpoint of a lawyer; I do so from that of a business man. First, the corporation has a board of directors, comprising lawyers, presidents and directors of banks, loan associations and insurance companies, railway directors, merchants and capitalists. Surely the combined talent and experience of these gentlemen is infinitely better than that of any individual executor or trustee. Second, the supervision and management of estates placed with the corporation, be they big or little, is methodical and systematic, and the exact terms of a will or a trust are carried out to the very letter. Testators and creators of trusts can rest assured of this, which we all know is not always done by individual executors and trustees. Third, mortgage and other investments for estate or trust funds are passed upon by the board in every case, and the varied and extensive knowledge of each member of the board is brought to bear in deciding whether the proposed investment is an absolutely safe one before it is passed, and no mortgage is passed without personal inspection and visitation. We all know that this cannot be done by individual executors and trustees, however able they may be. Fourth, there is a committee of the board whose duty it is to inspect the work done by the board, and to see that its instructions have been faithfully carried out by the staff, and who also must see every security belonging to a trust and initial it, and report back to the board that they have done so. My friend, Mr. Beatty, will doubtless tell you how carefully this work has been done. We all know, some of us too well, how wreck and ruin have been wrought upon families by neglect of this by individual executors and trustees. Fifth, every security is ear-marked in the books of the corporation to the estate to which it belongs, and is the property of the estate or trust as much as if the security had been negotiated and paid for by the testator or creator of the trust. Sixth, the commissions paid to the corporation are no greater, if they are as much, as are paid to individual executors and trustees.

These facts connected with the corporation, I am sure, in the making of wills and trusts are not sufficiently well known to the public, and I feel assured that it is only necessary that they should be known in order to be appreciated and acted upon.

The report of the directors was adopted, as well as the report of the Inspection Committee, as presented by the chairman, Mr. W. H. Beatty.

Certain by-laws and amendments to by-laws were confirmed.

The following auditors were appointed for the year 1904: For the head office, Messrs. R. F. Spence, F.C.A., and J. M. Martin, F.C.A. For the Winnipeg branch, Mr. P. A. McDonald. For the Ottawa branch, Messrs. J. S. Chamberlain and J. H. Thompson.

The following shareholders were re-elected directors for the ensuing year: John Hoskin, K.C., LL.D., Hon. S. C. Wood, W. H. Beatty, John Bell, K.C., John L. Blaikie, W. R. Brock, M.P., J. W. Digby, M.D., J. J. Foy, K.C., M.P.P., John Foy, Hon. G. T. Fulford, George Gooderham, Wm. Hendrie, Aemilius Irving, K.C., Robert Jaffray, J. J. Kenny, J. W. Langmuir, A. B. Lee, Thos. Long, W. D. Matthews, Hon. Peter MacLaren, E. B. Osler, M.P., J. G. Scott, K.C., T. Sutherland Stayner, Byron E. Walker and D. R. Wilkie.

At a subsequent meeting of the board Dr. John Hoskin, K.C., was re-elected president, and the Hon. S. C. Wood and Mr. W. H. Beatty, vice-presidents. The Executive Committee was re-elected, and Mr. W. H. Beatty, Mr. Aemilius Irving, K.C., and Mr. John L. Blaikie were appointed the Inspection Committee.

The following advisory boards were appointed: For the Ottawa branch, the Hon. W. C. Edwards (chairman), Messrs. Geo. P. Brophy, C. A. Douglas, Geo. Burn, W. D. Hogg, K.C., Capt. J. L. Murphy, J. B. Fraser, James Gillies, Hiram Robinson and Peter Whelan. For the Manitoba branch, the Hon. Sir Daniel H. McMillan, Messrs. D. W. Bole, A. M. Nanton and H. H. Smith.

WESTERN ASSURANCE COMPANY.

The annual meeting of shareholders was held at the company's offices, Toronto, on Friday, 19th February, 1904. The president, the Hon. Geo. A. Cox, occupied the chair, and the following annual report of the directors, with accompanying financial statement, was read by the secretary:

FIFTY-THIRD ANNUAL REPORT.

The directors have pleasure in presenting to the shareholders their report on the business of the year ending 31st December last.

The following synopsis of the accounts submitted herewith summarizes the results of the year's transactions:

The balance of revenue account, being the underwriting profit and interest received on investments, is		$305,912 60
This has been apportioned as follows:		
Written off investments to bring these to market value at 31st December	$ 18,264 26	
Written off office furniture account	10,000 00	
Applied to the payment of two half-yearly dividends at the rate of 6 per cent. per annum	119,147 35	
Added to reserve fund	158,500 99	
		$305,912 60

The premium income of $3,582,625.60 is $131,670.28 greater than that of the preceding year, and the losses incurred are $3,273.38 less than in 1902. The receipts from interest show a gain for the year of $10,681.71.

The total profit on the year's underwriting is $210,150.75, being $50,071.41 more than that realized in 1902, and $107,629.92 in excess of that for 1901. Apportioning the expenses of the year to the Fire and Marine branches, respectively, according to the cost of the business of each, a profit is shown in the Fire Branch of $222,978.84, and a loss in the Marine Branch of $12,828.09.

As intimated in the last annual report, the property adjoining the company's head office on Wellington Street has been purchased. The building has been refitted, and the greater part of it is now occupied for the company's offices.

GEO. A. COX,
President.

Toronto, February 10th, 1904.

SUMMARY OF FINANCIAL STATEMENT.

Fire and Marine premiums		$3,582,625 60
Interest receipts		95,701 85
Total income		$3,678,387 45
Fire and Marine losses	$2,153,965 17	
Agents' commissions and all other expenses	1,218,509 68	
Total expenditure		3,372,474 85
Profit for the year		$ 305,912 60
Total assets		$3,546,357 25
Capital		$2,000,000 00
Reserve fund		1,289,850 00
Security to policyholders		$3,289,850 00

The president, in moving the adoption of the report, said:

The report just read, the adoption of which I beg to move, is, I think I may safely say, one of the most favorable annual statements that it has been my duty to present to the shareholders since I have had the honor of occupying this chair. The net earnings of the year, you will note, were $305,912.00, which is upwards of 15 per cent. upon the capital. Compared with the preceding year there has been a moderate growth—some $131,000—in premium income, a gain of about $10,000 in interest earnings and a gratifying decrease in the ratio of losses to premiums. The manner in which the year's profits are appropriated is set forth in the report, and I need not enlarge upon it beyond saying that, taking into account the heavy fall in the value of securities generally during the past year, the amount which we have written off to bring our stocks and bonds to market value at 31st December, which is less than one per cent. upon the total amount of these securities held by the company, may be taken as satisfactory evidence as to the character of our investments. With regard to the $10,000 written off the item of office furniture (which, I may inform those who are not familiar with the method of conducting our business, embraces a valuable equipment of insurance maps and plans, both at the head office and at our branches and agencies), this amount does not represent any reduction in the actual value; for, as a matter of fact, there has been considerable expenditure of an exceptional nature during the year in fitting up the buildings now occupied for our head offices. This outlay, however, has been included in the expenses account of the year, and, in addition to this, $10,000 has been, as set forth in the report, taken from the year's profits to reduce this asset on our books.

The business of the Marine Branch shows a small adverse balance. This is attributed partly to the running off of the risks of some unprofitable agencies that have been closed since the beginning of the year, and partly to the exceptionally heavy losses on the lakes in the closing months of the season of navigation.

The fire business in Canada and the United States, as well as the British and Foreign business transacted through the London branch office, all show a very satisfactory profit.

I am pleased to take this opportunity to express the appreciation of the directors of the work done by the officers and agents of the company, as well as our indebtedness to the chairman and directors on the London Advisory Board for the deep interest they have shown in the company's progress, and in this connection it is gratifying to note the success which is attending the establishment of agencies of the company beyond the limits of the American continent. Glancing over the field of our operations, I may point out that we have now been doing business in Canada for upwards of fifty years, and it is, I think, generally admitted that in its home-field the "Western" stands as high in the estimation of the insuring public as any company operating in the Dominion. The records in the Government returns of Canadian business published by the Dominion Insurance Department show that during the period embraced by these reports—some thirty-four years—the loss ratio of the "Western" has been upwards of ten per cent. below the combined experience of all the companies doing business in this country. In the United States, to which field it extended its fire agencies some thirty years ago, the business of the company has steadily grown until it now produces an annual volume of premiums aggregating upwards of two million dollars. The profits realized on this business during the past two years—more particularly in 1903—have been sufficient to counterbalance the adverse experience of some preceding years. While the income derived from the more recently established agencies abroad is still comparatively small, the business from these sources has fully realized the expectations which we entertained at the time we undertook to extend our operations to those more distant fields, and there seems every reason to believe that under the efficient and energetic direction of our London manager, whose duties embrace the supervision of these agencies, we may look forward with confidence to the "Western's" attaining abroad in due time a position equal to that enjoyed by it on this continent.

Taken as a whole, I feel that there is much cause for congratulation in the results of the year's business as indicated in the report under consideration. There is, however, an event subsequent to the period with which the report deals, in which you no doubt feel much interested. I refer to the conflagration of Baltimore, and I deem it fortunate that we have this early opportunity of presenting to our shareholders the facts relating to this as far as they concern us. As you are aware, the most valuable as well as the most substantial portion of that beautiful historic city was practically wiped out of existence by a fire which, in spite of the efforts of its own fire department and those of adjacent cities, raged for the greater part of two days. The area embraced in the burned district covered 140 acres of the most closely built portion of the city. The property loss is estimated at something like $100,000,000, and the amount of insurance involved will, I believe, amount to at least $60,000,000. Compared with similar calamities in the world's history, the Baltimore conflagration will probably rank as second in magnitude in respect of the value of the property destroyed and the amount of insurance collected. In such a disaster in a city where we have had an agency established for thirty years, it would be unreasonable to expect that we should escape without serious loss. We have estimated the amount of this at $350,000. The claims are being promptly adjusted and paid, and I am pleased to be able to say that our latest advices indicate that the net loss of the company will be within the figure I have named. This, I would point out, is less than ten per cent. of our total assets, and represents but little more than the income of the company for thirty days. The effect upon business of the current year will be that the loss ratio upon our total premiums will run about ten per cent. higher than it would have done had we had no business in Baltimore. Bearing in mind the effect that a loss of this magnitude, in which practically all the leading companies doing business on this continent are heavily involved, must have in further advancing rates—particularly in the congested districts of all large cities—it does not seem unreasonable for us to hope that our experience during the remaining months of 1904 may be sufficiently favorable to off-set the adverse results of the first two months. Taking a broader view of the effect of this conflagration, it would seem that it must impress upon the authorities of all municipalities the vital importance of looking closely into the question of fire protection. The ordinary water supply of cities very frequently proves inadequate to meet the demands of a fire of any considerable magnitude. What would seem to be required is an independent system of water mains through some of the principal streets in the business centres of large cities, connected with a high pressure pumping station. This latter could be established without a very great cost at a convenient point in all cities having a water front, and the expense of laying a few miles of water mains would be counterbalanced by the relief of the business community from the burdens of increased insurance rates which will inevitably be applied in all cities whose water supply cannot be shown to be ample to fully meet the requirements of fire protection. Such a system has, I believe, been established in Philadelphia, and a similar one is being discussed in New York. The fact should not be lost sight of by the general public that the burden of such disasters as that at Baltimore falls upon the whole insuring public—insurance companies being merely the agency through which the necessary funds are collected to meet losses by fire and the expense of conducting the business, and the rates they charge must over a period of years yield a sufficient income to provide for this outlay and leave a fair margin of profit as a return on the capital invested in the business. I trust that the lessons of this recent disaster may prove beneficial in the future, not only to insurance companies, but to the community at large.

The vice-president seconded the adoption of the report, which was carried unanimously. The appointment of directors for the ensuing year was then proceeded with, resulting in the unanimous re-election of the following gentlemen, viz.: Hon. Geo. A. Cox, Hon. S. C. Wood, Messrs. G. R. R. Cockburn, Geo. McMurrich, H. N. Baird, W. R. Brock, J. K. Osborne, E. R. Wood and J. J. Kenny.

At a meeting of the Board of Directors, held subsequently, Hon. Geo. A. Cox was re-elected president, and Mr. J. J. Kenny, vice-president for the ensuing year.

THE ONTARIO LOAN AND DEBENTURE COMPANY.

The thirty-third annual meeting of the shareholders of this company was held at their offices in London, Ont., on Wednesday, the 10th inst., when the affairs of the company were shown to be in a very satisfactory state, two half-yearly dividends, at the rate of 6 per cent. per annum, having been paid to the shareholders, $15,000 added to the reserve fund, which now amounts to $600,000, or 50 per cent. of the paid-up capital, and $25,909.52 carried forward.

The annual report, as follows, was adopted by the meeting:

REPORT.

The directors beg to submit their thirty-third annual report and statement, showing the results of the past year's business of the company.

After deducting cost of management, interest on deposits and debentures, and all other charges, there remains a net profit of $97,606.59; this, with $15,302.93 remaining at the credit of revenue account from the previous year, amounts to $112,909.52, out of which two half-yearly dividends at the rate of six per cent. per annum have been paid, amounting to $72,000, and $15,000 added to the reserve fund, now amounting to $600,000, leaving $25,909.52 at credit of revenue account.

The sum of $660,044 has been loaned, and $798,069, principal and interest, has been repaid during the year.

The company has a paid-up capital of $1,200,000, with a reserve fund now of $600,000, and $25,909.52 at credit of revenue account, and its funds being loaned almost wholly on mortgages on real estate (no property of any kind unsold on our hands), only about $110,000 being invested in municipal and other debentures and stocks, should prove exceedingly satisfactory, not only to the shareholders, but to the depositors and debenture holders of the company as well.

The liabilities are $1,948,916.58, while the assets amount to $3,810,826.10, without taking into account the uncalled capital and premium thereon ($960,000); the company is, therefore, in an extremely strong financial position.

We have again to acknowledge the valuable services of our general agents in Scotland, Messrs. Wm. Home Cook & Co., C.A., of Edinburgh.

The accounts as usual undergo a careful monthly audit by thoroughly competent accountants.

All of which is respectfully submitted.

JOHN MCCLARY,
President.

London, Ont., January 18th, 1904.

To the Shareholders of the Ontario Loan and Debenture Co.:

We hereby certify that we have audited the books and accounts of the Ontario Loan and Debenture Company for the year 1903, comprising a monthly cash audit and the verification of the postings and balances in all the company's books, and we find the whole correct and in accordance with the above statements. We have also examined the securities, and find them in order.

GEO. F. JEWELL, F.C.A.,
A. M. SMART,
Auditors.

London, Ont., January 19, 1904.

The retiring directors, Messrs. John McClary, A. S. Emery, William Bowman, Lieut.-Col. Wm. M. Gartshore and John M. Dillon, were re-elected, as well as the auditors, Messrs. George F. Jewell, F.C.A., and A. M. Smart.

At a subsequent meeting of the directors, Mr. John McClary was re-elected president, and Mr. A. S. Emery vice-president.

WILLIAM F. BULLEN,
Manager.

LANDED BANKING AND LOAN COMPANY.

The twenty-seventh annual meeting of the shareholders of the Landed Banking and Loan Company was held in the company's office at noon on the 17th February, the following shareholders being present: Alexander Main, E. B. O'Reilly, M.D., J. D. Wilson, Rev. Geo. Forneret, Chas. Mills, Hon. Thos. Bain, Samuel Barker, M.P., Henry McLaren, John Proctor, Gordon A. Gates, W. F. Findlay, W. W. Osborne.

In the absence of the president, Matthew Leggat, and the vice-president, John Waldie, Hon. Thomas Bain occupied the chair, and the treasurer, C. W. Cartwright, acted as secretary.

The secretary read the notice convening the meeting; also the minutes of the meeting held the previous year, which were confirmed.

REPORT.

The directors submit to the shareholders the twenty-seventh annual report of the company's affairs, together with the profit and loss account and balance sheet for the year ended 31st December, 1903, as duly certified by the auditors appointed by the shareholders.

The net profits for the year after deducting all charges amount to	$61,686 29
Added to which is the balance carried forward from last year	2,484 58
	$64,170 87

Which amount has been appropriated as follows, viz.:

Two half-yearly dividends at the rate of 6 per cent. per annum, amounting with the Government and income tax to	$42,960 00
Added to the reserve fund	20,000 00
Carried forward to next year	1,210 87
	$64,170 87

A thorough examination of all the company's securities was made by a committee of your directors, and every known loss, besides any anticipated, was fully provided for.

Payments by borrowers, both interest and principal, have been very satisfactory, the amount in arrear being less than in the preceding year.

There has been an active demand for money, and the company's funds have been kept employed.

The reserve fund now stands at $215,000, or over 30 per cent. of the paid-up capital.

The directors again desire to place on record the efficient services rendered to the company by their agents in Scotland, Messrs. McAndrew, Wright & Murray.

The officers of the company have performed their several duties to the satisfaction of the directors. All of which is respectfully submitted.

MATTHEW LEGGAT,
President.

Hamilton, Feb. 2, 1904.

We hereby certify that we have examined the books, accounts and vouchers of the Landed Banking and Loan Company for the year ending 31st December, 1903, and have found the same correct, and the foregoing statements are in conformity therewith.

We have also examined the securities, and find them in perfect order and correctly set forth in the above statement, and in the securities book.

W. F. FINDLAY, F.C.A.,
WM. MARSHALL,
Auditors.

Hamilton, Feb. 1, 1904.

The adoption of the report was moved by Hon. Thomas Bain, seconded by Samuel Barker, M.P., and was carried unanimously.

On motion the following were re-elected directors for the ensuing year: Samuel Barker, M.P., Hon. Thomas Bain, M. Leggat, Charles Mills, Henry McLaren and John Waldie.

W. F. Findlay, F.C.A., and William Marshall were re-appointed auditors for the ensuing year.

The usual vote of thanks to the auditors and directors having been passed, the meeting adjourned.

At a subsequent meeting of the directors Matthew Leggat was re-elected president, and John Waldie vice-president.

BRITISH AMERICA ASSURANCE COMPANY.

The annual meeting of shareholders was held at the company's offices, Toronto, on Tuesday, February 23rd, 1904. The president, Hon. Geo. A. Cox, occupied the chair, and Mr. P. H. Sims, secretary of the company, read the annual report and financial statement, as follows:

SEVENTIETH ANNUAL REPORT.

The directors beg to present the seventieth annual report to the shareholders of the company, and in doing so they have pleasure in calling attention to the following figures, being a summary of the results of the year's transactions as set forth in the accompanying account:

The balance of income over expenditure is		$204,672 9[illegible]
Amount written off securities to bring them to market value at December 31st	$16,621 24	
Two half-yearly dividends at the rate of 6 per cent. per annum	60,000 00	
		76,621 24
Balance, being the amount added to the reserve fund		$128,051 70

The progress of the company is shown by a comparison of the following figures from the annual statements of the past three years:

Year.	Total Income.	Balance of Revenue Account. Year's Profits.	Addition to Reserve Fund.
1901	$2,040,197	$ 90,590	$ 30,545
1902	2,206,331	173,713	90,819
1903	2,421,383	204,673	128,052

All of which is respectfully submitted.

GEO. A. COX,
President.

J. J. KENNY,
Vice-president.

P. H. SIMS,
Secretary.

We hereby certify that the books of the company have been audited and the vouchers and securities relating thereto have been examined for the year ending 31st December, 1903, and the same are carefully kept, correct and properly set forth in the above statements.

JNO. M. MARTIN, F.C.A.,
R. M. WALTON,
Auditors.

Toronto, Feb. 11, 1904.

In moving the adoption of the report, which was seconded by the vice-president, the president said:

In presenting the seventieth annual report, I may say that I feel more than ordinary satisfaction, and I am sure my fellow directors share this feeling, in meeting the stockholders with a statement such as we are able to present, showing the result of the transactions of the company for the past year. The accounts for the year 1903 demonstrate that the expectations expressed at the two preceding annual meetings were fully realized. It was pointed out in those reports that the adverse experience of companies engaged in the fire business on this continent for the years 1899 and 1900 had shown the necessity for an increase of rates on many classes of risks. This increase came into effect in the year 1901, and has been generally maintained, producing for the companies a fair underwriting profit, in which this company has participated fully up to the average. As evidence of this the following

WE OFFER TO YIELD 5 per cent.

SANDWICH, WINDSOR & AMHERSTBURG RAILWAY

First Mortgage 20 year 4½ per cent. Gold Bonds.

Guaranteed Principal and Interest by the

DETROIT UNITED RAILWAY.

Denomination $1,000.

Dated Dec. 1st, 1902. **Due Dec. 1st, 1922.**

INTEREST COUPONS PAYABLE JUNE 1ST AND DECEMBER 1ST.

Redeemable at 105 and accrued interest on December 1st, 1912, or any interest day thereafter.

Authorized Issue	$600,000
Reserved (to be issued only for Extensions and Betterments)	200,000
Present Issue	$400,000

Trustee: NATIONAL TRUST COMPANY, TORONTO.

We own this issue and recommend the bonds as a thoroughly sound investment, particularly for funds seeking investment in **Canadian Securities.** The net earnings for 1903 were $44,397 37 — 2½ times the interest on the entire bond issue. The net earnings for January, 1904, shew an increase of 56% over the same period of last year.

Osborne & Francis

MEMBERS TORONTO STOCK EXCHANGE

INVESTMENT BROKERS Mail Building, TORONTO, CANADA

figures may be quoted: For the year 1900 the loss ratio of the company on its whole fire business was 67 per cent. of the premium income; in 1901 it was 61 per cent.; in 1902, 54 per cent., and in 1903, 52 per cent. In the United States field, from which a large proportion of our income is derived, the loss ratios for the same years were: 1900, 71 per cent.; 1901, 66 per cent.; 1902, 61 per cent., and in 1903, 52 per cent.

The report now under consideration is the most favorable which I have had the honor of presenting during the eleven years which I have held the position of president. The revenue account shows a balance of income over expenditure of $204,672.94, of which $48,046.59 is derived from interest on investments, and the balance, $156,626.35, from the underwriting. This amount has been apportioned, as shown in the statement, namely, $60,000 to the payment of two half yearly dividends at the rate of 6 per cent. per annum, $16,621.24 to reducing the securities held by the company to their current market values at December 31st, and the balance, $128,051.70, has been added to the reserve fund, which is thereby increased to $830,872.

It is gratifying to note that in Canada, the company's home field, satisfactory progress has been maintained, the Canadian income for last year having been $429,868.68, which is the largest in the history of the company, while the loss ratio for the year was under 50 per cent. upon our fire premium income in the Dominion. It may not be out of place here to refer to the fact that the loss ratio in Canada of the "British America" during the eleven years that it has been under present management has been upwards of 8 per cent. below the average loss ratio on the whole business of this country as shown in the Dominion Government returns.

The Marine Branch shows an adverse balance, notwithstanding the conservative lines on which it has been conducted. This is partially caused by losses incurred on unexpired business of certain unprofitable agencies which were closed at the beginning of the season.

The security which the British America offers to policyholders a cash capital of $1,000,000 and a reserve fund of $830,872; in all, $1,830,872 in assets of unquestionable character —is such as should, and I have no doubt will, secure for this, the oldest financial institution in the Province of Ontario, a steadily increasing share of public patronage.

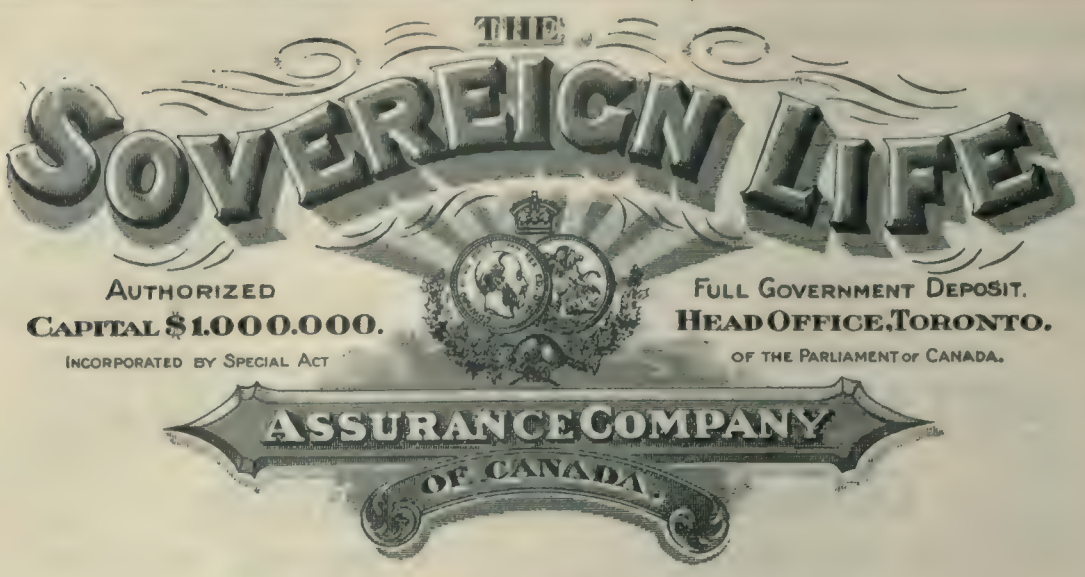
The conflagration in the city of Baltimore, which occurred this month, though not coming within the scope of the report of last year's operations, is a matter of such importance, affecting our own and all other leading companies on this continent, as to call for a reference on this occasion. Considering the large volume of our fire premium income, it might be expected that in so extensive a conflagration as this, in which upwards of $50,000,000 of insurance is involved, we would suffer a serious loss, but it is a satisfaction to know that our net loss, now ascertained to be under $210,000, is well within the figure we might reasonably expect in a city of 600,000 population, where we have for many years past been doing a large and profitable business. This amount represents about 10 per cent. of our annual fire income. While we cannot but regret this loss, we should not overlook the fact that the company in its past experience passed through several conflagrations in which it sustained losses that represented a relatively greater amount compared with the annual income and financial resources of the company at the time of the occurrence of the disasters I refer to. Bearing in mind the improved conditions already referred to, and realizing that the Baltimore conflagration will have the effect of advancing rates in the congested districts of all large cities, and especially in those where the water supply and fire appliances are inadequate to afford ample protection from large fires, it is not, I think, too much to hope that our loss in this conflagration will be made up, if not wholly, to a very considerable extent during the current year's operations.

In closing I must say that, while we feel that we are fortunate in having a thoroughly trained and efficient staff at our head office and branches, upon whom the responsibility for the success of the company's operations primarily rests, we fully recognize the fact that favorable results in a business such as ours are largely dependent upon the work of our local agents. It is due, therefore, to our representatives generally throughout the extended field of the company's operations that I should give expression—as I do with much pleasure—to our feelings of appreciation of their services in assisting in accomplishing the results shown in the report now before you.

The following gentlemen were re-elected to serve as directors during the ensuing year: Hon. Geo. A. Cox, J. J. Kenny, Augustus Myers, Thomas Long, John Hoskin, K.C., LL.D., Hon. S. C. Wood, Robert Jaffray, Lieut.-Col. H. M. Pellatt, E. W. Cox.

At a meeting of the board, held subsequently, the Hon. Geo. A. Cox was re-elected president, and Mr. J. J. Kenny vice-president.

(Reports Continued on Page 1152.)



FIRST ANNUAL REPORT.

The first annual meeting of the shareholders and participating policyholders of the Sovereign Life Assurance Company of Canada was held in the company's offices in the city of Toronto on Tuesday, February 16th, 1904, at 11 o'clock a.m.

The president, Mr. A. H. Hoover, took the chair, and Mr. John T. Hornibrook was appointed secretary of the meeting. Messrs. Thos. Allan and Geo. Edwards, F.C.A., were appointed scrutineers. After reading the notice convening the meeting, the secretary read the annual report and accompanying financial statement, as follows:

REPORT.

Your directors have pleasure in presenting their first annual report of the business of the company for the last ten months of the year 1903. The company received its license January 29, 1903, and commenced the business of assurance on March following.

Three hundred and thirty-one applications, amounting to $884,958 of new assurances, were received by the company. Of this number 307 applications for $808,708 were accepted, while 24 applications for $76,250 were declined because they were not up to the company's rigid standard of selection.

The total amount of policies in force at the close of December 31, 1903, was $745,000, and the premium income upon the policies issued, paid for, or in process of collection, amounted to $39,478.21. The average amount of assurance under these policies is $2,614 upon each life, and the average premium per $1,000 of assurance is $53, a greater average premium per $1,000 than has been received by any other Canadian company, indicating the high class of business which we are writing, our premiums on all classes of assurance being practically the standard rates of other life assurance companies.

The Government standard for life assurance reserves on new business is based upon the Hm. Table of Mortality of the Institute of Actuaries of Great Britain, with interest at the rate of 3½ per cent. per annum. Your directors have adopted as the standard of reserve the Om. Table of the Institute of Actuaries of Great Britain, with 3 per cent. as the rate of interest in computing the reserves to be maintained n respect of profit policies, and 3½ per cent. interest for non-profit policies. The reserves under this latter standard will, therefore, considerably exceed the reserves required by the Government standard, and exceed the standard of reserve adopted by other Canadian companies. In selecting the higher standard of reserve your directors were influenced by two considerations. The first is, to provide the maximum of security to the policyholders of the company; and the second, to provide for the future profits which will be distributed among our policyholders and shareholders. The main source of profits of a life assurance company is derived from the excess of interest earned by the company on its investments over and above the rate of interest allowed for in computing its reserves, and the savings in mortality within the tabulated expectations.

Your directors have invested the company's capital and income exclusively in first-class municipal debentures. Such debentures afford absolute security for a long period of years at a rate of interest considerably in excess of the rate allowed for in the calculations of the company.

No death losses have occurred among the policyholders of the company during the year.

The balance of the call upon the subscribed capital, amounting to $23,828.54, is in process of collection, and, therefore, not included in the assets of the company in the balance sheet appended.

Throughout the year a continuous audit of the income and expenditure of the company has been made by the auditors, and their certificate is attached to this report.

ADDISON H. HOOVER,
President and Managing Director.

Toronto, February 15, 1904.

The president, in moving the adoption of the report, said:

In moving the adoption of the annual report, I take the opportunity of congratulating the shareholders and policyholders upon the success which the company has attained at the close of its initial year.

Within a period of practically ten months we have three-quarters of a million of the choicest business ever secured by any life assurance company in the Dominion of Canada. The average policy issued amounts to $2,600, and demonstrates the confidence of the public in the respective plans of assurance inaugurated by the Sovereign Life. The premium income amounts to the substantial sum of $39,478.21, and the high average premium rate is proof in itself of the financial and business standing of our policyholders. It also represents a careful selection of influential business and professional men throughout the Dominion, whose affiliation with the Sovereign Life Assurance Company will prove a tower of strength in the years to come. There never was a better list of policyholders in any company.

The representative character of those associated with the company as policyholders is equally true of the shareholders of the company. The capital stock of the company is held by men who are prominent in business and professional life.

Equally with other Canadian institutions, we expect large future results from the general prosperous conditions and rapidly increasing population of the Dominion, and have already placed the company in a position to take advantage of the remarkable growth of the Canadian North-West. Agencies have been established in Ontario, New Brunswick,

Nova Scotia, Prince Edward Island, Manitoba and the North-West Territories.

In conclusion, I desire to commend the efficiency of the home office staff and the loyalty and painstaking efforts of our agents in the field.

Mr. William Dineen, second vice-president, in seconding the adoption of the report, said:

I welcome the opportunity thus afforded me of expressing my own pleasure, and also, I am assured, the gratification of every shareholder and policyholder at the more than satisfactory statements we have just heard. In a somewhat extended business experience I do not know that I have ever seen a more creditable or more substantial showing made by a financial corporation in the first year of its existence, and I think that our thanks and congratulations are due to those who have brought about this result. To have attained a premium income of $39,478.21 within a brief ten months, and that a period in which all business was originated, has been a notable achievement, and more particularly so when the fact that we have the strongest reserve basis in Canada, and when the splendid class of policyholders secured are considered, I think we can fairly regard these results not only as the fruits of good management, but also as indisputable evidence that we have earned, and deservedly earned, the confidence of business men throughout the country. As we have found, after our first ten months of operations, we have a surplus of $78,788 over liabilities, and offer to our policyholders security to the magnificent amount of $476,262.65. We have received a greater average premium per $1,000 of assurance than any other Canadian company, and in both the number and amount of policies written we can compare favorably with the first year's business of the largest and most successful American companies. With the favorable remarks of our consulting actuary we have reason to be particularly pleased, and with our present assets of over $110,000 we can be confident of securing, as we have already secured, the best class of assurers. I have pleasure in seconding the adoption of the report.

FINANCIAL STATEMENT, DECEMBER 31ST, 1903.

INCOME.

Insurance premiums	$ 39,478 21
Interest	2,313 59
Calls on capital stock	81,338 26

SECURITY TO POLICYHOLDERS.

Amount set apart for re-insurance reserve, $31,522.12; surplus of assets over liabilities, $78,778.79; call on capital stock in process of collection, $23,828.54; uncalled capital stock, $342,133.20. Total security to policyholders, $476,262.65.

Auditors' Report.—Having made a monthly audit of the books and accounts of the Sovereign Life Assurance Company of Canada from the inception of the company to December 31st, 1903, we certify the foregoing statements of income and expenditure, and of assets and liabilities, to be correct. We have examined the securities and the cash and bank balances, and find same to be in accordance with the said statement.

(Signed) James P. Langley, F.C.A.,
George Edwards, F.C.A.,
Auditors.

Toronto, Feb. 15, 1904.

Actuary's Report.—I herewith beg to submit my report on the valuations of the company's policies as at December 31, 1903. The policies number 285, and the amount assured by the policies was $745,000, with a premium income of $39,478.21, or $53 per $1,000 assured. The new British Life Offices Mortality Table (commonly known as the Om. Table) was used throughout as the basis of valuation, with 3 per cent. interest for profit-sharing policies and 3½ per cent. for non-profit policies. The valuation of the company's policies on this basis amounted to $21,522.12. The adoption of this table as the valuation basis is a new departure in Canadian life assurance. This Table was selected because it represents the actual experience of all the principal British life offices for twenty-five years ending the year 1893, while the older and more generally used Hm. Table represents the experience of a smaller number of offices ending with the year 1869. It is natural to expect that the mortality experience of this company will agree more closely with the recent Table than with the older Tables. The 3 per cent. standard is the strongest adopted by any Canadian or American company. Since the main source of profit to the policyholders and shareholders of the company is in the excess of interest earned over that assumed to be earned in the valuation rate, the adoption of this rate will place the company, so far as its future profit-earning capacity is concerned, in the front rank of the leading companies on this continent.

Sidney H. Pipe, A.I.A.,
Actuary.

Consulting Actuary's Report.—I have made a general inspection of the books of account of the company, and the statement of assets, liabilities, income and disbursements, and find the books well adapted to keep correct account of the affairs of the company, and the results of the year's business very satisfactory. There seems no reason why the continuance of the business plans which have been inaugurated by the management will not place the company in a few years on an entirely self-sustaining basis and duly reward the stockholders for their investment.

The selection of the Om. Table as a basis of computing liabilities and regulating the cost of insurance between policyholders seems to me on the whole a reasonable and wise choice. As compared with the tables now used for these purposes by the leading American and Canadian companies, it will give some advantage in premium charges to those who apply for insurance in early life, and this ought naturally to work beneficially for the whole company.

The selection of three per cent. as the rate of interest to be assumed in computing policy liabilities in the case of participating policies, and three and one-half per cent. in the case of non-participating policies, is also a judicious assumption, and when used with reference to the Om. Table of Mortality will produce reserves which will certainly be as conservative and high on the whole as are made by any Canadian or American company.

The number and amount of policies written during the ten months in which the company has been in full operation compares favorably with the amounts written in their first year by all the best and most successful of the leading American companies, and the prospect of soon reaching wholly profitable results with such an amount of business is much greater than it would be with five times the amount and as many times the amount of preliminary or organizing expense.

Walter C. Wright, Consulting Actuary.

Election of Officers and Directors.

A vote of thanks to the management, auditors, office and agency staff of the company was passed, after which the following directors of the company were elected for the ensuing year: A. H. Hoover, Hon. W. C. Edwards, William Dineen, Thos. Baker, Robert E. Menzie, Alex. F. Webster, John T. Hornibrook, Edmund E. Sheppard, Josiah B. King, His Honor Judge Alex. Finkle, James Dixon, Wm. M. German, K.C., M.P., John McClelland, E. Guss Porter, K.C., M.P., and Stephen Noxon. Subsequently Mr. A. H. Hoover was elected president and managing director, Hon. W. C. Edwards first vice-president, William Dineen second vice-president, Thomas Baker third vice-president, and Robert E. Menzie treasurer.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending January 31 1904.

J. M. COURTNEY,
Deputy Minister of Finance.

LONDON MUTUAL FIRE INSURANCE COMPANY OF CANADA.

The annual meeting of the London Mutual Fire Insurance Co. of Canada was held on Monday, February 22nd, at the head office, 82-84 King Street East, Toronto.

The president spoke at length on the operations of the company for the year 1903, and moved the adoption of the report. The motion was seconded by the vice-president, Mr. Geo. Gillies, and was carried unanimously by the meeting. The retiring directors, Hon. John Dryden, Rev. G. I. Taylor and Mr. D. Kemp, were re-elected, the Hon. John Dryden representing the policyholders, the Rev. G. I. Taylor and Mr. Kemp the shareholders.

REPORT.

Your directors have much pleasure in laying before you the forty-fourth annual report and balance sheet of the company.

From the statement it will be seen that the assets on December 31st last amounted to $736,796.55, an increase of $108,106.39 over the amount shown at the close of the year 1902.

There were issued during the year (including renewals) 28,597 policies, insuring property to the extent of $38,994,178.86, the gross amount at risk on the 31st of December, 1903, being $74,846,901.20.

The assets have all been carefully valued, and after providing for an ample re-insurance reserve fund, and writing off 25 per cent. from office furniture and Goad's plans account, there remains a surplus over all liabilities of $376,760.16.

The year 1903 is noted for the large number of conflagrations, occasioned chiefly by prolonged seasons of dry weather, but though the company contributed in each case, the amounts were comparatively small, it being the policy of your board to write small lines spread over a large area.

In April last, in compliance with a by-law passed at the last annual meeting, the head office was moved from London to Toronto. The offices at present occupied are commodious and well adapted to the needs of the company, and it gives much pleasure to state that the change has been beneficial.

Your directors are pleased to report that the office and field forces have performed their duties in a very satisfactory manner.

Three directors, viz.; Hon. John Dryden, Rev. G. I. Taylor and Mr. D. Kemp, retire from office, all being eligible for re-election.

Respectfully submitted,

JOHN DRYDEN,
President.

H. WADDINGTON,
Managing Director.

I have audited the books and accounts and have verified the securities of the London Mutual Fire Insurance Company of Canada, and hereby certify to the accuracy of the above statements, which correctly set forth the position of the company as on December 31st, 1903.

W. H. CROSS,
Auditor.

Toronto, February 4th, 1904.

At a subsequent meeting of the board the Hon. John Dryden was re-elected president, Mr. Geo. Gillies vice-president, and Mr. H. Waddington managing director for the year 1904.

Mr. W. H. Cross, F.C.A., was appointed auditor for the year.

Toronto, February 22nd, 1904.

ANSWERS TO ENQUIRERS.

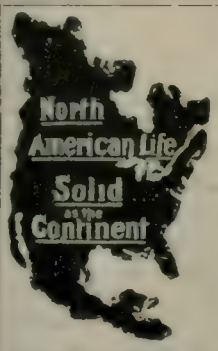
H. J., Montreal.—The Englishman does not always get the right explanation of such matters out here. Your Manchester correspondent is misinformed as to what this journal has had to say. We cannot prevent his calling us names—people do that in this country, to —but we can correct him when he misquotes us. On 27th November the Monetary Times said: "Some of our industries, we know, are not doing well enough, but are seriously handicapped by foreign competition, and we should be glad if measures can be framed to assist them." Quoting, in its issue of 26th December, this very article, which was headed: "Manufacturers' Proposals," the British-Canadian Review, of London, England, has this to say of the article: "We reproduce the following editorial from the Monetary Times, of Toronto, which may be said to very ably and fairly represent the views of a very considerable section of public opinion in Canada. With very slight alterations our contemporary's article would perfectly apply to this country." So you see that if, as you say, the Manchester School pupils are not all dead, it is still true that they need now-a-days to widen their curriculum.

—Mr. D. Pottinger, general manager of Government railways, is advertising for tenders for straightening the main line of the Prince Edward Island Railway, at Curtis' Creek, and for making connection between the main line and the Hillsborough river bridge at Charlottetown. Tenders will be received up till 15th March.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, February 25th, 1904, compared with those of the previous week:

Cities	Feb. 25th, 1904.	Feb. 18th, 1904.
Montreal	16,870,198	15,484,440
Toronto	11,463,022	12,442,137
Winnipeg	5,259,639	3,975,927
Halifax	1,717,687	1,445,374
Hamilton	837,698	1,051,769
St. John	900,613	750,893
Vancouver	1,201,650	1,188,493
Victoria	658,502	599,574
Quebec	1,243,901	914,950
Ottawa	1,818,400	1,515,265
London	646,302	720,206
	$42,617,612	$40,089,028



Strength and Stability

Are the important elements required in effecting insurance, —guaranteeing, as they do—the absolute fulfillment of the contract.

The financial position of the

NORTH AMERICAN

is unexcelled, making it a most desirable Company for Policy-holders and Agents.

Vacancies for active, energetic men to act as representatives.

North American Life Assurance Co., Home Office, TORONTO, Ont.

J. L. BLAIKIE, - - - - - - PRESIDENT.

Transacts Fire Business only, and is the oldest purely Fire Office in the world Surplus over Capital and all Liabilities exceed $7,000,000.

Canadian Branch—15 Wellington Street East, TORONTO, ONT.

H. M. BLACKBURN, . . . Manager
F. E. MAULSON . . . Inspector

HIGINBOTHAM & LYON, Toronto Agents.
Telephone 488.

Agents Wanted in all Unrepresented Districts.

Sometimes a revision of policy forms means little. It stands for

THOROUGHNESS

in every detail in the changes that have been made by the Union Mutual—re-arrangement of features, reduction of rates, liberalizing of rights, a contract modern to the highest notch. A policy that looks well, sells easily and pleases long.

UNION MUTUAL LIFE INSURANCE Co.
Portland, Maine.

FRED E. RICHARDS, President. ARTHUR L. BATES, Vice-President.

Agents always desired—the kind who write policies and hold them.

Large Bonuses. Moderate Rates of Premium.

Head Office for Canada, MONTREAL
A. McDOUGALD, Manager.

ABOUT BRITISH SHIPPING.

"The broad fact remains, as Mr. Chamberlain pointed out in his speech at Liverpool on 28th October, that foreigners are going more and more into shipping, and that they are able to earn money where British vessels make a loss, as they have not to submit to the British restrictions in respect of loading, etc., and can enter our coastal trades, whereas we are precluded from entering theirs." This quotation is from the London "Fair Play," of December 3rd, a paragraph in which notes that while in 1890, out of 22,151,000 tons gross, 11,597,000, or more than half, was British, in 1903 the gross tonnage is 33,643,000 tons gross, and Britain owns 16,006,000 tons—slightly less than half. One fact or two have not attracted anything like the attention their importance deserves. For example, take the United States and the Philippines. These islands having been declared subject to the United States coastal laws, all British ships have to observe these laws, which are a handicap. And again, German, Norwegian, American or other vessels carrying freight on the high seas are not subject to the restrictions of the British Load Line Act, and in consequence are permitted to carry perhaps twenty per cent. more and load much deeper than a British ship. Hence the foreign shipowner (granted that he does it at the risk of his crews' lives), can make money where the British shipowner loses it.

MONTREAL MARKETS

Montreal, Feb. 24th, 1904.

Ashes.—Nothing is coming in of any consequence, and stock in store is practically nil, but some enquiries are reported from makers, in some cases American, enquiring as to prices obtainable, and the chances are that there may be some moderate lots coming in between

now and the opening of navigation. Dealers are quite ready to pay $6.10 for first pots, and as high as $5.75 for seconds.

Dairy Products.—The cheese market remains a very dull one, with values somewhat depressed. English buyers and local holders are very much apart, and with the almost entire absence of business it is very difficult to establish any definite quotations; probably 10¼c. would now be about the outside figure that could be realized for fine fall goods, though some holders profess to be content to await the turn of the market, claiming that the statistical position is strong. A very fair local consumptive demand about absorbs the offerings of butter, and 19½ to 20½c. quoted for fresh creamery, and 21 to 21½c. for fine fall grass makes; western dairy is quoted at 15½ to 16c.; dairy rolls, 16 to 17c. Last week's shipments, via St. John and Portland, were 43,576 boxes of cheese, and 2,614 packages of butter.

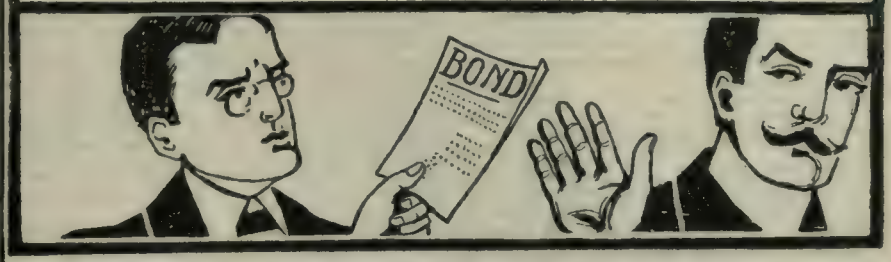
Dry Goods.—There has been nothing further in the way of revision of cotton prices reported since a week ago, but the mills are all very firm in quotations. General trade conditions are, on the whole, of favorable character, considering the very untoward weather conditions that have prevailed all winter. Some substantial country dealers, who have never been known to ask indulgence before, but have been obliged to call for renewal favors, having a large proportion of their fall goods still on their shelves, but the number of actual failures has been actually very small. City retail trade is still quiet, and a few bright sunny days, with a suspicion of thaw, are needed to create a call for spring stuffs.

Furs.—Buyers still report light offerings, traffic in the interior being still very difficult, and there is nothing specially new in the situation at date. We repeat quotations for prime pelts as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No 1. choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; Wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1, dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—A little increase is reported in the movement, but travellers are still handicapped to some extent in covering their routes, and collections, especially in back sections, show some backwardness. With regard to values the only change reported is an advance of 5c. a cental in soft refined sugars, which went into effect Tuesday afternoon, making the present range of quotations for these goods from $3.40 to $3.80; standard granulated is unaltered at $4.

Hardware and Metals.—A fair volume of hardware orders is reported for April shipment. Heavy metals are somewhat dull, largely owing to the difficulties of transport, and considerable inconvenience is being experienced through the non-receipt of needed supplies purchased in American iron centres. Some weeks ago, while some western foundry men are said to have bills of pig-iron shipped Christmas week still undelivered. No special changes are reported in market values. Carnbroe iron is offered for spring delivery at about $17.50, and Summerlee at about $19.50. Bars are easy at $1.75 to $1.80. Tin-plates are rather weaker in Britain; the present local quotation for standard quality and weight is $3.65 for cokes, and $3.90 for charcoals. Canada plates are quoted at $2.25 to $2.30; black sheets, $2.25, for 28 gauge; galvanized sheets, $4.25; boiler plate, $2.10. There is nothing new in nails or wire. Ingot tin is fairly steady at 32c. for Straits; lead, $3.25, with the discount for lead pipe, 35 per cent. off list; copper, 13½c.; spelter, $7.75.

An Unreasonable Request



Excuse me! I don't go on bonds any more. If you have to furnish a bond write to THE UNITED STATES FIDELITY AND GUARANTY COMPANY. They issue all kinds of Surety Bonds and Draft-Checks for Travellers.

Kirkpatrick & Kennard, Managers for Canada, 6 Colborne St., Toronto.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

SCOTT & WALMSLEY,

ESTABLISHED 1858

Managers and Underwriters.

Hides.—The quality of beef hides now offering is poor, the grub being much in evidence, and but for the fact that receipts of country hides have been very limited during the past month, owing to the difficulties of traffic, prices would probably have declined, but dealers are still buying at the old figures. Lambskins are steady at 75c. each, and calfskins at 11c. for No. 1, and 9c. for No. 2.

Leather.—The demand from local consumers is moderate, but prices rule steady to firm. Tanners claim they are making no money out of glove and buff, and an advance of half a cent has been practically established. Harness leather is scarce and firm at 28 to 32c. For splits there is quite a good export enquiry. Jobbing sole is hard to get in any quantity.

Oils, Paints and Glass.—There is no great swing to business as yet, travellers' orders not coming in very freely, and there is much dissatisfaction with the cutting in prices being indulged in all along the line. Turpentine is lower than last week, but all other quotations are nominally the same. We quote: single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 92c., single barrels; olive oil. machinery, 90c. to $1; cod oil, 35 to 40c. per gallon.; straw seal, 45 to 50 to 55c. per gallon; tinged and brown ditto, down to 35c.; castor oil, 7½ to 8c. for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.50; No. 1, $4.25; No. 2, $4; No. 3, $3.80 to $3.90; No. 4, $3.60; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4½c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in bbls., $1.90; ditto, in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75c.; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3 to $3.25 for first break; $3.45 for

THE SEASON'S HEARTY GREETINGS

Head Office, WATERLOO, ONT.

The Mutual Life OF CANADA

is pleased to announce that it has written during the past year

Over Five Millions

of good Canadian Business; and that in all other respects the Company has had a most successful year.

The Metropolitan Life INSURANCE CO. OF NEW YORK.

"The Leading Industrial Company of America."

Is represented in all the principal cities of the United States and Canada

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty-five years.

THE METROPOLITAN has Assets of over 89 Millions of Dollars Liabilities of 78 Millions, and a Surplus of over 10 Millions.

THE METROPOLITAN pays Death Claims, averaging one for every minute and a half of each business day of eight hours, and has nearly Seven Million Policy-holders.

THE METROPOLITAN offers remunerative employment to any honest, capable, industrious man, who is willing to begin at the bottom and acquire a knowledge of the details of the business. He can by diligent study and practical experience demonstrate his capacity and establish his claim to the highest position in the field in the gift of the Company. It is within his certain reach. The opportunities for merited advancement are unlimited. All needed explanations will be furnished upon application to the Company's Superintendents in any of the principal cities.

TORONTO MARKETS.

Toronto, Feb. 25th, 1904.

Chemicals, Drugs, Etc.—The local drug trade has been a good deal interfered with by the terrible state of roads throughout the country. The strongest feature is the advance in camphor, owing to its scarcity. Quinine is quite firm, but opium remains very dull. Codliver oil continues high-priced, but the demand is by no means brisk. Oil of cloves and peppermint are strong. Menthol is lower. Advices from Baltimore say the demand for ammoniates grows stronger, and business, both in blood and tankage, is good with advancing prices. Business in Manchester, England, has become dull owing to the gloomy textile prospects. Heavy alkalies are quiet, though there is a fairly good tone to the market. Bleaching power keeps steady at the higher prices. Ammonia salts are in demand. Some good business has been done in crude carbolic.

Dry Goods.—No great net change has been made during the week either in raw cotton or products, but they continue very strong indeed, and all the probabilities point to further increases. The wholesalers are doing a good business in all staple goods, though the difficulties of transportations have no doubt interfered with business considerably. They are getting ready for an influx of out-of-town visitors at the forthcoming spring millinery openings, which start the last day of this month.

Fruits and Vegetables.—The following will give an idea of the average price list: Apples, 75c. to $2.50 per barrel, according to quality; cocoanuts, $3.50 to $4. per sack; oranges, Florida, $2.75 to $3 per case; California navels, $2.50 to $3.25; Mexican, $2.50 to $2.75; Valencias, ordinary, $4; large 714's, $5, and large $5.50; bananas, 8's, $1.25 to $1.50 per bunch; 1st $2 to $2.50; celery, $5.50 per case and 75c. to 90c. per doz.; cranberries, $8 to $9 per barrel; $1.10 to $1.25 per basket; Spanish onions, $3.25 to $3.50 per large case, or $1.25 for small; Malaga grapes, $6.50 to $7.50 per barrel. Trade has been this week on a somewhat improved basis. Prices keep about steady.

Merchants FIRE INSURANCE CO.

CAPITAL AND ASSETS OVER HALF A MILLION

HEAD OFFICE TORONTO.

Agents Wanted in All Unrepresented Districts.

Hardware.—Trade continues only fairly good, being depressed to a certain degree by the difficulties of transport. There is scarcely any feature which deserves special attention. Prices remain practically unchanged. The metal trades are in about the same position as the smaller classes of hardware, with a fairly reasonable demand. English advices report a decline in Cleveland warrants.

Hides and Skins.—No change since last week has taken place in the hide market, and there is a good demand under normal receipts. Sheepskins and calfskins both continue steady. Tallow is unchanged.

Live Stock.—Brisker conditions prevailed at the cattle market this week, though exporters were still dull, being of somewhat poor quality. For butchers' there was a very good undertone, and some realized $4.50. A few stockers were offered and sold at old prices. Milch cows realized $35 to $60 each. Not many really good calves were shown, and they are in demand. Sheep and lambs, though in normally good supply, sold early.

Provisions.—Fair quantities of dairy rolls are coming forward, and the quality shows some improvement. Cheese is a little on the easy side. The egg situation remains practically without improvement, and stored sell at ordinary new-laid prices and above. Not much poultry is coming forward now and the market is firm. The trade in hops is quiet. Hog products are firmer in sympathy with Chicago. Stocks are not large, but there is not usually a very great demand in this market at this period of the year.

Wool.—A quiet market for wool prevails, and there is practically no demand for fleece. The demand for pulled wools reckons up to a respectable total, as they are all pretty busy.

	$3,994,083 67

The Year's Business. The new business of the year was the largest ever submitted to the Company, and the figures are given in tabular form together with those for 1902 to facilitate comparisons.

	1903	1902	Increase
Number of applications received	6863	5022	1841
Amount of Assurances applied for	$13,881,960	$10,687,672	$3,194,288
Policies issued	12,635,032	9,734,002	2,901,030
Policies paid for	10,122,139	8,398,386	1,723,753
Total business in force	95,531,110	89,170,575	6,360,535

Of the applications received, 266 for Assurances of $693,716 were declined, as not conforming to the Company's standard.

The Income. The gross premium and Annuity income was $2,847,559.74, and the income from interest, including $30,757.20 profit on sale of securities, reached the handsome sum of $1,176,374.33. Together these make the total gross income (exclusive of payments on account of Capital Stock), $4,023,934.07.

The Payments. The death claims paid during the year amounted to $1,227,414.42. The matured endowments and death claims, (including bonus additions), and annuities paid in 1903, amounted to $1,528,420.46, while $145,273.40 was paid as cash dividends and surrender values to policy-holders, making total payments to policy-holders $1,673,693.86.

The Assets. The total assets at the 31st December, 1903, as shown by the balance sheet, amount to $27,180,007.21, being an increase of $1,215,074.71 over 1902—a growth that your Directors think is very satisfactory. The usual conservative practice of the Company has been followed in the valuation of its assets.

The Liabilities. In the valuation of the policy liabilities, the Company's own standard has again been employed, viz., the Institute of Actuaries' Table, with interest at 3½% for all business prior to January 1st, 1900, and the same table with 3% interest for policies issued since that date. The total net Reserve by this valuation standard amounts to $25,093,374. In addition to this the Company holds Reserves of $32,315 for lapsed policies subject to revival, and $55,028 for instalment claims fund. After providing for these Reserves and for all liabilities, except Capital Stock, there remains a surplus on policy-holders' account of $1,861,367 32. A large section of our business was valued on the new table known as the OM Table, and the Reserves brought out amounted to 99.7% of the Reserves required by the table now in use by the Company. So that it would appear that no material change in Reserves would result by the adoption of the more recent tables of mortality. So far as is known this is the first occasion upon which these new tables have been used in a valuation in Canada or the United States by a Company having an established business.

A full report of the meeting will appear in the Company's paper, "Life Echoes."

Mercantile Summary

THE Windsor Hotel at Fort William, Ont., has been burned down, at a loss of $10,000.

THE Canadian Pacific Railway is said to be considering a plan for improving its air-brake system, in order to lessen the destruction of cattle along its lines.

THE Crawford Bay & St. Mary River Railway Company want authority from the Dominion Parliament to build and operate a railroad (steam, electric, or other power), from Crawford Bay on Kootenay Lake, to Fort Steele, in British Columbia, also to generate electricity for the supply of heat, light and power.

THE Ontario Association of Land Surveyors held their annual meeting in Toronto last week, and elected the following officers for the ensuing year: President, C. A. Jones, Petrolea, Ont; vice-president, J. W. Tyrrell, Hamilton; sec.-treas., Capt. Killaly Gamble, Toronto; auditors, J. F. Whitson and W. A. McLean, Toronto.

ON the 25th ult., a fire at St. Stephen, N.B., did damage to the Bonness building to the amount of $2,500, and destroyed the dry goods stock of W. J. Alger, value, $4,000; G. and L. Walls' book and stationery stock, $3,500; St. Croix Jewellery Company, $10,000. Most of the losses were covered by insurance.

THE Fundy Coal Company, Limited, are pushing development work on their property at Lower Cove, near Amherst, N.S. Already a shaft has been sunk about 600 feet, and is still being extended, while levels have been run a good distance at a depth of 500 feet. The mine is at present raising about 75 tons of coal daily, but this output is rapidly being increased. Modern machinery is being put in.

THE International Railway Bridge Company, of New Brunswick, is applying to the legislature of New Brunswick for incorporation, with power to build a railway bridge or a combined railway and highway bridge across Restigouche river, from near Campbelltown, N.B., to Mission Point, Que., and to build a railroad to connect with the Atlantic and Lake Superior Railway and the International Railway of New Brunswick.

THE big contract for the erection of the International Harvester Company's works at Hamilton, Ont., is now about completed, the cost being about $250,000. The buildings include a warehouse 450 feet long, by 130 feet wide; paint shop, knife and bar building, forge building extension 400 by 90 feet; wood room extension; grey iron foundry extension 450 feet long, by 130 feet wide; paint large fire-brick ovens. The company (Deering division), is said to be contemplating the erection of still further buildings.

PARKER & CO., 61 Victoria Street, TORONTO

THE Cleveland & Georgian Bay Steamship Line has given a contract to Sir W. G. Armstrong Whitworth & Co., Newcastle-on-Tyne, for a new steel steamer 250 feet over all, 235 feet keel, 41 feet beam, and 14 feet deep. It will ply on the route between Toronto, Hamilton, and Fort William, sailing twice a week, and will have accommodation for 250 passengers. It is stated that other steamers of a similar capacity will be built later.

Two failures are reported from the Saguenay district, both apparently the result of trade inexperience. T. Boudreault, of St. Francois de Sales, was a farmer who sold his land and engaged in storekeeping just about a year. He is also school secretary, and called naturally intelligent, but he has had to assign already.——E. Villeneuve, of Jonquiers, who engaged in retail trade in 1901, was formerly a cheese-maker, and took to storekeeping, with some assistance from his father. His assignment is also now reported.

ONE evening last week the employees of McLaren & Co., Limited, St. Catharines, Ont., tendered a banquet to their employers. It is a very old established house, comprising twenty-four departments, and has for a long time past been the pioneer in the early-closing movement, and in other ways looking to improvement in the condition of wage-earners. These points were brought forward in an address which was read by Mr. Wismer, the firm's accountant. Besides members of the firm, there were present the mayor and ex-mayor of the city, and other distinguished guests.

IMPORTANT WORK.

"Investments" is admitted by the Press to be a work of great value as a guide to Investors. Among the specially contributed articles are:—
"GENERAL PRINCIPLES FOR INVESTORS."
"STOCK MARKETS AND HOW TO PROFIT BY THEM."
"THE THEORY OF OPTION DEALING."
"HOW TO INVEST IN MINES."
"INSURANCE AS AN INVESTMENT."
"COLONIAL LAND: ITS COMING IMPORTANCE."
An entirely new feature is a collated list of "AVERAGE VALUES," enabling an Investor to gauge the value of any particular security. "Investments" (148 pages). Post Free on mentioning THE MONETARY TIMES.

Mercantile Summary.

THE death is announced of Frederick A. Folger, manager of the Kingston Light, Heat and Power Company. He had suffered for some years from locomotor ataxia, and at the last died of heart failure.

SCOTTISH steel manufacturers have concluded an arrangement whereby the prices of boiler plates will be raised 5s. per ton, ship plates two shillings and sixpence, and iron bars ten shillings and sixpence. Breaches of the agreement will incur heavy penalties.

THE assignment is reported of J. P. Fondrouge, dry goods retailer, in Montreal. For twenty years he was a dry goods clerk, and about a year ago he opened up on his own account in the north-eastern suburbs with the above result. He owes about $4,500.,

A SPECIAL dispatch from Chatham, N.B., states that the Maritime Sulphite Fibre Company's property at that place has been sold to the Bank of Montreal, who held prior mortgages and had secured bonds amounting to about $500,000. It is expected that operations will be resumed at the mill at an early date.

THE annual convention of the National Building Commissioners and Inspectors' Association was held in Washington, D.C., last week, and Messrs. A. Chausse, of Montreal, and R. McCallum, of Toronto, were elected vice-presidents. The association will in future be known as the International Society of State and Municipal Building Commissioners and Inspectors.

THE Winnipeg Paint and Glass Company, Limited, have moved into commodious new offices at 179-181 Notre Dame Street, Winnipeg, Man. The building, which is of solid stone, is of three stories, but will later on be double in height. The company has been incorporated a little more than a year, so that its present success speaks all the more eloquently.

THE Western Retail Implement Dealers' Association held its annual meeting in Winnipeg last week, and elected officers as follows:—President, John Menzies, Minnedosa; vice-president, William Williams, Gladstone; directors, William May, Portage; H. Chapin, Hartney; W. J. Helliwell, Oak Lake; H. C. Ouerra, Winnipeg; S. Hunter, Miniota; R. O. Holden, Birtle; D. McDonald, Virden; auditor, John Inglis, Brandon.

RECENT business troubles in Quebec are reported as follows: J. A. Belanger, a prominent marble cutter, whose one-time excellent business has suffered from a lack of proper application of late, it is said, is trying to settle at 10 cents on the dollar. Including mortgage liabilities, he is said to owe $19,000.—Napoleon Binet, who succeeded to an old-established grocery business in 1886, wants to settle with his creditors at 50 cents.—G. Lachance, baker, is reported as having compromised moderate local liabilities.

The Barber & Ellis Co.,
Limited ..... Toronto

Mercantile Summary.

THE John Goodison Thresher Company, of Sarnia, has been authorized by the Ontario Government to increase their capital stock from $99,000 to $300,000.

L. S. BELL, lately in general trade at Shawbridge, Que., but residing in Montreal for several months, has consented to assign on demand. He owes some $3,000 in connection with his late business.

THE Deep Oil and Gas Company, Limited, London, Ont., has been incorporated with a capital of $100,000 for the purpose of sinking oil and gas wells, deal in oil and natural gas and operate pipe lines.

A COMPANY has been formed, under the name of the Laval Electric Co., to produce electricity for light, heat and power purposes in the counties of L'Assomption, Terrebonne and Laval, in the Province of Quebec.

THE Ontario Government has granted letters patent to the Vermilion, Assiniboine and Saskatchewan Land Co., with a capital stock of $200,000, and headquarters at Toronto. Among the provisional directors are Col. S. Hughes, HON. R. P. Roblin, etc.

A WINDING-UP order has been granted in the matter of the Sleeper Engine Co., Limited, of Montreal, chartered in May, 1902, with an authorized capital of $250,000, to manufacture a high speed rotary engine, specially designed for electrical purposes. A certain amount of capital was paid in, and has apparently been absorbed in preliminary and experimental work.

MESSRS. Carter & Co. have opened a general stockbrokers' and financial business in commodious offices at 21 and 23 Colborne Street, Toronto, opposite the King Edward Hotel. The firm are members of the Toronto Board of Trade and Standard Stock Exchange, and are in a position to receive continuous and trustworthy information concerning quotations at the principal exchanges. Mr. Carter is the secretary-treasurer of the Builders' and Contractors' Concrete Cement Company, of Bell's Lake, near Owen Sound, whose Toronto offices are at the above address, and he is well known as the inventor of the popular check-book system and as the founder of the Carter-Crume Company.

FOR something like twenty years N. Rivard has been in general trade at St. Paschal, Que., but with indifferent success. He compromised about the year 1887, and assigned a year or so later. He resumed business in his wife's name, and appeared to do fairly for a time, but now we hear he has assigned.—Consent to assign has been fyled by J. I. Bissonette, general dealers, at Laprairie, Que. He was originally a carpenter in his native town, but a few years ago engaged in the men's furnishing business in Montreal, where he did not establish a favorable record. In 1902 he returned to Laprairie, buying out a general stock, and has not been reported as being very satisfactory in settlements.

Capital Wanted.

$20,000 in a Furniture and Carpet business in a city of 50,000 population, in one of the Maritime Provinces. Business established 50 years. Turnover $120,000 in 1903. For particulars address "B," Monetary Times Office.

Mercantile Summary.

GARIEPY & Panneton, in the dry goods line at Three Rivers, Que., whose failure we lately noted, are offering 33 1-3 cents on the dollar.—W. Hebert, another late dry goods insolvent, of Montreal, has settled at 60 cents.

THE Canadian Pacific Railway is about to put on a daily passenger service between Montreal and the Pacific Coast. Formerly this service, which was carried on by the Imperial Limited Express was a tri-weekly one.

A NEEPAWA syndicate has sold 40,700 acres of Manitoba wild land, situate along the Canadian Northern Railroad, to Messrs. Hopkins & Camp, of Minneapolis, who will colonize the tract with settlers from Wisconsin, Oklahoma, Nebraska and Ontario.

A BRICK block in Leamington, Ont., occupied by Norman & Dawson's dry goods store, Cullen & Bancroft, furniture, Maycock's fur warehouse, Leamington Business College, and the Inland Revenue and Customs offices was on the 24th burned to the ground at a total loss, estimated at $35,000.

A GENERAL merchant, L. S. Plamondon, of South Durham, Que., is reported as trying to compromise liabilities of $9,000 at 60 per cent. He was formerly in business at Acton Vale, where he was reported as doing fairly, and removed in 1902 to his present address, buying out J. P. St. Onge at 75 cents on the dollar.

FOR the third time in three years the Menzie Manufacturing Company's curtain-shade works in Toronto were (on Wednesday last) damaged by fire, which on this occasion is supposed to have been caused by defective electric wiring. The loss is estimated at $30,000, mostly insured in British companies.

GREAT regret is expressed on all sides at the untimely death of Mr. B. T. A. Bell, at the age of 41, as the result of falling down an elevator shaft in his office building at Ottawa, a fortnight ago. Mr. Bell was widely known as a mining expert, was editor of the "Mining Review," secretary of the Canadian Mining Institute, of which he was almost the mainstay, and which met in Toronto this week, and was a leading member of the Yukon investigation committee.

A STARTLINGLY sudden death was that of Mr. E. N. Heny, of Montreal, on Friday last. At noon on the previous day he left his office for his dwelling, saying that he felt indigestion. After seeing his doctor in the afternoon he went to bed at seven, feeling better. But he died before three on Friday morning. Mr. Heny was born in Ottawa in 1851, and came to Montreal about 1870. He was an enterprising manufacturer and wholesale merchant, and built up a large business. His character was such as to widen to a large radius the circle of those who respected and admired him.

The Prince Albert Board of Trade, Prince Albert, Saskatchewan, held its annual meeting on the 15th ult., and elected as under: J. H. Wilson, president; (re-elected); R. H. Hall, vice-president, and D. W. Adam, secretary-treasurer. Council: Messrs. F. C. Baker, C. G. K. Nourse, G. R. Russell, Wm. Galbraith, R. T. Goodfellow, Wm. Cowan, D. C. McLellan, O. B. Manville, R. S. Cook, Judge McGuire, Capt. Coats, Andrew McDonald, J. F. Betts.

Debentures, bearing date the 24th day of December, A.D. 1903, and repayable in twenty equal annual instalments of principal and interest.

For further particulars apply to

C. O. DAVIDSON,
Secretary-Treasurer.

THE ROCHESTER FIRE.

Underwriters did not have to wait very long after the Baltimore conflagration to hear news of another which, though much less disastrous in its results, will at least be considered as one of the big fires of the year. On the 26th ult., a blaze started in the Rochester Dry Goods Company's store in Rochester, N.Y., and, before it could be extinguished, practically cleared out the important retail dry goods section of the city. Local fire brigades did good work, and were assisted by those from Buffalo and Syracuse. The burned district lies on the north side of Main street, between St. Paul street and Clinton avenue. Three departmental stores were destroyed utterly, and one of them, the Sibley, Lindsay and Curr Company, was the oldest and largest in the city. Among the chief losses may be mentioned the Granite building, loss $300,000, insurance $175,000; Sibley, Lindsay & Curr Co., building, $250,000, fully insured, stock $1,100,000, insurance $830,000, also stock in Granite building $400,000, insured; Buell building $75,000, insurance $60,000. Cornwall building $60,000, insurance $50,000; Beadle & Sherburne, stock $250,000, insurance $240,000; Rochester Dry Goods Company stock, $150,000, insured. The total property loss is estimated at last accounts at $3,200,000, and the loss to insurance companies at $2,200,000. An unfortunate feature was the total demolition of the E. F. Ashley large insurance agency, together with all their records. The conflagration is supposed to have been caused by the fuse in the electric elevator connection. The fire protective apparatus of the city is said to have been defective. The fire came at a good time to strengthen the feeling now held by the underwriters that, in all fairness, something will have to be done to put such congested districts of large cities on a higher rating basis.

WORLD'S PRODUCTION OF COAL.

Statistics which have been gathered together by Bradstreet's, show the aggregate annual production of coal throughout the world to be a little over 700,000,000 tons. Of this, in 1902, the United States produced 269,195,000 tons, valued at $371,027,000; the United Kingdom, 227,095,000 tons, at $467,605,000; Germany, 150,600,000 tons, at $262,667,000; France, 29,574,000 tons, at $92,745,000; Belgium, 22,769,000 tons, at $68,307,000. The average number of miners employed in the United States in 1902 was 518,307; in Great Britain, 805,100; in Germany, 448,000; in France, 159,957, and in Belgium, 134,092. In the United States the average production per miner was 520 tons; in Great Britain, 278 tons; in Germany, 242 tons; in France, 198 tons, and in Belgium, 166 tons. In 1902 the United Kingdom exported 60,400,000 tons of coal, the United States 6,127,000, Germany, 18,981,000, France, 1,016,000, and Belgium 6,574,000. Of the quantity shipped from the United Kingdom, 15,148,000 tons was shipped for the use of steamers in the foreign trade.

PETRIE'S MONTHLY STOCK LIST.—Those in want of NEW and SECOND-HAND MACHINERY should send for this. H. W. PETRIE, 131-145 Front Street West, Toronto, Ont.

PETERBOROUGH BOARD OF TRADE.

The annual meeting of the Peterborough Board of Trade took place on the 1st inst., with a good attendance of members. The Trent Valley Canal was naturally the subject of discussion. The president, Mr. D. Hughes-Charles, in his retiring address, spoke of last year's importance in the history of Peterborough; amalgamation had been effected with the adjoining municipality of Ashburnham, and the celebrated hydraulic lift lock on the Trent Canal had been completed, another stride towards the completion of that canal. The coming re-opening and extension of the street railway were referred to as booms. In speaking of the three serious fires which had taken place during the past year, the occasion was seized to give a needed warning to do everything possible towards the improvement of the town's fire protection appliances. The president had collected statistics relative to the manufacturing industries carried on in the town during 1903. The number of hands employed was 2,750, the wages paid amounted to $1,087,900, and the output was valued at $7,581,600. It was probable that the town might develop into quite a large grain centre. Peterborough's retail merchants had last year done, he said, the largest business in their history. The Post-office revenue of the town was $25,553; inland revenue, $63,133; customs receipts, $228,927; total river and railway tonnage, $320,476. The election of officers resulted as follows: President, Mr. D. Hughes-Charles, (re-elected); vice-president, Mr. A. H. Stratton; treasurer, Mr. Peter Campbell; secretary, Mr. T. Q. Quartermaine.

have proven to be of value in acquainting Canadian manufacturers with the needs of the different parts of the country.

The next function of the Association is to be held in the city of Quebec, namely, a banquet in the Chateau Frontenac, on Saturday, March 5th. Prominent public men have been invited. Single fare rates of railway fare are arranged. The Montreal branch of the association expects to have at least fifty representatives at the dinner. The local arrangements are in charge of a sub-committee of the branch, consisting of Messrs. C. C. Ballantyne, J. M. Fortier, R. R. Stevenson, N. Tetrault, jr., R. C. Wilkins, and the secretary.

DAILY ROMANCE.

It was Saturday night—the married "drummer's" homesick night. Martin Prescott, walking into the long, narrow hotel bedroom, felt more than ever the wearing familiarity of the scene that met his eye. There was the same dull carpet, the Michigan pine furniture, the drab striped wall paper, the windows shaded only by little slated inside shutters, to which he was used in third-rate towns. There was even the same indefinable chill, dusty smell that was associated with evenings of figuring over sales on the coverless table, under the weak, single-armed gas burner that jutted out from the wall at the side of the bureau. Yet, cheerless as it was he preferred its seclusion just now to the more convivial barroom where the liquor and the jokes and the conversation of "the boys" had all the same jading flavor, and he felt unequal to bracing his spirit sufficiently to receiving the Saturday confidences of the garrulous of the weary.—"The Terminals," in McClure's.

Reduced Cost of Production

is the goal all are striving for.

One of our Band Mill customers in comparing the **Band** with the **Gang** said:

"It's quality, not quantity, I'm after. I have stood over my men this year and insisted on quality. In selling my cut I arranged for an advance of 25c. per M for every 1% advance in quantity of the cutup and better grades By the use of the Band I have secured 8% advance, which means $15,000 extra profit this season."

Several gangs have been discarded for the Pony Band double cutting, adding much to quality while only slightly reducing quantity. Many hundred single and double cutting bands running in Canada. Simple—easily managed—it's worthy of investigation.

MONTREAL'S PROGRESS.

One of the most statesmanlike utterances of the new Mayor of Montreal is that portion of his inaugural address in which he suggests the effacement of the imaginary lines separating that city from her several surrounding suburbs. It is time, he says with force, to unite their interests and to have a uniform and efficacious system governing the laying out and draining of streets, the supply and purification of water, and attention to hygiene on the part of all the municipalities. In arrangements to this end, an example is given by some of the American cities which may be copied to advantage. Although Montreal spent last year nearly a million dollars on sewers, permanent sidewalks, markets, waterworks, etc., her improvements in this direction are not completed. Reconstruction of drains is needed; the replacing of wooden sidewalks by macadam; cleaning of streets and lanes and the perfecting of the scavenging system. We are glad to see, too, that in addition to measures for isolation of persons having contagious diseases, he recommends "the practical encouragement of the League organized to resist the ravages made among our population by tuberculosis."

The natural beauty of Montreal is so great, its situation and surroundings so grand, that the desire of every well-wisher of the *chef lieu* of Canada should be to have her streets and lanes, her parks and public buildings so arranged and kept as to harmonize with the beauty which nature has conferred upon her. Evidently Mr. Laporte feels something needful in this direction, for in one of his paragraphs he declares truthfully that the internal beauty of a city, no less than its sanitary condition, is an element of attraction conducing to its prosperity. Therefore, he urges, let the council apply itself to the speedy abolition of unsightly electric poles, "let us keep our streets in proper condition, let us embellish our public parks and squares and provide good music there."

Having perceived that natural beauty in a city or town is a commercial asset, that a healthy place, other things being equal, has superior attractions for tourists and summer dwellers, let us hope that Mayor Laporte and his council will obtain the best expert advice possible as to the lasting improvement of Montreal. This was done when Fred. Olmstead was engaged to enhance the beauty of Mount Royal by making it a park for the citizens and visitors. No one has ever doubted that the move was a good one. It may not be out of place to remind His Worship that Baltimore, fire-swept as she is, is calling upon one of the distinguished medical men, of America, Doctor Osler, to apply sanitary principles in her rebuilding. Therefore, let Montreal's guardians have the best advice tending to make her the handsome healthy modern city she ought to be. Even if we take no higher view than the commercial one, it will be worth while, because the already great attraction of Montreal for the traveller will by such means be heightened.

Matters which he brings to the attention of the council are: (1) The placing of the police force on a footing worthy of Montreal, and which shall secure for that body the confidence of the citizens. (2) The getting insurance rates reduced. As to this last, His Worship and the aldermen do not see eye to eye with the underwriters. The latter have indicated measures which they insist are necessary for the safety of the city in the event of fire. These measures have not been taken, and until they are taken, we have reasons for the belief that insurance premiums will not be reduced. To mention only one of these reasons, the tangle of wires—telephone, telegraph, electric light, and street railway wires—in streets and lanes, which are so serious a hindrance to the erection of fire ladders and fire towers must be rectified in a way to permit the Fire Brigade to do its work effectively. And the fire-fighting equipment of Montreal as a whole is by no means to-day what it ought to be for a city of her size.

Upon other phases of the address we do not enter to-day. The financial aspect of Montreal's affairs, for example, might well deserve an article to itself. Nor may we more than mention to-day the gradual purging of the municipal system there, of which Alderman Ames has this week given a Toronto audience so interesting an account. What is most needed, in that city as elsewhere, is the securing of the active interest in municipal affairs of the best people. Montreal has no lack of residents with ability, public spirit, and large means.

THE MILLINERY OPENINGS.

In spite of backward seasonable conditions, the spring millinery openings which took place in Montreal and Toronto during the present week were successful and no diminution could be traced in the number of buyers. It is not easy to describe in small compass the predominating note in this season's hat fashions; they cover such a wide range, and something is shown of almost any shape. Many of the new hats are broad and flat, and some are triangle-shaped. The "continental" is quite popular, while those of a long narrow pattern are by no means unusual. One very pretty design, which caught the eye was that of a small half-opened clover leaf. Crowns are decidedly still "in," and one or two may be described as moderately high, but the generality are not more than medium. Two-toned flat-iron turban toques are coming in, as also are large hats with bandeaux.

As to trimmings, and the materials which go towards the make-up of a hat, they are of all sorts and grades. Besides the usual complement of mechlins, chiffons, etc., it may be said that ribbons are a strong feature. Plain ribbons are apparently more asked for than fancy. The chief widths in request are Nos. 40, 60 and 80. In colors, black, white and cream are strong favorites, with ciel, rose, champagne, reseda, turquoise, navy and helio by no means forgotten. Bandeaux, bands and passementeries in sequins and straw effects, also with light straw buttons, are also much in evidence. These are in black, white, cream and all the favorite shades. There is but little doubt this will be a lace year, and the designs will be of the usual varieties. Cabechons, principally in small effects, are abundant. Straw braids are highly popular, and promise to be more largely sold than for many seasons, while straw buttons are strewn frequently. In every form of trimming, a sprinkling of gold is often visible. This season, colors will have the preference over black, much more so than has prevailed for the last few years. We noticed on a number of the prettiest hats a large quantity of green, while all the wood shades are great favorites. Flowers will be worn probably more largely than ever before, and they are generally of a small character. Such flowers as baby roses, forget-me-nots, lilies of the valley, heather, hops and others similar, largely predominate. They are often massed or in wreaths. Fruit and berries are seen in average quantities, perhaps more. Foliage is in abundance, particularly roses, poppies, exhibited in the form of wreaths and branches. Ostrich feathers, too, retain their old-time position. They are to be found in white, black, cream, champagne, and, still more markedly, shaded.

THE LUMBER TRADE.

While with the exception of mill culls, which have gone up about a dollar, it may be said that the prices of lumber have made no appreciable change for nearly a year past, the market continues very firm. The cut in Ontario shows a material decrease chiefly owing to the great scarcity of labor at the beginning of the season, which induced lumbermen to come to the conclusion to rest content with a smaller output than had been anticipated at first. There is little likelihood, therefore, of any decline in values, even if the promise of a brisk building season be not fulfilled. In the Ottawa district the trade is rather dull, and prices hold to the level which has prevailed for some months. Some grades, indeed, show a slight decline.

In Quebec some doubt exists as to whether, owing to the great depth of snow in many districts, it will be possible to get all the logs out in time for the spring trade. Spruce deals, therefore, are apt to be dearer.

The trouble between the lumbermen of British Columbia and the Canadian Pacific Railway Company and settlers in the North-West, seems to be in a fair way towards amicable settlement. Efforts had been made by the lumbermen to obtain an increase in tariff duties against lumber from the United States, but the Dominion Government showed itself adverse to such a plan, on the ground that it would be a grave disadvantage to consumers to have to pay more for their building materials by reason of such a duty. Representatives of the three parties mainly concerned, however, have since come together, and it is understood that the lumbermen will make a reduction of $1 per thousand all round, provided the C.P.R. reduce their freight rates to 38c. per hundred. The latter also will give up its reported intention to set up mills on its own account.

Reports from Great Britain speak of a brighter outlook for Canadian woods. Prices are firmer, one lot of Quebec spruce deals being reported sold at 5 per cent. over previous recent transactions. Some concern, however, is felt lest the increased prices demanded by sellers may restrict business and bring back former conditions.

BUSINESS WITH AUSTRALIA.

Canada's business with Australia ought to grow, but growth is slow. A perfect understanding of each other's methods has not been reached yet. And indeed we cannot help thinking that Canada does not stand well in the eyes of Australians in respect of prompt shipments and strict observance of shipping instructions. A new topic for us is the New Zealand preferential tariff. This is commented upon by the letter of our Sydney correspondent, dated 1st February. He tells us that the Canadian Commissioner in New South Wales, Mr. Larke, estimates that this tariff gives a preference of ten to twenty per cent. on a million and a half dollars' worth of goods now imported from foreign countries that should come from Canada. In some articles, such as paper, there are contracts in existence, he says, made prior to the 16th November, which are not affected by the tariff, but in most of the lines of merchandise indicated trade is open now. These lines are bicycles, carriages, and carts, fancy goods, furniture, glassware, hardware, lamps and lanterns, paper hangings, printing paper, wrapping paper, pumps, gas and oil engines, boots and shoes, rubber and leather, sail cloth and duck, surgical and dental instruments.

It is important for our exporters to remember that in order that the advantage of the tariff may be secured, certain conditions must be observed by Canadians. For example, it is essential that all British and

foreign goods must be invoiced and packed separately. That these packages shall not contain other goods than appear in the invoice; for if any other goods are found they will be forfeited. Again, full duty will be charged on goods unless each invoice bears a declaration that they are of Canadian product. Our correspondent gives the text of this necessary declaration.

There is in New Zealand some enquiry for Canadian goods, but it is not large as yet. The general condition of business in that state is very fair; the islands have had a prosperous year in 1903, and are pleased with the promise of 1904. It would be well for Canadian manufacturers to take advantage of a promising opening.

In Australia business generally has not revived as rapidly as anticipated. True, the full returns for wool and wheat have not been yet received, but still enough has come in to have made money easier and orders brisker than they appear to be. As a matter of fact, we are told, there are in New South Wales more men out of employment and more disquieting rumors of probable failures than during the height of the drought. The Government is unable to borrow to any great extent and some thousands of men directly and indirectly paid out of loan funds have been discharged. Further particulars may be found in our Sydney letter. Some of the large iron works are closed and others have discharged nearly all their men.

CHARACTER IN CREDIT.

At a gathering of credit supervisors of Missouri, not long ago, an address on the value of character as an element of credit was delivered by Rev. Wm. Carter, of Kansas City. Among other things, the speaker said he knew that credit men, because of their new organization, are apt to think that they have struck a new idea, a modern invention, in the establishment of a Credit Man's Association founded thus upon character in business and society. But that notion, and the idea that this same character, or credit that is founded upon it, is one of the forms of wealth, are ideas as old as the hills, I was going to say, as old, at any rate, as old Demosthenes and he lived quite awhile ago! In his oration against Leptines he says: "There being two kinds of wealth, money and general credit, the greater is credit and—we have it!" So apparently they had a Credit Men's Association in Athens at that time with, perhaps, old Demosthenes himself as the president.

Daniel De Foe is known to most of us only as the writer of Robinson Crusoe, but he also was a credit man in his day, and also held to this same theory that character and credit make capital and wealth, for in a book of his entitled: "The Complete English Tradesman," he says: "Credit is so much a tradesman's blessing that it is the choicest ware in which he deals. He cannot be too chary of it when he has it, nor buy it too dear when he wants it. It is a stock to his warehouse. It is current money in his cash box."

Character is the one permanent abiding element that gives value to a man, stability to society and trust and confidence and prosperity to business everywhere. Horace Greeley, hard-headed business man that he was, struck the key-note of it all when he cried in that dying sentiment of his: "Fame is a vapor, popularity an accident, riches take wings, only one thing endures —that is character."

"Character," says Emerson, that sage of American philosophy, "is more than intellect. Goodness outshines genius, even as the sun makes the electric arc to cast its shadow;" while England's old blind poet, Milton, says: "There is nothing that makes men rich but that which they carry inside of them. Wealth is of the heart, not of the hand."

It is something, therefore, for a man to be adjudged worthy of credit, says the clergyman, emphasizing De Foe. This brings us to notice the modern measurers of credit, such as the mercantile agencies of Dun & Co., and Bradstreet. We received last week from the last-named of these the pamphlet: "A Record, not a Prospectus," which they issue every year. It is here remarked of 1903 that the year was one of strain; but its results indicate that the small trader, even in this era of combines and trusts, shows fewer failures among his class than for several years. The liabilities of failed traders for the year, $154,369,000, as compared with $105,489,000, in 1902, show the largest failure loss since 1897. The assets were 54.5 per cent. of the liabilities, the largest percentage since 1896. The fact is the *large failures* account for the increase of liabilities. We should remember that the number in business is being constantly augmented, and yet there were fewer failures in 1903 than in either of the three preceding years. It is found that of the 1,272,909 individuals, firms or corporations in business in the United States in 1903, only 9,775, or less than 1 per cent., failed, as against larger proportions in 1902 and 1901. The number in business actually increased by 33,936, or 2.8 per cent., as against a gain of 37,000, or 3 per cent., in 1902, but despite this there was an actual decrease in the number of failures of 2 per cent. Comparisons with earlier years are even more satisfactory.

In aiming to get at the meaning of mercantile failure, as so many have wished to do, Bradstreets take pains to analyze, as far as can be done, the causes which lead to commercial disaster. Thus, their writer says: "While ultimate responsibility for business success or failure has been and is traceable largely to the individual himself, the play of circumstances, natural conditions and the working out of exceptional occurrences, prevent the statement being laid down as exact that a man is entirely and alone the architect of his own fortune. It is here that statistical research reveals the fact that while a large contributor to his own undoing, man himself is not entirely blamable for lack of success." The classification made by this company of the causes of failures is as follows:

(A)—Due to faults of those failing—(1) Incompetence (irrespective of other causes); (2) Inexperience (without other incompetence; (3) Lack of capital; (4) Unwise granting of credits; (5) Speculation (outside regular business); (6) Neglect of business (due to doubtful habits); (7) Personal extravagance; (8) Fraudulent disposition of property.

(B)—Not due to faults of those failing—(9) Specific conditions (disasters, etc.); (10) Failure of others (of apparently solvent debtors); (11) Special or undue competition.

From 77 to 79 per cent. of failures in different years come under the first head; that is, they are the traders' own fault, and about one-fourth are not his own fault. Lack of capital, or the effort to do too much business for the capital employed, accounts for nearly one-third of all failures. Incompetence for nearly one-fifth. Inexperience is a considerable cause —6 to 7 per cent.; fraudulent disposition a larger one, 10 per cent.; then come unwise credits, speculation, extravagance and neglect.

Some points which are assumed to be peculiar to Canadian traders are touched upon in the pamphlet. Thus:

"Lack of capital is the main compelling cause of Canadian failures. In 1903 this cause accounted for 69.6 per cent. of all Canadian casualties, as against 67 per cent. in 1902, 70.6 per cent. in 1901, and 68.5 per cent. in 1900. Incompetence, though less hurtful than in the United States, still accounts for 12.3 per cent. of all failures. Fraudulent disposition accounted for 6.5 per cent. of the failures of 1903, as against 5.5 per cent. in 1902. Failures due to the shortcomings of the trader himself made up 94.9 per cent. of the total, which is a very much larger proportion than that exhibited in the United States. Of the remaining 5 per cent. of failures, specific conditions, which seem to have smaller play than in the United States, accounted for 4.3 per cent. Of the liabilities in 1903, 57.4 per cent. were chargeable to lack of capital and 11.5 per cent. to incompetence, while speculation, which accounted for only 1 per cent. of the failures, produced 12.1 per cent. of the liabilities. Taken as a whole, it might be noted that Canada reported 12 per cent. decrease in failures and 2 per cent. decrease in liabilities from 1902."

A STRAIGHT TALK TO UNIONISTS.

If we could see ourselves as others see us, and conversely, if we could see our opponent's side of the case as clearly as he himself sees it, probably two-thirds of the quarrels between man and man, between class and class, would sink out of sight. If a few men were to arise with clear sight sufficient to see both faces of a puzzling problem, and with courage equal to telling both sides the truth of what they see, the progress of the world would be in good hands. Few men have the power thus to see below the mere surface indications of any great question, and fewer still have the requisite strength and hardihood to impress their views upon the multitude. Professor Eliot, of Harvard University, seems to be such a one.

A few days ago the Doctor addressed an audience composed of delegates of the Boston Central Labor Union, upon the subject of the perennial difficulties between employers and employees; moreover, we are told in the despatches that in spite of the fact that he dealt the methods of labor unions some hard blows, yet his remarks were listened to with almost breathless interest. So evidently did he see both sides of the question, and so manifestly free from mere party bias! First, he outlined in brief the ultimate result of combination, either on the side of employers or men:

"Now, the final outcome of the successful organization of a solid and complete employers' association in any trade or industry is the securing of a monopoly of the whole product of that trade or industry; and the final outcome of the successful organization and maintenance of a labor union is a monopoly of all the labor in the trade or industry which the union represents. Work out to perfection in practice the theory of the complete national employers' association in any trade, and of federated labor unions all over the country in the same trade, and we arrive at the successful establishment of two monopolies—one in the labor necessary for making the goods and the other in the goods themselves. Both propose to prevent competition, so that each may regulate prices within its own field. The workmen propose to get into the union all the laborers in their trade, so that they can control the daily wages, the number of hours or of pieces of work which shall be called a day, and the general conditions under which the work is done, the definition of a day's work being the basis of the demand for extra pay for overtime. The employers propose to fix the conditions under which the whole product of the industry shall be sold to the public."

This spirit of monopoly, Prof. Eliot went on to show, would be restricted only by the limit of the consuming power of the population; but this is reached sooner than many monopolists believe. It is also in lasting opposition to the ideal of democracy, which believes in free, unfettered competition. How, he asks, if trades-union rules regarding a certain limited daily output, on the part of each workman, are to be kept in force, can there be that necessary incentive to constant progress either for the whole industry or for the individual man? How can rising genius win its way against entrenched dullness? How can the American ideal of freedom from class and caste be retained, when the unionist ideal is to prevent some men's natural superiority in brain and industry, making itself felt against the slowness, idleness and inefficiency of the mass?

However, the speaker was not averse to combinations on either one side or the other for mutual defensive and progressive purposes, and so long as their methods were confined within legitimate bounds. What he most objected to was what he rightly called the stupidity and unfairness of boycotts, lock-outs and other such harmful shifts of the trades-unions. As to the plan of picketing, upon which some of the delegates asked an opinion, he was in unhesitating opposition. "Peaceful picketing," he cried; "there is no such thing and we all know it! Its object is to deter men from going to work during a strike, by persuasion if possible, next by intimidation, and then—and generally—by violence."

TO PROTECT INVESTORS.

This journal has on previous occasions pointed out the desirability of taking better precautions for the protection of investors in joint stock companies. The present Ontario acts on the subject may regulate the formation of such companies better in some respects than is the case in other countries, as Hon. Mr. Stratton intimates; but this does not preclude the fact that much yet remains to be done. This gentleman also says that it is impossible to make enactments that will protect people who will not do a little thinking for themselves. This is true of course; nobody should subscribe for stock until he has obtained full and reliable particulars of the enterprise into which he is putting his money. But the trouble is that many people, even of the presumably intelligent investing class, do this very thing, and the problem is how to make them see their danger—in other words, how to protect them against themselves.

We are glad to see, therefore, that the Legislature is likely to take the matter up in earnest. The other day, Mr. Hoyle introduced a bill into the Ontario House for the amendment of the Companies' Act. His idea apparently is to render it obligatory on the part of seekers of charters to make the general public acquainted with the full details of their schemes, and, with this in view, to cause to be stated in prospectuses exactly what contracts have been entered into by promoters, the number and value of the shares and bonds which may have been given to certain parties for other than a cash consideration, the estimated amount of expenditure, the interest possessed by directors in properties, which may be or have been taken up, and so forth. Mr. Hoyles' suggestion will be seen to be based largely upon the acts in force in Great Britain, to embody which with the present acts in force in this province would require the latters' entire reconstruction. This was looked upon by legislators as the weak spot of the proposition, and it was unfortunately shelved.

The probabilities are, however, that, now the attention of the House has been drawn forcibly to the matter of companies legislation, some much-needed improvements will be inaugurated in the near future. A suggestion made by Hon. Mr. Gibson, the Attorney-General, may have a good deal to recommend it; this was to the effect that there should be created in Ontario a body similar to the Local Government Board in England, or to the State Commission in Massachusetts, a board consisting of three or more experienced men whose duties should be to examine and supervise the provisions of all proposed corporations, public or private; also all issues of stocks or bonds, and agreements between municipalities and public utility-owners. Certainly, there is room for much improvement in all these respects.

BRITISH MILITARY REFORM.

Contrary to the opinion which has been expressed more than once in some quarters, the result of the British Government Committee's enquiry into War Office methods is to be a drastic and most far-reaching reform. The position of Commander-in-Chief of the Army is to be abolished, and in his place will be appointed an army council, on a somewhat similar plan to that existing for the administration of the Navy. There will also be an Inspector-General, whose duty will be to look after the efficiency of the forces for home defence. In order that there may be greater continuity in the plans for defence, to the present committee, which has this important branch of the military organism in charge, there will be appointed a secretary who shall hold office for five years, besides which, it is proposed to add two officers chosen by the Viceroy of India, and, if possible, representatives of the colonies. That the Commission recognizes the dangers to which Great Britain has been exposed by the cumbrous methods of the past, is evidenced by a clause in its report to the effect that it attaches special importance to the appointment to the council of military members not heretofore closely connected with existing methods, and who, therefore, are not likely to be embarrassed by traditions. In another place the report voices the complaint of the investigators that the War Office "has no thinking department." Many other observers have been impressed with the same belief.

IS VANCOUVER FORGETFUL?

Something that appeared a few days ago in a British Columbia paper has reminded us of the calamitous fate of Vancouver in 1886 and the appearance of the ruins. No one who ever saw that fire-swept young city in those days ought to forget the devastating force of a conflagration. Yet the lesson of that day, and the more recent lessons afforded by Baltimore and Rochester do not appear to warn the Vancouver authorities. Writing to the News-Advertiser last week, Mr. Henry Lye, who has had long experience as a fire insurance adjuster, says:

"One of the lessons deducible from recent great fires is that no building is fireproof when exposed to the fury of flames from wooden buildings of great size or covering considerable area. London, New York, Chicago, Boston, St. John's, Baltimore, all illustrate the danger of conflagrations, and surely Vancouver has had one such lesson already. Yet, in spite of history, newspaper warning and local experiences, a wooden building of immense size, designed to contain inflammable materials, is allowed to be built in the heart of the city, exposing all the apparently substantial buildings to unavoidable destruction if a fire occurs in dry weather, with such a wind as usually occurs in the dry season."

Human nature becomes forgetful—possibly grows callous—in the course of seventeen or eighteen years. How otherwise could it be that the surviving residents of fire-swept Vancouver should allow fire-inviting wooden structures to be put up in the midst of her handsome and substantial commercial quarter. What about the building restrictions of Vancouver; what about her fire limit by-laws. And does not the local fire underwriters' branch have something to say about such breaches of common prudence?

OUR ST. JOHN LETTER.

Wholesale merchants report that the February business was the poorest in many months. January was good, and merchants were greatly elated with the auspicious opening of the year's business, but the slump last month has brought something of a reaction. The heavy snowstorms that have prevailed, blocking the railroads and completely shutting up some of the branch lines, is the cause assigned for the changed conditions. It is understood that collections have been very slow. Now that March has come there should be a let up to the winter weather, and ere long branch lines that have been closed for weeks will be open again. Then trade should boom.

The town of Newcastle voted on Monday unanimously to grant concessions to the Messrs. Anderson, of England, who are prepared to establish a furniture factory in that town. The promoters have purchased a site and made other preparations to begin business. Not a single vote was recorded against the proposal to grant special inducements to them. The Messrs. Anderson are the same who recently talked of settling near Fredericton, but apparently Newcastle has been found a more desirable centre.

In St. John the year 1903 was a particularly busy one in the building trades. Many new buildings were erected, old ones remodelled, and other work carried out. The outlook now is that 1904 will be quite a busy one in this direction. Some of the most important works projected in 1903 will be carried to completion this year. The Street Railway Company, which began to extend the line to West St. John, Fairville and other points, will complete the work this year. The Dominion Coal Company has given orders that the wharf and coal pocket planned last year shall be built at once. The Y.M.C.A will begin the erection of their new building, and the Union Club addition will also be made. These are all works previously considered. In addition, there are some important new works. The Canadian Government has plans ready for a drill hall that will entail an expenditure of $100,000 or more, and for a hospital on the west side, in which disease

immigrants are to be cared for until such time as the port physicians permit them to proceed to their destinations. Extensive alterations are planned in the Park Hotel, the new premises of the McLaughlin Carriage Company and in other buildings. Altogether the building outlook now is excellent, and further new work is sure to develop as spring opens.

Last year the Canadian Pacific Railway Company spent a large sum of money at St. Andrew's improving the Algonquin Hotel and fitting the place as a first class summer resort. It is now rumored that additional expenditures are to be made there this year, and that these will include the erection of a number of cottages on land near the hotel. The Canadian Pacific plans are to make St. Andrew's one of the greatest summer resorts on the Atlantic coast.

Female school teachers in St. John have presented the board of trustees with a demand for an increase of wages. They have submitted a scale of prices that they think should prevail, and the trustees have the matter under consideration. The increases if granted will mean an addition of over $5,000 in the yearly expenses of the St. John city schools.

St. John bakers have not yet made any increase in the price of bread consequent upon rise in flour, but it is expected before long. A two-pound loaf is the standard here, and the price is six cents.

The winter export business through the port of St. John is increasing by leaps and bounds. The shipments up to the first of March have been valued at $10,822,225, while last year up to the same period the shipments were valued at but $8,448,988, an increase for this winter of $2,373,237. The business is limited because of the lack of wharf accommodation, and apparently no improvements can now be made for next winter. It was thought that the city and the C.P.R. would complete an agreement under which four new berths could be built for next season, but there have been delays, and the work while it will go on cannot be completed before the winter of 1905.

* * *

Saint John, N.B., 2nd March, 1904.

OUR AUSTRALIAN LETTER.

I send you a list of the goods in respect of which a preference is given to Canada by the New Zealand tariff. It is estimated by the Canadian Commission here that this tariff grants a preference of 10 or 20 per cent. on £300,000 worth of goods which are now imported from foreign countries by New Zealanders. In order that the advantage of the New Zealand tariff may be secured the following conditions must be observed:

1. All British and foreign goods must be invoiced and packed separately.

2. Such packages shall not contain other goods than those set forth in the invoice, and if any other goods shall be found in any such package they shall be forfeited.

3. Full foreign duty will be payable on British goods unless each invoice has endorsed thereon the following declaration:

I (full name), of the firm of (name of firm) do hereby certify that this invoice, amounting to £ for goods exported to New Zealand on account of (name of person or firm to whom invoiced) is true and correct, and that the goods specified therein are bona fide the produce or manufacture of Canada.

Signature.

Dated at.....this.....day of.....190

By British goods are meant the goods of a British possession as well as those of the British Isles.

Private enterprise in New South Wales has been deadened by the Socialistic policy of the labor party, which is such a power in the State. It is not so much the Acts put on the statute books as the spirit displayed. Business in the meantime cannot be called active.

The Compulsory Arbitration Act, from which the sanguine hoped for so much, has, it is to be feared, broken down. The demands made upon the Act completely overwhelmed it, and to-day this measure has two years' work before it, with little prospect of catching up. No sooner is a decision arrived at than another appeal is made over the working of the award.

The most serious blow came a few days ago. The coal miners at Teralba appealed to the court to rule that they should be paid by the ton of coal won and not by the yard as heretofore, and that the rate should be a sliding scale based on the selling price of coal for the previous six months. The court granted their request, and the mine owners put in the requisite weighing machinery, and an auditor was appointed to investigate the books and report upon the average selling price of coal. It turned out to be less than expected, and so the hewing rate of the miners went down instead of going up. They promptly struck, refusing to pay any attention to the ruling of the court, and the court has decided that it is helpless in the matter. Where can there be the power in a free state to compel free men to work unless they choose? The employer must obey the law or shut up his business and go into bankruptcy, but the employee obeys it when it suits him. It is no marvel that capital is frightened in Australia, and as a consequence men are out of work and business poor. Of course, things will right themselves by-and-by, but what is going to happen in the meantime is troubling thoughtful men.

The Royal Commission to enquire into the charge that the Hon. Dr. Montague, of Canada, had attempted to bribe a member or members of the Victorian Parliament met on the 14th December. Dr. Montague had declared by cable the charges to be utterly untrue, and that they were malicious inventions of a man dismissed from the Foresters on his (Montague's) report. Col. McGillivray, supreme secretary of the Order of Foresters, then in this country, put in an affidavit that he had made enquiries at the Melbourne office of the order, and could find nothing material to support the charge, and that he knew Dr. Montague as a private citizen and public man, and he believed that the charges could not be and were not true. The Government decided to go on with the examination of witnesses, but at the request of counsel for Dr. Montague and the Foresters the court adjourned to 1st March. The chief witness besides the members interested is the Rev. John McNair, formerly a Presbyterian minister in an Eastern Ontario town.

F. W.

Sydney, N.S.W., 1st Feb., 1904.

ADVANCE IN RUBBERS.

On March 1st a new schedule of jobbers' selling terms for rubbers came into force for all parts of Canada east of Port Arthur. West of that point the new schedule will take effect on the 21st inst. The trade discount is 20 per cent., with an early order discount of 5 per cent. on all specific detailed orders placed before June 1st next and shipped before November 1st. A bonus for retailers is provided for on the basis of a percentage, varying from 1 to 6 per cent., according to the volume of purchases. The advance, roughly speaking, is about 10 per cent., and is due to several causes. Chief among them, of course, is the increased price of raw material. Crude rubber, for example, advanced from 74c. per pound in August, 1902, to $1.14 in October, 1903, and it is upon the average cost of this substance during the year that values are largely based. Cotton, too, which also forms an important item in the manufacture of rubbers, has made prodigious increases in price. Besides these the cost of cartage and of box material and labor have likewise gone up. The advances in rubbers are about in line with those recently made in the United States.

MOTOR MANUFACTURE.

The sort of motor car or carriage we in Canada are familiar with is the passenger motor. And even in the United States the freight motor has not yet seemed to come into general favor. In Europe it is different, for it has been found that motor traction costs scarcely more than half as compared with horse-wagons. An English authority says there is nothing so likely to assist agriculture and make fruit growing and dairy farming profitable as the general use of motors carrying, say, ten tons with trailer to the railway stations. The saving of time and the cost of horses will make

an enormous difference to farmers. A lecturer before the London Chamber of Commerce last month said there are now one hundred and sixteen motor makers in the United Kingdom, and yet last year the imports of motors to England amounted to £768,000. France leads in the new industry and is exporting at the rate of £1,000,000 a year. When the mechanical difficulties are overcome, there is certain to be a rush everywhere for motors for heavy goods traffic. Such, at any rate, is the opinion of the lecturer, Mr. S. C. Rolls, who is an expert in the motor business. He thinks motor manufacture likely to prove one of the most important aids to agricultural and industrial development, which the new century promises us.

DIGBY BOARD OF TRADE.

The annual meeting of the Digby Board of Trade was held on the 23rd ult. The report of the president, Mr. H. B. Short, who is now Mayor of the place, showed the volume of trade in those lines in which the town was chiefly interested to be as follows: Dry fish, $70,000; finnan haddies, $75,000; lobsters, $35,000; other fish and oils, $15,000; lumber, $42,000, a total of $237,000. In addition to this, careful computation had shown the summer visitors to this pretty Nova Scotia resort to have left in the town, directly and indirectly, $125,000. The place is year by year becoming more popular with the better class of Canadian and United States people who spend their summers in watering places. And any one who has been there will not wonder at it.

The officers of the board elected for the year were: Dr. DuVernet, president; W. E. VanBlarcom, vice-president; C. Jameson (fourth year), secretary-treasurer; and H. L. Dennison, David Sproul, O. S. Dunham, J. A. Irving, George H. Peters, Howard Anderson, W. Fairweather, Orbin Sproule, F. F. L. Jenner and H. B. Short, members of the council.

The secretary of the board, Mr. Clarence Jameson, who sends us the figures and names given above, authorizes us to say that the town of Digby is prepared to offer special inducements to any concern desiring to establish an industry at that place. As the harbor of Digby, on an inlet of the Bay of Fundy, is open all the year round, and is the natural outlet for Western Nova Scotia, it is evident, as the January number of Industrial Canada pointed out, that the location is an excellent one for manufacturers.

PETERBOROUGH BOARD OF TRADE.

We have a letter from the secretary of the Peterborough Board of Trade informing us of the holding of their annual meeting on Monday evening last. The following officers were duly elected for the ensuing year: President, Mr. D. Hughes-Charles (re-elected); secretary, Mr. T. Q. Quartermaine (re-elected).

"TRUST FINANCE."

The evolution of mammoth combinations of capital is the most interesting feature of recent financial and industrial history, and a scientific study of how they have come about, of their basis and probable course, is calculated to appeal to many people. Such a book, entitled "Trust Finance," we have just received from the Book Supply Company, of Toronto. The author, Dr. Meade, begins by tracing the genesis of the trust from the formation of the American Sugar Refining Company, which, however, may, perhaps, be described as a sort of advance agent, the real movement not having begun in earnest until 1898. For the total capital stock of all manufacturing consolidations organized between 1860 and 1893 was less than $1,000,000,000, while from 1898 to 1900, inclusive, the number of large combinations was no less than a hundred and forty-nine, with an aggregate value of $3,578,650,000. Hardly an industry escaped, though, it may be mentioned at this point, the movement distinctly lost its momentum a year or so ago, and may be described to-day as almost dead. It appears likely that the desire, on the part of large manufacturing concerns, to join forces so as to reduce expenses and enhance profits had its origin in such a time of depression as 1894-98, when excessive competition and shortening consumptive demand led to frequent bankruptcy, and when the appearance at least of monopoly seemed the only salvation in sight. The gradual unfolding of this idea, from the first forming of a "pool" to equalize prices and to gain various concessions from transportation companies, etc., through various kinds of trusts, which were, one after the other, declared illegal by many of the State Legislatures of the neighboring Union, up to the final "holding company" or trust proper of New Jersey, forms a very interesting section of the book under notice. The use and office of the much abused "professional promoter," too, are very logically described. There is in the United States and elsewhere a very generally held opinion that a large number of speculative securities, the product of the last few years, possess no sufficient guarantee of earning power to maintain their values under the ordinary fluctuations of business prosperity. This book examines thoroughly the grounds of this wide-spread opinion, and, in doing so, discusses the methods of trust management as well as the basis and justification of their capitalization. Finally, an attempt is made to set forth the consequences likely to ensue to the public from the growth of this form of financial enterprise, and to specify measures for regulation in the event of such regulation becoming necessary. The book is an exhaustive study of the subject upon which it treats; and further, we may say, is clearly written, well bound and printed. [Trust Finance, by Dr. Edward S. Meade, of the University of Pennsylvania. Price, $1.25 net.]

THE SOO COMPANIES.

At length a successful issue appears likely to follow the constant efforts which have been made for months past to reinstate the Consolidated Lake Superior industries on a working basis. The Reorganization Committee has had many obstacles to contend against, but it is understood that the last of these has now been overcome, and that Speyer & Co. have assisted to this end to the best of their ability. Another powerful factor in the present bright aspect for Sault Ste. Marie is the proposal of the Ontario Government to guarantee a loan of $2,000,000 to the new company, although the former have come in for a good deal of criticism for such action. The reorganized company will be capitalized as follows: Capital stock, $40,000,000 (exchanged for consolidated stock in the proportion of one share new stock for two of the preferred and four of the common stock of the consolidated); income bonds, $3,000,000 (each shareholder participating must pay a contribution of $3 per share for each share exchanged, but for the cash thus paid in the shareholder receives, in addition to his stock, an equivalent amount in income bonds); first mortgage 5 per cent. bonds, $10,000,000 (sold to the underwriters and shareholders at 70, with a stock bonus of 30 per cent.) The cash working capital upon which the company proposes to start operations is $1,000,000, while there will be in the treasury $2,000,000. All debts will be funded, with annual fixed charges of $600,000. It is the intention to start up the blast furnaces and rail mill with a capacity of 500 tons daily, and it is believed there will be sufficient orders to keep them running on full time from the start.

CANADIAN LIFE INSURANCE OFFICERS' ASSOCIATION.

The regular quarterly meeting of the Canadian Life Insurance Officers' Association was held in the rooms of the Insurance Institute, Toronto, on Thursday, February 18th. The members present were: Messrs. David Dexter (Federal), in the chair; J. K. Macdonald (Confederation), J. Milne (Northern), T. Hilliard (Dominion), G. B. Woods (Continental), T. Bradshaw (Imperial), W. C. Macdonald (Confederation), R. H. Matson (National), A. McDougald (Pelican and British Empire), E. E. Reid (London), R. Junkin (Manufacturers), P. H. C. Papps (Manufacturers), C. H. Fuller (Continental). Letters of regret at inability to be present were received from

Messrs. Geo. Wegenast (Mutual), L. Goldman (North American), D. M. McGoun (Standard), B. Hal Brown (London and Lancashire), D. Burke (Royal Victoria), F. Sanderson (Canada).

Several matters of interest were discussed, including legislation and proposed taxation at different points. The subject of comparative literature, i.e., circulars and leaflets containing comparisons of one life company with another received a good deal of attention. It is expected that the practice already adopted by a number of the Canadian companies of declining to publish or circulate comparative literature of any description will before long be made general. The effect of this would be to elevate the insurance business to a higher plane.

The association has lately been successful in securing an amendment to the Nova Scotia Insurance Act of 1903, by which the following undesirable clause was repealed:

"Provided further, that the age of the insured shall in all cases be determined within three years from the time the policy of insurance is effected, otherwise the age mentioned in such policy shall be conclusive proof of such age."

BELL TELEPHONE MEETING.

At the annual meeting of the Bell Telephone Company held last week in Montreal the announcement was made that an addition of $2,000,000 would shortly be made to the capital stock. These shares will be issued to shareholders at $125, and against the expressed objection that they should be issued to shareholders at par it was argued that as banks can find buyers of shares at a premium, before a dollar had been earned, then Bell Telephone stock, which is earning 8 per cent. per annum, should also certainly be worth a premium. Mr. C. F. Sise, in referring briefly to the great progress made by the company, spoke of the large additions to office buildings which they had found necessary in Montreal and Winnipeg in spite of the fact that at the time of construction they had been deemed sufficient for years to come. The company's new building in the east end of Montreal is expected to be ready for occupation by May 1st. During the year 1903 the number of new subscribers added to the company's list was 8,691, the total number of instruments now rented being 57,172. The number of exchanges maintained is 421, with 672 agencies. Last year 4,121 miles of wire was added to the long distance system, of which 1,738 was in the Ontario department, 1,260 in the eastern and 1,123 in the north-western. Altogether the long-distance system of the Bell Company comprises 30,969 miles of wire. The paid-up capital of this extensive concern is now $6,000,000. The receipts for 1903 aggregated $2,522,275, the expenses were $1,940,123 (of which we note $21,441 was for legal purposes), leaving a net revenue for the year of $582,151, of which $467,510 was paid out in dividends; carried to insurance reserve fund was $24,562; to accident reserve fund, $22,978, and to contingent fund, $50,000, leaving $40,536 to be brought forward to 1904.

PETROLEA AND MANUFACTURES.

The secretary of the Board of Trade of the town of Petrolea, having in view the further growth of that place and its development in the direction of manufactures, favors us with some information with the progress Petrolea has already made, and the desire of her business men to further encourage manufactures. He says: "We have established a creamery, a packing company and a waggon works here within the last two years, but want more. We have Michigan Central Railway and Grand Trunk Railway connections. Can you recommend a source which will bring me in touch with new enterprises, and can you give me a list of Canadian Boards of Trade? I wish to get into communication with parties looking for location for manufacturing purposes, and shall be very glad if you will direct anyone you may hear of to me."

We have sent Mr. Chatterton a list of Boards of Trade, and shall be glad if we can put him in touch with likely industries.

THE STATE LIFE OF INDIANA COMING TO CANADA.

The latest life insurance company from the United States to enter the Canadian field is the State Life Insurance Company, whose home office is at Indianapolis, Indiana. Since the organization of this company in 1895, the growth of its business, it is claimed, exceeded that of any other purely mutual old line company ever organized in America at the end of its eighth year. After the first twelve months' business, it had $3,548,500 of risks in force, while at the end of 1903 (the ninth year), the insurance in force stood at $49,713,796. This company is now doing business in thirty-seven States of the American Union.

The State Life does business under the Indiana Compulsory Legal Reserve Law of 1899, which declares that the auditor of the State is required to ascertain annually the reserve or net cash value of all outstanding policies, and the company must keep in his office, in stipulated high-class securities, an amount equal to such reserve. License has been issued to the company to transact business in Canada, and we are told that in a short time the necessary organization will be completed. At present the following gentlemen of the executive staff are at the King Edward Hotel, looking after the interests of the company: Messrs. P. L. Sweeney, F. M. Raiff, L. W. Moody and L. F. Ashton.

AGRICULTURAL SAVINGS AND LOAN COMPANY.

Another satisfactory year's business was shown by the management of this company. The volume of transactions is much the same, and net profits warranted the addition of $13,000 to reserve after paying the customary dividend. The funds of the company have been kept fully employed, the report tells us, and payments of interest well met. The president announced that rates for loans had been slightly increased. The aggregate of mortgage loans now amounts to $2,349,547, as compared with $2,341,436 in the preceding report. An increase is observable in sterling debentures, favorable terms having presumably been made in the Old Country for them. Indeed, the lessened amount set aside for interest on debentures would seem to indicate this. Currency debentures, on the other hand, show a slight decline. As to deposits, they are nearly as great as before, $608,000 being the amount; and it is the part of prudence in this regard, doubtless, that induces the company to keep so large a sum as $92,000 in cash and in bank. The paid capital of the company is now $630,200, the reserve $235,000, and the assets $2,485,000.

DOMINION PERMANENT LOAN COMPANY.

In its thirteenth annual report this company shows a decrease in liabilities from $3,391,217 to $3,304,407 during the twelve months. But the decrease is in obligations to the public, the debentures, deposits and accrued interest amounting now to $1,874,974, as against $1,986,211 a year ago, while the shareholders' capital and accumulations are increased to $1,429,432. Correspondingly with the liabilities the assets are reduced by $86,811 and now stand at $3,304,406. The report states that the company's funds have been profitably employed, enough having been earned to pay dividend, to add a larger sum to reserve than in the previous year, and to carry $18,547 forward.

MILLERS' AND MANUFACTURERS' INSURANCE COMPANY.

The success of this company in affording protection to its policyholders at reasonable rates for eighteen years has been marked. But it has not only done this, but now has $88,000 at credit in its profit and loss account, which is equal to 4.24 per cent. of its aggregate of risks in force, a remarkable showing, when compared with the like ratio for all the Canadian companies, as given in the Blue Book. The amount of bonus dividend declared to policyholders in that period was $47,560.

The Millers' and Manufacturers' Company has done a good work in the direction of educating its patrons to the value of order and cleanliness in mill and factory, to the importance of fire buckets and other simple but *always ready* means of fire-fighting, to the necessity of proper construction of premises. Its record of losses and expenses is worthy of special notice. During its whole career the average loss and expense ratio combined amounted to only 70.46 per cent. This shows what can be done by careful underwriters, such as Scott & Walmsley, the managers of this company, have proved themselves to be.

A striking statement was made by the vice-president at the annual meeting, namely, that while the total sum paid by this company for reinsurance from 1885 to 1903 had been $259,452, all it received back for claims under that reinsurance was $148,010, leaving the large sum of $111,442 in shape of profit for the reinsuring companies.

NATIONAL PORTLAND CEMENT CO., LIMITED.

The operations of this company for the year 1903 are set forth in the report and financial statement which we print to-day. These documents demonstrate that while the company has made a very large outlay on account of property and plant, and has now a complete premises at Durham, its output has been so limited that the profit thereon was insufficient to yield a dividend or even show a balance on the right side. This would not have been wonderful in any case, for it takes months after a cement mill begins to produce before it can venture to run at its full capacity, so many tests need to be applied and so much care to be taken with both machinery and material. But this mill suffered in its first year, as the report states, from a number of drawbacks; the dredge used for getting marl out of the lake proved defective, costing months of time and a lot of money to replace it; the coal strike hampered the works by lack of fuel; a lightning stroke caused the shutting down of the plant for weeks; and finally the terrible snow drifts of the present winter deprived them of marl and prevented deliveries of cement by the railways. The gross earnings—there was $234,000 worth of cement sold, say 100,000 barrels or over—were $33,631, but the expenses were $43,061, showing a loss on the year's operations of $9,430. We understand that the brand of cement turned out is of the very best, and the demand such as to give great hopes of a successful year in 1904, if no mishaps supervene. The new board of directors is composed of A. F. McLaren, M.P.; J. W. Scott, of Listowel; Gilbert McKechnie, of Durham; W. F. Cowham, of Jackson, Mich.; S. G. McKay, of Woodstock; F. H. Whitton, of Hamilton, and Dr. A. E. Mallory, of Colborne.

TRADE OPPORTUNITIES.

In answer to several enquirers, who wished to know if publication of these Old Country enquiries has been abandoned, we explain that it was merely suspended for a few weeks while our columns were unusually crowded. The names of enquirers may be had by addressing this office and enclosing a stamp.

Canadian Government Office, London, 5th February.—A rope work in Scotland wants Canadian agent. Russia merchant wants addresses of Canadian dealers exporting frozen salmon and lard. Dutch soap maker would export to Canada. February 19th—London produce merchant wants Canadian eggs, butter, bacon, and cheese. Another wants agency for canned fruits. Ketchup and sauce makers want to push business in Canada. Man wants connection with exporters of Canadian fowls. Firm in France asks for houses in Canada selling hosiery.

Imperial Institute, Canadian Section, 5th February.—Makers of wall paper and fabrics wish to hear from Canadian firms interested. Firm in Belfast would represent on commission Canadian furniture exporter. Makers of high-class confectionery and chocolate would appoint agents in Canada. February 12th—Firm of London agents ask offers from Canadian shippers in provision trade. Company making ochres, oxides and colors, wishes to hear from Canadian importers. Makers and shippers of oil and grease wish to share in Canadian trade. Makers of gun and rifle cases and bags would arrange with Canadian firm to represent their interests.

The Canadian agent at Leeds, Mr. T. B. Jackson, has had two enquiries about Canadian office furniture, about cheese, butter and poultry, about coal dealers in the Dominion, and an export clothing firm asks for names of Canadian houses.

ANSWERS TO ENQUIRERS.

Viator, Winnipeg.—What you say of the dangers and disasters of speculation is very true. But we do not always blame enough the foolish speculator, when we are blaming the bucket-shop man or the keeper of any other kind of a gambling shop. True, these men offer facilities for folk to gamble; but if the public were not already disposed or determined to gamble, such establishments could not make a living. An Episcopal bishop, in Vermont, boiled down the objections to gambling into the following five: First—Its danger on account of the excitement that belongs to it. Second—The fact that it tends to discourage honest, sober, hardworking people who think that by gambling they can get rich more easily and quickly. Third—That it lowers and degrades what should be manly sports. Fourth—That it ignores responsibility for the trust of money committed to one. Fifth—That is is a violation in selfishness of the law of brotherly love.

R. M., Rossland.—On several occasions—notably in the Monetary Times of 26th December, 1902.

Bank Clerk, Sydney.—It is possible that something of the kind was the case, but we have not seen a record of it. In Parkman's "The Old Regime in Canada," page 294, *et seq.* in the Little, Brown & Co. edition of 1891, the intendant of that day (Meules), urged in 1690 that "The fisheries are our true mines, but the English of Boston (Les Bastonnais?) have got possession of those of Acadia, which belong to us, and we ought to prevent it." But, says Parkman, it was not prevented.

BANKING AND FINANCIAL ITEMS.

The Sovereign Bank has opened a branch at Mount Forest, Ont.

The nuisance of United States silver is not felt alone in Eastern Canada. In the territory of Alberta, it is perceived very clearly. The banks in Calgary had arranged some weeks ago to charge a discount on the uncurrent coin, but for some reason this was not done. Now, according to the Calgary Herald, the banks in Edmonton have got ahead of those in Calgary by refusing to take American silver except at a discount, and the rate of this discount is to be increased in a month to such an extent as to keep American silver out of the district. This may account for the complaints made by some Calgary retailers to the effect that the amount of American silver in circulation there is on the increase.

According to an Ottawa letter of Saturday last, the deputy Minister of Finance, Mr. J. M. Courtney, has gone to England to arrange for meeting Dominion 4 per cents falling due on April 1st and May 1st. The aggregate of these loans is close upon $20,000,000. This sum is reduced by sinking funds to the extent of six millions, leaving some $15,000,000 to be provided for. Whether this will be covered by a temporary loan will likely be determined when Mr. Courtney reaches the London market, the present conditions being not very favorable for loans of long term at low interest. The sum raised thirty years ago, $1,460,000, for the purchase of the North-West Territories, comes due on 1st April.

The Bank of Toronto has opened an east end branch in Toronto at the corner of Queen Street and Bolton Avenue, under the management of Mr. L. S. McMurray.

DOMINION COAL COMPANY.

The annual report of the Dominion Coal Company states that the output for 1903 was 3,079,563 tons, as against 3,161,325 tons in 1902. The former would, no doubt, have been considerably larger, had it not been for the serious fire at No. 1 mine. The net earnings last year amounted to $1,756,023, as compared with $2,154,955 in 1902, a falling off which is attributed to the increased cost of labor and of material, and to the closing down of No. 1 mine, and necessary working of other mines at an increased pressure. Out of the rental received from the Steel Company for the six months ending with the 30th of June, have been paid dividends for the first two quarters, at the rate of 8 per cent. per annum, amounting to $600,000, and out of the net earnings for the second six months of the year has been paid (on the 4th of January, 1904), a half-yearly dividend at the rate of 6 per cent. per annum, amounting to $450,000. The total output for the present year, it is expected, will exceed by a considerable quantity, that for the year just passed, and most of it has already been disposed of at a fair price. Since February, 1902, there has been an increase in the fixed liabilities of about $2,150,000. Against this is shown an increase in value of quick assets of about $450,000, or a net increase in liabilities of $1,700,000. In the fixed liabilities is included the sum of $2,380,000, which the Coal Company paid the Steel Company, in order to obtain immediate possession of the property with improvements.

DRY GOODS ITEMS.

The terrific snow storm of Monday last did not very much interfere, it would seem, with the millinery openings in Toronto, which started on that day. The S. F. McKinnon Company tell us that there must have been at least fifteen hundred visitors to their show-rooms on that day, most of them of the fair sex, who represented practically every part of the Dominion; and that the sales were even larger than usual. The assortment of hats, shapes, trimmings, flowers, feathers, laces, etc., shown by this well-known house is extremely varied and pretty.

As stated in our millinery article, lace is likely to retain fully its leading position during the coming season. It is of interest, therefore, to learn that according to the views of an expert, the predominating designs are to be all kinds of ball effects, macrames, both for millinery and dressmaking, d'Alencons and wood fibres, both real and imitation. Round hole vals, allovers, yaks and torchons, while taking a second place, will also be popular.

For some days past there have been persistent rumors to the effect that an American syndicate was arranging to buy up the Canadian peroxaline (or celluloid factories, including, so said some reports, several photographic supply houses.) The report was exaggerated, however. So far as we know what is going to happen is nothing more than the reorganization of a Toronto celluloid collar and cuff concern into a joint stock company, with partial amalgamation with a New Jersey house of the same nature. A charter is being applied for for this purpose.

INSURANCE MATTERS.

A note appears in last week's issue of the Insurance and Finance Chronicle, stating in answer to an enquirer that there is no connection between the Union Life Assurance Co., of Toronto, and the North American Life Assurance Co., of that city, although both head offices are in the same building. "The North American Life Assurance Co. is not connected in any manner or form with the Union Life Assurance Co. Both are distinct and separate organizations; one not being dependent upon the other for its success or otherwise. The Union Life Assurance Co. was organized by Mr. H. Pollman Evans, its president and managing director. The North American Life does not hold one dollar of stock in it, nor are the officials of the last named company in any way interested financially in the affairs of the Union Life Assurance Co. The credit of the success of the Union Life will be due to the efforts of Mr. H. Pollman Evans and the officers associated with him."

—Attached to the inaugural address of Mayor Laporte, of Montreal, to which editorial reference is made to-day, were reports, showing the work accomplished by civic departments during the last two years. The following is from the statement of the Assessors' Board: "In the year 1893 the assessed valuation of the city was $165,020,135, and in 1903 it had increased to $201,044,670, an increase in ten years of 22 per cent."

—An Associated Press dispatch from Berlin says that success has at length rewarded the efforts which have been made during the last year or so to organize a steel trust in Germany. Twenty-six of the largest concerns are concerned, manufacturers with an output of a million tons or so yearly being excluded. The Krupp Company held out against the syndicate plan for a long time, but finally agreed. Two other large houses, however, are still out.

—It is just as well that Canadians should keep in mind what other colonies are doing to help the Mother Country by recalling the contribution of the Australian states to the navy. Some weeks ago the treasurer of the Commonwealth remitted £195,610 to London to cover Australia's contribution towards the maintenance of the auxiliary squadron in Federal waters. The new agreement came into force on August 28th. The annual contribution of each of the states is as under: New South Wales, £87,685; Victoria, £42,400; Queensland, £18,088; South Australia, £22,892; Western Australia, £13,464; Tasmania, £11,081. Total, £195,610.

—The Rhodes, Curry Company, Limited, of Amherst, N.S., held their annual meeting on the 23rd inst., and heard a highly satisfactory report. Some of its figures will show to what extensive proportions this manufacturing concern has grown. The total year's turn-over amounted to $2,700,000, an increase of $300,000 over the previous year's. The company paid out in wages $483,000, which is $100,000 more than the previous year. Their freights on materials imported amounted to $160,000. A dividend of 12 per cent. was declared. The following directors were elected: Mayor N. A. Rhodes, N. C. Curry, J. M. Townshend, K.C., Hon. T. R. Black, C. T. Hillson and J. C. Robertson, of St. John, N.B. The old officers were re-elected. Amherst has good reason to be proud of the Rhodes, Curry Company.

—Mr. C. M. Hays, general manager of the Grand Trunk Railway, has gone to England to present a modified agreement with regard to the Grand Trunk Pacific, as now proposed by the Dominion Government. According to the contract now proposed, the road will run to Moncton, as at first, but if any divergence be made to St. John, it will be in the nature of a branch line, with no connection either with the Grand Trunk or the Government. The choice as to Port Simpson or Butte Inlet will depend upon the report of the surveying parties. One important change is that whereby the Grand Trunk is given an extension of time in which to complete the western section. Five years was the period first named, but owing to the difficult nature of the route through the mountains, an addition of three years more is rendered necessary. In the construction of the mountain section the Government previously agreed to guarantee three-fourths of the cost of the road building, provided that it should not be more than $30,000 per mile. The change that has been made removes the $30,000 stipulation, and provides that the Government shall bear three-quarters of the cost even though it should exceed that figure, and is regarded as a more equitable arrangement to all concerned.

—At the Northwestern University, Chicago, the other day, a society was organized for the promotion of international arbitration. It will co-operate with the National Arbitration Committee, and with the English Parliamentary Committee of London. As president, it has elected Mr. Edmund J. James, president of the University.

Meetings.

AGRICULTURAL SAVINGS AND LOAN CO.

The thirty-second annual meeting of the shareholders of the Agricultural Savings and Loan Co. was held at the company's office, 109 Dundas Street, London, Ont., on Thursday, the 18th February, at 2 p.m.

The president, Mr. W. J. Reid, took the chair, and the manager, Mr. C. P. Butler, was requested to act as secretary.

The report of the directors for the year 1903 was then submitted, together with the financial statement:

REPORT.

The directors have much pleasure in presenting to the shareholders the thirty-second annual report of the business of the company.

The profits for the year (with $2,636.87 brought forward from last year) after providing for losses, expenses of management, and interest on deposit and debentures, amount to.....		$ 53,744 56
Which has been applied as follows:		
Half-yearly dividends at the rate of six per cent. per annum, with income tax, have been paid, amounting to..	$38,349 28	
Carried to reserve fund.....	13,000 00	
Balance at credit of profit and loss account	2,395 28	
		$ 53,744 56

The funds of the company have been fully employed during the year.

The payments of interest on mortgages have been well met, and the arrears are small.

The real estate held by the company amounts to $2,739.30, and the company have received an offer for same in excess of their claim against the property, and the sale will be carried out at an early date.

The sterling debentures show an increase of $36,257 for the year, which result is due to the efforts made by our agents at Edinburgh, Scotland: Messrs. Forbes, Dallas & Co.

The books, vouchers and securities of the company have received the usual careful audit by the company's auditors, as set forth in their certificate appended hereto.

All of which is respectfully submitted.

W. J. REID,
President.

London, January 30th, 1904.

C. P. BUTLER,
Manager.

We hereby certify that we have audited the accounts of the Agricultural Savings and Loan Company, of London, Ont., for the year ending December 31st, 1903, and find the same correct and in accordance with the above statements and the company's books. We have examined the cash and bank accounts and vouchers monthly, and have carefully checked every entry in the company's ledgers, and we have examined the company's securities, and find them in order.

GEORGE F. JEWELL, F.C.A.,
ANDREW DALE,
Auditors.

London, Ont., January 29th, 1904.

The president, Mr. W. J. Reid, on moving the adoption of the report, stated that it gave him great pleasure on being able again to present such a satisfactory report to the shareholders. Owing to the prevailing tightness of the money market the rates for loans had slightly increased. All loans had been carefully inspected before being made by the company's own inspector, and any doubtful loans which the company had on its books carefully re-inspected and ample provision made. The amounts the company had now invested in first mortgages on real estate came to $2,349,547, or nearly 95 per cent. of the total assets, which means that the security to debenture holders and depositors, who rank equally, is undoubted.

The assets of the company show an increase over the previous year, due to the increase of the sterling debentures.

Mr. Thomas McCormick, vice-president, seconded the motion, and the report was unanimously adopted.

The following gentlemen were re-elected directors: Messrs. W. J. Reid, Thomas McCormick, Thomas Beattie, T. H. Smallman and M. Masuret.

At a subsequent meeting of the directors, Mr. W. J. Reid was re-elected president, and Mr. Thomas McCormick vice-president.

The Dominion Permanent Loan Co.

THIRTEENTH ANNUAL REPORT.

The thirteenth annual meeting of the shareholders of the Dominion Permanent Loan Company was held at their offices, 12 King street west, on March 2nd. There was a good attendance of shareholders present.

The president, Hon. J. R. Stratton, presented the following report of directors and statement of the affairs of the company:—

Your directors herewith submit the thirteenth annual report of the Dominion Permanent Loan Company, together with a statement of the accounts for the twelve months ending the 31st December, 1903, duly certified to by the auditors, both as to correctness of the report and the satisfactory result of their inspection of the securities of the company.

Your directors are pleased to be able to state that active and profitable employment has been found for the funds of

the company during the past year, the demand for satisfactory loans being sufficient to call into requisition the available funds of the company.

The earnings of the past year have enabled the company to declare and pay dividends amounting to $68,788.31, and to permit to the transfer of $45,000 to the reserve fund of the company. After payment of such dividends and the addition to the reserve fund of $45,000, and the writing off of office premises and furniture, there remains to be placed to the credit of profit and loss the sum of $18,547.42.

Your directors are pleased to be in a position to congratulate the shareholders upon the gratifying results of the operations of the company during the past year, and have also pleasure in testifying to the generally efficient character of the services rendered by the officials, agents and staff of the company.

All of which is respectfully submitted.

AUDITORS' CERTIFICATE.

"We have audited the accounts of the Dominion Permanent Loan Company for twelve months ending December 31st, 1903, and find the transactions of that period accurately recorded in the books of the company, the receipts accounted for, the payments duly authorized and vouchers produced thereof. We certify to the correctness of the accompanying statement of assets and liabilities and profit and loss account. We have made a careful examination of the securities, checked the same with the Mortgage Register, and report everything satisfactory.

(Signed) O. M. HUDSON, } Chartered Accountants,
HARRY VIGEON, } Auditors.

On motion of Mr. Stratton, seconded by Mr. Karn, the above report was unanimously adopted.

The following directors were then re-elected: Hon. J. R. Stratton, president Trusts and Guarantee Company; D. W. Karn, president of the D. W. Karn Company, Woodstock; C. Kloepfer, manufacturer and director Traders' Bank, Toronto; T. P. Coffee and F. M. Holland, Toronto.

At a subsequent meeting of the directors, Hon. J. R. Stratton was re-elected president, and Mr. T .P. Coffee, vice-president.

MILLERS & MANUFACTURERS INSURANCE COMPANY.

(Stock and Mutual. Established 1885.)

The general annual meeting was held at the company's offices, 32 Church Street, Toronto, on Friday, February 26th, 1904. The president, Mr. Jas. Goldie, occupied the chair; the manager, Mr. Hugh Scott, acting as secretary.

REPORT.

Your directors beg to submit the nineteenth general statement of the business of the company, comprising revenue account and profit and loss account for the past year, and the balance sheet, showing the liabilities and assets on 31st December, 1903.

The total number of policies in force at the end of the year was 807, covering at risk, after deducting re-insurance, the sum of $2,090,997.

By referring to the profit and loss account, it will be seen that the sum at the debit of this account on the 31st December was $88,745.63, and after deducting re-insurance reserve, $17,035.88, the balance remaining to carry forward to the credit of this account was $71,709.75.

In view of the foregoing results a bonus dividend of ten per cent. has been declared to policyholders.

The retiring directors this year are: Jas. Goldie, Hugh Scott and Geo. Gillies.

All of which is respectfully submitted.

HUGH SCOTT, Managing Director and Sec'ty. JAS. GOLDIE, President.

J. ERNEST HOUNSOM,
Auditors.

Toronto, January 28th, 1904.

The report was adopted, the retiring directors unanimously re-elected, and at a subsequent meeting of the directors Jas. Goldie was re-elected president, and J. L. Spink, vice-president.

The board of directors is now constituted as follows: James Goldie, Guelph, president; J. L. Spink, Toronto, vice-president; Hugh Scott and Thos. Walmsley (managers); H. McCulloch, Galt; W. Bell, Guelph; Geo. Gillies, Toronto; W. Wilson, Toronto; A. Watts, Brantford.

FIRE INSURANCE EXCHANGE CORPORATION

(Stock and Mutual. Established 1886.)

The annual meeting was held at the offices of the corporation, 32 Church Street, Toronto, on Friday, 19th February, 1904. The president, Frederick Wyld, in the chair, the manager acting as secretary, when the following report was submitted:

REPORT.

Your directors beg to submit the seventeenth general statement of the business of the corporation, comprising revenue and profit and loss accounts for the past year, and the balance sheet, showing liabilities and assets on 31st December, 1903.

The number of policies in force at the close of the year was 891, covering, after deducting re-insurance, the sum of $2,065,723.

The revenue for the past year amounted to $37,044.62, and after deducting re-insurance and all expenses, including claims paid for fire losses, the balance remaining to carry over was $10,363.78.

By referring to the profit and loss account it will be seen that the surplus over all liabilities, including re-insurance reserve, amounts to $8,129.86.

The retiring directors this year are: Messrs. Frederick Wyld, Andrew Darling and R. W. Elliot.

All of which is respectfully submitted.

HUGH SCOTT, Manager and Secretary. FREDERICK WYLD, President.

NATIONAL PORTLAND CEMENT CO., LIMITED.

The annual meeting of the National Portland Cement Co., Limited, was held in Toronto on February 18th, 1904, in the Janes Building, corner King and Yonge Streets. The following directors were elected for the ensuing year and the following report was submitted and adopted: W. F. Cowham, Jackson, Mich.; A. F. MacLaren, M.P., Stratford, Ont.; Gilbert McKechnie, ex-M.P.P., Durham, Ont.; J. W. Scott, Listowel, Ont.; S. G. McKay, Woodstock, Ont.; F. H. Whitton, Hamilton, Ont.; Dr. A. E. Mallory, Colborne, Ont.

The following report was submitted:

REPORT.

We enclose herewith the annual report of the company for the year ending December 31, 1903, and, while we regret our inability to pay a dividend at this time, we might state that it is by reason of the following unavoidable circumstances:

1st. The extremely high price, scarcity and poor quality of coal, incident to the great coal strike in the United States, made it much more expensive to operate the mill than under normal conditions.

2nd. The most serious drawback experienced was the fact of our dredge being defective to such an extent that the necessary quantity of marl could not be supplied to the mill. After endeavoring unsuccessfully to remedy evils presented in the original dredge, new equipment of this kind had to be purchased, made and put in, necessitating a delay of about five or six months, and thus greatly curtailing the output of our plant for the year.

3rd. We had the further misfortune to have our plant struck by lightning, which occasioned a complete shut-down for several weeks, and consequent loss of output and revenue. Not only did we suffer thousands of dollars' loss from direct injury caused by lightning stroke, but the indirect loss of thousands of dollars through deprivation of output and consequent loss of revenue.

After the above difficulties were remedied and the mill was doing well, unprecedented storms, which have prevailed in Canada since last December, tied up all operations. That is to say, so intense was the cold, so deep was the snow for many weeks in succession that it was just as impossible for the dredge, the marl plant and the mill to be carried on as for the railways to run. Had it not been for these troubles, we, of course, could have made a very much better showing this year. The plant is now in good working order, and the prospects of the business are good.

Our cement has already been pronounced to be of the highest grade ever manufactured in Canada, and we would have sold double the quantity had we been able to manufacture it.

We do not doubt that at our next annual meeting the report given will be more satisfactory to all.

By order of the Board of directors.

—A young lady explained to a printer the difference in printing and publishing and in conclusion said: "Now you may print a kiss on my cheek, but you must not publish it." With t at he locked the fair form in his arms and went to press. —New England Grocer.

NAMES OF JAPAN'S WARSHIPS.

The Japanese carry, says Sir Edwin Arnold, ardent love of their own beautiful land out upon the sea, upon the flags and nameboards of their ships of war, making the mountains, the flowery plains, the blosoming groves, and the sparkling streams of Dai Nippon points of recollection, loyalty, and patriotism for the sailor, as well as for the soldier and the citizen. Broadly speaking, the big ships have been christened after great mountains, and their smaller sisters from some well-known natural feature of the country. The love of the Japanese for their country is impossible to exaggerate, yet it is characteristic that even the ships of the Island Empire testify by their names to that passionate pride and affection which the lowest subject of the Mikado feels in his native home. The Japanese always aim at correctness and utility, and they do not forget "What's in a name?" believing as they do that there is much in a name, especially in time of war.

First of all, it should be borne in mind that a ship of war and a ship of commerce have their own special words in the Japanese tongue. The latter class, from the big ocean liner of the Nippon Yusen Kaisha (the name of the great Pacific Japanese Steamship Co.) to the little trader or roofed-in junk going round the islands, bears the appellation of "Maru." This word, which is also used for a sword, and for the white and red flag of the Empire, properly meaning a "circle' is always tacked on to passenger or trading crafts, and so distinguishes them. The word for a man-of-war, from the superb "Mikasa" or "Fuji" up to the two new cruisers now about to enter Japanese waters, after their long and swift run from Genoa, is "Gun-Kan." But the Japanese drop the epithet, not saying or writing "Mikasa-Gun-Kan," but only "Mikasa." What does this signify? Simply, it is the name of a lofty and famous mountain near Nara, in the Japanese province of Yamato, and means "the Ridge of the Three Hats," its summit wearing the shape of the umbrella-like headpiece which pilgrims carry. . . . Take next the battleship Hatsuse. This, again, is taken from a locality much praised by poets, near Nara, and quite a household word among the people, as might be with us Skiddaw, or Helvellyn, or Snowdon in England. Next comes to mind the Asahi. That signifies "The Morning Sun," which luminary is at once an object universally praised and reverenced in Japan, as well as being the very symbol and national badge of the Empire. It is "Asahi" which figures in blazing scarlet of dawn on the standard of Dai Nippon. Shikishima is yet another synonym for the Land of the Rising Sun, frequently employed in its poetry. I need not give much explanation of the title bestowed on the sister battleship, Fuji, named after the beautiful and stately sacred mountain of Japan. Two cruisers have for their titles "Asawa" and "Tokiwa," the first in honor of an extinct volcano; the second, a word implying "unchangeable as an evergreen"; in fact, very much such an epithet as our "Inflexible." Among their sisters is one named "Nishin," which means progress, and "Kasuga," the name of a very ancient war junk.

Among the twelve of the "protected" class of cruisers you will observe Chitose, meaning a thousand years, a word of prosperity; Kasagi, a spot famous in Japanese history, belonging to Yamashiro; Takasago, a place much praised by poets for its exquisite scenery, on the sea coast, near Akashi; Akitsushima, a very notable appellation, for it signifies "the dragon fly,' which is, by its shape, the badge of the whole archipelago.

In the first great naval battle between China and Japan it was the vessel called Matsushima which sustained the brunt of that dreadful but glorious day. A single Chinese shell exploding in her citadel, almost under the feet of Rear-Admiral Ito, killed and wounded no less than fifty Japanese bluejackets, and yet after such blows the ship, splendidly handled, took the chief credit of the engagement. Sister to all the above is the Naniwa, another of the fighting line which, though small and to-day almost insignificant among her mightier consorts, covered herself with renown at the opening of the Chino-Japanese war. Commanded by that fearless, splendid sailor, Admiral Togo, who was then her captain, it was she who sank the Chinese transport Kowshing, after rescuing the European officers and engineers at whom the Chinese soldiers fired while attempting to escape by swimming. Naniwa is another name for the city of Osaka. Colloquially all these words have other meanings. Naniwa, for instance, translates our phrase, "What's up," but it also means Great Billows of the Sea; while Matsushima signifies the Island of Pine Trees.

MONTREAL MARKETS.

Montreal, 2nd March, 1904.

Ashes.—There is still a dearth of business on spot, and no supplies have come in of late. Prices continue high, owing to the scarcity of stock, and from $6.05 to to $6.10 for firsts; $5.70 to $5.75 for seconds, and $7 to $7.25 per cental could be readily realized.

Cements and Firebricks, etc.—Practically but little business has taken place in these lines for several weeks past. Some enquiries are reported for spring deliveries, but with no resulting orders as yet. Prices are expected to open at about the same figures as last spring.

Dairy Products.—Shipments of cheese via St. John and Portland, reported last week, were 26,286 boxes, and of butter, 711 packages. The cheese market has in no way improved. The British demand is very light, and though holders strive to "keep a stiff upper lip," it would be hard to obtain anything over 10c. per lb. for best makes. For butter there is very fair local demand, with comparative small receipts at the moment, but with better country roads supplies are expected to increase. Creamery makes are quoted from 20 to 20½c. to the grocery trade; dairy rolls 16 to 17c. per pound.

Furs.—Business in raw furs continues dull. Receipts of native pelts are small owing to the deep snows and bad roads in the interior, and large lots of Southern coon, bought in St. Louis a month ago, are still undelivered. The London March sales, the largest of the year, are scheduled as follows: Hudson Bay Co.'s sales, from March 14th to 17th; Lampsen & Co.'s sales from 14th to 25th. We repeat quotations for prime pelts as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No 1. choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; Wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1, dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Dry Goods.—It was feared that the bad stormy weather of the 1st of March would affect attendance at the spring millinery openings, but the trade report visiting customers quite as numerous as last year from Eastern Ontario, from this Province, and as far east as Dalhousie and other New Brunswick points. Travellers' letters still speak of considerable inconvenience and delays in covering their routes, and orders are not so large as at this time a year ago. Probably country dealers are inspired to buy carefully, as it is reported that a good many goods will be carried over, owing to the unfavorable trading conditions of this winter. In values of textiles there is nothing specially new, except that the Russo-Japan war may effect supplies of Russian hemp, and a further stiffening in linens is looked for.

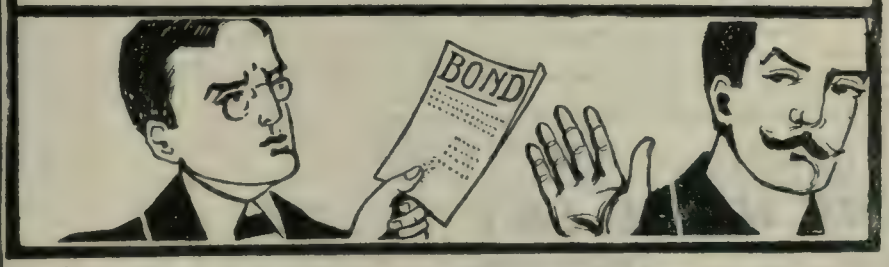
Groceries.—Sugars are decidedly stronger, and a further advance of 5 cents a cental has been established in all grades of refined, making the present factory quotation for standard granulated, in barrels, $4.05, with yellows ranging from $3.45 to $3.85. A very active market is reported in New York, with a further advance there yesterday, on which, however, local refiners have not yet acted. Molasses is easy, with the general jobbing quotations 34c. by the single puncheon, and 36 and 37c. in barrels, and half-barrels. A late cable quotation from the island is 19½c., equal to about 26½c. laid down here. Dried fruits are in little request. Canned very firm in price. Tea importers report quite a fair demand from jobbers, and values are well held; a late cable from Colombo advises an advance of a half-penny in Ceylon black.

Hides.—Receipts of calfskins are now fairly free, but former quotations continue. There was some talk of reducing quotations for sheepskins, on account of grubby conditions, but it was finally decided to maintain the figure at 75c. each. New lambskins are beginning to come in, and bring 10c. each. Beef hides are unchanged, at 8c. for No. 1, per pound.

Metals and Hardware.—Conditions in these lines are not materially altered. Merchants say their lives are made miserable through inability to get goods forward, and trying to pacify irate customers. In prices there are no changes of moment. Quotations in Summerlee pig-iron for spring delivery range about $20 for No. 1, and $19 for No. 2; Carnbroe, $17.50 to $17.75. Iron from the New Londonderry furnace is said to be showing good quality, and some few moderate sales are reported in this market at $19, but the bulk of this brand, it is calculated, will be sold in the Lower Provinces. Bars are being generally sold at $1.75. Plates and sheets are changing hands at unaltered figures. There is some scarcity of large sizes of tinned sheets used for cheese vats, maple sugar evaporators, etc. Ingot tin, lead and copper show no special variation. Sisal and Manilla cordage are advanced half a cent.

Oils, Paints and Glass.—Orders are not coming in so freely as last year at

An Unreasonable Request



An antiquated custom that of asking one's friends to go on your bond. Would you ask him to insure your house?

When required to furnish a bond of any nature, write to THE UNITED STATES FIDELITY & GUARANTY CO.

Kirkpatrick & Kennard, Managers for Canada, 6 Colborne St., Toronto.

this time, but prospects for spring trade are considered good, and it is thought any present deficiencies will be made up when travellers get moving around more freely. Turpentine continues to fluctuate considerably, and is at present down to 90½c. for single barrels. There is a slightly better feeling in linseed, though prices do not advance, and some more pronounced change is needed to stiffen quotations for mixed leads, which are still being sold at much cut-up rates. We quote: single bbls., raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 90½c., single barrels; olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gallon.; straw seal, 45 to 50 to 55c. per gallon; tinged and brown ditto, down to 35c.; castor oil, 7½ to 8c. for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.50; No. 1, $4.25; No. 2, $4; No. 3, $3.80 to $3.90; No. 4, $3.60; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4½c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in bbls., $1.90; ditto, in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75c.; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3 to $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, March 3, 1904.

Chemicals, Drugs, etc.—Camphor is still a very strong feature owing to the Japanese Government's action in Formosa, the main source of supply. Quinine, too, is very strongly held. Local trade is only moderate, and that in the country is interfered with owing to the state of the weather. Menthol is unchanged at former firm quotations.

Forging Ahead . . .
In Tendering to its Policyholders and Well Wishers
THE SEASON'S HEARTY GREETINGS
Head Office—Waterloo, Ont.
The Mutual Life OF CANADA
is pleased to announce that it has written during the past year
Over Five Millions
of good Canadian Business; and that in all other respects the Company has had a most successful year.

Dry Goods.—Wholesale dry goods houses have been extra busy this week owing to the numerous visitors in the city for the millinery openings. Considering the state of the weather, it is matter for surprise that so many people came. No further change has been made in prices, but they continue exceedingly strong, so far as cotton staples are concerned, and practically all other goods are firm also. Early in March is an important time in the dry goods trade for payments, and this year is likely to make but a poor showing. Not because trade is not good intrinsically, but merely that the blocked state of the roads and railways has prevented people from getting around. A quick change to reasonably spring-like weather would very likely lead to a rushing business.

Flour and Grain.—A firm market prevails for flour, $3.75 being the price quoted for ninety per cent. patents, in buyers' bags, middle freights. Both bran and shorts are firm. So also is oatmeal. Wheat continues unchanged as to prices, but the position is quite strong. Oats are 1c. higher. Rye has gone up 1c. Other grains remain the same. Little or no business is being done in the country.

Fruits and Vegetables.—Great difficulty is being experienced in moving stuff, so trade is rather dull. Prices may be quoted thus: Apples, 75c. to $2.75 per bbl., according to grade; cocoanuts, $4 per sack; oranges, Florida, $2.75 to $3 per case; California navels, $2 to $3; Mexican, $2 to $2.50; Valencias, ordinary, $4, large, 714's, $5; marmalade oranges, $2.50 per box; bananas, 8's, $1.25 to $1.50 per bunch; firsts, $2 to $2.50; celery, $5 to $5.50 per case and 75 to 90c. per doz.; cranberries, $8 to $9 per bbl., $1.10 to $1.25 per basket; Spanish onions, $3.50 to $3.75 per large case, and $1.25 for small; Malaga grapes, $6.50 to $7.50 per bbl.; tomatoes, $5 to $5.50 per case.

Hardware.—The only change which has taken place in prices since last report is in rope, which has gone up ½c. For some time past there has been a marked discrepancy between the value of rope and that of the raw material, which has advanced more than once, and now the manufacturers have placed their goods more on a parity. The business actually transacted during the last two or three months has been smaller considerably than last year, owing to the inconveniences of transportation, etc., but trade may be said to be nevertheless on a satisfactory footing. Metals are affected by causes similar to the above. As to the state of things in the iron trade in the United States, the situation can hardly be said to show any pronounced tendency. Pig iron is a little weaker, but that is not new. Finished products, on the other hand, are generally firm, and a larger volume of business is being done. The exceedingly severe weather of the past week has interfered considerably with manufacturing operations. Pig iron is weaker in the West and South. The Southern price, which had been held firmly for a time, has given way under the competition of Northern iron in common markets. This was to be expected. The price will probably decline a little further, when another buying movement may be expected, as there are plenty of customers waiting for an opportunity to get in again on a lower level. The light sheet trade is again disturbed by the cutting of some of the independent mills. It was supposed that a basis had been reached which would be satisfactory to all concerned, and that prices would be maintained, but it seems that this expectation was not well grounded.

Provisions—Considerable quantities of fair-quality dairy and creamery butter have come in during the week, but the demand is good. Stocks are accumulating, however, to some slight extent. Cheese is easy. The egg market continues very firm. Few poultry are coming forward, and there is a brisk demand for choice stock. A somewhat more active demand for hogs is setting in, as is often the case at this time of the year.

Seeds—Little business is being done locally in seeds. Prices are unchanged. Advices from London, Eng., on the other hand, report a general shortage of red clover seed, with sales at steadily advancing prices. In fact, English buyers admit that they will have to depend mainly upon foreign seed during the coming spring; and of these it is said there are good supplies already in the hands of the large importing houses, whch are being offered at very reasonable prices, which, it is thought will induce buyers to take hold pretty liberally as soon as they find out that there are scarcely any English reds to be had at any price.

Wool and Hides.—There is no change in the wool market, which continues very quiet, in the absence of further export demand. Pulled wools are in fair request from domestic mills. Hides are dull, and green have declined ½c. Sheepskins are in moderate request, while calfskins are steady.

The Molsons Bank.

97th DIVIDEND.

The Shareholders of The Molsons Bank are hereby notified that a dividend of FOUR AND ONE-HALF PER CENT. upon the Capital Stock has been declared for the current half-year, and that the same will be payable at the Office of the Bank, in Montreal, and at the Branches, on and after the

Second Day of April next.

The Transfer Books will be closed from the 17th to the 31st March, both days inclusive.

By order of the Board,

JAMES ELLIOT,
Montreal, 26th Feb., 1904. General Manager.

The Bank of British North America.

INCORPORATED BY ROYAL CHARTER.

The Court of Directors hereby give notice that a Dividend free of Income Tax of thirty shillings per share, will be paid on the 7th of April next, to the proprietors of shares registered in the Colonies, being at the rate of Six per Cent. per annum.

The dividend will be paid at the Rate of Exchange current on the 7th day of April, 1904, to be fixed by the Managers.

No transfers can be made between the 24th March and 7th April, as the books must be closed during that period.

By Order of the Court.

(Sgd). A. G. WALLIS, Secretary.

No. 5 Gracechurch Street, E. C.,
London, 8th March, 1904.

The Dominion Bank.

Notice is hereby given that a dividend of Two and One-half per Cent. upon the Capital Stock of this Institution has been declared for the current quarter—being at the rate of Ten per Cent. per Annum, and that the same will be payable at the Banking House in this city on and after

Saturday, the Second Day of April Next.

The Transfer Books will be closed from the 21st to the 31st March next, both days inclusive.

By order of the Board,

T. C. BROUGH,
Toronto, 23rd February, 1904. General Manager.
